STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RESPECT OF THE AUDITED FINANCIAL STATEMENTS

The Directors are responsible for ensuring that the annual audited financial statements of the Group and of the Company are drawn up in accordance with MFRS Accounting Standards, IFRS Accounting Standards, the requirements of the Companies Act 2016 in Malaysia, Bank Negara Malaysia's Guidelines and the Listing Requirements of Bursa Malaysia Securities Berhad.

The Directors are also responsible for ensuring that the annual audited financial statements of the Group and of the Company are prepared with reasonable accuracy from the accounting records of the Group and of the Company so as to give a true and fair view of the financial position of the Group and of the Company as at 31 March 2026, and of their financial performance and cash flows for the financial year then ended.

The audited financial statements are prepared on a going concern basis and the Directors have ensured that appropriate and relevant accounting policies are applied on a consistent basis and accounting judgements and estimates made are reasonable and fair so as to enable the preparation of the financial statements of the Group and the Company.

The Directors also have a general responsibility to take reasonable steps to safeguard the assets of the Group and of the Company to prevent and detect fraud and other irregularities.

DIRECTORS' REPORT

The Directors have pleasure in presenting their report together with the audited financial statements of AMMB Holdings Berhad ("the Company") and its subsidiaries ("the Group") for the financial year ended 31 March 2026.

PRINCIPAL ACTIVITIES

The principal activity of the Company is that of an investment holding company.

The subsidiaries, as listed in Note 15 to the financial statements, provide a wide range of retail banking, business banking, wholesale banking, investment banking, Islamic banking and related financial services which also include stock and share-broking, futures broking, investment advisory and asset, real estate investment trust and unit trust management services.

There have been no significant changes in the nature of the activities of the Group and of the Company during the financial year.

FINANCIAL RESULTS

	Group RM'000	Company RM'000
Profit for the financial year	2,100,906	1,211,526
Attributable to:		
Equity holders of the Company	2,100,836	1,211,526
Non-controlling interests	70	–
Profit for the financial year	2,100,906	1,211,526

OUTLOOK FOR NEXT FINANCIAL YEAR

Quarter 1 calendar year ("CY") 2026 Gross Domestic Product ("GDP") off to a solid start, but early war-related headwinds emerge

The global economy entered 2026 on a solid footing, with both the United States ("US") and China recording faster GDP growth in Q1CY2026. However, a closer look at the composition of growth points to uneven underlying momentum, suggesting mounting downside risks to the global outlook ahead, particularly if the conflict in Middle East proves more prolonged. Meanwhile, the Eurozone's flash GDP estimate indicated a moderation in growth, partly dragged down by an outlier contraction in Ireland.

In the US, strong Q1CY2026 growth was primarily driven by a sharp rebound in government spending, following last year's mass federal layoffs, and by robust domestic investment, supported by infrastructure projects and Artificial Intelligence ("AI")-related spending. These helped offset weaker consumer spending as higher energy prices – fuelled by ongoing geopolitical tensions – eroded households' purchasing power. Likewise, China's above-expectations GDP growth masked persistent consumer weakness. While industrial production and exports remained resilient, retail sales growth continued to underperform, reflecting subdued consumer confidence amid heightened uncertainty and an ongoing property sector downturn.

Rising tensions in Middle East shock energy markets, weaken Purchasing Managers' Index ("PMI") and push global services into contraction

The US-Israel-Iran war triggered the largest supply disruptions in the history of global energy markets, with risks of prolonged conflict or even an escalation remaining a possibility. Latest PMI surveys reinforced these concerns, revealing a deterioration in business confidence. Notably, the global services sector recorded its first contraction in more than three years. Against this backdrop of heightened geopolitical and mounting macroeconomic risks, a joint statement by the International Energy Agency ("IEA"), the International Monetary Fund ("IMF") and the World Bank announced the establishment of a coordination group to strengthen their response, including targeted policy advice and related financial support.

DIRECTORS' REPORT

OUTLOOK FOR NEXT FINANCIAL YEAR (CONT'D.)

Central banks maintain policy rates while signalling future tightening

Rising inflation risks have prompted the financial markets to reassess the global monetary policy path. Both the European Central Bank ("ECB") and the Bank of England ("BOE") held interest rates steady at 2.0% and 3.75%, respectively, but investors seemed to read the same signal coming from both central banks – hikes are coming later this year. The ECB's decision to hold rates belies a more hawkish shift in its messaging, while the BOE went a step further by warning that United Kingdom ("UK") inflation could rise to 6% should the Middle East conflict persist. Meanwhile, the US Federal Reserve ("Fed") held rates steady for a third straight meeting, with an 8–4 vote marking its most divided decision since 1992. The central bank is unlikely to cut rates for the remainder of the year in its latest policy meeting.

Bank of Japan ("BOJ") holds rates steady amid balanced risks and inflation concerns

Meanwhile, in Japan, the IMF has advised the BOJ to continue normalising rates despite rising economic risks, noting that the overall balance of risks remains broadly even. In contrast, steady wage growth should continue to support consumption. Although three of the BOJ's nine policy board members advocated for an interest rate hike at the April meeting, reflecting rising concerns over inflationary pressures linked to the Middle East conflict, Governor Kazuo Ueda said the central bank opted to keep policy unchanged for now to allow more time to assess the conflict's economic impact. Nonetheless, he emphasised that the BOJ remains prepared to raise rates should inflationary risks materialise or intensify significantly.

Q1CY2026 GDP is likely to be the best-performing quarter of the year

Malaysia's economy grew by 5.4% year-on-year in Q1CY2026, in line with our forecast, following a 6.2% expansion in the previous quarter. Additionally, growth above 5.0% in Q1CY2026 was consistent with our expectations and had already been incorporated into our full-year growth forecast of 4.5%. Looking ahead, however, we expect growth to moderate amid heightened global uncertainties. The impact of the war in Middle East will likely manifest as a lagged, supply-side shock. As such, we opine that the economy will see material effects only emerging from second half of CY2026. There is currently no immediate recession risk. Unlike past crises, the current environment remains relatively resilient despite the global oil supply crunch. The key uncertainty remains on the durability of consumption demand if global oil prices remain elevated for longer as well as the effects of disrupted supply chains feeding through to higher cost of production across key industrial and manufacturing sectors.

Loan growth strengthened further in March

Loan activity picked up in March, underpinned by a significant acceleration in non-household growth to 5.61% from 4.45% in February, despite a slight easing in household growth (March: 5.17% vs. February: 5.27%). By purpose, working capital loan growth strengthened markedly to 3.19% in March 2026 from 1.59% previously, signalling heightened liquidity requirements among firms facing cost pressures. Conversely, residential property loan growth continued to ease to 5.58% during the month (February: 5.69%) amid subdued household sentiment, while credit card loan growth moderated to 6.03% from 6.77% in February. Meanwhile, the banking system remains strong with a liquidity coverage ratio of 144.6% in March (February: 149.4%). The loan-to-fund ratio and loan-to-fund-and-equity ratio remained stable at 82.6% (February: 82.6%) and 71.8% (February: 71.9%), respectively, as of the end of the month.

We expect the Overnight Policy Rate ("OPR") to remain unchanged at 2.75% throughout CY2026, consistent with market consensus that anticipates no major hikes or cuts unless there is a significant shift in incoming economic data. With a tight labour market and well-contained inflation expected in CY2026, we find no compelling reason for Bank Negara Malaysia ("BNM") to alter its policy stance. The current monetary policy stance remains accommodative, supporting growth expected to remain within a healthy range.

BUSINESS PLAN AND STRATEGY

The Group ends FY2026 on a firm financial footing and rewards shareholders with a higher dividend payout

The Group concluded its financial year ended 31 March 2026 ("FY2026") on firm financial footing, marking the successful execution of the second year of its five-year Winning Together ("WT29") strategy. Profit After Taxation and Minority Interest ("PATMI") rose to a record RM2.1 billion, translating into a Return on Equity ("ROE") of 10.0% and a Return on Assets ("ROA") of 1.05%.

Liquidity levels remained robust, while the Group's capital position remained solid through consistent quarterly profit formation and Risk-Weighted Assets ("RWA") management. This financial strength enabled the Group to increase its dividend payout by 16% to 35.0 sen per share for FY2026, underscoring its commitment to deliver sustainable and consistent shareholder value.

BUSINESS PLAN AND STRATEGY (CONT'D.)

The Group ends FY2026 on a firm financial footing and rewards shareholders with a higher dividend payout (Cont'd.)

Mindful that tariff-driven trade tensions, sustained heightened geopolitical tensions in the Middle East and ongoing fuel price volatility will continue to impact all economies including the Malaysian economy, the Group remains vigilant while actively managing risks, preserving balance sheet strength and remaining responsive to evolving external conditions.

At the same time, the Group will leverage the strong foundation built in the first two years of WT29 to further enhance operational resilience through its three core strategy pillars: Digitalisation, Operational Excellence and Sustainability. The Group remains firmly committed to the objectives of WT29 and to the continuous enhancement of shareholder value.

ITEMS OF MATERIAL AND UNUSUAL NATURE

In the opinion of the Directors, the results of operations of the Group and of the Company for the financial year have not been substantially affected by any item, transaction or event of a material and unusual nature.

There has not arisen in the interval between the end of the financial year and the date of this report any item, transaction or event of a material and unusual nature likely, in the opinion of the Directors, to affect substantially the results of the operations of the Group and of the Company for the current financial year in which this report is made.

SIGNIFICANT EVENT

The Middle East Conflict that began on 28 February 2026 and caused the closure of the Strait of Hormuz, has significantly disrupted many business operations around the world. In assessing the potential credit implications of the conflict, specific borrowers' and customers' information and situations with particular focus on exposures to and from Middle East, industry and sectoral developments and trends, forward-looking economic information and a range of external market views were considered, with judgement applied considering the evolving facts and circumstances. The results of the assessment and these considerations have been reflected and incorporated in the expected credit loss ("ECL") allowances as at 31 March 2026.

SIGNIFICANT SUBSEQUENT EVENT

There was no significant event subsequent to the reporting date that required disclosure or adjustment to the financial statements.

DIVIDENDS

During the financial year, the Company paid:

(a) a final single-tier dividend of 19.9 sen per share in respect of the financial year ended 31 March 2025 which amounted to RM657,349,967. This amount was noted in the Directors' Report for that financial year and paid on 8 July 2025 to shareholders whose names appear in the record of Depositors as at 19 June 2025.

(b) an interim single-tier dividend of 12.5 sen per share in respect of the financial year ended 31 March 2026 which amounted to RM413,414,607 was paid on 30 December 2025 to shareholders whose names appear in the record of Depositors as at 11 December 2025.

The Directors proposed the payment of a final single-tier dividend of 22.5 sen per share on 3,306,734,944 ordinary shares in issue (net of treasury shares) amounting to approximately RM744,015,000 in respect of the current financial year ended 31 March 2026. The financial statements for the current financial year do not reflect this proposed dividend and will be accounted for in equity as an appropriation of retained earnings in the financial year ending 31 March 2027.

DIRECTORS' REPORT

RESERVES, PROVISIONS AND ALLOWANCES

There were no material transfers to or from reserves, provisions and allowances during the financial year other than as disclosed in the financial statements.

BAD AND DOUBTFUL DEBTS AND LOANS, ADVANCES AND FINANCING

Before the financial statements of the Group and of the Company were made out, the Directors took reasonable steps to ascertain that action had been taken in relation to the writing off of bad debts and loans, advances and financing and the making of allowances for doubtful debts and loans, advances and financing, and have satisfied themselves that all known bad debts and loans, advances and financing had been written off and that adequate allowances had been made for doubtful debts and loans, advances and financing.

At the date of this report, the Directors are not aware of any circumstances that would render the amount written off for bad debts and loans, advances and financing or the amount of the allowances for doubtful debts and loans, advances and financing in the financial statements of the Group and of the Company inadequate to any substantial extent.

CURRENT ASSETS

Before the financial statements of the Group and of the Company were made out, the Directors took reasonable steps to ascertain that current assets, which were unlikely to be realised in the ordinary course of business, their values as shown in the accounting records of the Group and of the Company, have been written down to their estimated realisable values.

At the date of this report, the Directors are not aware of any circumstances that would render the values attributed to the current assets in the financial statements of the Group and of the Company misleading.

VALUATION METHODS

At the date of this report, the Directors are not aware of any circumstances which have arisen which would render adherence to the existing methods of valuation of assets or liabilities of the Group and of the Company misleading or inappropriate.

CONTINGENT AND OTHER LIABILITIES

At the date of this report, there does not exist:

(a) any charge on the assets of the Group and of the Company that has arisen since the end of the financial year which secures the liabilities of any other person; or

(b) any contingent liability in respect of the Group and of the Company that has arisen since the end of the financial year, other than those incurred in the normal course of business of the Group and of the Company.

No contingent or other liability of the Group and of the Company has become enforceable or is likely to become enforceable within the period of twelve months after the end of the financial year which, in the opinion of the Directors, will or may substantially affect the ability of the Group and of the Company to meet their obligations as and when they fall due.

CHANGE OF CIRCUMSTANCES

At the date of this report, the Directors are not aware of any circumstances, not otherwise dealt with in this report or the financial statements of the Group and of the Company, that would render any amount stated in the financial statements misleading.

ISSUANCE OF SHARES AND DEBENTURES

The following are changes during the financial year in connection with the debt and equity securities that were issued by the Group:

(i) Issuance of commercial papers

(1) AmBank (M) Berhad ("AmBank") issued the following series under its RM4.0 billion Commercial Papers Programme:

(i) Series 4 with nominal value of RM200.0 million on 29 May 2025. The tenure of the commercial paper ("CP") is three (3) months, which was issued at a discount of 3.52% per annum.

(ii) Series 5 with nominal value of RM300.0 million on 29 May 2025. The tenure of the CP is five (5) months, which was issued at a discount of 3.54% per annum.

(iii) Series 6 with nominal value of RM530.0 million on 17 June 2025. The tenure of the CP is twelve (12) months, which was issued at a discount of 3.30% per annum.

(iv) Series 7 with nominal value of RM300.0 million on 29 October 2025. The tenure of the CP is six (6) months, which was issued at a discount of 3.26% per annum.

(v) Series 8 with nominal value of RM500.0 million on 4 December 2025. The tenure of the CP is twelve (12) months, which was issued at a discount of 3.38% per annum.

(vi) Series 9 with nominal value of RM400.0 million on 5 December 2025. The tenure of the CP is six (6) months, which was issued at a discount of 3.35% per annum.

(2) On 26 June 2025, AmBank Islamic Berhad ("AmBank Islamic") issued Series 2 of Islamic commercial paper ("ICP") with nominal value of RM400.0 million under its RM3.0 billion ICP based on Shariah principle of Wakalah Bi Al-Istithmar Programme ("Sukuk Wakalah Programme"). The tenure of the ICP is two (2) months, which was issued at a discount of 3.44% per annum.

(ii) Issuance of senior notes and subordinated sukuk

(1) On 28 August 2025, AmBank issued the following tranches of its RM7.0 billion Senior Notes Programme:

(i) Tranche 13 with nominal value of RM300.0 million. The interest rate of this tranche is at 3.68% per annum, payable semi-annually with a tenure of five (5) years.

(ii) Tranche 14 with nominal value of RM300.0 million. The interest rate of this tranche is at 3.75% per annum, payable semi-annually with a tenure of seven (7) years.

(2) On 30 September 2025, AmBank Islamic issued Tranche 12 with nominal value of RM400.0 million under its RM3.0 billion Subordinated Sukuk Murabahah Programme. The profit rate of this tranche is at 3.75% per annum, payable semi-annually with a tenure of ten (10) years (non-callable 5 years).

(3) On 17 March 2026, AmBank issued Tranche 2 with nominal value of RM400.0 million under its RM8.0 billion Subordinated Notes programme. The interest rate of this tranche is at 3.95% per annum, payable semi-annually with a tenure of ten (10) years (callable in the 5th years).

DIRECTORS' REPORT

ISSUANCE OF SHARES AND DEBENTURES (CONT'D.)

(iii) Redemption of commercial papers

(1) AmBank Islamic redeemed the following series under its RM3.0 billion Sukuk Wakalah Programme:

(i) Series 1 of ICP with nominal value of RM200.0 million on 11 June 2025.

(ii) Series 2 of ICP with nominal value of RM400.0 million on 26 August 2025.

(2) AmBank redeemed the following series under its RM4.0 billion Commercial Papers Programme:

(i) Series 1 of CP with nominal value of RM530.0 million on 20 June 2025.

(ii) Series 2 of CP with nominal value of RM150.0 million on 28 July 2025.

(iii) Series 4 of CP with nominal value of RM200.0 million on 27 August 2025.

(iv) Series 3 of CP with nominal value of RM300.0 million on 26 September 2025.

(v) Series 5 of CP with nominal value of RM300.0 million on 29 October 2025.

(iv) Redemption of subordinated sukuk and notes

(1) On its first call date of 8 December 2025, AmBank Islamic redeemed Tranche 8 with nominal value of RM400.0 million of its Sukuk Murabahah.

(2) On its first call date of 30 March 2026, AmBank redeemed Tranche 7 with nominal value of RM400.0 million of its RM4.0 billion Subordinated Notes programme.

Other than as disclosed above and in Notes 26, 27, 29 and 30 to the financial statements, there were no new shares and debentures, share cancellations nor resale of treasury shares by the Group and the Company during the financial year.

SHARE OPTIONS

There were no options granted during the financial year by the Company to take up unissued shares of the Company.

No shares have been issued during the financial year by virtue of the exercise of any option to take up unissued shares of the Company. As at the end of the financial year, there were no unissued shares of the Company under options.

INDEMNIFICATION OF DIRECTORS AND OFFICERS

The Company maintained on a group basis, a Directors' and Officers' Liability Insurance up to an aggregate limit of RM200.0 million against any legal liability incurred by the Directors and Officers in the discharge of their duties while holding office for the Company and its subsidiaries. The Directors and Officers shall not be indemnified by such insurance for any deliberate negligence, fraud, intentional breach of law or breach of trust proven against them. The gross amount of insurance premium paid by the Company for the Directors and Officers of the Company and its subsidiaries for the current financial year was RM368,000 (2025: RM418,425).

EXECUTIVES' SHARE SCHEME

On 5 October 2018, the Board approved the implementation of an Executives' Share Scheme ("ESS") for Eligible Executives of the Group.

The awards under the ESS are up to ten percent (10%) of the total number of issued shares of the Company (excluding treasury shares) at any point of time for the duration of the ESS for Eligible Executives including Executive Directors. The ESS is implemented and administered by the Group Nomination and Remuneration Committee ("GNRC"). The effective date of the ESS is 5 October 2018 and would be in force for a period of ten (10) years to 4 October 2028.

The awards granted to such Eligible Executives only comprises shares. Shares to be made available under the ESS will only vest to Eligible Executives who have duly accepted the offers of awards under the ESS in accordance with the By-Laws of the ESS and subject to the satisfaction of stipulated conditions. Such conditions are stipulated and determined by the GNRC.

The salient features of the ESS are disclosed in Note 31 to the financial statements.

SHARE BUY-BACK

During the current financial year, the Company bought back from the open market, a total of 4,922,000 ordinary shares listed on the Main Market of Bursa Malaysia Securities Berhad at an average buy-back price of RM5.46 per share. The total consideration paid for the share buy-back including transaction costs was approximately RM26.9 million and was financed by internally generated funds. None of the shares were resold or cancelled during the current financial year.

DIRECTORS

The Directors who have served on the Board since the beginning of the current financial year to the date of this report are:

Tan Sri Md Nor bin Md Yusof	
Soo Kim Wai	
Jeyaratnam A/L Tamotharam Pillai	
Hong Kean Yong	
Dato' Kong Sooi Lin	
U Chen Hock	
Sharifatu Laila binti Syed Ali	(Appointed w.e.f. 15 April 2025)
Chan Siew Mei	(Appointed w.e.f. 30 June 2025)
Dato' Mohamed Rafique Merican bin Mohd Wahiduddin Merican	(Appointed w.e.f. 2 January 2026)
Farina binti Farikhullah Khan	(Resigned w.e.f. 3 September 2025)
Seow Yoo Lin	(Retired w.e.f. 30 June 2025)
Felicity Ann Youl	(Resigned w.e.f. 15 April 2025)

The names of the Directors of the Company's subsidiary companies who served on the respective board of the subsidiary companies since the beginning of the financial year to the date of this report are disclosed in the Appendix to the financial statements.

DIRECTORS' INTERESTS

Under the Company's Constitution, the Directors are not required to hold shares in the Company.

There are no interests in shares and options in the Company or its related corporations, of those who were Directors at the end of the financial year as recorded in the Register of Directors' Shareholdings kept by the Company under Section 59 of the Companies Act 2016.

DIRECTORS' REPORT

DIRECTORS' BENEFITS

Since the end of the previous financial year, no Director of the Company has received or become entitled to receive any benefit (other than a benefit included in the aggregate amount of emoluments received or due and receivable by Directors or the fixed salary of a full-time employee as shown in Note 37 to the financial statements) by reason of a contract made by the Company or a related corporation with the Director or with a firm in which the Director is a member, or with a company in which the Director has a substantial financial interest, except for the related party transactions as shown in Note 43 to the financial statements.

Neither during nor at the end of the financial year was the Company a party to any arrangements whose object is to enable the Directors to acquire benefits by means of the acquisition of shares in, or debentures of, the Company or any other body corporate.

DIRECTORS' REMUNERATION

The details of the directors' remuneration paid or payable to the Directors of the Group and of the Company during the financial year are as follows:

	Group RM'000	Company RM'000
Fees	2,600	1,784
Other emoluments	2,144	1,305
Benefits-in-kind	227	178
	4,971	3,267

CORPORATE GOVERNANCE

(i) BOARD RESPONSIBILITY AND OVERSIGHT

The Board of Directors ("the Board") remains fully committed in ensuring that the principles and best practices in corporate governance are applied consistently in the Group. Since the Company is a holding company, its major business activities are conducted through its various subsidiaries. The Board complies with the recommendations on corporate governance as set out in the Malaysian Code on Corporate Governance 2021.

The Board supervises the management of the Group's businesses, policies and affairs with the goal of long-term sustainability of the Group. The Board meets no less than six (6) times in a year to carry out its duties and responsibilities, with additional Board meetings being convened, whenever required.

The Board addresses key matters concerning strategy, finance, organisation structure, business developments, human resource (subject to matters reserved for shareholders' meetings By-Laws), promote sustainability in the Group's business strategies, and establishes guidelines for overall business, risk and control policies, capital allocation and approves all key business developments.

