## 1.0 Scope of Application

### The Pillar 3 Disclosure Framework

The Bank Negara Malaysia's ("BNM") Risk Weighted Capital Adequacy Framework - (Basel II) ("RWCAF") - Disclosure Requirements ("Pillar 3") is applicable to all banking institutions licensed under the Financial Services Act 2013 ("FSA"). The Pillar 3 disclosure requirements aim to enhance transparency on the risk management practices and capital adequacy of banking institutions.

The FSA have come into effect on 30 June 2013, providing for the regulation and supervision of financial institutions, payment systems and other relevant entities and the oversight of the money market and foreign exchange market, to promote financial stability and for related, consequential or incidental matters. The FSA have replaced the Banking and Financial Institutions Act 1989 ("BAFIA"). On 27 June 2013, BNM has issued the Capital Adequacy Framework (Basel II - Risk Weighted Assets) which provide the framework and guidelines on computation of risk weighted assets ("RWA"), replacing the previous Guidelines on Risk-Weighted Capital Adequacy Framework (Basel II - Risk Weighted Assets) issued on 19 April 2007.

### AmBank Group Pillar 3 Disclosure Policy

The banking entity at AmBank (M) Berhad Group level to which the RWCAF applies is AmBank (M) Berhad ("the Bank").

The Bank has provided explicit guarantee against the liabilities of its wholly owned Labuan offshore banking subsidiary, AmInternational (L) Ltd. ("AMIL"), a Labuan company licensed under the Labuan Financial Services and Securities Act to carry out Labuan banking business. In accordance with the RWCAF, the capital position and RWA of the Bank refers to the combined capital base and RWA of the Bank and AMIL.

The Pillar 3 information has been provided in order to highlight the capital adequacy of the Group and the Bank. The information provided has been verified by the Group internal auditors and certified by the Chief Executive Officer.

### Frequency of Disclosure

Full disclosure requirements under the BNM guidelines are made on an annual and semi-annual basis except for disclosures under paragraph 10.1 of the guidelines and all qualitative disclosures which are made on an annual basis if there are no material changes in the interim reporting periods.

### Medium and Location of Disclosure

These Pillar 3 disclosures of the Group together with the individual Pillar 3 disclosures of the Group and the Bank are available on the Group's corporate website at [www.ambankgroup.com](http://www.ambankgroup.com).

### Capital Adequacy Ratios

BNM guidelines on capital adequacy require regulated banking subsidiaries to maintain an adequate level of capital to withstand any losses which may result from credit and other risks associated with financing operations. Each of these entities is independently held by AMMB as a regulated banking institution - there are no cross-shareholdings within or between these entities.

With effect from 1 January 2013, the capital adequacy ratios are computed in accordance to BNM's guidelines on Capital Adequacy Framework (Capital Components) issued by the Prudential Financial Policy Department on 28 November 2012, which is based on the Basel III capital accord. Prior to that, the capital adequacy ratios of the Bank and its Group were computed in accordance to BNM's Risk Weighted Capital Adequacy Framework (General Requirements and Capital Components) (as applicable), which is based on the Basel II capital accord. The Bank has adopted the Standardised Approach for Credit and Market Risks and the Basic Indicator Approach for Operational Risk, based on BNM's Guidelines on Capital Adequacy Framework (Basel II - Risk Weighted Assets).

## 1.0 Scope of Application (Contd.)

### Capital Adequacy Ratios (contd.)

The minimum regulatory capital adequacy requirements for the risk weighted capital ratios are as follows:

Calendar year	Common Equity Tier 1 ("CET 1") Capital ratio	Tier 1 Capital ratio	Total Capital ratio
2013	3.5%	4.5%	8.0%
2014	4.0%	5.5%	8.0%
2015	4.5%	6.0%	8.0%

The minimum regulatory capital adequacy requirements as stipulated in the above table have not factored in capital buffers that will be introduced in calendar year 2016 onwards.

## 1.1 Basis of Consolidation

For statutory accounting purposes, the consolidated financial statements of the Bank comprise the financial statements of the Bank and the financial statements of all its controlled entities (individually referred to as "group entities") where it is determined that there is a capacity to control. An investor controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

For purposes of this Pillar 3 Disclosures, the consolidation basis used is the same as that used for regulatory capital adequacy purposes. The following table shows the differences between the scope of statutory and regulatory consolidation.

Type of entity	Accounting treatment	
	Statutory reporting	Basel III regulatory reporting
Subsidiaries licensed under FSA or engaged in financial activities	Fully consolidated	Deducted from capital at the banking subsidiary entity level; Fully consolidated in the calculation of capital adequacy at the banking subsidiary consolidated level.
Subsidiaries engaged in non-financial activities	Fully consolidated	Risk weighted at the banking subsidiary entity level; Consolidated in calculation of capital adequacy at the banking subsidiary consolidated level.
Associates which are licensed under FSA or engaged in financial activities	Equity accounted	Deducted in calculation of capital.
Associates which are not licensed under FSA or engaged in financial activities	Equity accounted	Reported as investment and risk weighted.

Apart from regulatory requirements and statutory constraints, there is no current or foreseen material, practical or legal impediments to the transfer of funds or regulatory capital within the Group.

Any such transfers would require the approval of the Board of Directors ("Board"), as well as the concurrence of BNM.

## 2.0 Capital Management

The capital and risk management of the banking subsidiaries of AMMB Holdings Berhad (“AMMB”) are managed collectively at Group level. The Group’s capital management approach is driven by its desire to maintain a strong capital base to support the development of its businesses, to meet regulatory capital requirements at all times and to maintain good credit ratings.

Strategic, business and capital plans are drawn up annually covering a 3 year horizon and approved by the Board. The capital plan ensures that adequate levels of capital and an optimum mix of the different components of capital are maintained by the Group to support its strategy.

The capital plan takes the following into account:

- (a) Regulatory capital requirements:
  - forecast demand for capital to support the credit ratings; and
  - increases in demand for capital due to business growth and market shocks.
- (b) Or stresses:
  - available supply of capital and capital raising options; and
  - internal controls and governance for managing the Group’s risk, performance and capital.

The Group uses internal models and other quantitative techniques in its internal risk and capital assessment. The models help to estimate potential future losses arising from credit, market and other risks, and using regulatory formulae to simulate the amount of capital required to support them. In addition, the models enable the Group to gain a deeper understanding of its risk profile, e.g, by identifying potential concentrations, assessing the impact of portfolio management actions and performing what-if analysis.

Stress testing and scenario analysis are used to ensure that the Group’s internal capital assessment considers the impact of extreme but plausible scenarios on its risk profile and capital position. They provide an insight into the potential impact of significant adverse events on the Group and how these events could be mitigated. The Group’s target capital levels are set taking into account its risk appetite and its risk profile under future expected and stressed economic scenarios.

The Group’s assessment of risk appetite is closely integrated with the Group’s strategy, business planning and capital assessment processes, and is used to inform senior management’s views on the level of capital required to support the Group’s business activities.

The Group uses a capital model to assess the capital demand for material risks, and support its internal capital adequacy assessment. Each material risk is assessed, relevant mitigants considered, and appropriate levels of capital determined. The capital modelling process is a key part of the Group’s management disciplines.

The capital that the Group is required to hold is determined by its balance sheet, off balance sheet, counterparty and other risk exposures after applying collateral and other mitigants, based on the Group’s risk rating methodologies and systems. We discuss these outcomes with BNM on a regular basis as part of our normal regulatory liaison activities. BNM has the right to impose further capital requirements on Malaysian Financial Institutions via its Financial Market Supervision remit.