The Board currently comprises nine (9) Directors with wide skills and experience, of which eight (8) are Independent Non-Executive Directors. The Directors participate fully in decision making on key issues regarding the Company and its subsidiaries. The Independent Non-Executive Directors ensure strategies proposed by the Management are fully discussed and examined, as well as take into account the long-term interests of various stakeholders.

There is a clear division between the roles of the Chairman and the Group Chief Executive Officer.

The Senior Management team of the subsidiaries are invited to attend Board Meetings to provide presentations and detailed explanations on matters that have been tabled. The Group Company Secretary has been empowered by the Board to assist the Board in matters of governance and in complying with statutory duties.

CORPORATE GOVERNANCE (CONT'D.)

(ii) COMMITTEES OF THE BOARD

The Board delegates certain responsibilities to Board Committees. These committees, which were created to assist the Board in certain areas of deliberation, are:

1 Group Nomination and Remuneration Committee;

2 Audit and Examination Committee;

3 Risk Management Committee; and

4 Group Information Technology Committee.

The roles and responsibilities of each committee are set out under the respective terms of reference, which have been approved by the Board. The minutes of the Committee meetings are tabled at the subsequent Board meetings for comment and notation.

(iii) MANAGEMENT INFORMATION

All Directors review Board papers and reports prior to the Board meeting. Information and materials, relating to the operations of the Company and its subsidiaries that are important to the Directors' understanding of the items in the agenda and related topics, are distributed in advance of the meeting. The Board reports, include among others, minutes of meetings of all Board Committees, monthly performance of the Group, review of business strategy, credit risk management, asset liability and market risk management and industry benchmarking as well as prevailing regulatory developments and the economic and business environment.

These reports are issued giving sufficient time before the meeting to enable the Directors to be prepared and to obtain further explanations, where necessary, and provides input on Group policies.

CREDIT RATINGS

From a credit rating perspective, we believe in providing our stakeholders with an independent view of our banking subsidiaries as well as that of the Company. As such, we continue to maintain credit ratings with Moody's Investors Service, S&P Global Ratings and RAM Rating Services Berhad.

DIRECTORS' REPORT

SHARIAH COMMITTEE

The Shariah Committee is responsible and accountable for all Shariah-related decisions, views and opinions. The main functions and duties of the Shariah Committee shall include, but are not limited to the following:

(i) To advise the Board and AmBank Islamic on Shariah matters to ensure that AmBank Islamic's business, operations, affairs and activities comply with Shariah requirements at all times.

(ii) To review and endorse policies and procedures of AmBank Islamic from Shariah perspectives, and to ensure that the contents do not contain any elements which are not in line with Shariah requirements.

(iii) To review and approve the documentations in relation to AmBank Islamic's products to ensure that the products are in compliance with Shariah requirements, which may include:
  (a) the terms and conditions contained in the forms, contracts, agreements and other legal documentation used in executing the transactions; and
  (b) the product manuals, marketing advertisements, sales illustrations, pamphlets and brochures used to describe the product.

(iv) To provide a decision, advice or opinion on AmBank Islamic's business, operations, affairs and activities which may trigger a Shariah non-compliance ("SNC") event.

(v) To perform oversight on and assess the strategies, initiatives and work carried out by the Shariah Management Department, in order to ensure compliance with Shariah matters which form part of their duties in providing their assessment of Shariah compliance and assurance information in the annual report. This includes performing the annual assessment of the Head of Shariah Management Department.

(vi) To perform oversight on the strategies, initiatives and work carried out by the:
  (a) Group Compliance Department relating to the Shariah Review function;
  (b) Group Risk Management Department relating to the Shariah Risk Management function; and
  (c) Group Internal Audit Department relating to the Shariah Audit function,

  in order to ensure compliance with Shariah matters which form part of their duties in providing their assessment of Shariah compliance and assurance information in the annual report.

(vii) To provide assistance to parties related to AmBank Islamic such as its legal counsel, auditors or consultants on Shariah matters upon request.

(viii) To advise AmBank Islamic to consult the Shariah Advisory Council of Bank Negara Malaysia ("SAC of BNM") or the Shariah Advisory Council of Securities Commission Malaysia ("SAC of SC") on any Shariah matters that could not be resolved by the Shariah Committee.

(ix) To provide written Shariah opinions to the SAC of BNM or SAC of SC as and when required, including the following circumstances where AmBank Islamic:
  (a) makes reference to the SAC of BNM for advice; or
  (b) submits an application to BNM or SC for new product approval.

(x) To provide advice and guidance to senior management on the management of the Zakat fund, charity and other social programmes or activities.

(xi) To endorse the Shariah operations manual which specify the manner in which a submission or request for advice be made to the Shariah Committee, the conduct of the Shariah Committee's meeting and the manner of compliance with any Shariah decision.

(xii) To oversee the overall SNC management including to endorse purification of SNC income.

(xiii) To assist in AmBank Islamic's sustainability and value-based intermediation ("VBI") agenda, including in relevant capacity building and awareness creation initiatives.

(xiv) To advise on the application of Shariah requirements in the recovery options and other relevant components of the Recovery Plan that covers the following:
  (a) provide direction on how Shariah conditions should be applied to recovery options that are recommended to be prepared in this level of disruption;
  (b) ensure that Shariah conditions are adhered to, and address issues related to Islamic financial transactions that may have an influence on the Recovery Plan;
  (c) provide advice and clarification on pertinent Shariah decisions, rulings, or policy documents issued by BNM or by any other authority that have an impact on or may have an impact on the Recovery Plan; and
  (d) provide opinions on any other Shariah-related situations when required.

SHARIAH COMMITTEE (CONT'D.)

(xv) The Chairman of the Shariah Committee, in leading the Shariah Committee is responsible for the effective functioning of the Shariah Committee. In fulfilling this role, the Chairman must:
  (a) ensure appropriate procedures are in place to govern the Shariah Committee's deliberations and proceedings;
  (b) act as a direct liaison between the Board and the Shariah Committee to foster greater understanding between both organs;
  (c) ensure that Shariah decisions or advice are made on a sound and well-informed basis, including based on a robust decision-making methodology which ensures that all business, operations and risk implications are considered by the Shariah Committee;
  (d) encourage healthy discussion, participation and contribution, and ensure that dissenting views can be freely expressed and discussed; and
  (e) ensure sufficient records of the discussion leading to formulation of the Shariah Committee's decision, advice or opinion are maintained.

The Shariah Committee may, if it thinks fit and proper and from time to time, delegate, re-delegate, suspend or revoke any powers given to the Shariah Management Department to do certain acts on behalf of the Shariah Committee such as review, advice and/or endorse certain materials or issues within the Shariah Committee's terms of reference.

The Shariah Committee members also sit in Shariah Oversight Committee. The Shariah Oversight Committee is established as a sub-committee of the Shariah Committee of AmBank Islamic to assist the Shariah Committee to oversee the strategies, initiatives and work carried out by the Shariah control functions namely Shariah Review, Shariah Risk Management and Shariah Audit.

The main functions and duties of Shariah Oversight Committee shall include, but are not limited to the following:

(i) as the authority to endorse Shariah Review's Plan;

(ii) determine whether potential SNC events are actual SNC incidents or not;

(iii) endorse action plan/rectification measure in addressing SNC incident and purification of income methodology and amount;

(iv) recommend alternative ways to rectify issues found through Shariah Audit, Shariah Review and Shariah Risk Management activities and/or other credible sources;

(v) provide advice on the recognition of income pursuant to SNC events and/or its disposal; and

(vi) recommend possible implementation methods to improve AmBank Islamic's business activities vis-à-vis Shariah in line with applicable statutes and guidelines/policies/circulars issued by relevant regulatory bodies.

AUDITORS AND AUDITORS' REMUNERATION

The auditors, Ernst & Young PLT, have expressed their willingness to continue in office.

The details of the auditors' remuneration for the financial year are as follows:

	Group RM'000	Company RM'000
Audit	3,002	126
Regulatory and assurance related	633	34
	3,635	160

Signed on behalf of the Board in accordance with a resolution of the Directors.

INDEPENDENT AUDITORS' REPORT

to the members of AMMB Holdings Berhad

(Incorporated in Malaysia)

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

Opinion

We have audited the financial statements of AMMB Holdings Berhad, which comprise the statements of financial position as at 31 March 2026 of the Group and of the Company, and statements of profit or loss, statements of comprehensive income, statements of changes in equity and statements of cash flows of the Group and of the Company for the financial year then ended, and notes to the financial statements, including material accounting policy information, as set out on pages 20 to 238.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Group and of the Company as at 31 March 2026, and of their financial performance and their cash flows for the financial year then ended in accordance with MFRS Accounting Standards, IFRS Accounting Standards and the requirements of the Companies Act 2016 in Malaysia.

Basis for opinion

We conducted our audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing. Our responsibilities under those standards are further described in the *Auditors' responsibilities for the audit of the financial statements* section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Independence and other ethical responsibilities

We are independent of the Group and of the Company in accordance with the By-Laws (on Professional Ethics, Conduct and Practice) of the Malaysian Institute of Accountants ("By-Laws") and the International Code of Ethics for Professional Accountants (including International Independence Standards) ("IESBA Code"), as applicable to audits of financial statements of public interest entities, and we have fulfilled our other ethical responsibilities in accordance with the By-Laws and the IESBA Code.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the Group and of the Company for the current financial year. These matters were addressed in the context of our audit of the financial statements of the Group and of the Company as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditors' responsibilities for the audit of the financial statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis of our audit opinion on the accompanying financial statements.

Risk area and rationale	***Our response***
Expected credit losses of loans, advances and financing and debt instruments not carried at fair value through profit or loss	
As at 31 March 2026, the loans, advances and financing represent 70% of the total assets of the Group, and the debt instruments carried at amortised cost and fair value through other comprehensive income represent 19% of the total assets of the Group. MFRS 9 *Financial Instruments* ("MFRS 9") requires the Group to account for the impairment losses on loans, advances and financing and debt instruments not carried at fair value through profit or loss with a forward-looking expected credit loss ("ECL") approach.	Our audit procedures included the assessment of key controls over the origination, segmentation, ongoing internal credit quality assessments, recording and monitoring of the loans, advances and financing and the debt instruments not carried at fair value through profit or loss. We also assessed the processes and effectiveness of key controls over the transfer criteria (for the three stages of credit exposures under MFRS 9 in accordance with their credit quality), impairment measurement methodologies, governance for development, maintenance, and validation of ECL models, inputs, basis and assumptions used by the Group in staging the credit exposures and calculating the ECL.

INDEPENDENT AUDITORS' REPORT

to the members of AMMB Holdings Berhad
(Incorporated in Malaysia)

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS (CONT'D.)

Key audit matters (Cont'd.)

Risk area and rationale (cont'd.)	***Our response (cont'd.)***
Expected credit losses of loans, advances and financing and debt instruments not carried at fair value through profit or loss (cont'd.)	
	For staging and identification of credit exposures with significant deterioration in credit quality, we assessed and tested the reasonableness of the transfer criteria applied by the Group for different types of credit exposures. We evaluated if the transfer criteria are consistent with the Group's credit risk management practices.
The measurement of ECL requires the application of significant judgment and increased complexity which includes the identification of on-balance sheet and off-balance sheet credit exposures with significant deterioration in credit quality, assumptions used in the ECL models (for exposures assessed individually or collectively) such as the expected future cash flows, forward looking macroeconomic factors and probability-weighted multiple scenarios.	For the measurement of ECL, we assessed and tested reasonableness of the Group's ECL models, including model inputs, model design, and model performance and management overlays for significant portfolios. We challenged whether historical experience is representative of current circumstances and of the recent losses incurred in the portfolios and assessed the reasonableness of forward-looking adjustments, macroeconomic factor analysis, probability-weighted multiple scenarios, and the use of management overlays to address uncertainties arising from emerging risks.
Management overlays are applied due to uncertainties from emerging risks which impacts have not been reflected in ECL models. The overlays are maintained to the extent they can be measured reliably with available, reasonable and supportable information.	We evaluated if changes in modeling approaches, parameters and assumptions are needed and if any changes made were appropriate. We also assessed, tested and monitored the sensitivity of the credit loss provisions to changes in modelling assumptions. In assessing the management overlays applied in the ECL amid current environment uncertainties from emerging risks, we performed scenario analysis to cross-check the impacts and challenged reasonableness of the basis applied by the management, particularly for the loans, advances and financing and debt instruments not carried at fair value through profit or loss under Stages 1 and 2.
Refer to significant event in Note 55, summary of material accounting policies for financial instruments – ECL in Note 2.5 (o), significant accounting judgements, estimates and assumptions for measurement of ECL allowances in Note 5.1, disclosures of loans, advances and financing and debt instruments in Notes 12, 10 and 11, and disclosures on credit risk management in Note 50.2 to the financial statements.	With respect to individually assessed ECL which are mainly in relation to the impaired loans, advances and financing and debt instruments not carried at fair value through profit or loss in Stage 3 and purchased or originated credit-impaired ("POCI") financial assets, we reviewed and tested a sample of loans, advances and financing and debt instruments not carried at fair value through profit or loss to evaluate the timely identification by the Group of exposures with significant deterioration in credit quality or which have been impaired. For cases where impairment has been identified, we assessed the Group's assumptions on the expected future cash flows, including the value of realisable collaterals based on available market information and the multiple scenarios considered. We also challenged the assumptions and compared estimates to external evidence where available, including the appropriateness of management overlays applied due to uncertainties from emerging risks.
	We also assessed whether the financial statements disclosures are adequately and appropriately reflect the Group's exposures to credit risk.
	We involved our credit modelling specialists and information technology ("IT") specialists in the performance of these procedures where their specific expertise were required.

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS (CONT'D.)

Key audit matters (Cont'd.)

Risk area and rationale (cont'd.)	***Our response (cont'd.)***
Impairment of (i) goodwill, (ii) investment in subsidiaries, associates and joint ventures *(i) Goodwill* As at 31 March 2026, goodwill amounts to RM303.5 million. The Group is required to annually test the carrying amount of goodwill for impairment. Goodwill impairment testing of cash-generating unit ("CGU") relies on value-in-use ("VIU") estimates based on estimated future cash flows. This is an area of focus in the preparation of the financial statements due to: (i) the significance of the goodwill recognised in the financial statements of the Group; (ii) the level of subjectivity associated with the assumptions used in estimating VIU of the CGUs; and (iii) the subjectivity involved in determining the appropriate discount rates to be applied to measure the net present value of each CGU.	Our audit procedures included, amongst others, evaluating the assumptions and methodologies used by the Group and the Company in performing the impairment assessment. We tested the basis of preparing the cash flow forecasts, taking into account the back-testing results on the accuracy of previous forecasts and the historical evidence supporting underlying assumptions. We assessed the appropriateness of the other key assumptions, such as the terminal growth rates used to extrapolate the cash flows, by comparing against internal information, external economic and market data, including emerging risks. We also involved our specialists to independently compute discount rates, which reflect the specific risks relating to each CGU based on publicly available information. We independently performed the sensitivity analysis on the key inputs to the impairment models, to understand the impact that reasonable alternative assumptions would have on the overall carrying amounts. We reviewed the adequacy of the Group's and the Company's disclosures within the financial statements on those assumptions to which the outcome of the impairment test is most sensitive.
(ii) Investment in subsidiaries, associates and joint ventures As at 31 March 2026, the carrying amount of investment in subsidiaries stood at RM10.9 billion (at Company level) and investment in associates and joint ventures stood at RM1.4 billion (at Group level). We focused on impairment assessment of investment in subsidiaries, associates and joint ventures as the impairment testing relies on VIU estimates based on estimated future cash flows where significant judgement and estimation is involved in determining the future cash flows. This is an area of focus in the preparation of the financial statements due to: (i) the significance of the investment in subsidiaries, associates and joint ventures recognised in the financial statements of the Group and the Company; (ii) the level of subjectivity associated with the assumptions used in estimating VIU of the subsidiaries, associates and joint ventures; and (iii) the subjectivity involved in determining the appropriate discount rates to be applied to measure the net present value for each investment. Refer to summary of material accounting policies for investments in subsidiaries, associates and joint ventures and impairment of non-financial assets in Notes 2.5 (b), Notes 2.5 (c) and 2.5 (r), material accounting judgement, estimates and assumption for impairment of goodwill in Notes 5.3 and the disclosure of goodwill, investment in subsidiaries and investment in associates and joint ventures in Notes 20 (a), 15 and 16 to the financial statements.	

INDEPENDENT AUDITORS' REPORT

to the members of AMMB Holdings Berhad
(Incorporated in Malaysia)

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS (CONT'D.)

Information other than the financial statements and auditors' report thereon

The directors of the Company are responsible for the other information. The other information comprises the directors' report and the annual report, but does not include the financial statements of the Group and of the Company and our auditors' report thereon, which we obtained prior to the date of this auditors' report, and the remaining other information expected to be included in the annual report, which is expected to be made available to us after the date of this auditors' report.

Our opinion on the financial statements of the Group and of the Company does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements of the Group and of the Company, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements of the Group and of the Company or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditors' report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

When we read the remaining other information expected to be included in the annual report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to the directors of the Company and take appropriate action.

Responsibilities of the directors for the financial statements

The directors of the Company are responsible for the preparation of financial statements of the Group and of the Company that give a true and fair view in accordance with MFRS Accounting Standards, IFRS Accounting Standards and the requirements of the Companies Act 2016 in Malaysia. The directors are also responsible for such internal control as the directors determine is necessary to enable the preparation of financial statements of the Group and of the Company that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements of the Group and of the Company, the directors are responsible for assessing the Group's and the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or the Company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements of the Group and of the Company as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements of the Group and of the Company, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS (CONT'D.)

Auditors' responsibilities for the audit of the financial statements (Cont'd.)

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also (Cont'd.):

- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's or the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements of the Group and of the Company or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group or the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements of the Group and of the Company, including the disclosures, and whether the financial statements of the Group and of the Company represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the group as a basis for forming an opinion on the financial statements of the Group. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the financial statements of the Group and of the Company for the current financial year and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Other matters

This report is made solely to the members of the Company, as a body, in accordance with Section 266 of the Companies Act 2016 in Malaysia and for no other purpose. We do not assume responsibility to any other person for the content of this report.

The accompanying notes form an integral part of the financial statements.

1. CORPORATE INFORMATION

AMMB Holdings Berhad ("AMMB" or "the Company") is a public limited liability company incorporated and domiciled in Malaysia, and listed on the main market of Bursa Malaysia Securities Berhad ("Bursa Malaysia"). The registered office of the Company is located at Level 22, Bangunan AmBank Group, No. 55, Jalan Raja Chulan, 50200 Kuala Lumpur.

The principal activity of the Company is that of investment holding.

The subsidiaries, as listed in Note 15, provide a wide range of wholesale banking, business banking, retail banking, investment banking and related financial services which also include Islamic banking business, stock and share-broking, futures broking, investment advisory and asset, real estate investment trust and unit trust management services. There have been no significant changes in the nature of the principal activities during the financial year.

The consolidated financial statements of the Company and its subsidiaries ("AMMB Group" or "the Group") and the separate financial statements of the Company have been approved and authorised for issue by the Board of Directors on 30 April 2026.

2. ACCOUNTING POLICIES

2.1 Basis of preparation

The financial statements have been prepared on a historical cost basis unless otherwise indicated in the financial statements.

In the preparation of these financial statements, the management of the Group and the Company have made an assessment of the ability of the Group and the Company to continue as a going concern. From the assessment, the management is not aware of any material uncertainties related to events or conditions that may cast significant doubt upon the Group's and the Company's ability to continue as a going concern, hence these financial statements have been prepared on a going concern basis.

2.2 Statement of compliance

The consolidated financial statements of the Group and the separate financial statements of the Company have been prepared in accordance with MFRS Accounting Standards, IFRS Accounting Standards, and the requirements of the Companies Act 2016 in Malaysia.

2.3 Presentation of financial statements

The financial statements are presented in Ringgit Malaysia ("RM" or "MYR") and all values are rounded to the nearest thousand ("RM'000") except when otherwise indicated.

The statements of financial position are presented in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (i.e. "current") and more than 12 months after the reporting date (i.e. "non-current") is presented in Note 48.

2.4 Basis of consolidation

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries as at 31 March 2026.

Subsidiaries are entities (including structured entities) over which the Group has control.

The Group controls an investee if, and only if, the Group has:

- power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- exposure, or rights, to variable returns from its involvement with the investee; and
- the ability to use its power over the investee to affect its returns.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

2. ACCOUNTING POLICIES (CONT'D.)

2.4 Basis of consolidation (Cont'd.)

Generally, control is established when the Group holds a majority of the voting rights of an investee. When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- the contractual arrangement with the other vote holders of the investee;
- rights arising from other contractual arrangements; and
- the size of the Group's voting rights and potential voting rights relative to the size and dispersion of voting rights and potential rights held by the other vote holders.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income, expenses and cash flows of a subsidiary are included in the consolidated financial statements, from the date the Group gains control until the date the Group ceases to control the subsidiary.

The profit or loss and each component of other comprehensive income ("OCI") are attributed to the equity owners of the Company and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

On consolidation, the assets and liabilities denominated in foreign currency are translated into RM at the exchange rates prevailing at the reporting date and their profit or loss items are translated at the average exchange rates for the financial year. The exchange differences arising on translation for consolidation are recognised in OCI. On disposal of a foreign subsidiary or operation, the component of OCI relating to that particular foreign subsidiary or operation is reclassified to profit or loss.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as transaction with equity owners of the Group. If the Group loses control over a subsidiary, it:

- derecognises the assets (including goodwill) and liabilities of the subsidiary;
- derecognises the carrying amount of any non-controlling interests;
- derecognises the cumulative translation differences recorded in equity;
- recognises any consideration received at its fair value;
- recognises any investment retained at its fair value;
- recognises any surplus or deficit in profit or loss; and
- reclassifies the parent's share of components previously recognised in OCI to profit or loss, or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities.

2.5 Summary of material accounting policies

(a) Business combinations and goodwill

Business combinations are accounted for using the acquisition method. The consideration transferred for the acquisition of a subsidiary is the acquisition date fair values of the assets transferred, the liabilities incurred to the former owners of the acquiree and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement and fair value of any pre-existing equity interest in the subsidiary.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. The Group recognises any non-controlling interest in the acquiree on an acquisition-by-acquisition basis, either at fair value or at the non-controlling interest's proportionate share of the recognised amounts of acquiree's identifiable net assets.