The Group operates processes and controls to monitor and manage capital adequacy across the organisation. Where we operate in other jurisdictions, capital is maintained on the basis of the local regulator’s requirements. It is overseen by the Group Chief Executive Officers Committee (“Group CEOs Committee”). The Group CEOs Committee is also responsible for managing the Group’s statement of financial position, capital and liquidity.

A strong governance and process framework is embedded in the capital planning and assessment methodology. Overall responsibility for the effective management of risk rests with the Board. The Risk Management Committee of Directors (“RMCD”) is specifically delegated the task of reviewing all risk management issues including oversight of the Group’s capital position and any actions impacting the capital levels. The Audit and Examination Committee (“AEC”) reviews specific risk areas and the issues discussed at the key capital management committees.

## 2.0 Capital Management (Contd.)

Group CEOs Committee proposes internal triggers and target ranges for capital management and operationally oversees adherence with these. For the current financial year ended 31 March 2015 ("FY 2015"), these ranges are 8.0% to 10.0% for the CET 1 Capital ratio, 9.5% to 11.5% for the Tier 1 Capital ratio and 14.0% to 16.0% for the Total Capital ratio. The Group has been operating within these ranges.

A dedicated team, the Capital and Balance Sheet Management Department, is responsible for the ongoing assessment of the demand for capital and the updating of the Group's capital plan.

Appropriate policies are also in place governing the transfer of capital within the Group. These ensure that capital is remitted as appropriate, subject to complying with regulatory requirements and statutory and contractual restrictions.

There are no current material, practical or legal impediments to the prompt transfer of capital resources in excess of those required for regulatory purposes or repayment of liabilities between the holding company, AMMB, and its group entities when due.

**Table 2.1: Capital Adequacy Ratio**

(a) The capital adequacy ratios of the Group and the Bank are as follows.

	Group		Bank	
	30 September 2014	31 March 2014	30 September 2014	31 March 2014
<b>Before deducting proposed dividends:</b>				
CET 1 Capital	10.819%	9.864%	10.453%	9.453%
Tier 1 Capital ratio	12.882%	11.832%	12.513%	11.418%
Total Capital ratio	16.891%	15.711%	16.480%	14.916%
<b>After deducting proposed dividends:</b>				
CET 1 Capital	10.271%	9.557%	9.905%	9.146%
Tier 1 Capital ratio	12.333%	11.525%	11.965%	11.112%
Total Capital ratio	16.342%	15.404%	15.932%	14.609%

Notes:

The capital position and RWA of the Bank refers to the combined capital base and RWA of the Bank and its wholly-owned offshore banking subsidiary company, AMIL.

## 2.0 Capital Management (Contd.)

**Table 2.1: Capital Adequacy Ratio (contd.)**

(b) The capital adequacy ratios of AMIL are follows:

	AMIL	
	30 September 2014	31 March 2014
Core capital ratio	92.060%	86.773%
Risk weighted capital ratio	92.320%	87.019%

The capital adequacy ratios of AMIL for capital compliance on a standalone basis as reported by the subsidiary are computed in accordance with the BNM guidelines of RWCAF based on the Basel II capital accord.

On 28 December 2012, as part of an arrangement between the Bank and Amlslamic Bank Berhad ("Amlslamic") in relation to a Restricted Profit Sharing Investment Account ("RPSIA") agreement, the Bank records as "deposits and placements with banks and other financial institutions" its exposure in the arrangement, whereas Amlslamic records its exposure as "financing and advances". The RPSIA is a contract based on Shariah concept of Mudharabah between the Bank and Amlslamic to finance a specific business venture where the Bank solely provides capital and the business ventures are managed solely by Amlslamic as the entrepreneur. The RPSIA exposes the Bank to the risks and rewards of the financing, and accordingly the Bank accounts for all impairment allowances and risk-weighted assets arising from the RPSIA financing.

Upon expiry of the RPSIA contract on 2 May 2014, the Bank derecognised the collective allowance. Accordingly, Amlslamic now accounts for the collective allowance in its financial statements. The gross exposure and collective allowance relating to the RPSIA financing as at 31 March 2014 are RM450.1 million and RM2.5 million. There was no individual allowance provided for the RPSIA financing. RPSIA assets excluded from the risk-weighted capital adequacy computation of Amlslamic for 31 March 2014 amounted to RM450.1 million and the risk-weight on these RPSIA assets were accounted for in the computation of capital adequacy of the Bank.

**Table 2.2 : Risk-Weighted Assets and Capital Requirements**

The breakdown of risk weighted assets ("RWA") by exposures in major risk category of the Group is as follows:

30 September 2014					
Exposure class	Gross exposures/ Exposure at default ("EAD") before credit risk mitigation ("CRM")		Net exposures/ EAD after CRM	Risk weighted assets	Minimum capital requirement at 8%
	RM'000		RM'000	RM'000	RM'000
<b>1. Credit risk</b>					
<b>On balance sheet exposures</b>					
Sovereigns/Central banks	6,622,935		6,608,191	-	-
Banks, development financial institutions ("DFIs") and multilateral development banks ("MDBs")	6,578,211		6,578,211	1,352,597	108,208

<b>5. Total RWA and capital requirements</b>				<b>70,525,501</b>	<b>5,642,041</b>

The Group does not have Profit-Sharing Investment Account ("PSIA") that qualifies as a risk absorbent.

### 3.0 Capital Structure

Table 3.3 Capital Structure summarises the consolidated capital position of the Group and the Bank. The capital structure of the Group and the Bank includes capital under the following headings:

- CET 1 Capital;
- Additional Tier 1 Capital; and
- Tier 2 Capital.

All capital instruments included in the capital base have been issued in accordance with the BNM rules and guidelines. The Additional Tier 1 and Tier 2 Capital instruments of the Group and the Bank that were issued prior to 2013 do not meet all qualifying criteria for full recognition of capital instruments under the Basel III accord, on the requirements for loss absorbency at the point of non-viability, and write-off or conversion mechanisms for achieving principal loss absorption and/or loss absorbency at the point of non-viability. These Additional Tier 1 and Tier 2 Capital instruments qualify for the gradual phase-out treatment under the transitional arrangements of the Basel III accord. Under this treatment, the amount of capital instruments that can be recognised for the Group and the Bank shall be capped at 90% of the base in 2013 (as counted separately for Additional Tier 1 Capital and Tier 2 Capital respectively), with the cap reducing by 10% in each subsequent year. To the extent that an instrument is redeemed or derecognised after 1 January 2013, the amount serving as the base is not reduced.

### 3.1 CET 1 Capital

CET 1 Capital consists of the following:

#### **Paid-up Ordinary Share Capital**

Paid-up ordinary share capital is an item of capital issued by an entity to an investor, which is fully paid-up and where the proceeds of issue are immediately and fully available. There is no obligation to pay a coupon or dividend to the equity holder of ordinary shares. The capital is available for unrestricted and immediate use to cover risks and losses, and enable the Bank to continue trading. It can only be redeemed on the winding up of the Bank.

#### **Share Premium**

Share premium is used to record premium arising from new shares issued by the Bank.

#### **Retained Earnings**

Retained earnings at the end of the financial year and eligible reserves are accumulated resources included in the shareholders' funds in an entity's statement of financial position, with certain regulatory adjustments applied. The retained earnings is included in CET 1 Capital net of any interim and/or final dividend declared, and net of any interim losses. Quarterly interim profits have been included in CET 1 Capital subject to review/audit by the external auditors.

#### **Other Disclosed Reserves**

Other disclosed reserves comprise the following:

- **Statutory Reserve**  
Statutory reserve is maintained in compliance with Section 47(2) f of the FSA and is not distributable as cash dividends.
- **Merger Reserve**  
The merger reserve represent reserves arising from the transfer of subsidiaries pursuant to schemes of arrangement under group restructuring and was accounted for using the merger accounting method.

### 3.1 CET 1 Capital (Contd.)

#### Other Disclosed Reserves (contd.)

- **Foreign Currency Translation Reserve**

Foreign currency translation reserve is used to record exchange differences arising from the translation of the financial statement of foreign operations, whose functional currencies are different from that of the Group's presentation currency.

- **Available-for-Sale Reserve**

This comprises the unrealised fair value gains and losses on financial investments available-for-sale. Where the available-for-sale reserve is a net gain outstanding balance, the Bank can recognise 45% of the total outstanding balance as part of CET 1 Capital. Where the available-for-sale reserve is a net loss outstanding balance, the entire outstanding balance is deducted in CET 1 Capital.

- **Cash Flow Hedging Reserve**

Cash flow hedging reserve relates to the amount of the hedging of the items that are not fair valued in the statement of financial position (including projected cash flows). The amount of the cash flow hedging reserve is derecognised in the calculation of CET 1 Capital.

### 3.2 Additional Tier 1 Capital

The amount of Additional Tier 1 Capital that can be recognised in the computation of the capital adequacy ratios of the Group and the Bank for 2013, has been capped at 90% of the total qualifying Additional Tier 1 Capital balance outstanding as at 1 January 2013. For 2014, the amount of Additional Tier 1 Capital that can be recognised in the computation of the capital adequacy ratios are capped at 80% of the total qualifying Additional Tier 1 Capital balance outstanding as at 1 January 2013. This is in accordance to the transitional gradual phase-out treatment under the Basel III regime. Table 3.1 outlines the application of the grandfathering provisions in respect of the Additional Tier 1 Capital Instruments of the Group and the Bank. Details of the Additional Tier 1 Capital Instruments are outlined below.

**Table 3.1: Additional Tier 1 Capital Instruments of the Group and the Bank and the Basel III Gradual Phase-Out Treatment**

#### Base for Additional Tier 1 Capital Instruments outstanding on 1 January 2013

Instruments	RM'000
Non-cumulative Non-voting Guaranteed Preference Shares	750,100
Innovative Tier 1 Capital - Tranche 1	300,000
Innovative Tier 1 Capital - Tranche 2	185,000
Non-Innovative Tier 1 Capital - Tranche 1	200,000
Non-Innovative Tier 1 Capital - Tranche 2	300,000
<b>Total qualifying base</b>	<b>1,735,100</b>

Calendar year	Cap on Additional Tier 1 Capital Instruments that can be recognised in capital adequacy computation each year	
	Cap (%)	Cap (RM'000)
2013	90%	1,561,590
2014	80%	1,388,080
2015	70%	1,214,570
2016	60%	1,041,060
2017	50%	867,550
2018	40%	694,040
2019	30%	520,530
2020	20%	347,020
2021	10%	173,510
2022	0%	-

### 3.2 Additional Tier 1 Capital (Contd.)

#### Innovative Tier 1 Capital

Innovative Tier 1 Capital comprises deeply subordinated debt instruments which despite their legal form, have loss absorbency qualities and can therefore be included as Tier 1 Capital. The Innovative Tier 1 securities in issue and their primary terms are as follows:

##### (a) Non-cumulative Non-voting Guaranteed Preference Shares

On 27 January 2006, AMBB Capital (L) Ltd, a wholly-owned subsidiary of the Bank issued United States Dollar ("USD") 200,000,000 Innovative Hybrid Tier 1 Capital comprising 2,000 preference shares of USD100,000 each ("Hybrid Securities"). The Hybrid Securities are subordinated and guaranteed by the Bank. The gross proceeds from the issuance was on-lent to the Bank in the form of a subordinated term loan on 27 January 2006 for the purpose of supplementing the Bank's working capital requirements.

The salient features of the Hybrid Securities are as follows:

- (i) The Hybrid Securities bear non-cumulative dividends from the issue date to (but excluding) 27 January 2016 at 6.77% per annum and thereafter, a floating rate per annum equal to three (3) month US dollar LIBOR plus 2.90%, if not redeemed on 27 January 2016. The non-cumulative dividends are payable on a semi-annual basis.
- (ii) The Hybrid Securities are perpetual securities and have no fixed final redemption date. The Hybrid Securities may be redeemed in whole but not in part at the option of the issuer (but not the holders) in certain circumstances. In each case, not less than 30 nor more than 60 days' notice (which notice shall be irrevocable) must be given.

The Hybrid Securities are listed on both the Labuan International Financial Exchange Inc. and the Singapore Exchange Securities Trading Limited and are offered to international institutional investors outside Malaysia.

##### (b) Innovative Tier 1 Capital Securities

On 18 August 2009, the Bank issued up to RM485 million Innovative Tier I Capital Securities under its RM500 million Innovative Tier I Capital Securities ("ITICS") Programme. The ITICS bear a fixed interest (non-cumulative) rate at issuance date (interest rate is 8.25% per annum) and step up 100 basis points after the First Call Date (10 years after issuance date) and interest is payable semi annually in arrears. The maturity date is 30 years from the issue date. The ITICS facility is for a tenor of 60 years from the first issue date and has a principal stock settlement mechanism to redeem the ITICS via cash through the issuance of the Bank's ordinary shares. Upon BNM's approval, the Bank may redeem in whole but not in part the relevant tranche of the ITICS at any time on the 10th anniversary of the issue date of that tranche or on any interest payment date thereafter.

### 3.2 Additional Tier 1 Capital (Contd.)

#### Non-innovative Tier 1 Capital

In the financial year 2009, the Bank issued RM500 million Non-Innovative Tier 1 Capital ("NIT1") in nominal value comprising:

- Non-Cumulative Perpetual Capital Securities ("NCPCS"), which are issued by the Bank and stapled to the Subordinated Notes described below; and
- Subordinated Notes ("SubNotes"), which are issued by AmPremier Capital Berhad ("AmPremier"), a wholly-owned subsidiary of the Bank (collectively known as "Stapled Capital Securities").

The proceeds from the NIT1 programme were used as working capital. The Stapled Capital Securities cannot be traded separately until the occurrence of certain assignment events. Upon occurrence of an assignment event, the Stapled Capital Securities will "unstaple", leaving the investors to hold only the NCPCS while ownership of the SubNotes will be assigned to the Bank pursuant to the forward purchase contract entered into by the Bank unless there is an earlier occurrence of any other events stated under the terms of the Stapled Capital Securities. If none of the assignment events as stipulated under the terms of the Stapled Capital Securities occur, the Stapled Capital Securities will unstaple on the 20th interest payment date or 10 years from the issuance date of the SubNotes.

The SubNotes have a fixed interest rate of 9.0% per annum. However, the NCPCS distribution will not begin to accrue until the SubNotes are re-assigned to the Bank as referred to above.

The NCPCS are issued in perpetuity unless redeemed under the terms of the NCPCS. The NCPCS are redeemable at the option of the Bank on the 20th interest payment date or 10 years from the issuance date of the SubNotes, or any NCPCS distribution date thereafter, subject to redemption conditions being satisfied. The SubNotes have a tenure of 30 years unless redeemed earlier under the terms of the SubNotes. The SubNotes are redeemable at the option of AmPremier on any interest payment date, which cannot be earlier than the occurrence of assignment events as stipulated under the terms of the Stapled Capital Securities.