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(a) Business combinations and goodwill (Cont'd.)

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. For financial liabilities, this includes the separation of embedded derivatives in host contracts by the acquiree.

Acquisition-related costs are expensed as incurred.

If the business combination is achieved in stages, any previously held equity interest is remeasured at its acquisition date fair value and any resulting gain or loss is recognised in profit or loss.

Any contingent consideration to be transferred by the acquirer is recognised at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration that is classified as a financial asset or a financial liability is recognised in accordance with MFRS 9 *Financial Instruments* ("MFRS 9") in profit or loss. If the contingent consideration is not within the scope of MFRS 9, it is measured at fair value at each reporting date with changes in fair value recognised in profit or loss. Contingent consideration that is classified as equity is not remeasured and subsequent settlement is accounted for within equity.

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the identifiable net assets acquired is recognised as goodwill. If the total of consideration transferred, non-controlling interest recognised and previously held interest measured is less than the fair value of the net assets of the subsidiary acquired, the difference is recognised directly in profit or loss as a bargain purchase.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is reviewed for impairment annually, or more frequently, if events or changes in circumstances indicate that the carrying value may be impaired. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units ("CGU"), or groups of CGUs, that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units. Each unit to which the goodwill is allocated represents the lowest level within the Group at which the goodwill is monitored for internal management purposes, and is not larger than an operating segment in accordance with MFRS 8 *Operating Segments* ("MFRS 8").

Where goodwill has been allocated to a CGU (or a group of CGUs) and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the CGU retained.

(b) Investment in subsidiaries

In the Company's separate financial statements, investment in subsidiaries is accounted for at cost less accumulated impairment losses. On disposal of such investments, the difference between the net disposal proceeds and its carrying amounts are recognised in profit or loss.

(c) Investment in associates and joint ventures

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

A joint arrangement is an arrangement of which there is contractually agreed sharing of control by the Group with one or more parties, i.e. joint control, where decisions about the relevant activities relating to the joint arrangement require unanimous consent of the parties sharing control. A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(c) Investment in associates and joint ventures (Cont'd.)

The considerations made in determining significant influence or joint control are similar to those necessary to determine control over subsidiaries.

The Group's investment in associates and joint ventures are accounted for using the equity method.

Under the equity method, the investment in an associate or a joint venture is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the associates or joint ventures since the acquisition date. Dividends received or receivable from an associate or a joint venture are recognised as a reduction in the carrying amount of the investment. Goodwill relating to the associate or joint venture is included in the carrying amount of the investment and is neither amortised nor individually tested for impairment.

The statement of profit or loss reflects the Group's share of the results of operations of the associates or joint ventures. Any change in OCI of those investees is presented as part of the Group's OCI. In addition, when there has been a change recognised directly in the equity of the associates or joint ventures, the Group recognises its share of any changes, when applicable, in the statements of changes in equity. Unrealised gains and losses resulting from transactions between the Group and the associates or joint ventures are eliminated to the extent of the interest in the associates or joint ventures.

The aggregate of the Group's share of profit or loss of the associates and joint ventures is shown on the face of the statement of profit or loss and represents profit or loss after tax and non-controlling interests in the associates or joint ventures.

When the Group's share of losses in an associate or a joint venture equals or exceeds its interests in the investee, including any long-term interests that, in substance, form part of the Group's net investment in the investee, the Group does not recognise further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate or joint venture.

The financial statements of the associates or joint ventures are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

After application of the equity method, the Group determines whether it is necessary to recognise an impairment loss on its investments in associates or joint ventures. At each reporting date, the Group determines whether there is objective evidence that the investments in associates or joint ventures are impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amounts of the associates or joint ventures and their carrying values, and recognises the loss as "impairment loss on associates or joint ventures" in profit or loss.

Upon loss of significant influence or joint control over the associate or joint venture respectively, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate or joint venture upon loss of significant influence or joint control and the fair value of the retained investment and proceeds from disposal is recognised in profit or loss.

In the Company's separate financial statements, investments in associates or joint ventures are stated at cost less accumulated impairment losses. On disposal of such investment, the difference between net disposal proceeds and its carrying amounts are recognised in profit or loss.

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(d) Transactions with non-controlling interests

Non-controlling interests represent the portion of equity in subsidiaries not held directly or indirectly by the Group.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the consolidated statements of profit or loss, statements of comprehensive income, statements of changes in equity and statements of financial position, respectively. Any losses applicable to the non-controlling interests in excess of the non-controlling interests are allocated against the interests of the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions – that is, as transactions with the owners in their capacity as owners. In such circumstances, the carrying amounts of the non-controlling interests shall be adjusted to reflect the changes in relative interests in the subsidiaries. Any differences between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received shall be recognised directly in equity and attributable to the owners of the Group.

(e) Foreign currencies

(i) Functional and presentation currency

The individual financial statements of each entity within the Group are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The Group's consolidated financial statements and the Company's separate financial statements are presented in RM, which is also the Company's functional currency.

(ii) Transactions and balances

Transactions in foreign currencies are initially recorded by the entities within the Group at their respective functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency spot exchange rate at the reporting date.

All differences arising on settlement or translation of monetary items are recognised in profit or loss with the exception of monetary items that are designated as part of the hedge of the Group's net investment of a foreign operation. These are recognised in OCI until the net investment is disposed, at which time, the cumulative amount is reclassified to profit or loss. Tax charges and credits attributable to exchange differences on those monetary items are also recognised in OCI.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on retranslation of non-monetary items is treated in line with the recognition of gain or loss on changes in fair value of the item (i.e. translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

(f) Property and equipment

Property and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses. Such cost includes its purchase price and any cost that is directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management, as well as borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset. When significant parts of property and equipment are required to be replaced at intervals, the Group recognises such parts as individual assets with specific useful lives and depreciates them accordingly. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred. The present value of the expected cost for the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for a provision are met.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(f) Property and equipment (Cont'd.)

Purchased computer software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

Freehold land has an unlimited life and therefore, is not depreciated. Work-in-progress which are not yet available for use are not depreciated. Depreciation of other property and equipment is calculated on a straight-line basis to write-off the cost of each asset to its residual value over the estimated useful lives of the assets.

The annual depreciation rates for the various classes of property and equipment are as follows:

Leasehold land	2% or remaining lease period (whichever is shorter)
Buildings	2% or over the term of short-term lease (whichever is shorter)
Leasehold improvements	10% to 20%
Motor vehicles	20%
Computer equipment	12.5% to 33.33%
Office equipment, furniture and fittings	10% to 50%

An item of property and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss when the asset is derecognised.

The assets' residual values, useful lives and methods of depreciation are reviewed at each financial year end and adjusted prospectively if the expectations differ from previous estimates.

(g) Leases

The determination of whether an arrangement is, or contains, a lease is based on whether the arrangement conveys a right to control the use of asset, even if that right is not explicitly specified in an arrangement.

The Group as a lessee

Leases are recognised as right-of-use assets and corresponding lease liabilities at the date at which the leased asset is available for use by the Group.

At the commencement date of the leases, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating a lease, if the lease term reflects the Group exercising the option to terminate. The variable lease payments that do not depend on an index or a rate are recognised as expense in the period on which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset.

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(g) Leases (Cont'd.)

The Group as a lessee (Cont'd.)

Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received (if any). Where applicable, the cost of right-of-use assets also includes an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located. Unless the Group is reasonably certain to obtain ownership of the underlying asset at the end of the lease term, the recognised right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term, as follows:

Premises	50 years or over the term of short-term lease
Computer equipment	3 to 8 years

If the Group is reasonably certain to obtain ownership of the underlying asset at the end of the lease term, the right-of-use asset is depreciated over the underlying asset's useful life.

Right-of-use assets are assessed for impairment whenever there is an indication that the right-of-use assets may be impaired.

The Group applies the short-term lease recognition exemption to its short-term leases, i.e. those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option. It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered of low value, i.e. those with a value of RM20,000 or less when new. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

(h) Intangible assets, other than goodwill arising from business combination

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value as at the date of acquisition. Internally generated intangible assets, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the year in which the expenditure is incurred.

Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses. The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortised over useful lives ranging from 3 to 10 years and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortisation period or method, as appropriate, which are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in profit or loss in the expense category that is consistent with the function of the intangible assets.

Intangible assets with indefinite useful lives are not amortised, but are tested for impairment annually, either individually, or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in profit or loss when the asset is derecognised.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(h) Intangible assets, other than goodwill arising from business combination (Cont'd.)

(i) Research and development costs

Research costs are expensed as incurred. Development expenditures on an individual software project are recognised as an intangible asset when the Group can demonstrate:

- the technical feasibility of completing the intangible asset so that the asset will be available for use or sale;
- its intention to complete and its ability to use or sell the asset;
- how the asset will generate future economic benefits;
- the availability of resources to complete the asset;
- the ability to measure reliably the expenditure during development; and
- the ability to use the intangible asset generated.

Following initial recognition of the software development expenditure as an asset, the asset is carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation of the asset begins when development is complete and the asset is available for use. It is amortised on a straight-line basis over the period of expected benefit of 3 to 10 years. During the period of development, the asset is tested for impairment annually.

(i) Financial instruments – initial recognition and measurement

(i) Initial recognition

Financial assets and financial liabilities are recognised when the Group and the Company become a party to the contractual provisions of the instrument. Regular way purchases and sales of financial assets are recognised using trade date accounting or settlement date accounting. The method used is applied consistently for all purchases and sales of financial assets that belong to the same category of financial assets. The Group and the Company apply trade date accounting for derivative financial instruments and investments in equity instruments, and settlement date accounting for investments in debt instruments.

(ii) Initial measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

All financial liabilities are recognised initially at fair value and, in the case of financial liabilities not recorded at fair value through profit or loss, net of directly attributable transaction costs.

(iii) "Day 1" profit or loss

At initial measurement, if the transaction price differs from the fair value, the Group and the Company immediately recognise the difference between the transaction price and fair value (a "Day 1" profit or loss) provided that fair value is evidenced by a quoted price in an active market for an identical asset or liability (i.e. Level 1 input) or based on a valuation technique that uses only data from observable markets. In all other cases, the difference between the transaction price and model value is recognised in profit or loss on a systematic and rational basis that reflects the nature of the instrument over its tenure.

(j) Financial assets – classification and subsequent measurement

The Group and the Company classify its financial assets in the following measurement categories:

- Amortised cost;
- Fair value through other comprehensive income ("FVOCI"); or
- Fair value through profit or loss ("FVTPL").

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(j) Financial assets – classification and subsequent measurement (Cont'd.)

The classification requirements for debt and equity instruments are described below:

(i) Debt instruments

Debt instruments are those instruments that meet the definition of a financial liability from the issuer's perspective. Classification and subsequent measurement of debt instruments depend on:

Business model

The business model reflects how the Group and the Company manage the financial assets in order to generate cash flows. Specifically, it considers whether the Group's and the Company's objective is solely to collect the contractual cash flows from the assets, or is to collect both the contractual cash flows and cash flows arising from the sale of assets. If neither of these objectives applies (e.g. the financial assets are held-for-trading purposes), then the financial assets are classified under "other" business model. Factors considered by the Group and the Company in determining the business model for a portfolio of assets include past experience in collecting the cash flows, how the asset's performance is evaluated and reported to key management personnel, and how risks are assessed and managed.

Cash flow characteristics

Where the business model is to hold the financial assets to collect contractual cash flows, or to collect both the contractual cash flows and cash flows from the sale of assets, the Group and the Company assess whether the financial assets' contractual cash flows represent solely payments of principal and interest/profit ("SPPI"/"SPPP"). In making this assessment, the Group and the Company consider whether the contractual cash flows are consistent with a basic lending/financing arrangement, i.e. interest/profit includes only consideration for time value of money, credit risk, other basic lending/financing risks and a profit margin that is consistent with a basic lending/financing arrangement. Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are SPPI/SPPP.

Based on these factors, the Group and the Company classify the debt instruments into one of the following three measurement categories:

Amortised cost

Financial assets that are held for collection of contractual cash flows where those cash flows represent SPPI/SPPP, and that are not designated at FVTPL, are measured at amortised cost using the effective interest/effective profit method. The carrying amount of these assets is adjusted by any expected credit loss allowance recognised and measured using the methodology described in Note 2.5(o). Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate ("EIR")/effective profit rate ("EPR"). The EIR/EPR amortisation is included in "interest income"/"profit income" in profit or loss. The losses arising from impairment are recognised in the statements of profit or loss in "impairment losses on financial investments" for bonds and sukuk, "impairment losses on loans, advances and financing" for loans, advances and financing or "doubtful receivables" for losses other than bonds, sukuk, loans, advances and financing.

FVOCI

Financial assets that are held for contractual cash flows and cash flows from the sale of the assets, where the assets' cash flows represent SPPI/SPPP, and are not designated at FVTPL, are measured at FVOCI. Changes in the fair value are recognised through OCI, except for interest income/profit income and foreign exchange gains or losses on the assets' amortised cost which are recognised in profit or loss. Interest/profit earned whilst holding the assets is reported as "interest income"/"profit income" using the effective interest/effective profit method. The losses arising from impairment are reclassified from OCI to profit or loss in "impairment losses on financial investments". When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified to profit or loss and recognised in "other operating income".

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(j) Financial assets – classification and subsequent measurement (Cont'd.)

(i) Debt instruments (Cont'd.)

FVTPL

Financial assets that do not meet the criteria for amortised cost or FVOCI, including financial assets held-for-trading and derivatives, are measured at FVTPL. A gain or loss on an asset that is subsequently measured at FVTPL and is not part of a hedging relationship is recognised in profit or loss and presented within "investment and trading income". Interest/profit earned whilst holding the assets is reported as "interest income"/"profit income" using the effective interest/effective profit method.

In addition, financial assets that meet the criteria for amortised cost or FVOCI may be irrevocably designated by management as FVTPL on initial recognition, provided the designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the assets or liabilities or recognising gains or losses on them on a different basis. Such designation is determined on an instrument by instrument basis. Any change in fair value is recognised in profit or loss and presented within "investment and trading income". Interest/profit earned is recognised in "interest income"/"profit income" using the effective interest/effective profit method.

(ii) Reclassification of debt investments

The Group and the Company reclassify debt investments when and only when the business model for managing those assets changes. The reclassification takes place from the start of the first reporting period following the change. Such changes are expected to be very infrequent and none occurred during the financial year.

(iii) Equity instruments

Equity instruments are instruments that meet the definition of equity from the issuer's perspective; that is, instruments that do not contain a contractual obligation to pay and that evidence a residual interest in the issuer's net assets.

The Group and the Company subsequently measure all equity investments at FVTPL, except where the management has elected at initial recognition to irrevocably designate an equity investment that is not held-for-trading at FVOCI. When this election is used, fair value gains and losses are recognised in OCI and are not subsequently reclassified to profit or loss, including on disposal. Dividends earned whilst holding the equity investment are recognised in profit or loss as "other operating income" when the right to the payment has been established.

Gains and losses on equity investments at FVTPL, including dividends earned, are included in "investment and trading income" in profit or loss.

(k) Financial liabilities – classification and subsequent measurement

Financial liabilities are classified as subsequently measured at amortised cost, except for:

- financial liabilities at FVTPL; and
- financial guarantee contracts and loan/financing commitments (see Note 2.5(u)).

(i) Amortised cost

Financial liabilities issued by the Group and the Company, that are not designated at FVTPL, are classified as financial liabilities at amortised cost, where the substance of the contractual arrangement results in the Group and the Company having an obligation either to deliver cash or another financial asset to the holder, or to satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

After initial measurement, term funding, debt capital and other borrowings/financings are subsequently measured at amortised cost using the effective interest/effective profit method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR/EPR.

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(k) Financial liabilities – classification and subsequent measurement (Cont'd.)

(i) Amortised cost (Cont'd.)

A compound financial instrument which contains both a liability and an equity component is separated at the issue date. A portion of the net proceeds of the instrument is allocated to the debt component on the date of issue based on its fair value (which is generally determined based on the quoted market prices for similar debt instruments). The equity component is assigned the residual amount after deducting from the fair value of the instrument as a whole the amount separately determined for the debt component. The value of any derivative features (such as a call option) embedded in the compound financial instrument other than the equity component is included in the debt component.

(ii) FVTPL

This classification is applied to derivatives, financial liabilities held-for-trading and other financial liabilities designated as such at initial recognition. Gains or losses on financial liabilities designated at FVTPL are presented partially in OCI (being the amount of change in the fair value of the financial liability that is attributable to changes in credit risk of that liability) and partially in profit or loss (i.e. the remaining amount of change in fair value of the liability). This is unless such presentation would create, or enlarge, an accounting mismatch, in which case the gains and losses attributable to changes in the credit risk of the liability are also presented in profit or loss.

(l) Derecognition of financial instruments

(i) Derecognition of financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- the rights to receive cash flows from the asset have expired; or
- the Group and the Company have transferred rights to receive cash flows from the asset or have assumed an obligation to pay the received cash flows in full without material delay to a third party under a "pass-through" arrangement; and either:
  - the Group and the Company have transferred substantially all the risks and rewards of the asset; or
  - the Group and the Company have neither transferred nor retained substantially all the risks and rewards of the asset, but have transferred control of the asset.

When the Group and the Company have transferred rights to receive cash flows from an asset or have entered into a pass-through arrangement, and have neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Group's and the Company's continuing involvement in the asset. In that case, the Group and the Company also recognise an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group and the Company have retained.

(ii) Modification of financial assets

When the contractual cash flows of a financial asset are renegotiated or otherwise modified as a result of commercial restructuring activity, the Group assesses whether or not the new terms are substantially different to the original terms. The Group does this by considering, among others, the following factors:

- if the borrower/customer/counterparty is in financial difficulty, whether the modification merely reduces the contractual cash flows to amounts the borrower/customer/counterparty is expected to be able to pay;
- whether any substantial new terms are introduced, such as a profit share or equity-based return that substantially affects the risk profile of the financial asset;
- significant extension of the repayment term when the borrower/customer/counterparty is not in financial difficulty;
- significant change in the interest rate/profit rate;
- change in the currency the financial asset is denominated in; or
- insertion of collateral, other security or credit enhancements that significantly affect the credit risk associated with the financial asset.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(l) Derecognition of financial instruments (Cont'd.)

(ii) Modification of financial assets (Cont'd.)

If the terms are substantially different, the Group derecognises the original financial asset and recognises a "new" asset at fair value and recalculates a new EIR/EPR for the asset. The date of renegotiation is consequently considered to be the date of initial recognition for impairment calculation purposes, including for the purpose of determining whether a significant increase in credit risk ("SICR") has occurred. However, the Group also assesses whether the new financial asset recognised is deemed to be credit-impaired at initial recognition, especially in circumstances where the renegotiation was driven by the borrower/customer/counterparty being unable to make the originally agreed payments. For purchased or originated credit-impaired ("POCI") financial assets, the new gross carrying amount is recalculated by discounting the modified cash flows at the credit-adjusted EIR/EPR. Differences in the carrying amount are recognised in profit or loss as a gain or loss on derecognition.

If the terms are not substantially different, the renegotiation or modification does not result in derecognition, and the Group recalculates the gross carrying amount based on the revised cash flows of the financial asset and recognises a modification gain or loss in profit or loss. The new gross carrying amount is recalculated by discounting the modified cash flows at the original EIR/EPR.

(iii) Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expired.

When an existing financial liability is replaced by another from the same lender/financier on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original EIR/EPR, is at least 10% different from the discounted present value of the remaining cash flows of the original financial liability. In addition, other qualitative factors such as the currency that the instrument is denominated in, changes in the type of interest rate/profit rate, new conversion features attached to the instrument and changes in covenants are also taken into consideration. The difference in the respective carrying amount of the original financial liability and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

If the exchange or modification is not accounted for as an extinguishment, any costs or fees incurred are adjusted to the carrying amount of the financial liability and are amortised over the remaining term of the modified financial liability.

(m) Repurchase and reverse repurchase agreements

Securities sold under repurchase agreements at a specified future date are not derecognised from the statement of financial position as the Group retains substantially all the risks and rewards of ownership. The corresponding cash received is recognised in the statement of financial position as an asset with a corresponding obligation to return it, including accrued interest, as a liability within "securities sold under repurchase agreements", reflecting the transaction's economic substance as a loan to the Group. The difference between the sale and repurchase prices is treated as interest expense and is accrued over the life of the agreement using the EIR. When the counterparty has the right to sell or repledge the securities, the Group reclassifies those securities in the statement of financial position to "financial assets at FVTPL pledged as collateral" or to "financial investments at FVOCI pledged as collateral", as appropriate.

Conversely, securities purchased under agreements to resell at a specified future date are not recognised in the statement of financial position. The consideration paid, including accrued interest, is recorded in the statement of financial position, within "securities purchased under resale agreements", reflecting the transaction's economic substance as a loan by the Group. The difference between the purchase and resale prices is recorded in "interest income" and is accrued over the life of the agreement using the EIR.

If securities purchased under agreement to resell are subsequently sold to third parties, the obligation to return the securities is recorded as a short sale within "financial liabilities at FVTPL" and measured at fair value with any gains or losses included in "investment and trading income".

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(n) Fair value measurement

The Group measures financial instruments such as financial assets and financial liabilities at FVTPL, financial investments at FVOCI and derivatives at fair value at each reporting date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

– in the principal market for the asset or liability; or

– in the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or most advantageous market must be accessible to the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurements as a whole:

Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities;
Level 2 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable; and/or
Level 3 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets or liabilities that are recognised at fair value in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The fair value hierarchies of the following are disclosed in Note 51:

(i) financial instruments that are measured at fair value; and

(ii) financial assets, financial liabilities and non-financial assets that are not measured at fair value, but for which fair value is disclosed.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(o) Financial instruments – expected credit losses ("ECL")

The Group and the Company assess on a forward-looking basis the ECL associated with debt instrument assets carried at amortised cost and FVOCI and with the exposure arising from loan/financing commitments and financial guarantee contracts. The Group and the Company recognise a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- the time value of money; and
- reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The carrying amount of the asset is reduced through the use of an allowance account and the loss is recognised in profit or loss, except for debt instruments measured at FVOCI, an amount equivalent to the allowance recognised in OCI as an accumulated impairment amount with the corresponding charge to profit or loss. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring or a change in forward-looking adjustments after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the allowance account or impairment amount.