The Stapled Capital Securities comply with BNM's Guidelines on Non-Innovative Tier 1 capital instruments. They constitute unsecured and subordinated obligations of the Bank. Claims in respect of the NCPCS rank pari passu and without preference among themselves and with the most junior class of preference shares of the Bank but in priority to the rights and claims of the ordinary shareholders of the Bank. The SubNotes rank pari passu and without preference among themselves and with the most junior class of notes or preference shares of AmPremier.

### 3.3 Tier 2 Capital

The main components of Tier 2 Capital are collective allowance and regulatory reserves (subject to a maximum of 1.25% of total credit risk-weighted assets determined under the Standardised Approach) and subordinated debt instruments.

The amount of Tier 2 Capital issued prior to 2013 that can be recognised in the computation of the capital adequacy ratios of the Group and the Bank for 2013, has been capped at 90% of the total qualifying Tier 2 Capital balance outstanding as at 1 January 2013. For 2014, the amount of such Tier 2 Capital that can be recognised in the computation of the capital adequacy ratios is capped at 80% per cent of the total qualifying Tier 2 Capital balance outstanding as at 1 January 2013. This is in accordance to the transitional gradual phase-out treatment under the Basel III regime. Table 3.2 outlines the application of the grandfathering provisions in respect of the Tier 2 Capital Instruments for the Group and the Bank. Details of the Tier 2 Capital Instruments are outlined below.

**Table 3.2: Tier 2 Capital Instruments of the Group and the Bank and the Basel III Gradual Phase-Out Treatment**

**Base for Tier 2 Capital Instruments outstanding on 1 January 2013**

Instruments	RM'000
Medium Term Notes ("MTN") - Tranche 1	200,000
MTN - Tranche 2	165,000
MTN - Tranche 3	75,000
MTN - Tranche 4	45,000
MTN - Tranche 5	75,000
MTN - Tranche 6	600,000
MTN - Tranche 7	97,800
MTN - Tranche 8	710,000
<b>Total qualifying base</b>	<b>1,967,800</b>

Calendar year	Cap on Tier 2 Capital Instruments that can be recognised in capital adequacy computation each year	
	Cap (%)	Cap (RM'000)
2013	90%	1,771,020
2014	80%	1,574,240
2015	70%	1,377,460
2016	60%	1,180,680
2017	50%	983,900
2018	40%	787,120
2019	30%	590,340
2020	20%	393,560
2021	10%	196,780
2022	0%	-

#### Medium Term Notes

In the financial year 2008, the Bank implemented a RM2.0 billion nominal value MTN Programme whereby the proceeds raised from the MTN Programme had been and will be utilised for the refinancing of existing subordinated debts and for general working capital requirements.

The MTN Programme has a tenor of up to 20 years from the date of the first issuance under the MTN Programme. The MTNs shall be issued for a maturity of up to 20 years as the Issuer may select at the point of issuance provided that no MTN shall mature after expiration of the MTN Programme.

The MTNs issued under the MTN Programme was included as Tier 2 Capital under BNM's capital adequacy framework. Effective 1 January 2013, the MTNs are eligible for gradual phase-out treatment under the transitional arrangement of the Basel III accord, for recognition as Tier 2 Capital for capital adequacy calculation.

### 3.3 Tier 2 Capital (Contd.)

#### Medium Term Notes (Contd.)

The salient features of the MTNs issued and outstanding are as follows:

- (i) Tranche 3 amounting to RM75 million was issued on 14 March 2008 is for a tenor of 12 years Non-Callable 7 years and bears interest at 5.4% per annum.
- (ii) Tranche 5 amounting to RM75 million was issued on 28 March 2008 is for a tenor of 12 years Non-Callable 7 years and bears interest at 5.4% per annum.
- (iii) Tranche 6 amounting to RM600 million was issued on 9 April 2008 is for a tenor of 15 years Non-Callable 10 years and bears interest at 6.25% per annum.
- (iv) Tranche 7 amounting to RM97.8 million was issued on 10 December 2009 is for a tenor of 10 years Non-Callable 5 years and bears interest at 5.75% per annum.
- (v) Tranche 8 amounting to RM710 million was issued on 16 October 2012 is for a tenor of 10 years Non-Callable 5 years and bears interest at 4.45% per annum.

The interest rate of the MTN will step up by 0.5% per annum as follows:

- (i) Tranche 3 – at the beginning of the 8th year
- (ii) Tranche 5 – at the beginning of the 8th year
- (iii) Tranche 6 – at the beginning of the 11th year
- (iv) Tranche 7 – at the beginning of the 6th year

and every anniversary thereafter, preceding the maturity date of the MTN. The step up feature does not apply to Tranche 8.

Total MTN outstanding in issuance has amounted to RM1,557.8 million (31 March 2014: RM1,557.8 million).

#### Basel III Subordinated Notes

On 30 December 2013, the Bank established a new Subordinated Notes programme of RM4.0 billion. The objective of the programme is to enable the issuance of Tier 2 Capital from time to time, for the purpose of enhancing the Bank's total capital position. The programme is set up in accordance to the requirements spelt out in the Capital Adequacy Framework (Capital Components) issued by BNM, and the securities issued under this programme are fully Basel III compliant.

The programme has a tenor of thirty (30) years from the date of the first issuance under the programme. Each issuance of Tier 2 Subordinated Notes under this programme shall have a tenor of at least five (5) years from the issue date, and is callable on any coupon payment date after a minimum period of five (5) years from the date of issuance of each tranche. The Tier 2 Subordinated Notes have been assigned a credit rating of AA3 by RAM Rating Services Berhad ("RAM").

On 30 December 2013, the Bank issued the first tranche of Tier 2 Subordinated Notes under the programme, of RM400.0 million. The interest rate of this tranche is at 5.20%, payable on a half-yearly basis. The full amount issued qualified for recognition of capital adequacy ratio computation.

**Table 3.3: Capital Structure**

The components of CET 1, Additional Tier 1, Tier 2, and Total Capital of the Group and the Bank are as follows:

	Group		Bank	
	30 September 2014 RM'000	31 March 2014 RM'000	30 September 2014 RM'000	31 March 2014 RM'000

#### **4.0 General Risk Management**

The Risk Management Framework takes its lead from the Board's Approved Risk Appetite Framework which provides the catalyst to setting the risk/reward profile required by the Board, together with the related business strategies, limit framework and policies required to enable successful execution.

The Risk Appetite Framework is approved annually by the Board taking into account the Group's desired external rating and targeted profitability/return on equity ("ROE") and is reviewed periodically throughout the financial year by both the executive management and the Board to consider any fine tuning/amendments taking into account prevailing or expected changes to the operational environment.

The Risk Appetite Framework provides portfolio parameters for Credit Risk, Traded Market Risk, Non-Traded Market Risk and Operational Risk incorporating, inter alia, limit structures for countries, industries, single counterparty, value at risk, earnings at risk, stop loss, stable funding ratio and liquidity. Each Business Unit has asset writing strategies which tie into the overall Risk Appetite Framework providing detailed strategies of how the Business Units will execute their business plans in compliance with the Risk Appetite Framework.

##### **Board Approved Risk Appetite Statement**

The Group strategic goals are to sustain the top quartile ROE, and to maintain the credit rating of BBB+ or better (from international rating agencies) for the next one to two years. This is supported by sustainable asset quality and continued portfolio diversification within retail and non-retail, with greater contribution from non-interest income, complemented by robust management of liquidity, disciplined execution of interest rate risk/rate of return risk in the balance sheet, and with support from strong level of capital.

The Group intends to maintain sufficient quantity and quality of capital in excess of Basel III requirement for CET 1 Capital, Tier 1 Capital, and Total Capital. Our capital requirements are robustly tested over a three year period.

We enforce conservative approach to liquidity management, maintaining stable and diversified funding base consistent with Basel III liquidity matrix (Net Stable Funds Ratio, and Liquidity Coverage Ratios). Our targeted Adjusted Loan Deposit Ratio is within 90% range with continually improving current account and savings account ("CASA") deposit composition and market share.

The Group manages Operational Risk by setting the operational risk appetite statements and measurements that the Group is willing to tolerate to support its business strategies and objectives. The Group manages its reputational risk by not engaging in any activity that has potential to result in a material event or loss that would be outside the expectations of its stakeholders. The Group also manages its regulatory compliance risk by setting positive compliance culture and ensuring that the letter and spirit of regulatory requirements, applicable laws, rules, and standards in the respective jurisdictions are complied with.

The Group manages Shariah risk by ensuring that its operations, business, affairs and activities are in compliance with rulings of the BNM's Shariah Advisory Council (SAC) and the bank's Shariah Committee.

The Group manages trading activities by instituting appropriate governance, culture, and controls to promote acceptable trading behaviour.

##### **Risk Management Governance**

The Board is ultimately responsible for the management of risks within the Group. The Risk Management Committee of Directors is formed to assist the Board in discharging its duties in overseeing the overall management of all risks covering market risk management, liquidity risk management, credit risk management and operational risk management.