For loan/financing commitments and financial guarantee contracts, the loss allowance is recognised as a provision. However, for contracts that include both a loan/financing and an undrawn commitment and the Group cannot separately identify the ECL on the undrawn commitment component from those on the loan/financing component, the ECL on the undrawn commitment are recognised together with the loss allowance for the loan/financing. To the extent that the combined ECL exceeds the gross carrying amount of the loan/financing, the ECL is recognised as a provision.

The methodology applied in measuring ECL is explained in Note 50.2.

Loans, advances and financing together with the associated allowance are written off when all practical recovery efforts have been exhausted and there is no realistic prospect of future recovery, and all collateral has been realised or has been transferred to the Group. The Group may also write-off financial assets that are still subject to enforcement activity when there is no reasonable expectation of full recovery. If a write-off is later recovered, the recovery is credited to profit or loss.

(i) Rescheduled and restructured loans, advances and financing

Where possible, the Group seeks to reschedule or restructure loans, advances and financing rather than to take possession of collateral. This may involve extending the payment arrangements and the agreement of new loans, advances and financing conditions. Once the terms have been rescheduled or restructured, any impairment is measured using the original EIR/EPR as calculated before the modification of terms. Management continually reviews impaired rescheduled or restructured loans, advances and financing for a certain period to ensure all terms are adhered to and that future payments are likely to occur before the loan is reclassified back to performing status.

(ii) Collateral valuation

The Group seeks to use collateral, where possible, to mitigate its risks on financial assets. The collateral comes in various forms such as cash, securities, letters of credit/guarantees, real estate, receivables, inventories, other non-financial assets and credit enhancements such as netting agreements. The fair value of collateral is generally assessed, at a minimum, at inception and based on the Group's quarterly reporting schedule, however, some collateral, for example, cash or securities relating to margining requirements, is valued daily.

To the extent possible, the Group uses active market data for valuing financial assets held as collateral. Other financial assets which do not have a readily determinable market value are valued using models. Non-financial collateral, such as real estate, is valued based on data provided by third parties such as property valuers, mortgage brokers, housing price indices, audited financial statements, and other independent sources (See Note 50.2.1d for further analysis of collateral).

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(o) Financial instruments – expected credit losses ("ECL") (Cont'd.)

(iii) Collateral repossessed

The Group's policy is to determine whether a repossessed asset is best used for internal operations or should be sold. Repossessed financial assets determined to be useful for the internal operations are classified based on their characteristics, business model and the cash flow characteristics, and are measured at their fair value in the same manner as described in Note 2.5(n). Repossessed non-financial assets determined to be useful for the internal operations are transferred to their relevant asset category at the lower of their repossessed value and the carrying value of the original secured asset. Repossessed assets that are determined better to be sold are immediately transferred to assets held for sale if the sale is deemed highly probable within a short period following the repossession, whereby financial assets are measured at their fair value whereas non-financial assets are measured at the lower of fair value less cost to sell at the repossession date and the carrying value of the original secured asset.

(p) Hedge accounting

The Group makes use of derivative instruments to manage exposures to interest rate/profit rate risk, including exposures arising from forecast transactions and firm commitments. In order to manage particular risks, the Group applies hedge accounting for transactions which meet specified criteria.

At inception of the hedge relationship, the Group formally documents the relationship between the hedged item and the hedging instrument, including the nature of the risk, the risk management objective and strategy for undertaking the hedge and the method that will be used to assess the effectiveness of the hedging relationship at inception and on an ongoing basis.

At each hedge effectiveness assessment date, a hedge relationship must be expected to be highly effective on a prospective basis for the designated period in order to qualify for hedge accounting. A formal assessment is undertaken by comparing the hedging instrument's effectiveness in offsetting the changes in fair value or cash flows attributable to the hedged risk in the hedged item, both at inception and at each quarter end on an ongoing basis. Hedge ineffectiveness is recognised in profit or loss. For situations where the hedged item is a forecast transaction, the Group also assesses whether the transaction is highly probable and presents an exposure to variations in cash flows that could ultimately affect profit or loss.

(i) Fair value hedges

The change in the fair value of a hedging derivative is recognised in "investment and trading income" in profit or loss. The change in the fair value of the hedged item attributable to the risk hedged is recorded as part of the carrying value of the hedged item and is also recognised in "investment and trading income" in the statement of profit or loss.

For fair value hedges relating to items recorded at amortised cost, any adjustment to carrying value is amortised through profit or loss over the remaining term of the hedge using the effective interest/effective profit method. EIR/EPR amortisation may begin as soon as an adjustment exists and no later than when the hedged item ceases to be adjusted for changes in its fair value attributable to the risk being hedged.

If the hedged item is derecognised, the unamortised fair value is recognised immediately in profit or loss.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(p) Hedge accounting (Cont'd.)

(ii) Cash flow hedges

The effective portion of the gain or loss on the hedging instrument is recognised in OCI in the "cash flow hedge reserve", while any ineffective portion is recognised immediately in "investment and trading income" in the statement of profit or loss.

Amounts recognised as OCI are transferred to profit or loss when the hedged transaction affects profit or loss, such as when the hedged financial income or financial expense is recognised or when a forecast sale occurs. When the hedged item is the cost of a non-financial asset or non-financial liability, the amounts recognised as OCI are transferred to the initial carrying amount of the non-financial asset or liability.

If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover (as part of the hedging strategy), or if its designation as a hedge is revoked, or when the hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss previously recognised in OCI remains separately in equity until the forecast transaction occurs.

(q) Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the statements of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

(r) Impairment of non-financial assets

The Group and the Company assess at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group and the Company estimate the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or CGU's fair value less costs of disposal and its value-in-use ("VIU"). Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing VIU, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded entities or other available fair value indicators.

For assets excluding goodwill and intangible assets with indefinite useful lives, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Group and the Company estimate the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in profit or loss.

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(r) Impairment of non-financial assets (Cont'd.)

The following assets have specific characteristics for impairment testing:

(i) Goodwill

Goodwill is tested for impairment annually and when circumstances indicate that the carrying value may be impaired.

Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or group of CGUs) to which the goodwill relates. When the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods.

(ii) Intangible assets

Intangible assets with indefinite useful lives are tested for impairment annually either individually or at the CGU level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

(s) Cash and cash equivalents

Cash and short-term funds in the statements of financial position comprise cash and bank balances with banks and other financial institutions and short-term deposits maturing within one month.

For the purpose of the statements of cash flows, cash and cash equivalents consist of cash and short-term funds with original maturity of 3 months or less.

(t) Contingent liabilities and contingent assets

A contingent liability is a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation or in extremely rare cases whereby there is a liability that cannot be recognised because it cannot be measured with sufficient reliability. The contingent liability is not recognised but instead is disclosed in the financial statements. A possible obligation that arises from past events whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group is also disclosed as a contingent liability unless the probability of outflow or economic resources is remote.

A contingent asset is a possible asset that arises from past events whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group. The Group does not recognise contingent assets in the financial statements but discloses its existence where inflows of economic benefits are probable, but not virtually certain.

(u) Financial guarantee contracts and loan/financing commitments

Financial guarantee contracts issued by the Group are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor/customer fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance (calculated as described in Note 2.5(o)) and the premium received on initial recognition less income recognised in accordance with the principles of MFRS 15 Revenue from Contract with Customers.

Loan/financing commitments provided by the Group are measured at the amount of the loss allowance (calculated as described in Note 2.5(o)).

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(v) Recognition of income and expenses

(A) Recognition of income and expenses relating to financial instruments

(i) Interest/profit income and similar income and expense

For all interest-bearing/profit-bearing financial assets and financial liabilities measured at amortised cost, interest-bearing/profit-bearing financial investments at FVOCI and financial assets and financial liabilities at FVTPL, interest/financing income or expense is calculated using the effective interest/effective profit method. EIR/EPR is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. The calculation takes into account all contractual terms of the financial instrument and includes any fees or incremental costs that are directly attributable to the instrument and are an integral part of the EIR/EPR, but not future credit losses.

The carrying amount of the financial asset or financial liability is adjusted if the Group revises its estimates of payments or receipts. The adjusted carrying amount is calculated based on the original EIR/EPR and the change in carrying amount is recorded in profit or loss. However, for a reclassified financial asset for which the Group subsequently increases its estimates of future cash receipts as a result of increased recoverability of those cash receipts, the effect of that increase is recognised as an adjustment to the EIR/EPR from the date of the change in estimate.

Once the recorded value of a financial asset or a group of similar financial assets has been reduced due to an impairment loss, interest income/profit income continues to be recognised using the rate of interest/profit used to discount the future cash flows for the purpose of measuring the impairment loss.

Loan/financing commitment fees for loans, advances and financing that are likely to be drawn down and other credit related fees are deferred (together with any incremental costs) and recognised as an adjustment to the EIR/EPR on the loans, advances and financing.

Interest/Profit income on financial assets, other than those that are credit-impaired, is calculated by applying the EIR/EPR to the gross carrying amount of the financial asset. When a financial asset becomes credit-impaired, interest/profit income is calculated by applying the EIR/EPR to the amortised cost of the financial asset.

For POCI financial assets, interest/profit income is calculated by applying credit-adjusted EIR/EPR to the amortised cost of the financial asset. The credit-adjusted EIR/EPR is the rate that, at initial recognition, discounts the estimated future cash flows, including expected credit losses, to the amortised cost of the POCI financial asset.

(ii) Dividend income

Revenue is recognised when the Group's right to receive the payment is established, it is probable that the economic benefits will flow to the Group and the amount of payment can be reliably measured. The conditions are generally met when shareholders approve the dividend.

(iii) Investment and trading income

Results arising from trading activities include all gains and losses from changes in fair value and dividends for financial investments held-for-trading classified as financial assets at FVTPL. This includes any ineffectiveness recorded in hedging transactions.

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(v) Recognition of income and expenses (Cont'd.)

(B) Recognition of revenue from contracts with customers

Revenue is recognised by reference to each distinct performance obligation promised in the contract with customer as or when the Group transfers the control of the goods or services promised in a contract and the customer obtains control of the goods or services. Depending on the substance of the respective contract with customer, the control of the promised goods or services may transfer over time or at a point in time.

A contract with customer exists when the contract has commercial substance, the Group and its customer have approved the contract and intend to perform their respective obligations, the Group's and the customer's rights regarding the goods or services to be transferred and the payment terms can be identified, and it is probable that the Group will collect the consideration to which it will be entitled to in exchange of those goods or services.

At the inception of each contract with customer, the Group assesses the contract to identify distinct performance obligations, being the units of account that determine when and how revenue from the contract with customer is recognised.

Revenue is measured at the amount of consideration to which the Group expects to be entitled in exchange for transferring the promised goods or services to the customers, excluding amounts collected on behalf of third parties. If the amount of consideration varies, the Group estimates the amount of consideration that it expects to be entitled based on the expected value or the most likely outcome but the estimation is constrained up to the amount that is highly probable of no significant reversal in the future. If the contract with customer contains more than one distinct performance obligation, the amount of consideration is allocated to each distinct performance obligation based on the relative stand-alone selling prices of the goods or services promised in the contract.

The consideration allocated to each performance obligation is recognised as revenue as or when the customer obtains control of the goods or services. At the inception of each contract with customer, the Group determines whether control of the goods or services for each performance obligation is transferred over time or at a point in time. Revenue is recognised over time if the control over the goods or services is transferred over time. Revenue for performance obligation that is not satisfied over time is recognised at the point in time at which the customer obtains control of the promised goods or services.

The following specific recognition criteria must be met before revenue is recognised:

(i) Fee and commission income

The Group earns fee and commission income from a diverse range of services it provides to its customers. Fee income can be divided into the following two categories:

Fee income earned from services where performance obligations are satisfied over time

Fees earned for the provision of services over a period of time are accrued over that period by reference to the stage of completion of the services. These fees include commission income, interchange, asset management, custody and other management and advisory fees. Loan/Financing commitment fees for loans, advances and financing that are unlikely to be drawn down are recognised over the commitment period on a straight-line basis.

Fee income from providing transaction services where performance obligations are satisfied at a point in time

Fees arising from negotiating or participating in the negotiation of a transaction for a third party, such as the arrangement of the acquisition of shares or other securities, the purchase or sale of businesses, brokerage, underwriting, or loan syndication/ arrangement services are recognised on completion of the underlying transaction. Fees or components of fees that are linked to a certain performance are recognised after fulfilling the corresponding criteria. Revenue from sale of unit trusts is recognised upon allotment of units, net of cost of units sold or as a percentage of sales value.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(v) Recognition of income and expenses (Cont'd.)

(B) Recognition of revenue from contracts with customers (Cont'd.)

The following specific recognition criteria must be met before revenue is recognised: (Cont'd.)

(ii) Customer loyalty programmes

Award credits under customer loyalty programmes are accounted for as a separately identifiable component of the transaction in which the award credits are granted. The fair value of the consideration received in respect of the initial sale is allocated between the award credits and the other components of the transaction on a relative stand-alone selling price basis. If stand-alone selling price of the other component is uncertain, the Group estimates the stand-alone selling price by reference to the total transaction price less the fair value of the award credits. Revenue from the award credits is recognised when the award credits are redeemed or expired. The amount of revenue recognised when the award credits are redeemed is based on the number of award credits redeemed relative to the total number expected to be redeemed.

(w) Employee benefits

(i) Short-term benefits

Wages, salaries, bonuses and social security contributions that are expected to be settled wholly within 12 months after the end of the financial year in which the employees render the related service are recognised as an expense in the financial year in which the associated services are rendered by employees of the Group and are measured at the amounts paid or expected to be paid when the liabilities are settled. Short-term accumulating compensated absences such as paid annual leave are recognised when services are rendered by employees that increase their entitlement to future compensated absences, and short-term non-accumulating compensated absences such as sick leave are recognised when the absences occur.

(ii) Defined contribution pension plan

The Group makes contributions to the Employee Provident Fund ("EPF"), as well as defined contribution private retirement schemes in Malaysia. Such contributions are recognised as an expense in profit or loss in the financial year to which they relate. Once the contributions have been paid, the Group has no further payment obligations.

(iii) Termination benefits

Termination benefits are payable whenever an employee's employment is terminated before the normal retirement date or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Group recognises termination benefits when the Group demonstrably committed to either terminate the employment of current employees according to a detailed formal plan without possibility of withdrawal or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Benefits falling due more than 12 months after the reporting date are discounted to present value.

(iv) Share-based payment transactions

The Company operates an equity-settled share-based compensation scheme, known as the Executives' Share Scheme ("ESS") wherein shares are granted to eligible directors and employees of the Group based on certain financial and performance criteria and such conditions as it may deem fit.

The cost of equity-settled transactions is recognised, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled, ending on the date on which the relevant employees become fully entitled to the award ("the vesting date"). The cumulative expense recognised for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the number of equity instruments that will ultimately vest. The charge or writeback of shares granted under ESS for the period is recorded in "personnel costs" and represents the movement in cumulative expense recognised as at the beginning and end of that period.

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(w) Employee benefits (Cont'd.)

(iv) Share-based payment transactions (Cont'd.)

Where the terms of an equity-settled award are modified, the minimum expense recognised in "personnel costs" is the expense as if the terms had not been modified. An additional expense is recognised for any modification which increases the total fair value of the share-based payment arrangement, or is otherwise beneficial to the employee as measured at the date of modification.

Where an equity-settled award is cancelled, it is treated as if it had vested on the date of cancellation, and any expense not yet recognised for the award is recognised immediately. This includes any award where non-vesting conditions within the control of either the entity or the counterparty are not met. However, if a new award is substituted for the cancelled award, and designated as a replacement award on the date that it is granted, the cancelled and new awards are treated as if they were a modification of the original award, as described in the previous paragraph.

(x) Dividends on ordinary shares

Dividends on ordinary shares are recognised as a liability and deducted from equity when they are approved by the Company's shareholders. Interim dividends are deducted from equity when they are declared.

Dividends for the year that are approved between the end of the reporting period and the date the financial statements are authorised for issue are disclosed as an event after the reporting period.

(y) Taxes

(i) Current tax

Current tax assets and liabilities for the current and prior financial years are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the reporting date. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions, where appropriate, on the basis of amounts expected to be paid to the tax authorities.

Current taxes are recognised in profit or loss except to the extent that the tax relates to items recognised outside profit or loss. Current taxes relating to items recognised in OCI or directly in equity are recognised in OCI or equity respectively.

(ii) Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- when the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of taxable temporary differences associated with investments in subsidiaries and associates, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(y) Taxes (Cont'd.)

(ii) Deferred tax (Cont'd.)

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

– when the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and

– in respect of deductible temporary differences associated with investments in subsidiaries and associates, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss. Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Tax benefits acquired as part of a business combination, but not satisfying the criteria for separate recognition at that date, would be recognised subsequently if new information about facts and circumstances change. The adjustment is either treated as a reduction in goodwill (as long as it does not exceed goodwill) if it was incurred during the measurement period or recognised in profit or loss.

(z) Zakat

This represents business zakat payable by the Group to comply with Shariah principles approved by AmBank Islamic's Shariah Committee. Zakat provision is calculated by reference to the zakat rate of 2.5775% of the net profit after taxation of AmBank Islamic. The amount of zakat assessed is recognised as an expense in the period in which it is incurred.

In the financial year, the Group has fulfilled its obligation to pay business zakat to state zakat authorities and has identified eligible beneficiaries (asnaf).

(aa) Earnings Per Share ("EPS")

The Group presents basic and diluted EPS data for its ordinary shares in Note 41. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period net of treasury shares. Diluted EPS is determined by adjusting the profit or loss attributable to the ordinary shareholder and the weighted average number of ordinary shares outstanding, including the effects of all dilutive potential ordinary shares.

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(ab) Segment reporting

Segment reporting in the financial statements is presented on the same basis as that used by management internally for evaluating operating segment performance and in deciding how to allocate resources to operating segments. Operating segments are distinguishable components of the Group about which separate financial information is available and is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. Reportable segments are operating segments or aggregations of operating segments of similar economic characteristics that meet specific aggregation criteria.

The Group's segmental reporting is based on the following operating segments: retail banking, business banking, wholesale banking, investment banking, funds management, insurance and others, as disclosed in Note 52.

(ac) Fiduciary assets

The Group provides trust and other fiduciary services that result in the holding or investing of assets on behalf of their clients. Assets held in a fiduciary capacity are not recognised as assets of the Group.

(ad) Insurance/takaful and reinsurance/retakaful contracts

(i) Classification of contracts

The Group's associate and joint ventures issue insurance/takaful contracts in the normal course of business, under which significant insurance/takaful risk from their policyholders/certificateholders are accepted. Reinsurance contracts are issued in the normal course of business to compensate other entities for claims arising from one or more insurance contracts issued by those entities.

The Group determines whether a contract contains significant insurance/takaful risk, by comparing benefits payable after an insured event with benefits payable if the insured event did not occur.

(ii) Separating components from insurance/takaful and reinsurance/retakaful contracts

The Group assesses its insurance/takaful and reinsurance/retakaful products to determine whether they contain distinct components which must be accounted for under another MFRS rather than MFRS 17 Insurance Contracts ("MFRS 17"). After separating any distinct components, the Group applies MFRS 17 to all remaining components of the (host) insurance contract. Currently, the products of associate and joint ventures do not include any distinct components that require separation.

Some insurance contracts issued contain cashback or experience refund arrangements. Under these arrangements, there is a minimum guaranteed amount that the policyholder will always receive either in the form of profit commission, or as claims, or another contractual payment irrespective of the insured event happening. The minimum guaranteed amounts have been assessed to be highly interrelated with the insurance component of the insurance contracts and are, therefore, non-distinct investment components which are not accounted for separately. However, receipts and payments of these investment components are recognised outside of the income statement.

Some family takaful contracts issued include a surrender option under which the surrender value is paid to the certificateholder on maturity or earlier lapse of the contract. These surrender options have been assessed to meet the definition of a non-distinct investment component in MFRS 17.

It is common for the insurance/takaful contracts issued (basic policy/certificate) to be attached with a series of riders, also known as a supplementary contract. Given that it is possible for the coverage and nature of the basic policy/certificate and rider to differ, the Group assesses if the basic policy/certificate and rider should be separated and thereby valued separately.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(ad) Insurance/takaful and reinsurance/retakaful contracts (Cont'd.)

(ii) Separating components from insurance/takaful and reinsurance/retakaful contracts (Cont'd.)

In making this assessment, the Group considers the following factors:

- presence of cash flows dependencies between basic policy/certificate and riders;
- whether the basic policy/certificate and riders are distinct components (i.e. whether they lapse separately or whether they can be priced and sold separately); and
- substance of the combined basic policy/certificate and rider.

The Group measures all riders together with the basic policy/certificate due to the cash flow dependency between the insurance/takaful funds.

(iii) Level of aggregation

Insurance/takaful and reinsurance/retakaful contracts are aggregated into groups for applying its requirements. Groups of insurance/takaful contracts and reinsurance/retakaful contracts are determined by first identifying portfolios of insurance/takaful contracts and reinsurance/retakaful contracts, each comprising contracts subject to similar risks and managed together. The portfolios are further divided by annual cohort (year of issue) and profitability for recognition and measurement purposes. No group of insurance/takaful contracts and reinsurance/retakaful contracts for level of aggregation purposes may contain contracts issued more than one year apart. Hence, within each annual cohort, portfolios of contracts are divided into three groups, as follows:

- a group of contracts that are onerous at initial recognition;
- a group of contracts that at initial recognition have no significant possibility of becoming onerous subsequently; and
- a group of the remaining contracts in the portfolio.

The portfolios of reinsurance/retakaful contracts held are further divided into:

- a group of contracts on which there is a net gain on initial recognition;
- a group of contracts that have no significant possibility of a net gain arising subsequent to initial recognition; and
- a group of the remaining contracts in the portfolio.

(iv) Recognition

The Group recognises groups of insurance/takaful contracts it issues from the earliest of the following:

- the beginning of the coverage period of the group of contracts;
- the date when the first payment from a policyholder/certificateholder is due or when the first payment is received if there is no due date; and
- when facts and circumstances indicate that the group of contracts is onerous.

The Group recognises a group of reinsurance/retakaful contracts held it has entered into from the earlier of the following:

- the beginning of the coverage period of the group of reinsurance/retakaful contracts held. However, the Group delays the recognition of a group of reinsurance/retakaful contracts held that provide proportionate coverage until the date any underlying insurance/takaful contract is initially recognised, if that date is later than the beginning of the coverage period of the group of reinsurance/retakaful contracts held, and
- the date the Group recognises an onerous group of underlying insurance/takaful contracts if the Group entered into the related reinsurance/retakaful contract held in the group of reinsurance/retakaful contracts held at or before that date.