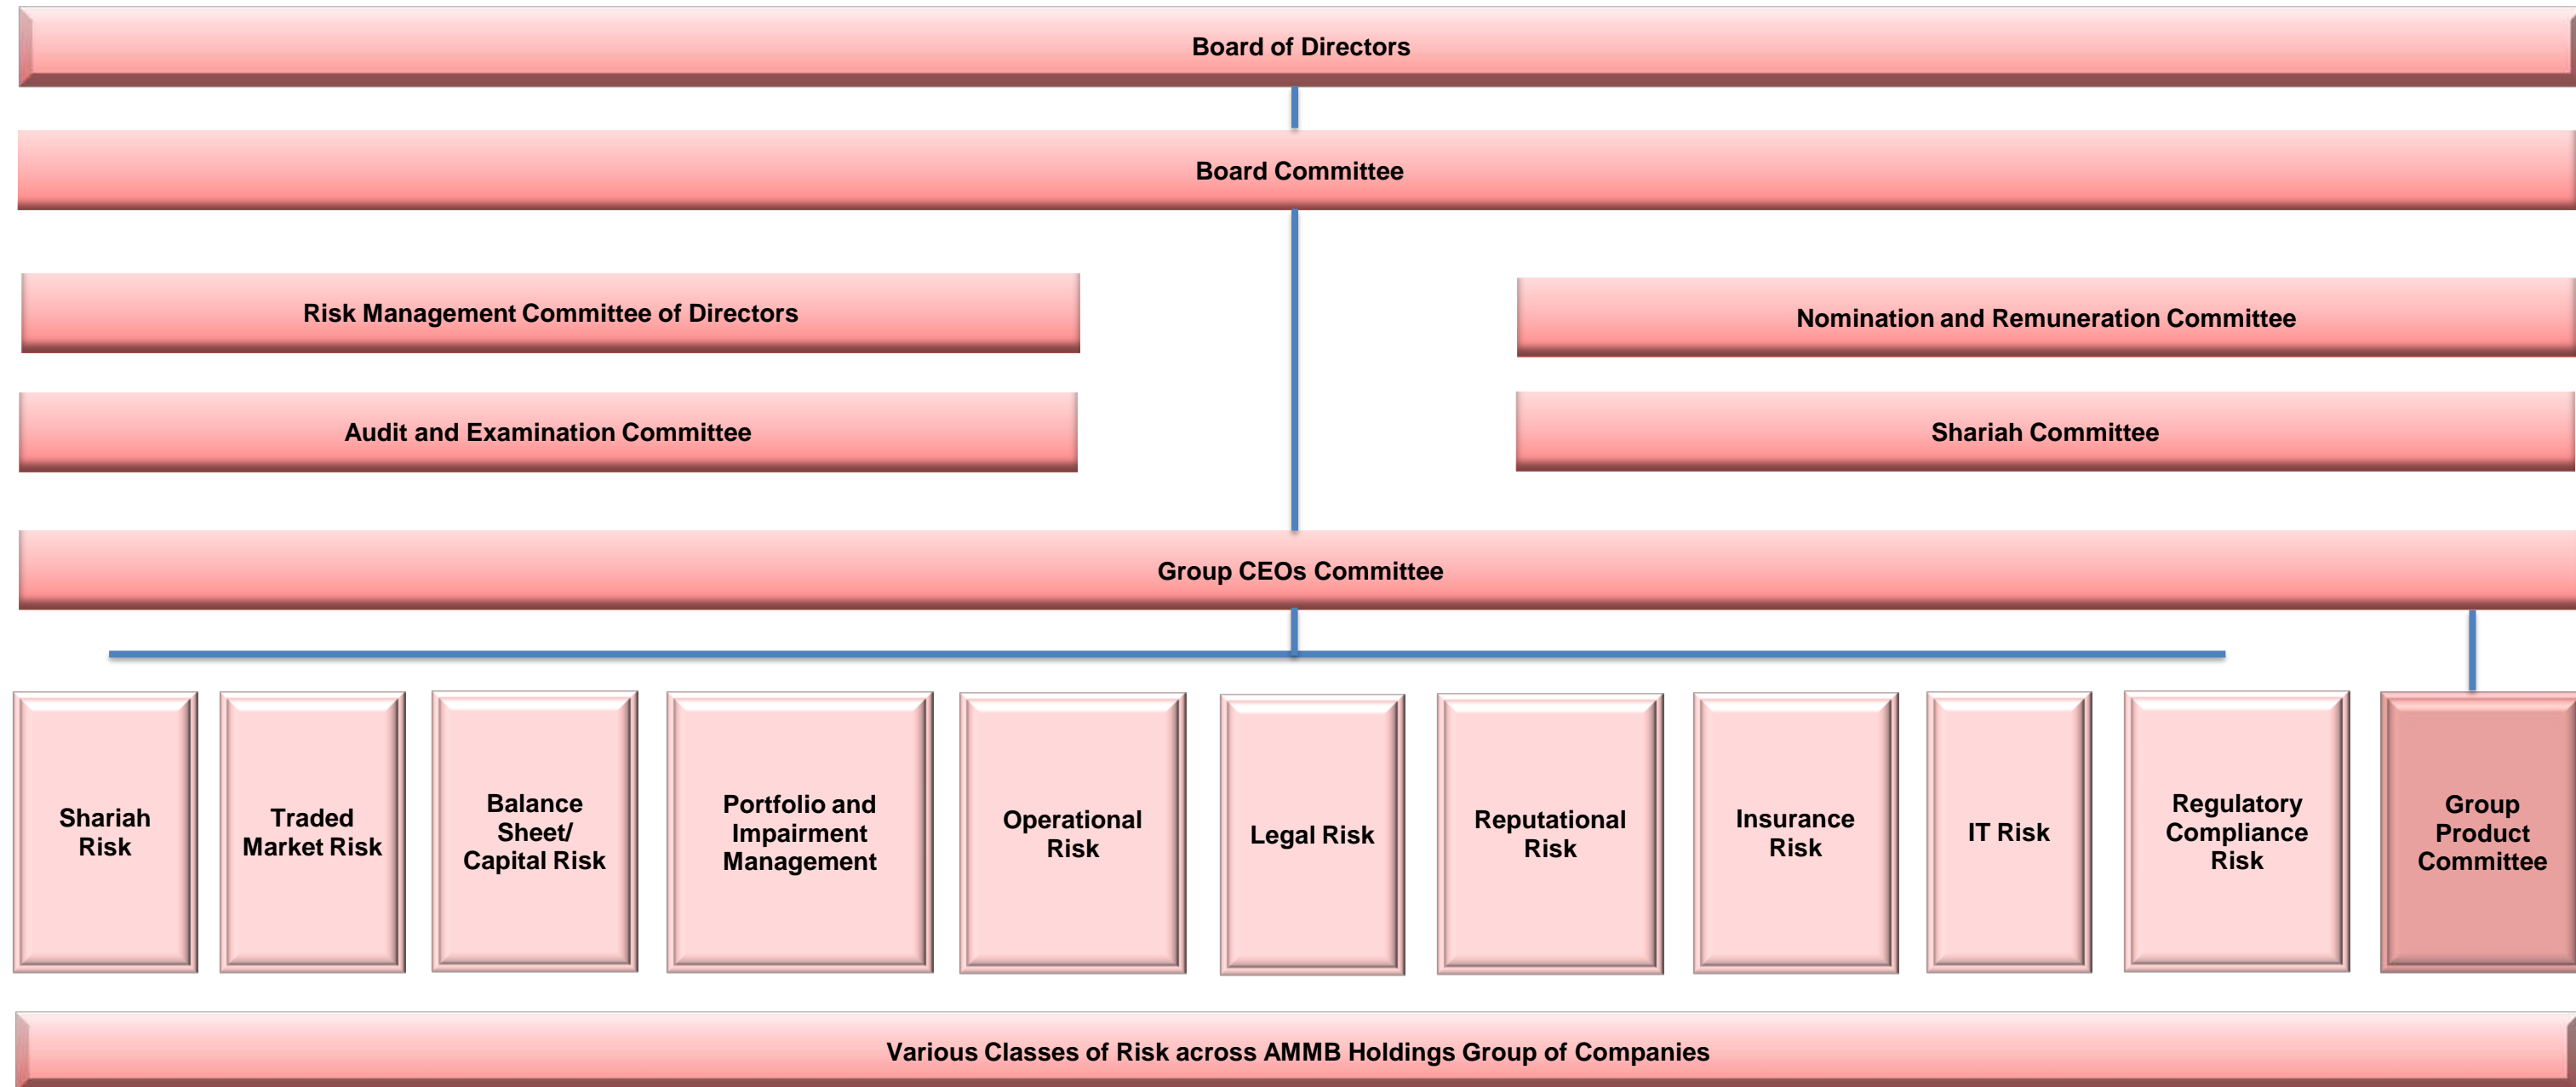

The Board has also established the Group CEOs Committee to assist it in managing the risks and businesses of the Group. The committee addresses all classes of risk within its Board delegated mandate: balance sheet risk, credit risk, legal risk, operational risk, market risk, Shariah risk, compliance risk, reputational risk, product risk and business and IT project risk.

In July 2013, the Group Product Committee ("GPC") was re-established as a sub-committee of the Group CEOs Committee. The GPC is to oversee activities in managing products for the Group; and to advise and report to the Group CEOs Committee on product related matters.

**4.0 General Risk Management (Contd.)**

Risk Management Governance (Contd.)

The following chart sets out the organisational structure of the Group CEOs Committee and an overview of the Group CEOs Committee's roles and responsibilities.

#### 4.0 General Risk Management (chart)

##### Risk Management Governance (Contd.)

###### Strategic Risk

Strategic risk is the risk of not achieving the Group's corporate strategic goals. The Group's overall strategic planning reflects the Group's vision and mission, taking into consideration the Group's internal capabilities and external factors.

The Board is actively involved in setting of strategic goals, and is regularly updated on matters affecting corporate strategy implementation and corporate projects/initiatives.

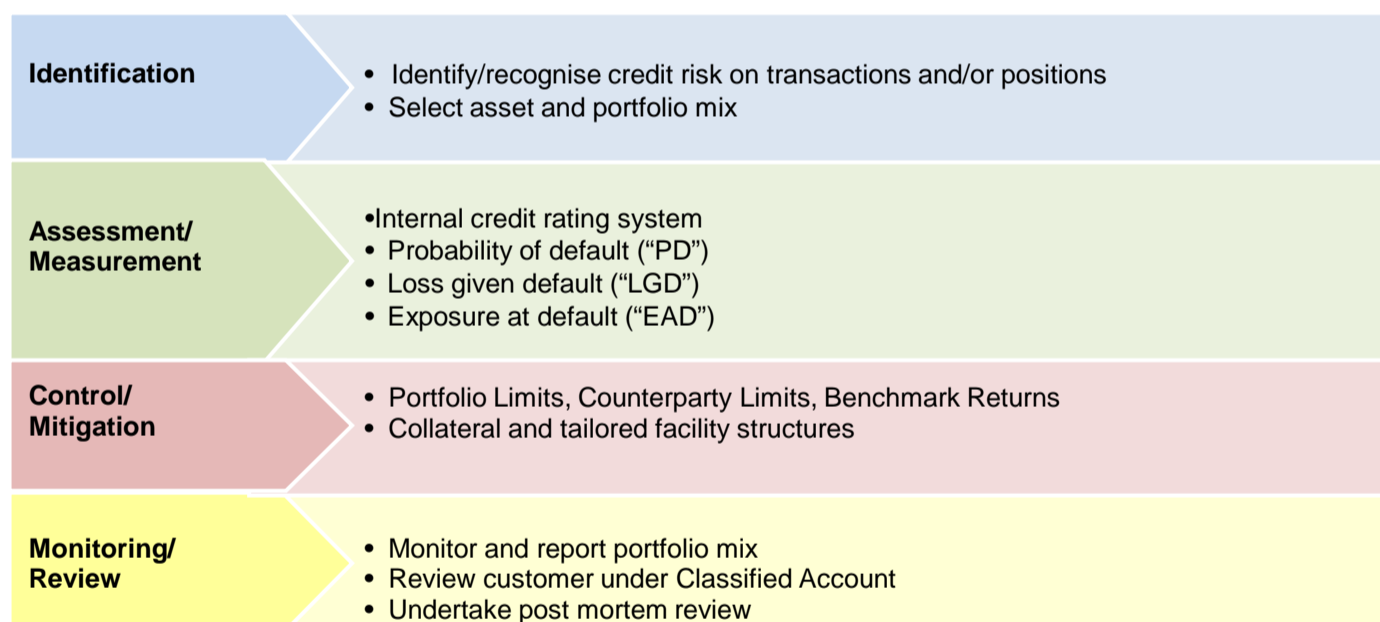

###### Reputational Risk

The Group recognises that maintaining its reputation among clients, investors, regulators and the general public is an important aspect of minimizing legal and operational risk. Maintaining our reputation depends on a large number of factors, including the selection of our clients and business partners and the conduct of our business activities.

The Group seeks to maintain its reputation by screening potential clients and business partners and by conducting our business activities in accordance with high ethical standards and regulatory requirements.

#### 5.0 Credit Risk Management

The credit risk management process is depicted in the table below:

Credit risk is the risk of loss due to the inability or unwillingness of a counterparty to meet its payment obligations. Exposure to credit risk arises from lending, securities and derivative exposures. The identification of credit risk is done by assessing the potential impact of internal and external factors on the Groups transactions and/or positions.

The primary objective of credit risk management is to maintain accurate risk recognition - identification and measurement, to ensure that credit risk exposure is in line with the Group's Risk Appetite Framework and related credit policies.

For non-retail credits, risk recognition begins with an assessment of the financial standing of the borrower or counterparty using credit rating model. The model consists of quantitative and qualitative scores that are then translated into rating grades. The assigned credit rating grade forms a crucial part of the credit analysis undertaken for each of the Group's credit exposures.

For retail credits, credit-scoring systems to better differentiate the quality of borrowers are being used to complement the credit assessment and approval processes.

## 5.0 Credit Risk Management (Contd.)

To support credit risk management, our rating models for major portfolios have been upgraded to facilitate:

- improvement in the accuracy of individual obligor risk ratings;
- enhancement to pricing models;
- loan loss provision calculation;
- stress-testing; and
- enhancement to portfolio management.

Lending activities are guided by internal credit policies and Risk Appetite Framework that are approved by the Board. The Group's Risk Appetite Framework is refreshed at least annually and with regard to credit risk, provides direction as to portfolio management strategies and objectives designed to deliver the Group's optimal portfolio mix. Credit risk portfolio management strategies include, amongst others:

- concentration threshold/review trigger:
  - single counterparty credit;
  - industry sector; and
  - country.
- asset writing strategies for industry sectors and portfolio composition (by Risk Grade and Security Indicator);
- setting Loan to Value limits for asset backed loans (i.e., property exposures and other collateral);
- Classified Account processes for identifying, monitoring and managing customers exhibiting signs of weakness and higher risk customers; and
- setting Benchmark Returns which serve as a guide to the minimum returns the Group requires for the risk undertaken, taking into account operating expenses and cost of capital.

Individual credit risk exposure exceeding certain thresholds are escalated to Credit and Commitments Committee ("CACC") for approval. In the event such exposure exceeds CACC authority it will be reported to Executive Committee of Directors ("EXCO"). Portfolio credit risk is reported to the relevant management and board committees.

The Group CEOs Committee regularly meets to review the quality and diversification of the Group's loan/financing portfolio, approve new and amended credit risk policy, and review the portfolio risk profile against the Group Risk Appetite Framework ("GRAF").

Group Risk prepares monthly Risk Reports which detail important portfolio composition and trend analysis incorporating asset growth, asset quality, impairments, flow rates of loan delinquency buckets and exposures by industry sectors are reported monthly by Group Risk to executive management and to all meetings of the Board.

## 5.1 Impairment

### 5.1.1 Definition of past due and impaired loans and advances

All loans and advances are categorised as either:

- neither past due nor impaired;
- past due but not impaired; or
- impaired

An asset is considered past due when any payment (whether principal and/or interest) due under the contractual terms are received late or missed.

A loan is classified as impaired under the following circumstances:

- (a) where the principal or interest or both is past due<sup>1</sup> or the amount outstanding is in excess of approved limit (for revolving facilities), each for more than 90 days or 3 months on any material<sup>2</sup> obligation; or
- (b) for loans where repayments are scheduled on intervals of 3 months or longer, the loan is to be classified as impaired 1+30 days or 1 day+1 month past due (the 30-days grace period is to allow for exclusion of administrative default<sup>3</sup>).
- (c) for trade bills/facilities, an account is deemed default and impaired when the past due is 90 days from due date of the bill.
- (d) A loan may also be classified as impaired:
  - i. as deemed appropriate by the Watch and Control Committee where it is determined the loans have a high probability of default; or
  - ii. Cross-default occurs when:
    - a default of a loan obligation of a borrower triggers a default of another loan obligation of the same borrower or
    - a default of a loan obligation of a borrower triggers a default of a loan obligation of other borrowers within the same borrower group.The Credit and Commitments Committee (CACC) is allowed to waive the declaration of cross-default across all accounts of the same borrower or accounts of all borrowers within the same borrower group.
- (e) debt instruments (for example, fixed income securities, debt converted instrument etc.) shall be classified as impaired when the coupon or interest payment is 1 day past due.

---

<sup>1</sup> For credit card facilities, an account is "past due" when the card member fails to settle the minimum monthly repayment due before the next billing date.

<sup>2</sup> Material obligation is defined as determined by Management.

<sup>3</sup> Administrative defaults include cases where exposures become overdue because of oversight on the part of the obligor and/or the banking institution. Instances of administrative defaults may be excluded from the historical default count, subject to appropriate policies and procedures established by the banking institution to evaluate and approve such cases.

## 5.1 Impairment (Contd.)

### 5.1.2 Methodology for Determination of Individual and Collective Allowances

An assessment is performed to determine whether objective evidence of impairment exists individually for financial assets that are individually significant, and collectively for financial assets that are not individually significant or not individually impaired.

#### **Individual Assessment**

Individual assessment is divided into 2 main processes - detection of an event (s) and an assessment of impairment:

(a) Trigger management

In trigger management, financial assets which are above the pre-set individual assessment threshold are assessed using the relevant impairment triggers for objective evidence of impairment.

(b) Valuation of assets

Financial assets which are triggered by the impairment triggers will be measured for evidence of high likelihood of impairment, i.e. estimated recoveries (based on the discounted cash flow projection method and taking into account economic conditions) is less than carrying value or fair value is less than the carrying value.

#### **Collective Assessment**

Loans and advances and commitments and contingencies below the significant threshold and those not assessed to be individually impaired, will be subject to collective assessment and a collective allowance will be computed accordingly. The collective impairment assessment and provisioning methodology uses historical loss data to derive the level of provisions. The collective provisions are computed after making the necessary adjustments to reflect current economic conditions.

**Table 5.1 : Distribution of gross credit exposures by sector**

The distribution of credit exposures by sector of the Group as follows:

30 September 2014	Agriculture	Mining and quarrying	Manufacturing	Electricity, gas and water	Construction	Wholesale and retail trade and hotels and restaurants	Transport, storage and communication	Finance and insurance	Real estate	Business activities	Education and health	Household	Others	Total

**Table 5.6 : Reconciliation of changes to loans impairment allowances exposure**

The reconciliation of changes to loans impairment allowances of the Group are as follows:

	Collective impairment allowances		Individual impairment allowances	
	30 September 2014 RM'000	31 March 2014 RM'000	30 September 2014 RM'000	31 March 2014 RM'000
<b>Balance at beginning of financial year</b>	1,411,219	1,492,899	133,755	168,840
Charge to income statement, net	150,219	360,079	23,286	151,832
Amount transferred from Amlslamic *	(2,463)	-	-	-
Amount written-off and others	(436,649)	(443,170)	(7,545)	(186,917)
Foreign exchange differences	(61)	1,411	-	-
<b>Balance at end of financial year/period</b>	<b>1,122,265</b>	<b>1,411,219</b>	<b>149,496</b>	<b>133,755</b>

\* Upon expiry of the RPSIA contract on 2 May 2014, the Bank derecognised the collective allowance. Accordingly, Amlslamic now accounts for the collective allowance in its financial statements. The gross exposure and collective allowance relating to the RPSIA financing as at 31 March 2014 for the Group and the Bank was RM450.1 million and RM2.5 million respectively.

There was no individual allowance provided for the PSIA financing.