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(ad) Insurance/takaful and reinsurance/retakaful contracts (Cont'd.)

(v) Contract boundary

The Group includes in the measurement of a group of insurance/takaful contracts all the future cash flows within the boundary of each contract in the group. Cash flows are within the boundary of an insurance/takaful contract if they arise from substantive rights and obligations that exist during the reporting period in which the Group can compel the policyholder/certificateholder to pay the premiums/contributions, or in which the Group has a substantive obligation to provide the policyholder/certificateholder with insurance/takaful contract services. A substantive obligation to provide insurance/takaful contract services ends when:

– the Group has the practical ability to reassess the risks of the particular policyholder/certificateholder and, as a result, can set a price or level of benefits that fully reflects those risks, or

– both of the following criteria are satisfied:
  - the Group has the practical ability to reassess the risks of the portfolio of insurance/takaful contracts that contain the contract and, as a result, can set a price or level of benefits that fully reflects the risk of that portfolio; and
  - the pricing of the premiums/contributions up to the date when the risks are reassessed does not take into account the risks that relate to periods after the reassessment date.

For insurance/takaful contracts with renewal periods, the Group assesses whether premiums/contributions and related cash flows that arise from the renewed contract are within the contract boundary. The pricing of the renewals is established by the Group by considering all the risks covered for the policyholder/certificateholder by the Group, that the Group would consider when underwriting equivalent contracts on the renewal dates for the remaining service. Therefore, the cash flows related to renewals of insurance/takaful contracts will not be included in the contract boundary.

For groups of reinsurance/retakaful contracts held, cash flows are within the contract boundary if they arise from substantive rights and obligations that exist during the reporting period in which the Group is compelled to pay amounts to the reinsurer/retakaful operator or has a substantive right to receive services from the reinsurer/retakaful operator. A substantive right to receive services from the reinsurer/retakaful operator ends when the reinsurer/retakaful operator:

– has the practical ability to reassess the risks transferred to it and can set a price or level of benefits that fully reflects those reassessed risks; or

– has a substantive right to terminate the coverage.

Cash flows that are not directly attributable to a portfolio of insurance/takaful contracts are recognised in other operating expenses as incurred.

The contract boundary is reassessed at each reporting date to include the effect of changes in circumstances on the Group's substantive rights and obligations and, therefore, may change over time.

(vi) Contracts not measured under premium allocation approach ("PAA")

Initial measurement

On initial recognition, the Group measures a group of insurance/takaful contracts as the total of (a) the fulfilment cash flows, adjusted to reflect the time value of money and the associated financial risks, and a risk adjustment for non-financial risk; and (b) the contractual service margin ("CSM").

The risk adjustment for non-financial risk is applied to the present value of the estimated future cash flows, and it reflects the compensation that the Group requires for bearing the uncertainty about the amount and timing of the cash flows from non-financial risk as the Group fulfils insurance/takaful contracts.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(ad) Insurance/takaful and reinsurance/retakaful contracts (Cont'd.)

(vi) Contracts not measured under premium allocation approach ("PAA") (Cont'd.)

Initial measurement (Cont'd.)

For reinsurance/retakaful contracts held, the risk adjustment for non-financial risk represents the amount of risk being transferred by the Group to the reinsurer/retakaful operator.

If the total is a net outflow, then the group is onerous. A loss from onerous insurance/takaful contracts is recognised in profit or loss immediately, with no CSM recognised on the statements of financial position on initial recognition, and a loss component is established.

Fulfilment cash flows ("FCF")

The FCF are the current estimates of the future cash flows within the contract boundary of a group of contracts that the Group expects to collect from premiums/contributions and pay out for claims, benefits and expenses, adjusted to reflect the timing and the uncertainty of those amounts.

The estimates of future cash flows:

- are based on a probability-weighted mean of the full range of possible outcomes;
- are determined from the perspective of the Group, provided that the estimates are consistent with observable market prices for market variables; and
- reflect conditions existing at the measurement date.

Contractual service margin ("CSM")

The CSM is a component of the carrying amount of the asset or liability for a group of insurance/takaful contracts issued representing the unearned profit that the Group will recognise as it provides insurance/takaful contract services in the future.

At initial recognition, the CSM is an amount that results in no income or expenses (unless a group of contracts is onerous or any pre-recognition cash flows are derecognised as below) arising from:

- the initial recognition of the FCF;
- cash flows arising from the contracts in the group at that date;
- the derecognition of any insurance/takaful acquisition cash flows asset; and
- the derecognition of any other pre-recognition cash flows. Insurance/takaful revenue and insurance/takaful service expenses are recognised immediately for any such assets derecognised.

For groups of reinsurance/retakaful contracts held, any net gain or loss at initial recognition is recognised as the CSM unless the net cost of purchasing reinsurance/retakaful relates to past events, in which case the Group recognises the net cost immediately in profit or loss. For reinsurance/retakaful contracts held, the CSM represents a deferred gain or loss that the Group will recognise as a reinsurance/retakaful gain or expense as it receives insurance/takaful contract services from the reinsurer/retakaful operator in the future and is calculated as the sum of:

- the initial recognition of the FCF;
- cash flows arising from the contracts in the group at that date;
- the amount derecognised at the date of initial recognition of any asset or liability previously recognised for cash flows related to the group of reinsurance/retakaful contracts held (other pre-recognition cash flows); and
- any income recognised in profit or loss when the entity recognises a loss on initial recognition of an onerous group of underlying insurance/takaful contracts or on addition of onerous underlying insurance/takaful contracts to that group.

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(ad) Insurance/takaful and reinsurance/retakaful contracts (Cont'd.)

(vi) Contracts not measured under premium allocation approach ("PAA") (Cont'd.)

Subsequent measurement

Subsequently, the carrying amount of a group of insurance/takaful contracts at each reporting date is the sum of the liability for remaining coverage ("LRC") and the liability for incurred claims ("LIC"). The LRC comprises (a) the FCF that relate to services that will be provided under the contracts in future periods and (b) any remaining CSM at that date. The LIC includes the FCF for risk adjustments, incurred claims and expenses that have not yet been paid, including claims that have been incurred but not yet reported.

– The FCF of groups of contracts are measured at the reporting date using current estimates of future cash flows, current discount rates and current estimates of the risk adjustment for non-financial risk. Changes in FCF are recognised as follows:

Changes relating to future service	Adjusted against CSM (or recognised in the insurance/takaful service result in profit or loss if the group is onerous)
Changes relating to current or past services	Recognised in the insurance/takaful service result in profit or loss
Effects of the time value of money, financial risk and changes therein on estimated cash flows	Recognised as insurance/takaful finance income or expense in profit or loss, except for certain portfolios measured using the general measurement model where the other comprehensive income option is applied

– The CSM is adjusted subsequently only for changes in FCF that relate to future services and other specified amounts and is recognised in profit or loss as services are provided. The CSM at each reporting date represents the profit in the group of contracts that has not yet been recognised in profit or loss because it relates to future services.

Onerous contracts – loss component

When adjustments to the CSM exceed the amount of the CSM, the group of contracts becomes onerous and the Group recognises the excess in insurance/takaful service expenses, and it records the excess as a loss component of the LRC.

When a loss component exists, the Group allocates the following between the loss component and the remaining component of the LRC for the respective group of contracts, based on the ratio of the loss component to the FCF relating to the expected future cash outflows:

– expected incurred claims and other directly attributable expenses for the period;

– changes in the risk adjustment for non-financial risk for the risk expired; and

– finance income (expenses) from insurance/takaful contracts issued.

The amounts of the loss component allocation above reduce the respective components of insurance/takaful revenue and are reflected in insurance/takaful service expenses.

Decreases in the FCF in subsequent periods reduce the remaining loss component and reinstate the CSM after the loss component is reduced to zero. Increases in the FCF in subsequent periods increase the loss component.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(ad) Insurance/takaful and reinsurance/retakaful contracts (Cont'd.)

(vi) Contracts not measured under premium allocation approach ("PAA") (Cont'd.)

Reinsurance/retakaful contracts held

The carrying amount of a group of reinsurance/retakaful contracts held at each reporting date is the sum of the asset for remaining coverage and the asset for incurred claims. The asset for remaining coverage comprises (a) the FCF that relate to services that will be received under the contracts in future periods and (b) any remaining CSM at that date.

The Group will measure the estimates of the present value of future cash flows using assumptions that are consistent with those used to measure the estimates of the present value of future cash flows for the underlying insurance/takaful contracts, with an adjustment for any risk of non-performance by the reinsurer/retakaful operator. The effect of the non-performance risk of the reinsurer/retakaful operator is assessed at each reporting date and the effect of changes in the non-performance risk is recognised in profit or loss.

The risk adjustment for non-financial risk represents the amount of risk being transferred by the Group to the reinsurer/retakaful operator.

For groups of reinsurance contracts held, the Group recognises both day 1 gains and day 1 losses at initial recognition in the statement of financial position as a CSM and releases this to profit or loss as the reinsurer renders services, except for any portion of a day 1 loss that relates to events before initial recognition.

(vii) Contracts measured under PAA

Insurance/takaful contracts – initial measurement

The Group applies the PAA to certain insurance/takaful contracts that it issues and certain reinsurance/retakaful contracts that it holds, as:

- the coverage period of each contract in the group is one year or less, including insurance/takaful contract services arising from all premiums/contributions within the contract boundary, or
- for contracts longer than one year, the Group has modelled possible future scenarios and reasonably expects that the measurement of the LRC for the group containing those contracts under the PAA does not differ materially from the measurement that would be produced applying the general model. In assessing materiality, the Group has also considered qualitative factors such as the nature of the risk and types of its lines of business.

The Group does not apply the PAA if, at the inception of the group of contracts, it expects significant variability in the FCF that would affect the measurement of the liability for the remaining coverage or asset for the remaining coverage during the period before a claim is incurred. Variability in the FCF increases with, for example the length of the coverage period of the group of contracts.

For a group of contracts that is not onerous at initial recognition, the Group measures the LRC as:

- the premiums/contributions, if any, received at initial recognition;
- minus any insurance/takaful acquisition cash flows at that date;
- plus or minus any amount arising from the derecognition at that date of the asset recognised for insurance/takaful acquisition cash flows; and
- any other asset or liability previously recognised for cash flows related to the group of contracts that the Group pays or receives before the group of insurance/takaful contracts is recognised.

Where facts and circumstances indicate that contracts are onerous at initial recognition, the Group performs additional analysis to determine if a net outflow is expected from the contract. Such onerous contracts are separately grouped from other contracts and the Group recognises a loss in profit or loss for the net outflow, resulting in the carrying amount of the liability for the group being equal to the FCF. A loss component is established by the Group for the LRC for such onerous group depicting the losses recognised.

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(ad) Insurance/takaful and reinsurance/retakaful contracts (Cont'd.)

(vii) Contracts measured under PAA (Cont'd.)

Insurance/takaful contracts – subsequent measurement

The Group measures the carrying amount of the LRC at the end of each reporting period as the LRC at the beginning of the period:

- plus premiums/contributions received in the period;
- minus insurance/takaful acquisition cash flows;
- plus any amounts relating to the amortisation of the insurance/takaful acquisition cash flows recognised as an expense in the reporting period for the group;
- minus the amount recognised as insurance/takaful revenue for the services provided in the period; and
- minus any investment component paid or transferred to the liability for incurred claims.

The Group estimates the liability for incurred claims as the FCF related to incurred claims. The FCF incorporate, in an unbiased way, all reasonable and supportable information available without undue cost or effort about the amount, timing and uncertainty of those future cash flows, they reflect current estimates from the perspective of the Group, and include an explicit adjustment for non-financial risk (the risk adjustment).

Where, during the coverage period, facts and circumstances indicate that a group of insurance/takaful contracts is onerous, the Group recognises a loss in profit or loss for the net outflow, resulting in the carrying amount of the liability for the group being equal to the FCF. A loss component is established by the Group for the LRC for such onerous group depicting the losses recognised.

Reinsurance/retakaful contracts held – initial measurement

The Group measures its reinsurance/retakaful assets for a group of reinsurance/retakaful contracts that it holds on the same basis as insurance/takaful contracts that it issues. However, they are adapted to reflect the features of reinsurance/retakaful contracts held that differ from insurance/takaful contracts issued, for example the generation of expenses or reduction in expenses rather than revenue.

On initial recognition of a group of reinsurance/retakaful contracts held, the Group measures the asset for the remaining coverage ("AFRC") at the amount of ceding premiums/contributions paid on initial recognition minus commission income received.

Where the Group recognises a loss on initial recognition of an onerous group of underlying insurance/takaful contracts or when further onerous underlying insurance/takaful contracts are added to a group, the Group establishes a loss-recovery component of the AFRC for a group of reinsurance/retakaful contracts held depicting the recovery of losses.

The Group calculates the loss-recovery component by multiplying the loss recognised on the underlying insurance/takaful contracts and the ratio of expected reinsurance/retakaful receivable to expected outgo arising from the underlying insurance/takaful contracts. The Group uses a systematic and rational method to determine the portion of losses recognised on the group to insurance/takaful contracts covered by the group of reinsurance/retakaful contracts held where some contracts in the underlying group are not covered by the group of reinsurance/retakaful contracts held.

The loss-recovery component adjusts the carrying amount of the AFRC.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(ad) Insurance/takaful and reinsurance/retakaful contracts (Cont'd.)

(vii) Contracts measured under PAA (Cont'd.)

Reinsurance/retakaful contracts held – subsequent measurement

The subsequent measurement of reinsurance/retakaful contracts held follows the same principles as those for insurance/takaful contracts issued and has been adapted to reflect the specific features of reinsurance/retakaful contracts held.

Where the Group has established a loss-recovery component, the Group subsequently reduces the loss recovery component to zero in line with reductions in the onerous group of underlying insurance/takaful contracts in order to reflect that the loss-recovery component shall not exceed the portion of the carrying amount of the loss component of the onerous group of underlying insurance/takaful contracts that the entity expects to recover from the group of reinsurance/retakaful contracts held.

The Group measures the carrying value of the asset for incurred claims ("AFIC") at the end of each reporting period. The Group recognises the AFIC for a group of reinsurance/retakaful contracts held at the amount of the FCF relating to the claims recoverable. The FCF are measured at the reporting date using current estimates of future cash flows, current discount rates and current estimates of the risk adjustment for non-financial risk.

Risk adjustment for non-financial risk

An explicit risk adjustment for non-financial risk is estimated separately from the discounted FCF. For contracts measured under the PAA, unless contracts are onerous, the explicit risk adjustment for non-financial risk is only estimated for the measurement of the LIC. The risk adjustment for non-financial risk is applied to the present value of the estimated future cash flows. It reflects the compensation the Group requires for bearing uncertainty about the amount and timing of the cash flows from non-financial risk as the Group fulfills its obligations under the insurance/takaful contracts. For reinsurance/retakaful contracts held, the risk adjustment for non-financial risk represents the amount of risk being transferred by the Group to the reinsurer/retakaful operator.

(viii) Insurance/takaful acquisition cash flows

Insurance/takaful acquisition cash flows arise from the costs of offering, underwriting and starting a group of insurance/takaful contracts that are directly attributable to the portfolio of insurance/takaful contracts to which the group belongs.

Insurance/takaful acquisition cash flows are allocated to groups of insurance/takaful contracts on a systematic and rational basis. Insurance/takaful acquisition cash flows that are directly attributable to a group of insurance/takaful contracts are allocated to that group; and to groups that will include insurance/takaful contracts that are expected to arise from renewals of the insurance/takaful contracts in that group.

Insurance/takaful acquisition cash flows not directly attributable to a group of contracts but directly attributable to a portfolio of contracts are allocated to groups of contracts in the portfolio or expected to be in the portfolio.

The insurance/takaful acquisition cash flows that arise before the recognition of the related insurance/takaful contracts are recognised as separate assets and tested for recoverability, whereas other insurance/takaful acquisition cash flows are included in the estimates of the present value of future cash flows as part of the measurement of the related insurance/takaful contracts.

The Group assesses at each reporting date whether facts and circumstances indicate that an asset for insurance/takaful acquisition cash flows may be impaired, then the Group:

- recognises an impairment in profit or loss so that the carrying amount of the asset does not exceed the expected net cash inflow for the related group; and
- if the asset relates to future renewals, recognises an impairment loss in profit or loss to the extent that it expects those insurance/takaful acquisition cash flows to exceed the net cash inflow for the expected renewals and this excess has not already been recognised as an impairment loss.

2. ACCOUNTING POLICIES (CONT'D.)

2.5 Summary of material accounting policies (Cont'd.)

(ad) Insurance/takaful and reinsurance/retakaful contracts (Cont'd.)

(viii) Insurance/takaful acquisition cash flows (Cont'd.)

The Group reverses any impairment losses in profit or loss and increases the carrying amount of the asset to the extent that the impairment conditions no longer exist or have improved.

(ix) Derecognition and modification

The Group derecognises insurance/takaful contracts when:

– the rights and obligations relating to the contract are extinguished (i.e. discharged, cancelled or expired); or

– the contract is modified such that the modification results in a change in the measurement model or the applicable standard for measuring a component of the contract, substantially changes the contract boundary, or requires the modified contract to be included in a different group. In such cases, the Group derecognises the initial contract and recognises the modified contract as a new contract.

When a new contract is required to be recognised as a result of modification and it is within the scope of MFRS 17, the new contract is recognised from the date of modification and is assessed for, amongst other things, contract classification, including the variable fee approach eligibility component separation requirements and contract aggregation requirements.

When an insurance/takaful contract not accounted for under the PAA is derecognised from a group of insurance/takaful contracts, the Group:

(a) adjusts the FCF to eliminate the present value of future cash flows and risk adjustment for non-financial risk relating to the rights and obligations removed from the group;

(b) adjusts the CSM (unless the decrease in the FCF is allocated to the loss component of the LRC of the group) in the following manner, depending on the reason for the derecognition:
- if the contract is extinguished, in the same amount as the adjustment to the FCF relating to future service;
- if the contract is transferred to a third party, in the amount of the FCF adjustment in (a) less the premium/contribution charged by the third party; or
- if the original contract is modified resulting in its derecognition, in the amount of the FCF adjustment in (a) adjusted for the premium/contribution that the Group would have charged if it had entered into a contract with equivalent terms as the new contract at the date of the contract modification, less any additional premium/contribution charged for the modification; when recognising the new contract in this case, the Group assumes such a hypothetical premium/contribution as actually received; and

(c) adjusts the number of coverage units for the expected remaining insurance/takaful contract services, to reflect the number of coverage units removed.

When a modification is not treated as a derecognition, the Group recognises amounts paid or received for the modification with the contract as an adjustment to the relevant LRC.

The accounting policies of insurance/takaful and reinsurance/retakaful contracts impact the value of investment in associates and joint ventures.

(ae) Government grant

A government grant is recognised only when there is a reasonable assurance that the grant will be received and all attached conditions will be met. It is measured at its fair value and is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. The benefit of a government loan at a below-market rate of interest, measured as the difference between the fair value of the loan and proceeds received, is similarly treated as a government grant.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

3. CHANGES IN ACCOUNTING POLICIES

3.1 Adoption of amendments to standards

The accounting policies adopted are consistent with those of the previous financial year. The adoption of the following amendments to published standard did not require a change in the accounting policies or retrospective adjustments, as they did not have any material impact on the financial statements of the Group and of the Company:

– Lack of Exchangeability (Amendments to MFRS 121 *The Effects of Changes in Foreign Exchange Rates*)

The nature of the amendments to published standard relevant to the Group and the Company are described below:

Lack of Exchangeability (Amendments to MFRS 121 *The Effects of Changes in Foreign Exchange Rates*)

The amendments clarified when a currency is exchangeable into another currency and how an entity estimates a spot rate when a currency lacks exchangeability. New disclosure requirements include the nature and financial impacts of the currency not being exchangeable, spot exchange rate used, estimation process and risks to the entity when the currency is not exchangeable.

3.2 New standards and amendments to published standards issued but not yet effective

The following are new standards and amendments to published standards issued but not yet effective for the Group and the Company. The Group and the Company intend to adopt the relevant new standards and amendments to published standards when they become effective.

Description	Effective for annual periods beginning on or after
– Amendments to the Classification and Measurement of Financial Instruments (Amendments to MFRS 9 *Financial Instruments* and MFRS 7 *Financial Instruments: Disclosures*)	1 January 2026
– Annual Improvements to MFRS Accounting Standards – Volume 11	1 January 2026
– Contracts Referencing Nature-dependent Electricity (Amendments to MFRS 9 *Financial Instruments* and MFRS 7 *Financial Instruments: Disclosures*)	1 January 2026
– MFRS 18 *Presentation and Disclosure in Financial Statements*	1 January 2027
– MFRS 19 *Subsidiaries without Public Accountability: Disclosures*	1 January 2027
– Translation to a Hyperinflationary Presentation Currency (Amendments to MFRS 121 *The Effects of Changes in Foreign Exchange Rates*)	1 January 2027
– Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to MFRS 10 *Consolidated Financial Statements* and MFRS 128 *Investments in Associates and Joint Ventures*)	To be determined by MASB

3. CHANGES IN ACCOUNTING POLICIES (CONT'D.)

3.2 New standards and amendments to published standards issued but not yet effective (Cont'd.)

The nature of the new standards and amendments to published standards issued but not yet effective are described below. The Group and the Company are currently assessing the financial effects of their adoption.

(a) Amendments to published standards effective for financial year ending 31 March 2027

Amendments to the Classification and Measurement of Financial Instruments (Amendments to MFRS 9 *Financial Instruments* and MFRS 7 *Financial Instruments: Disclosures*)

The amendments clarified the dates of recognition and derecognition of financial assets and liabilities, with a new exception for financial liabilities settled through an electronic cash transfer system.

The amendments also provide additional guidance for assessing whether financial assets with contingent features that are not related directly to a change in basic lending risks or costs meet the SPPI/SPPP criterion.

Key characteristics of contractually linked instruments and the factors to be considered when assessing the cash flows underlying a financial asset with non-recourse features are also included in the amendments.

Additional disclosures are required for certain financial instruments with contractual terms that can change their cash flows and equity instruments designated at fair value through other comprehensive income.