	(Charge offs)/ recoveries	
	30 September 2014 RM'000	31 March 2014 RM'000
Bad debts written off during the year/period	(39,067)	(68,396)
Bad debt recoveries during the year/period	215,213	730,944

## 6.0 Credit Risk Exposure under the Standardised Approach

**Table 6.1 : Credit exposures by risk weights under the Standardised Approach**

The breakdown of credit risk exposures by risk weights of the Group is as follows:

30 September 2014	Exposures after netting and credit risk mitigation											Total exposures after netting and credit risk mitigation RM'000	Total risk weighted assets RM'000
	Sovereigns and Central banks	Banks, DFIs and MDBs	Insurance companies, Securities firms and Fund managers	Corporates	Regulatory retail	Residential mortgages	Higher risk assets	Other assets	Securitisation exposures	Equity exposures			
	RM'000	RM'000	RM'000	RM'000	RM'000	RM'000	RM'000	RM'000	RM'000	RM'000

**Table 8.1: Off Balance Sheet Exposures**

The off balance sheet exposures and counterparty credit risk of the Group are as follows:

31 March 2014	Principal amount RM'000	Positive fair value of derivative contracts RM'000	Credit equivalent amount RM'000	Risk weighted assets RM'000
<b>Direct credit substitutes</b>	1,092,935		964,135	865,605
<b>Transaction related contingent Items</b>	4,663,740		2,396,271	1,682,429
<b>Short term self liquidating trade related contingencies</b>	616,860		123,366	91,046
<b>Assets sold with recourse</b>	200		200	200
<b>Forward asset purchases</b>	105,872		6,360	3,710
<b>Obligations under an on-going underwriting agreement</b>	250,000		-	-
<b>Foreign exchange related contracts</b>				
One year or less	22,196,436	84,533	211,519	134,918
Over one year to five years	3,018,618	118,761	331,810	271,535
Over five years	895,569	89,634	272,947	225,831
<b>Interest rate related contracts</b>				
One year or less	4,377,755	3,947	12,754	4,554
Over one year to five years	28,591,959	153,942	927,330	392,518
Over five years	6,250,838	48,801	476,900	244,942
<b>Equity and commodity related contracts</b>				
One year or less	419,790	4,928	19,603	13,526
Over one year to five years	331,103	480	20,127	10,063
<b>Credit derivative contracts</b>				
One year or less	-	-	-	-
Over one year to five years	306,519	4,651	10	5
Over five years	305,967	19,153	6	3
<b>Other commitments, such as formal standby facilities and credit lines, with an original maturity of over one year</b>	5,145,833		2,552,853	2,170,244
<b>Other commitments, such as formal standby facilities and credit lines, with an original maturity of up to one year</b>	13,898,239		2,800,012	2,557,267
<b>Unutilised credit card lines</b>	3,622,016		724,403	539,996
<b>Total</b>	<b>96,090,249</b>	<b>528,830</b>	<b>11,840,606</b>	<b>9,208,392</b>

**Table 8.2 : Credit Derivatives Counterparty Credit Risk**

Credit derivatives that create exposures to counterparty credit risk is as follows:

Usage	Product	30 September 2014		31 March 2014	
		Sell Leg	Buy Leg *	Sell Leg	Buy Leg *
		Notional Exposure for Protection Sold RM'000	Notional Exposure for Protection Bought RM'000	Notional Exposure for Protection Sold RM'000	Notional Exposure for Protection Bought RM'000
Intermediation	Credit default swap	313,878	300,000	312,485	300,000

\* Out of the total notional exposure for protection bought as at 30 September 2014, RM283,500,000 (31 March 2014: RM283,500,000) has no counterparty credit risk exposure because it is on a fully funded basis.

## 9.0 Securitisation

**Table 9.1: Securitisation (Trading and Banking Book)**

The securitised exposures of the Group are as follows:

30 September 2014				Gains/losses recognised during the year RM'000
Underlying asset	Total exposures securitised RM'000	Past due RM'000	Impaired RM'000	
<b><u>Traditional securitisation originated by the Group</u></b>				
<b>Banking book</b>				
Corporate loans	159,290	-	96,254	-
Mortgage loans	775,146	-	766,311	-
<b>Total traditional securitisation</b>	<b>934,436</b>	<b>-</b>	<b>862,565</b>	<b>-</b>
<b>Total synthetic securitisation</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>-</b>
<b>Total traditional and synthetic securitisation</b>	<b>934,436</b>	<b>-</b>	<b>862,565</b>	<b>-</b>

31 March 2014				Gains/losses recognised during the year RM'000
Underlying asset	Total exposures securitised RM'000	Past due RM'000	Impaired RM'000	
<b><u>Traditional securitisation originated by the Group</u></b>				
<b>Banking book</b>				
Corporate loans	199,373	-	129,895	-
Mortgage loans	747,256	-	738,154	-
<b>Total traditional securitisation</b>	<b>946,629</b>	<b>-</b>	<b>868,049</b>	<b>-</b>
<b>Total synthetic securitisation</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>-</b>
<b>Total traditional and synthetic securitisation</b>	<b>946,629</b>	<b>-</b>	<b>868,049</b>	<b>-</b>

Table 9.2: Securitisation under the Standardised Approach for Banking Book Exposures

30 September 2014	Exposure value of positions purchased or retained RM'000	Exposure after CRM RM'000	Exposures subject to deduction RM'000	Distribution of exposures after CRM according to applicable risk weights				Risk weighted assets RM'000
				Rated securitisation exposures or risk weights of guarantees/credit derivatives			Unrated (look-through)	
				20% RM'000	50% RM'000	1250% RM'000	Exposure amount RM'000	
<b>Securitisation exposures by exposure type</b>

## 10.0 Non-Traded Market Risk

**Table 10.1: Market Risk Sensitivity - Interest Rate Risk/Rate of Return Risk in the Banking Book ("IRR/RORBB")**

The IRR/RORBB sensitivity for the Group is as follows:

<b>30 September 2014</b> <b>Currency (MYR)</b>	<b>Interest Rate/Rate of Return +100 bps RM'000</b>	<b>Interest Rate/Rate of Return -100 bps RM'000</b>
Impact on Profit Before Taxation	132,151	(132,151)
Impact on Equity	(218,354)	251,444

<b>31 March 2014</b> <b>Currency (MYR)</b>	<b>Interest Rate/Rate of Return +100 bps RM'000</b>	<b>Interest Rate/Rate of Return -100 bps RM'000</b>
Impact on Profit Before Taxation	152,296	(152,196)
Impact on Equity	(264,141)	299,765

## 11.0 Equities (Banking Book Positions)

**Table 11.1: Equity investments and capital requirement**

An analysis of equity investments by appropriate equity groupings and risk weighted assets of the Group are as follows:

<b>Non traded equity investments</b>	<b>30 September 2014 RM'000</b>	<b>31 March 2014 RM'000</b>
Value of quoted (publicly traded) equities	187,567	188,288
Value of unquoted (privately held) equities	88,460	88,470
<b>Total</b>	<b>276,027</b>	<b>276,758</b>
<b>Net realised and unrealised (losses)/gains</b>		
Cumulative realised gains from sales and liquidations	2,424	41,052
Total unrealised (losses)/gains	(538)	(10,751)
<b>Total</b>	<b>1,886</b>	<b>30,301</b>
<b>Risk weighted assets</b>		
Equity investments subject to a 100% risk weight	187,567	188,288
Equity investments subject to a 150% risk weight	132,691	132,706
<b>Total</b>	<b>320,258</b>	<b>320,994</b>
<b>Total minimum capital requirement (8%)</b>	<b>25,621</b>	<b>25,680</b>