Annual Improvements to MFRS Accounting Standards – Volume 11

The Annual Improvements to MFRS Accounting Standards – Volume 11 include minor amendments affecting the following 5 MFRSs:

(i) Hedge accounting by a first-time adopter (Amendments to MFRS 1 *First-time Adoption of Malaysian Financial Reporting Standards*)

(ii) Gain or loss on derecognition (Amendments to MFRS 7 *Financial Instruments: Disclosures*)

(iii) Lessee derecognition of lease liabilities and transaction price (Amendments to MFRS 9 *Financial Instruments*)

(iv) Determination of a "de facto agent" (Amendments to MFRS 10 *Consolidated Financial Statements*)

(v) Cost method (Amendments to MFRS 107 Statement of Cash Flows)

Wording in certain paragraphs of these standards has been amended to improve consistency with other relevant standards and cross-references to other standards, where applicable, have been added to enhance the understandability of these standards.

Contracts Referencing Nature-dependent Electricity (Amendments to MFRS 9 *Financial Instruments* and MFRS 7 *Financial Instruments: Disclosures*)

The amendments allow an entity to apply the own-use exemption to its nature-dependent electricity contracts if the entity has been, and expects to be a, net purchaser of electricity for the contract period.

Nature-dependent electricity contracts that do not meet the own-use exemption are accounted for as derivatives and measured at fair value through profit or loss. Applying hedge accounting could reduce profit or loss volatility by reflecting how these contracts hedge the price of future electricity purchases or sales.

Additional disclosures include, but are not limited to, the following:

– contractual features exposing the entity to variability in underlying amount of electricity and risk of oversupply;
– estimated future cash flows from unrecognised contractual commitments to buy electricity in appropriate time bands;
– qualitative information about how the entity assesses whether a contract might become onerous; and
– qualitative and quantitative information about the costs and proceeds associated with purchases and sales of electricity.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

3. CHANGES IN ACCOUNTING POLICIES (CONT'D.)

3.2 New standards and amendments to published standards issued but not yet effective (Cont'd.)

(b) New standards effective for financial year ending 31 March 2028

MFRS 18 *Presentation and Disclosure in Financial Statements*

MFRS 18 is a new accounting standard for presentation and disclosure of information in the financial statements which supersedes MFRS 101 *Presentation of Financial Statements*.

MFRS 18 introduced a defined structure for the statement of profit or loss comprising three main categories which include operating, investing and financing categories. Classification of income and expenses will be driven by the main business activities. Specified totals and subtotals are to be presented in the statement of profit or loss.

Information related to the management-defined performance measures ("MPM") should be disclosed in a note to the financial statements, including a reconciliation between the MPM and the most similar specified subtotal. Entity is also required to present expenses in the operating category by nature, function or a mix of both.

Enhanced guidance on the principles of aggregation and disaggregation, which focus on grouping of items based on their shared characteristics should be applied across the financial statements.

Consequential amendments to other accounting standards include, among others:

(i) MFRS 107 *Statement of Cash Flows*

The amendments require operating profit or loss subtotal to be used as the starting point when presenting operating cash flows under the indirect method and interest and dividend cash flows to be classified based on the main business activities.

(ii) MFRS 133 *Earnings per Share*

The amendments permit entities to disclose additional amounts per share using only the following numerators:

- required income and expenses totals and subtotals;
- common income and expenses subtotals listed in MFRS 18; or
- MPM disclosed by the entity.

(iii) MFRS 134 *Interim Financial Reporting*

Entity is required to provide additional disclosures for MPM in the condensed interim financial statements.

(iv) MFRS 108 *Accounting Policies, Changes in Accounting Estimates and Errors*

Certain requirements such as going concern assessment have been moved from MFRS 101 to MFRS 108, which will be renamed MFRS 108 *Basis of Preparation of Financial Statements* when MFRS 18 becomes effective.

3. CHANGES IN ACCOUNTING POLICIES (CONT'D.)

3.2 New standards and amendments to published standards issued but not yet effective (Cont'd.)

(b) New standards effective for financial year ending 31 March 2028 (Cont'd.)

MFRS 19 *Subsidiaries without Public Accountability: Disclosures*

MFRS 19 introduced reduced disclosure requirements for eligible subsidiaries. An eligible subsidiary has the option to adopt this standard in its consolidated or separate financial statements provided that it does not have public accountability and it has an ultimate or intermediate holding company that produces consolidated financial statements in accordance with IFRS Accounting Standards.

Translation to a Hyperinflationary Presentation Currency (Amendments to MFRS 121 *The Effects of Changes in Foreign Exchange Rates*)

The amendments require all amounts (including comparatives) to be translated from a functional currency that is the currency of a non-hyperinflationary economy to a presentation currency that is the currency of a hyperinflationary economy using the closing rate at the date of the most recent statement of financial position.

The amendments is not expected to have any impact on the financial statements of the Group and of the Company as none of the group entities has a functional or presentation currency that is the currency of a hyperinflationary economy.

(c) Amendments to published standard effective on a date to be determined by MASB

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to MFRS 10 *Consolidated Financial Statements* and MFRS 128 *Investments in Associates and Joint Ventures*)

The amendments clarify that:

– gains and losses resulting from transactions involving assets that do not constitute a business, between entity and its associate or joint venture are recognised in the entity's financial statements only to the extent of unrelated investors' interests in the associate or joint venture; and

– gains and losses resulting from transactions involving the sale or contribution to an associate of a joint venture of assets that constitute a business is recognised in full.

4. SIGNIFICANT CHANGES IN REGULATORY REQUIREMENTS

There are no significant changes in regulatory requirements during the current financial year.

5. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the financial statements in accordance with MFRS Accounting Standards requires management to make judgements, estimates and assumptions that affect the application of accounting policies and reported amounts of revenues, expenses, assets and liabilities, the accompanying disclosures and the disclosure of contingent liabilities. Judgements, estimates and assumptions are continually evaluated and are based on the past experience, reasonable expectations of future events and other factors. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In the process of applying the Group's and the Company's accounting policies, management has made the following judgements, estimates and assumptions which have significant effect on the amounts recognised in the financial statements.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

5. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (CONT'D.)

5.1 Measurement of ECL allowances (Notes 6, 7, 10, 11, 12, 17, 28, 38, 39, 50 and 55)

The measurement of the ECL allowances for financial assets measured at amortised cost, FVOCI, loan/financing commitments and financial guarantee contracts requires the use of complex models and significant assumptions about future economic conditions and credit behaviour. Explanation of the inputs, assumptions and estimation techniques used in measuring ECL is further detailed in Note 50.2.

Components of ECL models that involve significant judgement include:

- determining criteria for SICR in the qualitative assessment and the impact of the instrument being measured at lifetime ECL basis due to SICR;
- choosing appropriate models and assumptions including the various formulae and choice of inputs for the measurement of ECL;
- establishing the forward-looking macroeconomic scenarios and the associated probability weightings, which are used in forward-looking ECL measurement;
- establishing groups of similar financial assets for the purposes of measuring ECL; and
- application of the Group's internal credit grading model which assigns Probability of Default ("PD") to the individual grades.

Please refer to Note 55 for the assessment and considerations of Middle East Conflict implications on measurement of ECL allowances as at 31 March 2026.

5.2 Lease term of agreements with renewal options (Note 19)

The Group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised.

The Group has the option, under some of its leases to lease the assets for additional terms of three to twelve years. The extension options held are exercisable only by the Group and not by the respective lessor. In determining the lease term, the Group considers all facts and circumstances that create an economic incentive to exercise an extension option. Factors considered include historical lease durations and the costs and business disruption required to replace the leased asset. After the commencement date, the Group reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise (or not to exercise) the option to renew. The Group included the renewal period as part of the lease term for most of its leases of premises due to the significance of these assets to its operations.

5.3 Impairment of goodwill (Note 20)

The Group tests annually whether the goodwill that has an indefinite life is impaired by measuring the recoverable amount of the CGU based on the value-in-use method, which requires the use of estimates of future cash flow projections, terminal growth rates and discount rates. Changes to the assumptions used by management, particularly the discount rate and the terminal value, may affect the results of the impairment assessment.

5.4 Deferred tax assets (Note 14) and income taxes (Note 40)

The Group's income tax expense, deferred tax assets and liabilities reflect management's best estimate of current and future taxes to be paid.

Deferred tax assets are recognised in respect of unabsorbed capital allowances and other temporary differences to the extent that it is probable that future taxable profit will be available against which the unabsorbed capital allowances and other temporary differences can be utilised. Management judgement is required to determine the amount of the deferred tax assets that can be recognised, based upon the likely timing and level of future taxable profits together with future tax planning strategies.

Significant judgement is required in estimating the provision for income taxes. Such estimate involves dealing with uncertainties in the application on the tax treatment of certain income or expenses that requires interpretation of the provisions in the income tax act of the relevant tax authorities. Liabilities for taxation are recognised based on estimates as to whether the payment of additional tax is probable. Management may seek experts' advice for such complex areas. As there is significant judgement and estimation uncertainty involved in determining provision for income taxes, the actual tax liability payable to the relevant tax authorities for the relevant year of assessment may be materially different from the amounts that were initially recorded; and such differences, if any, will be reflected as adjustments of over or under provisions of income tax and deferred tax provision in the period in which the estimate is revised or when the final tax liability is established.

5. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS (CONT'D.)

5.5 Fair value measurement of financial instruments (Notes 8, 9, 10, 25, 50 and 51)

When the fair values of financial assets and financial liabilities recorded on the statements of financial position cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of financial models. The inputs to these models are taken from observable markets where possible, but where this is not feasible, judgement is required to establish fair values. Judgements include considerations of liquidity and model inputs such as volatility for longer-dated derivatives and discount rates, prepayment rates and default rate assumptions for asset-backed securities.

5.6 Development costs (Note 20)

Costs incurred in the development and implementation of software systems for the Group are capitalised as development costs if specific criteria are met. In determining whether the costs are capitalisable, management applies judgement to ascertain the technical feasibility of completing the intangible asset, which is usually evidenced by the achievement of defined milestone according to an established project management model.

5.7 Impairment of investments in subsidiaries, associates and joint ventures (Notes 15 and 16)

Investments in subsidiaries, associates and joint ventures ("investments") are for a long-term basis and the Group and the Company determine whether the carrying amounts of its investments are impaired as and when there is indication of impairment at reporting date. This requires an estimation of the VIU of the investments which is attributable to those investments. Estimating a VIU amount requires management to make an estimate of the expected future cash flows from the investments and also to use a suitable discount rate in order to calculate the VIU.

6. CASH AND SHORT-TERM FUNDS

	Group		Company	
	31 March 2026 RM'000	31 March 2025 RM'000	31 March 2026 RM'000	31 March 2025 RM'000

Other financial institutions	62,649	16,352	–	–
	3,710,047	3,562,715	–	–
	6,819,012	6,761,436	152,328	14,557
Less: Allowances for ECL	(397)	(2,310)	–	–
	6,818,615	6,759,126	152,328	14,557

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

6. CASH AND SHORT-TERM FUNDS (CONT'D.)

Movements in allowances for ECL are as follows:

Group 31 March 2026	Note	Stage 1 12-month ECL RM'000	Stage 2 Lifetime ECL not credit impaired RM'000	Total RM'000
Balance at beginning of the financial year		1,682	628	2,310
Net writeback of ECL	39	(1,294)	(572)	(1,866)
Transfer from deposits and placements with banks and other financial institutions	7	255	–	255
New financial assets originated		5,768	61	5,829
Financial assets derecognised		(6,975)	(61)	(7,036)
Net remeasurement of allowances		(342)	(572)	(914)
Foreign exchange differences		(30)	(17)	(47)
Balance at end of the financial year		358	39	397

Group 31 March 2025	Note	Stage 1 12-month ECL RM'000	Stage 2 Lifetime ECL not credit impaired RM'000	Total RM'000
Balance at beginning of the financial year		946	37	983
Net allowances for ECL	39	748	610	1,358
Transfer from deposits and placements with banks and other financial institutions	7	696	–	696
New financial assets originated		9,457	58	9,515
Financial assets derecognised		(9,485)	–	(9,485)
Net remeasurement of allowances		80	552	632
Foreign exchange differences		(12)	(19)	(31)
Balance at end of the financial year		1,682	628	2,310

The decrease in allowances for ECL for the current financial year is mainly due to decrease in the Group's foreign currencies placements at the end of the financial year which correspondingly resulted in decrease of allowance for ECL.

7. DEPOSITS AND PLACEMENTS WITH BANKS AND OTHER FINANCIAL INSTITUTIONS

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Deposits and placements maturing more than one month:		
Licensed banks	–	–
Less: Allowances for ECL	–	–
	–	–

Movements in allowances for ECL are as follows:

Group 31 March 2026	Note	Stage 1 12-month ECL RM'000
Balance at beginning of the financial year		–
Net allowances for ECL		–
New financial assets originated		255
Transfer to cash and short-term funds	6	(255)
Balance at end of the financial year		–

Group 31 March 2025	Note	Stage 1 12-month ECL RM'000
Balance at beginning of the financial year		–
Net allowances for ECL		–
New financial assets originated		678
Net remeasurement of allowances		18
Transfer to cash and short-term funds	6	(696)
Balance at end of the financial year		–

The allowances for impairment on deposits and placement with banks and other financial institutions decreased mainly due to the transfer to cash and short-term funds; partially offset by new deposits and placements with licensed banks.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

Total	116,457,572	1,008,401	1,172,988	93,273,043	652,209	608,236

Derivative financial instruments and hedge accounting

(i) Fair value hedge

The Group's fair value hedges principally consist of interest/profit rate swaps that are used to protect against changes in the fair value of fixed-rate long-term financial instruments due to movements in market interest/profit rates. AmBank and AmBank Islamic had undertaken a fair value hedge to hedge the interest/profit rate risk of its unquoted securities as disclosed in Note 10.

Interest/profit rate risk

The Group holds a portfolio of long-term fixed rate financial investments, therefore is exposed to changes in fair value due to movements in market interest/profit rates. The Group manages a portion of this risk exposure that is not naturally offset against fixed and floating rate positions held by the Group in financial investments by entering into pay fixed/receive floating interest/profit rate swaps.

8. DERIVATIVE FINANCIAL ASSETS/LIABILITIES (CONT'D.)

Derivative financial instruments and hedge accounting (Cont'd.)

(i) Fair value hedge (Cont'd.)

Interest/profit rate risk (Cont'd.)

Only the interest/profit rate risk element is hedged and therefore other risks, such as credit risk, are managed but not hedged by the Group. The interest/profit rate risk component is determined as the change in fair value of the long-term fixed rate financial investments (e.g. medium term notes and sukuk) arising solely from changes in 3-month/6-month KLIBOR (the benchmark rate of interest/profit). Such changes are usually the largest component of the overall change in fair value. This strategy is designated as a fair value hedge and its effectiveness is assessed with reference to the effectiveness requirements as set out in MFRS 9, which include demonstrating economic relationship, assessing the effect of credit risk and calculating hedge ratio.

The Group establishes the hedging ratio by matching the aggregate notional of the derivatives with the principal of the long-term fixed rate financial investments being hedged. The main source of ineffectiveness arises from differences in timing of cash flows between debt instruments and interest/profit rate swaps.

(ii) Cash flow hedge

Interest rate risk

Previously, the Group hedged its variable rate short-term treasury deposits and fixed deposits portfolio using interest rate swaps with a total notional amount of RM1.4 billion. Hence, the total unamortised fair value balances in the cash flow hedging reserve are to be amortised to the profit or loss over the remaining life of the hedge instruments. The Group had discontinued its cash flow hedge in the previous financial year. Total fair value loss amortised in the previous financial year was RM1,353,000.

(iii) The following table sets out the maturity profile and average price/rate of the hedging instruments used in the Group's non-dynamic hedging strategies:

Group 31 March 2026	Maturity				
	Up to 1 month RM'000	> 1 month to 3 months RM'000	> 3 months to 1 year RM'000	> 1 year to 5 years RM'000	More than 5 years RM'000

The Group had undertaken fair value hedge on the:

(a) interest rate risk of medium term notes of RM785.0 million as at the current financial year end.

(b) profit rate risk of unquoted sukuk of RM350.0 million. The said hedge had matured as at the previous financial year end.

The gain arising from the fair value hedge is as follows:

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Relating to hedged item	(8,960)	(1,075)
Relating to hedging instrument	9,137	1,088
	177	13

The financial investments at FVOCI of the Group that are pledged as collaterals for securities sold under repurchase agreements amounting to RM3,055.8 million (2025: RM5,069.4 million).

10. FINANCIAL INVESTMENTS AT FAIR VALUE THROUGH OTHER COMPREHENSIVE INCOME ("FVOCI") (CONT'D.)

Movements in allowances for ECL are as follows:

Group 31 March 2026	Note	Stage 1 12-month ECL RM'000	Stage 2 Lifetime ECL not credit impaired RM'000	Total RM'000
Balance at beginning of the financial year		27,576	4,218	31,794
Net writeback of ECL	39	(3,455)	(4,218)	(7,673)
– Transfer to 12-month ECL (Stage 1)		529	(3,078)	(2,549)
– New financial assets originated		10,655	–	10,655
– Financial assets derecognised		(10,424)	(1,140)	(11,564)
– Net remeasurement of allowances		(4,215)	–	(4,215)
Foreign exchange differences		(5)	–	(5)
Balance at end of the financial year		24,116	–	24,116

Group 31 March 2025	Note	Stage 1 12-month ECL RM'000	Stage 2 Lifetime ECL not credit impaired RM'000	Total RM'000
Balance at beginning of the financial year		22,003	4,986	26,989
Net allowances for/(writeback of) ECL	39	5,574	(768)	4,806
– Transfer to 12-month ECL (Stage 1)		701	(1,490)	(789)
– Transfer to Lifetime ECL not credit impaired (Stage 2)		(397)	2,205	1,808
– New financial assets originated		3,023	971	3,994
– Financial assets derecognised		(5,039)	(2,168)	(7,207)
– Net remeasurement of allowances		7,286	(286)	7,000
Foreign exchange differences		(1)	–	(1)
Balance at end of the financial year		27,576	4,218	31,794

The movements in allowances for ECL during the current financial year are due to the following:

– 12-month ECL (Stage 1) – decrease of RM3,460,000 mainly due to derecognition of financial assets and net remeasurement of allowances partially offset by new financial assets originated and impact from migration to Stage 1.

– Lifetime ECL not credit impaired (Stage 2) – decrease of RM4,218,000 mainly due to impact from migration to Stage 2 and derecognition of financial assets.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

10. FINANCIAL INVESTMENTS AT FAIR VALUE THROUGH OTHER COMPREHENSIVE INCOME ("FVOCI") (CONT'D.)

(i) Equity investments at FVOCI comprise the following individual investments:

Group	31 March 2026		31 March 2025	
	Carrying value RM'000	Dividend income (Note 35) RM'000	Carrying value RM'000	Dividend income (Note 35) RM'000

Balance at end of the financial year		324,938	917,633	510,715	1,753,286

Overall, the total allowances for impairment on loans, advances and financing had increased due to the following:

(a) 12-month ECL (Stage 1) – decrease of RM11,311,000 mainly due to financial assets derecognised, net remeasurement of allowances, impact from migration to Stage 2 and Stage 3 and impacts from the changes in model assumptions and methodologies partially offset by newly originated loans, advances and financing, and impact from migration to Stage 1.

(b) Lifetime ECL not credit impaired (Stage 2) – decrease of RM212,764,000 mainly due to impact from migration to Stage 1 and Stage 3, impacts from the changes in model assumptions and methodologies, financial assets derecognised and partially offset by impact from migration to Stage 2 and newly originated loans, advances and financing.

(c) Lifetime ECL credit impaired (Stage 3) – increase of RM66,350,000 mainly due to net remeasurement of allowances, impact from migration to Stage 3, impacts from the changes in model assumptions and methodologies partially offset by written off of loans, advances and financing due to deterioration in credit quality and the migration of loans, advances and financing from Stage 3 to Stage 1 and Stage 2 and derecognition of loans, advances and financing.

13. STATUTORY DEPOSITS WITH BANK NEGARA MALAYSIA

The non-interest bearing statutory deposits are maintained with Bank Negara Malaysia in compliance with Section 26(2)(c) of the Central Bank of Malaysia Act 2009, the amounts of which are determined as set percentages of total eligible liabilities. Effective 16 May 2025, the Statutory Reserve Requirement ("SRR") rate for banking institutions has revised from 2.0% to 1.0% of eligible liabilities.

14. DEFERRED TAX ASSETS

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set-off current tax assets against current tax liabilities and when the deferred income taxes relate to the same fiscal authority. The following amounts are shown in the statements of financial position, after appropriate offsetting:

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Deferred tax assets, net	286,518	271,050

Deferred tax assets and liabilities prior to offsetting are summarised as follows:

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Deferred tax assets	335,181	323,025
Deferred tax liabilities	(48,663)	(51,975)
	286,518	271,050

The components and movements of deferred tax assets/(liabilities) prior to offsetting are as follows:

Deferred tax assets

Group 31 March 2026	Balance at beginning of the financial year RM'000	Recognised in profit or loss (Note 40) RM'000	Recognised in other comprehensive income RM'000	Balance at end of the financial year RM'000
Provision for commitments and contingencies	968	839	–	1,807

14. DEFERRED TAX ASSETS (CONT'D.)

The components and movements of deferred tax assets/(liabilities) prior to offsetting are as follows: (Cont'd.)

Deferred tax assets (Cont'd.)

Group 31 March 2025	Balance at beginning of the financial year RM'000	Recognised in profit or loss (Note 40) RM'000	Recognised in other comprehensive income RM'000	Balance at end of the financial year RM'000
Cash flow hedge reserve	324	–	(324)	–
Provision for commitments and contingencies	777	191	–	968
Provision for expenses	97,885	1,749	–	99,634
Allowances for ECL	178,105	(2,803)	–	175,302
Fair value reserve	3,097	–	(797)	2,300
Unutilised loss	31,781	(13,822)	–	17,959
Other temporary differences	17,509	9,353	–	26,862
	329,478	(5,332)	(1,121)	323,025

Deferred tax liabilities

Group 31 March 2026	Balance at beginning of the financial year RM'000	Recognised in profit or loss (Note 40) RM'000	Recognised in other comprehensive income RM'000	Balance at end of the financial year RM'000
Excess of capital allowance over depreciation and amortisation	9,094	8,345	–	17,439
Deferred charges	42,881	(11,657)	–	31,224
	51,975	(3,312)	–	48,663

Group 31 March 2025	Balance at beginning of the financial year RM'000	Recognised in profit or loss (Note 40) RM'000	Recognised in other comprehensive income RM'000	Balance at end of the financial year RM'000
Excess of capital allowance over depreciation and amortisation	1,741	7,353	–	9,094
Deferred charges	51,977	(9,096)	–	42,881
	53,718	(1,743)	–	51,975

As at 31 March 2026, there is unabsorbed capital allowances which amounted to RM450,458,000 (2025: RM450,465,000) that is available for offset against future taxable profit of leasing business from two (2025: two) of its subsidiaries. The non-recognition of deferred tax asset arose from unabsorbed capital allowances is due to the uncertainty in timing of its recoverability. The recognition of deferred tax asset arose from unutilised tax losses is as disclosed in Note 5.4.

– Conventional banking	129,655	129,655
– Islamic banking	53,482	53,482
	303,492	303,492

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

20. INTANGIBLE ASSETS (CONT'D.)

(a) Goodwill (Cont'd.)

Impairment test for goodwill (Cont'd.)

The recoverable amount of these CGUs, which are monitored at the operating segment level, has been determined based on VIU calculations. These calculations use pre-tax cash flow projections based on financial budgets approved by the management. The discount rate applied to the cash flow projections is derived from the pre-tax weighted average cost of capital plus a reasonable risk premium at the date of assessment of the respective CGU.

The cash flow projections for these CGUs are based on the financial budgets approved by the management covering one year period (second to fifth years based on management's estimated projections), taking into account the projected regulatory capital requirements, as well as the terminal growth rate of 3.00% (2025: 3.00%) based on long-term GDP forecast and expectations of market opportunities. The discount rate applied ranged from 7.79% to 9.10% (2025: 7.72% to 9.28%). The terminal growth rates used do not exceed the long-term average growth rate for the markets in which the businesses operate.

The management believes that any reasonably possible change in the key assumptions would not cause the carrying amounts of the goodwill to exceed their recoverable amounts.

Individuals	60,615,835	58,196,532
Others	5,753,255	5,482,419
	147,000,103	141,547,041

The maturity structure of term/investment deposits is as follows:

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Due within six months	73,055,314	70,845,999
Over six months to one year	21,591,810	18,941,672
Over one year to three years	245,041	720,942
Over three years to five years	30,634	32,525
	94,922,799	90,541,138

22. DEPOSITS AND PLACEMENTS OF BANKS AND OTHER FINANCIAL INSTITUTIONS

	Note	Group	
		31 March 2026 RM'000	31 March 2025 RM'000
Licensed banks		2,394,685	3,170,056
Licensed investment banks		580,327	567,040
Bank Negara Malaysia	(a)	1,958,780	1,834,771
Other financial institutions		1,185,686	2,007,461
		6,119,478	7,579,328

(a) As at the current financial year, a total amount of RM1,024.5 million (2025: RM1,072.5 million) received by the Group under the government financing scheme as part of the support measures by the government in response to the COVID-19 pandemic for the purpose of lending to SMEs at below market rate with six-year (6) to eight and half year (8.5) maturities.

23. SECURITIES SOLD UNDER REPURCHASE AGREEMENTS

The amount represents the liabilities in correspondence to the cash received from the sale of securities under repurchase agreements, whereby the securities are not derecognised as the Group retains substantially all of the risks and rewards of ownership of the securities.

24. RECOURSE OBLIGATION ON LOANS AND FINANCING SOLD TO CAGAMAS BERHAD

Recourse obligation on loans and financing sold to Cagamas Berhad represents the proceeds received from loans and financing sold to Cagamas Berhad with recourse. Under this arrangement, the Group undertakes to administer the loans and financing on behalf of Cagamas Berhad and to buy back any loans and financing, which are regarded as defective based on prudential criteria with recourse to the Group.

25. FINANCIAL LIABILITIES AT FVTPL

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Structured deposits	347,264	178,818

The Group has designated certain structured deposits at FVTPL. This designation is permitted under MFRS 9 *Financial Instruments* as these instruments include terms that have substantive derivative characteristics and are managed by the Group on a fair value basis.

The contractual carrying amounts of the structured deposits designated at FVTPL of the Group as at 31 March 2026 was RM431.1 million (2025: RM208.9 million).

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

26. TERM FUNDING (CONT'D.)

(a) The Senior Notes/Sukuk/EMTN outstanding were issued under the following:

	Note	Group	
		31 March 2026 RM'000	31 March 2025 RM'000
Senior Notes Programme	(i)	2,700,000	2,100,000
Senior Sukuk Programme	(ii)	1,000,000	1,000,000
EMTN Programme	(iii)	1,210,030	1,324,716
		4,910,030	4,424,716

(i) The movements of debt securities under the Senior Notes Programme are as follows:

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Balance at beginning of the financial year	2,100,000	500,000
Issuance during the financial year	600,000	1,600,000
Balance at end of the financial year	2,700,000	2,100,000

Senior Notes of the Group refers to the Senior Notes Programme ("SNP") of up to RM7.0 billion nominal value by AmBank. The proceeds from the issuance of the Senior Notes is to be utilised for AmBank's general working capital requirements.

The SNP has a tenure of up to thirty (30) years from the date of first issuance under the programme. Under the SNP, AmBank may issue Senior Notes with a tenure of more than one (1) year and up to ten (10) years provided that the Senior Notes mature prior to the expiry of the SNP. Unless previously redeemed or purchased and cancelled, the Senior Notes shall be fully redeemed on the respective maturity date(s) at 100% of their nominal value.

The Senior Notes rank pari-passu with all other present and future unsecured and unsubordinated obligations (excluding deposits) of AmBank.

The salient features of Senior Notes issued and outstanding are as follows:

- Tranche 9 which amounted to RM500.0 million in nominal value was issued on 6 November 2023 with tenure of three (3) years and interest rate of 4.33% per annum, payable semi-annually.
- Tranche 10 which amounted to RM300.0 million in nominal value was issued on 19 June 2024 with tenure of five (5) years and interest rate of 4.00% per annum, payable semi-annually.
- Tranche 11 which amounted to RM800.0 million in nominal value was issued on 19 June 2024 with tenure of seven (7) years and interest rate of 4.10% per annum, payable semi-annually.
- Tranche 12 which amounted to RM500.0 million in nominal value was issued on 19 June 2024 with tenure of ten (10) years and interest rate of 4.15% per annum, payable semi-annually.
- Tranche 13 which amounted to RM300.0 million in nominal value was issued on 28 August 2025 with tenure of five (5) years and interest rate of 3.68% per annum, payable semi-annually.
- Tranche 14 which amounted to RM300.0 million in nominal value was issued on 28 August 2025 with tenure of seven (7) years and interest rate of 3.75% per annum, payable semi-annually.

As at 31 March 2026, RAM Rating has assigned a long-term rating of AA2/Stable to the SNP.

26. TERM FUNDING (CONT'D.)

(a) The Senior Notes/Sukuk/EMTN outstanding were issued under the following: (Cont'd.)

(ii) The movements of debt securities under the Senior Sukuk Programme are as follows:

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Balance at beginning of the financial year	1,000,000	800,000
Issuance during the financial year	–	1,000,000
Redemption during the financial year	–	(800,000)
Balance at end of the financial year	1,000,000	1,000,000

In the financial year ended 31 March 2011, AmBank Islamic implemented a Senior Islamic securities issuance ("Senior Sukuk") programme under the Shariah principle of Musharakah with nominal value of up to RM3.0 billion. As at 31 March 2026, the Senior Sukuk was assigned a rating of AA2/Stable by RAM.

The salient features of Senior Sukuk issued and outstanding are as follows:

- Tranche 7 which amounted to RM300.0 million was issued on 9 May 2024. The profit rate of this tranche is 4.00% per annum, payable semi-annually and has a tenure of five (5) years.
- Tranche 8 which amounted to RM500.0 million was issued on 9 May 2024. The profit rate of this tranche is 4.10% per annum, payable semi-annually and has a tenure of seven (7) years.
- Tranche 9 which amounted to RM200.0 million was issued on 20 September 2024. The profit rate of this tranche is 3.75% per annum, payable semi-annually and has a tenure of three (3) years.

(iii) The movements of debt securities under the EMTN Programme are as follows:

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Balance at beginning of the financial year	1,324,716	–
Issuance during the financial year	–	1,330,125
Unamortised issuance expenses	–	(5,070)
Amortisation of issuance expenses	1,033	186
Foreign exchange differences	(115,719)	(525)
Balance at end of the financial year	1,210,030	1,324,716

On 7 January 2025, AmBank updated its USD2.0 billion EMTN Programme. The EMTN Programme has been approved by the Securities Commission under its deemed approval process. The net proceeds from the issuance will be utilised by AmBank for its working capital, general funding requirements and other corporate purposes.

On 23 January 2025, AmBank issued Tranche 1 (Series 2) with nominal value of USD300.0 million (RM1.3 billion) under its USD2.0 billion EMTN Programme. The coupon rate of this tranche is at 5.252% per annum, payable semi-annually with a tenure of five (5) years. As at 31 March 2026, the EMTN has been assigned a credit rating of A3 by Moody's Investors Service and BBB+ by Standard & Poor's Rating Services.

(i) Subordinated Sukuk Murabahah

On 26 February 2014, AmBank Islamic had implemented a Subordinated Sukuk Murabahah programme of RM3.0 billion. The objective of the programme is to enable the issuance of Tier 2 Capital from time to time, for the purpose of enhancing AmBank Islamic's total capital position. The programme is set up in accordance to the requirements spelt out in the Capital Adequacy Framework for Islamic Banks (Capital Components) issued by BNM, and the securities issued under this programme qualified for recognition as Tier 2 Capital for the purpose of capital adequacy ratio computation.

The programme has a tenure of thirty (30) years from the date of the first issuance under the programme. Each issuance of Tier 2 Subordinated Sukuk under this programme shall have a tenure of at least five (5) years from the issue date, and is callable on any profit payment date after a minimum period of five (5) years from the date of issuance of each tranche. As at 31 March 2026, the Tier 2 Subordinated Sukuk have been assigned a credit rating of AA3/Stable by RAM.

27. DEBT CAPITAL (CONT'D.)

(i) Subordinated Sukuk Murabahah (Cont'd.)

The salient features of Subordinated Sukuk issued and outstanding are as follows:

- Tranche 8 which amounted to RM400.0 million was issued on 8 December 2020. The profit rate of this tranche is 3.13% per annum, payable semi-annually. This tranche was fully redeemed on its first call date on 8 December 2025.
- Tranche 9 which amounted to RM250.0 million was issued on 8 March 2022. The profit rate of this tranche is 4.25% per annum, payable semi-annually.
- Tranche 10 which amounted to RM150.0 million was issued on 28 March 2023. The profit rate of this tranche is 4.53% per annum, payable semi-annually.
- Tranche 11 which amounted to RM500.0 million was issued on 27 June 2023. The profit rate of this tranche is 4.53% per annum, payable semi-annually.
- Tranche 12 which amounted to RM400.0 million was issued on 30 September 2025. The profit rate of this tranche is 3.75% per annum, payable semi-annually.

All the above tranches are for a tenure of 10 years (callable in the 5th year).

The full amount of these tranches issued qualify for recognition as Tier 2 Capital in the capital adequacy ratio computation of AmBank Islamic. Total outstanding Subordinated Sukuk Murabahah as at 31 March 2026 amounted to RM1,300,000,000 (2025: RM1,300,000,000).

(ii) Subordinated Notes

(a) Subordinated Notes programme of RM4.0 billion

On 13 December 2013, AmBank established a Subordinated Notes programme of RM4.0 billion. The objective of the programme is to enable the issuance of Tier 2 Capital from time to time, for the purpose of enhancing AmBank's total capital position. The programme is set up in accordance to the requirements spelt out in the Capital Adequacy Framework (Capital Components) issued by BNM.

The programme has a tenure of thirty (30) years from the date of the first issuance under the programme. Each issuance of Tier 2 Subordinated Notes under this programme shall have a tenure of at least five (5) years from the issue date, and is callable on any coupon payment date after a minimum period of five (5) years from the date of issuance of each tranche. As at 31 March 2026, the Tier 2 Subordinated Notes have been assigned a credit rating of AA3/Stable by RAM.

The salient features of Subordinated Notes issued and outstanding are as follows:

- Tranche 7 which amounted to RM400.0 million was issued on 30 March 2021. The interest rate of this tranche is 4.18% per annum, payable semi-annually. This tranche was fully redeemed on its first call date on 30 March 2026.
- Tranche 8 which amounted to RM600.0 million was issued on 8 March 2022. The interest rate of this tranche is 4.30% per annum, payable semi-annually.
- Tranche 9 which amounted to RM745.0 million was issued on 12 October 2022. The interest rate of this tranche is 5.20% per annum, payable semi-annually.
- Tranche 10 which amounted to RM350.0 million was issued on 28 March 2023. The interest rate of this tranche is 4.58% per annum, payable semi-annually.
- Tranche 11 which amounted to RM500.0 million was issued on 27 June 2023. The interest rate of this tranche is 4.59% per annum, payable semi-annually.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

27. DEBT CAPITAL (CONT'D.)

(ii) Subordinated Notes (Cont'd.)

(b) Subordinated Notes programme of RM8.0 billion

On 16 October 2023, AmBank established a new Subordinated Notes programme of RM8.0 billion. The objective of the programme is to enable the issuance of additional Tier 1 and Tier 2 Capital from time to time. The programme's tenure is perpetual. As at 31 March 2026, the Subordinated Notes and additional Tier-1 Notes have been assigned a credit rating of AA3/Stable and A2/Stable respectively by RAM.

The salient features of Subordinated Notes issued and outstanding are as follows:

- Tranche 1 which amounted to RM500.0 million was issued on 3 November 2023. The interest rate of this tranche is 4.55% per annum, payable semi-annually.
- Tranche 2 which amounted to RM400.0 million was issued on 17 March 2026. The interest rate of this tranche is 3.95% per annum, payable semi-annually.

All the above tranches are for a tenure of 10 years (callable in the 5th year).

The full amount of these tranches issued qualify for recognition as Tier 2 Capital in the capital adequacy ratio computation of AmBank. Total outstanding Subordinated Notes as at 31 March 2026 amounted to RM3,095,000,000 (2025: RM3,095,000,000).

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

28. OTHER LIABILITIES (CONT'D.)

(c) Movements in allowances for ECL on loan/financing commitments and financial guarantees are as follows: (Cont'd.)

The movements in allowances for ECL during the current financial year are due to the following:

(i) 12-month ECL (Stage 1) increased due to new exposures originated and transfer to 12-month ECL (Stage 1); partially offset by exposure derecognised, net remeasurement of allowances, transfer to lifetime not credit impaired Stage 2 and transfer to lifetime credit impaired Stage 3.

(ii) Lifetime ECL not credit impaired (Stage 2) increased due to new exposures originated and transfer to lifetime ECL not credit impaired (Stage 2); partly offset by exposures derecognised, impacts on migration to Stage 1 and Stage 3 and net remeasurement of allowances.

(iii) Lifetime ECL credit impaired (Stage 3) decreased mainly due to net remeasurement of allowances and exposures derecognised.

(d) The movements of lease liabilities are as follows:

	Note	Group	
		31 March 2026 RM'000	31 March 2025 RM'000
Premises			
At beginning of the financial year		133,158	186,790
Additions during the financial year		180,589	9,904
Remeasurements		82,428	798
Termination		(13)	(3)
Finance cost charged	36	7,800	4,636
Payment of lease liabilities*		(73,216)	(68,967)
At end of the financial year		330,746	133,158

* Inclusive of RM44,617,000 (2025: RM42,682,000) of payment of lease liabilities to related parties during the financial year.

There were no variable lease payments, subleasing, leases with residual value guarantees, leases not yet commenced, restrictions or covenants imposed to which the Group is committed.

The costs relating to leases for which the Group applied the practical expedient described in Note 2.5(g) for the current financial year end amounted to RM312,082 (2025: RM508,053) for low-value assets and RM Nil (2025: RM44,036) for leases with contract term of less than 12 months.

Lease liabilities analysed by undiscounted contractual payments are as follows:

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Premises		
Up to 1 month	6,415	3,816
> 1 month to 3 months	12,831	7,611
> 3 months to 6 months	18,755	9,691
> 6 months to 12 months	37,306	12,288
> 1 year to 5 years	167,016	67,516
Over 5 years	125,656	41,780
	367,979	142,702

28. OTHER LIABILITIES (CONT'D.)

(e) The movements for provision for reinstatement of leased premises are as follows:

	Note	Group	
		31 March 2026 RM'000	31 March 2025 RM'000
At beginning of the financial year		6,429	6,956
Additions during the financial year		24	–
Remeasurement		(45)	–
Reversal of provision during the financial year		(56)	(565)
Finance cost charged	36	23	38
At end of the financial year		6,375	6,429

As at 31 March 2026, the Group has estimated that it is contingently liable to incur restoration costs of RM14.2 million (2025: RM14.3 million) upon termination of lease contracts for certain premises leased from an associate.

(f) Amount due to subsidiaries are unsecured, interest-free and is repayable on demand.

29. SHARE CAPITAL

	Group		Company	
	31 March 2026 Units '000	31 March 2025 Units '000	31 March 2026 Units '000	31 March 2025 Units '000
No. of ordinary shares				
At beginning/end of the financial year	3,314,185	3,314,185	3,314,185	3,314,185

	RM'000	RM'000	RM'000	RM'000
Issued and fully paid				
At beginning/end of the financial year	6,376,240	6,376,240	6,372,870	6,372,870

The holders of fully paid ordinary shares, are entitled to receive dividends as and when declared by the Company. All fully paid ordinary shares carry one vote per share without restrictions and ranked equally with regards to the Company's residual assets.

The Company has an Executives' Share Scheme ("ESS"), details of the ESS are disclosed in Note 31. Total numbers of shares held as treasury shares for purposes of the ESS is 7,449,900 as at 31 March 2026 (2025: 10,118,700).

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

30. RESERVES

	Note	Group		Company	
		31 March 2026 RM'000	31 March 2025 RM'000	31 March 2026 RM'000	31 March 2025 RM'000
Regulatory reserve	(a)	683,469	352,522	–	–
Fair value reserve	(b)	763,350	756,720	–	–
Foreign currency translation reserve	(c)	88,755	113,212	–	–
ESS reserve	(d)	41,471	40,786	41,471	40,786
Treasury shares	(e)	(41,739)	(53,522)	(41,739)	(53,522)
Non-participating funds	(f)	45,715	45,715	–	–
Retained earnings	(g)	13,666,923	12,989,137	4,609,395	4,489,743
		15,247,944	14,244,570	4,609,127	4,477,007

(a) Regulatory reserve is maintained by the banking subsidiaries in accordance with paragraph 10.5 of the BNM's Policy Document on *Financial Reporting* and paragraph 10.9 of the BNM's Policy Document on *Financial Reporting* for Islamic Banking Institutions as an additional credit risk absorbent.

(b) The fair value reserve comprises fair value gains (net of fair value losses) on financial investments measured at FVOCI. In addition, the loss allowance arising from the recognition of expected credit losses on financial investments measured at FVOCI are accumulated in fair value reserve instead of reducing the carrying amount of the assets.

(c) Foreign currency translation reserve represents foreign exchange differences arising from the translation of the financial statements of foreign operations whose functional currencies are different from that of the Group's functional currency.

(d) ESS reserve represents the equity-settled scheme shares granted to employees (Note 31). The reserve is made up of the cumulative value of services received from employees recorded over the vesting period commencing from the grant date of equity-settled scheme share, and is reduced by the expiry of the scheme shares.

(e) Treasury shares represent the shares of the Company listed on the Main Market of Bursa Malaysia bought back from the open market. Shares bought back are held as treasury shares in accordance with Section 127(4)(b) of the Companies Act 2016. These shares have no rights to vote, dividends and participate in other distributions.

During the current financial year, the Company bought back 4,922,000 (2025: 8,322,000 ordinary shares of the Company for a total consideration of RM26.9 million (2025: RM44.7 million) (including transaction costs) from the open market at an average price of RM5.46 per share (2025: RM5.37 per share).

(f) This non-participating funds unallocated surplus is only available for distribution to shareholders based on the amount recommended by the appointed actuary.

(g) The Company can distribute dividends out of its entire retained earnings under the single-tier system.

31. EXECUTIVES' SHARE SCHEME ("ESS")

On 5 October 2018, the Board of the Company approved the implementation of a new ESS. The new ESS will be in force for a maximum period of ten (10) years from the effective date. Under the new ESS By-Laws, the award granted comprise Scheme Shares.

The awards included in the ESS are:

(i) Short term Incentive ("STI") Award

The STI Award is a share incentive scheme for the selected executives in recognition of their services as an important contribution to the current on-going development, growth and success of the Group. Under the Award, a selected executive is granted a specified number of shares which will be vested in him upon the fulfilment of the service period and such other conditions (if any) imposed by the GNRC.

(ii) Long term Incentive ("LTI") Award

The LTI Award is a share incentive scheme for the selected executives in motivating attainment of higher performance goals and exceptional achievements by selected executives. Under the Award, a selected executive is granted a specified number of shares which will be vested in him upon fulfilment of the service period as well as fulfilment of certain performance targets and such other conditions (if any) imposed by the GNRC.

The salient features of the ESS are as follows:

(i) Any executive director or executive of a corporation in the Group, who meets the following criteria at date of offer of awards ("Offer Date") shall be eligible for consideration and selection in the ESS by GNRC ("Eligible Executives"):

(a) has attained the age of eighteen (18) years and is not an undischarged bankrupt;

(b) employed on a full time basis and is on the payroll of any corporation in the Group and has not served a notice of resignation or received a notice of termination;

(c) employment has been confirmed in writing;

(d) in the case of an executive director of the Company, if required, the specific allocation of shares granted by the Company to him in his capacity as an Executive Director under the ESS has been approved by the shareholders at a general meeting;

(e) if he is serving in a specific designation under an employment contract for a fixed duration but not if he is merely employed for a specific project;

(f) is not participating or entitled to participate in any other employee share or incentive scheme implemented by any other corporation which is in force for the time being provided that he may be eligible for consideration notwithstanding his participation or entitlement to participate if the GNRC shall so determine; and

(g) fulfils any other criteria and/or falls within such category as may be set by the GNRC from time to time.

(ii) The maximum number of shares which may be made available under the ESS shall not exceed in aggregate ten percent (10%) of the total number of issued shares of the Company (excluding treasury shares) ("Maximum Scheme Shares Allowable") at any point of time during the tenure of the ESS and out of which not more than fifty percent (50%) of the shares shall be allocated, in aggregate, to executive directors and senior management. In addition, not more than ten percent (10%) of the shares available under the ESS shall be allocated to any Eligible Executive who, either individually or collectively through persons connected to him/her, holds twenty percent (20%) or more of the total number of issued shares of the Company.

(iii) In the event that the Company purchases or cancels its own shares in accordance with the provisions of Section 127 of the Companies Act 2016 or otherwise howsoever or undertakes any other corporate proposal resulting in the reduction of its issued and paid-up ordinary share capital, all the Scheme Shares granted prior to such purchase and/or the reduction/adjustment of the issued and paid-up ordinary share capital of the Company shall remain valid as if that reduction/adjustment had not occurred.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

31. EXECUTIVES' SHARE SCHEME ("ESS") (CONT'D.)

The salient features of the ESS are as follows: (Cont'd.)

(iv) The Share Grant Price (being the reference price which is used to determine the number of Scheme Shares to be granted under the awards) shall be at a discount (as determined by the GNRC) of not more than ten percent (10%) of the five (5) days weighted average market price of the Company's shares transacted on Bursa Malaysia Securities Berhad immediately preceding the date on which an offer is made (or such basis as the relevant authorities may permit).

(v) The Scheme Shares to be allotted and issued or transferred to Scheme Participant (Eligible Executive who has accepted the Offer) pursuant to the By-Laws are not subjected to any retention period unless otherwise stipulated by the GNRC in the offer.

(vi) The GNRC may in its discretion decide that the Scheme Shares be satisfied either by way of acquisition of existing ordinary shares including by a share buy-back and subject to compliance with the provisions of the Companies Act 2016 and Bursa Malaysia Securities Berhad Listing Requirements.

(vii) In the event that the performance targets, performance period or other conditions stipulated in the Offer in respect of any one or more Scheme Participant cannot be achieved/satisfied, the GNRC may in its discretion by notice in writing to such Scheme Participant(s), waive its compliance, subject to any further conditions as the GNRC may in its discretion impose.

The Company and/or GNRC may establish a Trust administered by a Trustee for the purposes of acquiring existing ordinary shares of the Company and transferring them to the Scheme Participants. For this purpose and to pay expenses in relation to the administration of the Trust, the Trustee is entitled from time to time to accept funding and/or assistance, financial or otherwise from the Company and/or its subsidiaries.

(viii) Details for Share Grants are as follows:

(a) Movements for Share Grants under LTI award:

Group	Share Grants Number of Shares				
	Movements During the Financial Year				
	Balance at 1 April 2025 '000	Granted '000	Vested '000	Forfeited '000	Balance at 31 March 2026 '000

Tax recoverable recognised on income subject to tax remission	(312)	(515)	–	–
Over provision of income tax in prior financial years	(10,161)	(3,530)	–	(3)
Under/(over) provision of deferred tax in prior financial years	2,922	(1,438)	–	–
Tax on share in results of associates and joint ventures	(26,156)	(25,883)	–	–
Taxation for the financial year	615,197	581,010	460	307

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

41. EARNINGS PER SHARE

(a) Basic earnings per share

Basic earnings per share is calculated by dividing the net profit attributable to equity holders of the Company by the weighted average number of ordinary shares in issue during the financial year excluding the weighted average of shares bought back held as treasury shares.

	Group	
	31 March 2026	31 March 2025
Net profit attributable to equity holders of the Company	2,100,836	2,001,185
Weighted average number of ordinary shares in issue ('000)	3,307,679	3,304,488
Basic earnings per share (sen)	63.51	60.56

(b) Diluted earnings per share

The Group has no dilution in its earnings per ordinary share in the current and previous financial year as there are no dilutive potential ordinary shares.

42. DIVIDENDS

Dividends recognised and paid by the Group and the Company are as follows:

	Group and Company	
	31 March 2026 RM'000	31 March 2025 RM'000
In respect of the financial year ended 31 March 2026		
Interim single-tier dividend of 12.5 sen per share	413,415	–
In respect of the financial year ended 31 March 2025		
Interim single-tier dividend of 10.3 sen per share	–	340,648
Final single-tier dividend of 19.9 sen per share	657,350	–
In respect of the financial year ended 31 March 2024		
Final single-tier dividend of 16.6 sen per share	–	548,738
	1,070,765	889,386

42. DIVIDENDS (CONT'D.)

(a) Dividends recognised and paid

The dividends are paid based on the number of outstanding ordinary shares in issue (net of treasury shares) on the entitlement date of dividend.

(b) Proposed final dividend

The Directors proposed the payment of a final single-tier dividend of 22.5 sen per share on 3,306,734,944 ordinary shares in issue (net of treasury shares) amounting to approximately RM744,015,000 in respect of the current financial year ended 31 March 2026. The financial statements for the current financial year do not reflect this proposed dividend and will be accounted for in equity as an appropriation of retained earnings in the financial year ending 31 March 2027.

(c) Dividends paid by the Company's subsidiaries to non-controlling interests

Dividends paid by the Company's subsidiaries to non-controlling interests amounted to RM150,000 during the financial year ended 31 March 2026 (2025: RM300,000).

43. SIGNIFICANT RELATED PARTY TRANSACTIONS AND BALANCES

For the purpose of these financial statements, parties are considered to be related to the Group or the Company if the Group has the ability, directly or indirectly, to control the party or exercise significant influence over the party in making financial or operational decisions, vice versa, or where the Group or the Company and the party are subject to common control or common significant influence. Related parties may be individuals or other entities.

The related parties of the Group and the Company are:

(i) Subsidiaries

Transactions between the Company and its subsidiaries have been eliminated on consolidation. Details of subsidiaries are shown in Note 15.

(ii) Associates and joint ventures

Details of associates and joint ventures are disclosed in Note 16.

(iii) Key management personnel ("KMP")

KMP are defined as those persons having authority and responsibility for planning, directing and controlling the activities of the Group and of the Company, either directly or indirectly. The KMP include Executive and Non-Executive Directors and certain members of senior management of the Group and of the Company as well as heads of major subsidiaries of the Company (including close member of their families).

(iv) Companies in which certain Directors have substantial financial interest

These are entities in which significant voting power in such entities, either directly or indirectly, resides with certain Directors of the Company.

All related party transactions are conducted on normal commercial terms which are no more favourable than those generally available to the public.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

43. SIGNIFICANT RELATED PARTY TRANSACTIONS AND BALANCES (CONT'D.)

(c) There were no granting of loans, advances and financing to the Directors of the Company other than in the normal course of business of the Group and of the Company. Loans, advances and financing made to Directors and other key management personnel of the Group are on similar terms and conditions generally available to other employees within the Group. No provisions have been recognised in respect of loans, advances and financing given to Directors and key management personnel.

(d) The Company incurs intercompany charges for shared operating costs of the Group in Malaysia as disclosed under service transfer pricing expenses. The services received relate to expenses incurred for group shared services in respect of key management personnel costs, internal audit, finance, human resource, marketing and communications, legal, company secretarial, organisation and development and information systems.

(e) Key management personnel compensation

The remuneration of Directors of the Company and other key management personnel during the financial year are as follows:

	Note	Group		Company	
		31 March 2026 RM'000	31 March 2025 RM'000	31 March 2026 RM'000	31 March 2025 RM'000
Directors:	37				
Fees		2,600	2,689	1,784	1,585
Other emoluments		2,144	2,063	1,305	1,214
Other short-term employee benefits (including estimated monetary value of BIK)		227	230	178	153
		4,971	4,982	3,267	2,952
Other key management personnel:					
Salary		20,104	20,503	–	–
Bonus[1]		15,781	15,418	–	–
LTI[1]		12,228	7,556	–	–
Other emoluments and BIK[2]		10,287	10,388	–	–
		58,400	53,865	–	–

Notes:

[1] The Group's Board of Directors has been notified on the approved bonus and LTI by its respective entities' Board of Directors. The bonus is payable in three tranches subsequent to the financial year end. The LTI will vest in three years if the performance conditions are met. During the financial year, the KMP received RM9,075,420 (2025: RM9,459,200) in shares in relation to the LTI vesting.

[2] Include statutory contributions and allowances.

The remuneration for other key management personnel of the Company of RM12,457,200 (2025: RM12,708,000) was paid by AmBank and charged to the Company under STP expenses.

44. CREDIT TRANSACTIONS AND EXPOSURES WITH CONNECTED PARTIES

	Group	
	31 March 2026	31 March 2025
Outstanding credit exposures with connected parties (RM'000)	3,587,499	2,931,995
Percentage of outstanding credit exposures to connected parties as a proportion of total credit exposures (%)	2.09	1.78
Percentage of outstanding credit exposures with connected parties which is impaired or in default (%)	0.00	0.00

The credit exposures disclosed above are based on the requirement of paragraph 9.1 of Bank Negara Malaysia's revised Guidelines on Credit Transactions and Exposures with Connected Parties and Credit Transactions and Exposures with Connected Parties for Islamic Banks issued on 16 July 2014.

Based on these guidelines, a connected party refers to the following:

(i) Directors of AmBank, AmInvestment Bank and AmBank Islamic ("the Banks") and their close relatives;

(ii) Controlling shareholder and his close relatives;

(iii) Influential shareholder and his close relatives;

(iv) Executive officer, being a member of management having authority and responsibility for planning, directing and/or controlling the activities of the Banks, and his close relatives;

(v) Officers who are responsible for or have the authority to appraise and/or approve credit transactions or review the status of existing credit transactions, either as a member of a committee or individually, and their close relatives;

(vi) Firms, partnerships, companies or any legal entities which control, or are controlled by any person listed in (i) to (v) above, or in which they have an interest as a director, partner, executive officer, agent or guarantor, and their subsidiaries or entities controlled by them;

(vii) Any person for whom the persons listed in (i) to (v) above is a guarantor; or

(viii) Subsidiary of or an entity controlled by the Banks and their connected parties.

Credit transactions and exposures to connected parties as disclosed above include the extension of credit facilities and/or commitments and contingencies transactions that give rise to credit/counterparty risk, the underwriting and acquisition of equities and corporate bonds and/or sukuk issued by the connected parties.

The credit transactions with connected parties above are all transacted on an arm's length basis and on terms and conditions not more favourable than those entered into with other counterparties with similar circumstances and creditworthiness. Due care has been taken to ensure that the creditworthiness of the connected party is not less than that normally required of other persons.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

45. FIDUCIARY DUTY

(a) In respect of investment portfolio management

Investment portfolio funds managed by the Group on behalf of customers as at 31 March 2026 amounted to RM67,446,446,506 (2025: RM62,971,256,320).

(b) In respect of monies in trust

Monies in trust in relation to the Group's stockbroking and futures businesses excluded from the statements of financial position in accordance with Financial Reporting Standards Implementation Committee Consensus 18 *Monies Held in Trust by Participating Organisations of Bursa Malaysia Securities Berhad* ("FRSIC 18"):

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Clients' trust balances and dealers' representative balances	534,815	576,958
Remisiers' trust balances	31,252	31,101
	566,067	608,059

Monies held in trust in relation to the Group's fund management business excluded from the statements of financial position:

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Monies in trust in relation to the fund management business	16,337	31,535

46. CAPITAL COMMITMENTS

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Authorised and contracted for:		
Purchase of computer equipment and software	48,623	29,552
Leasehold improvements	3,939	8,049
	52,562	37,601
Authorised but not contracted for:		
Purchase of computer equipment and software	101,963	108,090
	154,525	145,691

47. COMMITMENTS AND CONTINGENCIES

In the normal course of business, the banking subsidiaries of the Company make various commitments and incur certain contingent liabilities with legal recourse to their customers. No material losses are anticipated as a result of these transactions other than those where provision had been made in the financial statements. The commitments and contingencies are not secured against the Group's assets.

As at the reporting date, the principal amounts of commitments and contingencies and notional contracted amounts of derivatives are as follows:

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Commitments		
Other commitments, such as formal standby facilities and credit lines, with an original maturity of:		
One year or less	20,472,666	19,272,118
Over one year	2,501,237	2,783,244
Unutilised credit card lines	7,225,246	6,059,474
Forward asset purchases	442,578	762,478
	30,641,727	28,877,314
Contingent Liabilities		
Direct credit substitutes	355,249	1,381,075
Transaction-related contingent items	9,394,519	8,593,579
Obligations under on-going underwriting agreements	–	13,862
Short-term self-liquidating trade-related contingencies	1,410,574	1,152,135
	11,160,342	11,140,651
Derivative Financial Instruments		
Interest/profit rate related contracts:	59,715,115	44,243,660
One year or less	4,861,782	4,098,987
Over one year to five years	41,276,848	27,946,421
Over five years	13,576,485	12,198,252
Foreign exchange related contracts:	53,934,452	46,789,010
One year or less	47,629,800	42,369,636
Over one year to five years	5,293,089	3,018,862
Over five years	1,011,563	1,400,512
Equity and commodity related contracts:	2,808,005	2,240,373
One year or less	2,589,988	2,063,663
Over one year to five years	218,017	176,710
	116,457,572	93,273,043
Total	158,259,641	133,291,008

NOTES TO THE FINANCIAL STATEMENTS

49. CAPITAL MANAGEMENT

The Group's capital management approach is focused on maintaining an optimal capital position that supports the Group's strategic objectives and risk appetite. In line with the Group's annual 3-year strategy plan, a capital plan is developed to ensure that adequate level of capital and an optimum capital structure is maintained to meet regulatory requirements, the Group's strategic objectives and stakeholders' expectations.

The Group uses internal models and other quantitative techniques in its internal risk and capital assessment. They help to estimate potential future losses arising from credit, market and other material risks, and supplement the regulatory formulae to simulate the amount of capital required to support them.

Stress testing is used to ensure that the Group's internal capital assessment considers the impact of extreme but probable scenarios on its risk profile and capital position. They provide an insight into the potential impact of significant adverse events on the Group and how these events could be mitigated. The Group's target capital levels are set taking into account its risk appetite and its risk profile under future expected and stressed economic scenarios.

The Group's assessment of risk appetite is closely integrated with the Group's strategy, business planning and capital assessment processes, and is used to inform senior management's views on the level of capital required to support the Group's business activities.

The capital that the Group is required to hold is determined by its risk exposures after applying collaterals and other risk mitigants.

The Group has in place processes and controls to monitor and manage capital adequacy across the organisation. The Group Assets and Liabilities Committee ("GALCO") is responsible for overseeing and managing the Group's capital and liquidity positions.

A strong governance and process framework is embedded in the capital planning and assessment methodology. Overall responsibility for the effective management of risk rests with the Board. The Risk Management Committee ("RMC") is specifically delegated the task of reviewing all risk management issues including oversight of the Group's capital position and any actions impacting the capital levels.

The capital adequacy ratios are computed in accordance with BNM's policy documents on Capital Adequacy Framework (Capital Components), Capital Adequacy Framework for Islamic Banks ("CAFIB") (Capital Components) issued on 14 June 2024, Capital Adequacy Framework (Basel II – Risk Weighted Assets), CAFIB (Risk Weighted Assets) issued on 18 December 2023, Capital Adequacy Framework (Operational Risk) and Capital Adequacy Framework (Exposures to Central Counterparties) issued on 15 December 2023. Pursuant to BNM's policy documents on Capital Adequacy Framework (Capital Components) and CAFIB (Capital Components), financial institution is required to maintain minimum Common Equity Tier 1 ("CET1") Capital Ratio of 4.5%, Tier 1 Capital Ratio of 6.0% and Total Capital Ratio of 8.0% at all times. In addition, a financial institution is also required to maintain capital buffers which comprise the sum of the following:

i. a Capital Conservation Buffer ("CCB") of 2.5%;

ii. a Countercyclical Capital Buffer ("CCyB") determined as the weighted-average of the prevailing CCyB rates applied in the jurisdictions in which the financial institution has credit exposures. BNM will communicate any decision on the CCyB rate by up to 12 months before the date from which the rate applies; and

iii. a Higher Loss Absorbency ("HLA") requirement for a financial institution that is designated as a domestic systemically important bank ("D-SIB").

(a) The Group adopts the following approaches in determining the capital requirements:

Credit Risk:

AmBank and AmBank Islamic have adopted the Foundation Internal Rating Based ("FIRB") Approach and Supervisory Slotting Criteria for major non-retail portfolios and the Advanced Internal Ratings Based ("AIRB") Approach for major retail portfolios. Given that the credit risk exposure of AmInvestment Bank is relatively less material, the credit risk component of capital adequacy ratios of AmInvestment Bank remains to be computed using Standardised Approach. Credit risk is computed in accordance with Capital Adequacy Framework (Basel II – Risk Weighted Assets), CAFIB (Risk Weighted Assets) and Capital Adequacy Framework (Exposures to Central Counterparties).

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

49. CAPITAL MANAGEMENT (CONT'D.)

(a) The Group adopts the following approaches in determining the capital requirements: (Cont'd.)

Market Risk:

Market risk remains to be computed using the Standardised Approach, as per the Capital Adequacy Framework (Basel II – Risk Weighted Assets) and CAFIB (Risk Weighted Assets).

Operational Risk:

The computation of operational risk-weighted assets is in line with the Capital Adequacy Framework (Operational Risk).

The capital adequacy ratios of the Group and the banking subsidiaries are as follows:

	31 March 2026			
	AmBank	AmBank Islamic	AmInvestment Bank	Group[1]
Before deducting proposed dividends:				
CET1 Capital Ratio	14.647%	15.937%	50.428%	15.445%
Tier 1 Capital Ratio	14.647%	15.937%	50.428%	15.445%
Total Capital Ratio	18.535%	20.344%	51.112%	17.851%
After deducting proposed dividends:				
CET1 Capital Ratio	14.455%	14.594%	43.903%	14.821%
Tier 1 Capital Ratio	14.455%	14.594%	43.903%	14.821%
Total Capital Ratio	18.343%	19.001%	44.588%	17.227%

	31 March 2025			
	AmBank	AmBank Islamic	AmInvestment Bank	Group[1]
Before deducting proposed dividends:				
CET1 Capital Ratio	14.692%	15.652%	45.121%	15.389%
Tier 1 Capital Ratio	14.692%	15.652%	45.121%	15.390%
Total Capital Ratio	18.847%	20.276%	45.858%	18.064%
After deducting proposed dividends:				
CET1 Capital Ratio	14.295%	14.814%	39.357%	14.818%
Tier 1 Capital Ratio	14.295%	14.814%	39.357%	14.818%
Total Capital Ratio	18.451%	19.439%	40.093%	17.493%

Note:

[1] The Company, being a financial holding company ("FHC") i.e. a financial holding company approved pursuant to Section 112(3) of the FSA or Section 124(3) of the IFSA and holds investment directly or indirectly in corporations that are engaged predominantly in banking business or Islamic banking business, has complied with BNM guidelines on minimum capital adequacy ratios and capital buffer requirements at the consolidated level effective 1 January 2019. For regulatory capital reporting purposes, the consolidated level comprises the consolidation of all its financial and non-financial subsidiaries, excluding investments in ordinary shares of unconsolidated financial and insurance entities as per BNM's guidelines on Capital Adequacy Framework (Capital Components) and CAFIB (Capital Components). Under the guidelines, investments in ordinary shares of unconsolidated financial and insurance entities shall be deducted in the calculation of CET1 Capital Ratio.

49. CAPITAL MANAGEMENT (CONT'D.)

50. RISK MANAGEMENT

50.1 General Risk Management

The Risk Management Framework takes its lead from the Board's Approved Risk Appetite Framework that forms the foundation of the Group to set its risk/reward profile.

The Risk Appetite Framework is reviewed and approved annually by the Board taking into account the Group's desired external rating and targeted profitability/return on capital employed ("ROCE") and is reviewed periodically throughout the financial year by both the executive management and the Board to consider any fine tuning/enhancements taking into consideration the prevailing or in anticipation of challenges to the environment that the Group operates in.

The Risk Appetite Framework provides portfolio limits/triggers for Credit Risk, Traded Market Risk, Non-Traded Market Risk, Operational Risk, Sustainability Risk and Technology and Cyber Risk incorporating, inter alia, limits/triggers for countries, industries, single counterparty group, products, value at risk, stop loss, stable funding ratio, liquidity and Operational Risk Management ("ORM") tools.

50. RISK MANAGEMENT (CONT'D.)

50.1 General Risk Management (Cont'd.)

The Group Risk Direction

The Group's FY2025 to FY2029 Winning Together Strategy blueprint is to focus and reconstruct on 8 key areas, namely, (1) Path to Return on Equity ("ROE") of ≥10%, (2) Sharpening Segment Play, (3) Holistic Customer Value Proposition ("CVP") Leveraging A Collaboration Culture and Partnerships, (4) Pushing Capital-Light Revenue, (5) Ramping Up the Next Wave of Digital Initiatives, (6) Future Proofing The Workforce, (7) Integrating Environmental, Social, and Governance ("ESG") Considerations and (8) The Digital Bank.

1 The Group aspires to maintain its corporate credit ratings and the financial institution ratings of its banking subsidiaries at a minimum of AA2/P1 by RAM Rating Services Berhad ("RAM").

2 The Group aims to maintain a minimum ROCE of 12% and RWA efficiency ("CRWA/EAD") in the range of 40% to 45%, both based on FIRB.

3 The Group aims to maintain its Capital Ratios and at the Group's Internal Capital Target and Desired Operating Level Target under normal conditions.

4 The Group aims to maintain Available Financial Resources in excess of the capital requirements as estimated in the Internal Capital Adequacy Assessment Process ("ICAAP").

5 The Group recognises the importance of funding its own business. It aims to maintain the following:

   a. Liquidity Coverage Ratio ("LCR") (both consolidated and entity level) at least 10 percentage points above prevailing regulatory minimum;

   b. Stressed LCR (both consolidated and entity level) above the regulatory requirement; and

   c. Net Stable Funding Ratio ("NSFR") (FHC level) above the prevailing regulatory minimum (effective July 2020).

6 The Group aims to maintain adequate controls for all key operational risks (including but not limited to regulatory, compliance, technology, conduct and reputational risks).

   a. Keep the overall financial losses (operational losses, regulatory penalties and fraud losses) below 0.8% of Profit After Taxation and Minority Interest ("PATMI"); and

   b. Remain vigilant in risk identification and management to protect its reputation and business franchise.

7 The Group aims to maintain adequate controls for all Shariah Non-Compliance ("SNC") risks, with zero tolerance to SNC.

8 The Group aims to manage the non-climate supporting and transition exposures of the climate sensitive sectors within 15% by FY2027 (Short Term) and 10% by FY2030 (Medium Term) of non-retail financing/investment exposures.

9 The Group aims to manage its exposures to Green House Gas ("GHG") emission intensive sectors while continuing to engage and assist our customers onto sustainability pathways toward the Group's ultimate target of net zero, in line with the country aspiration by FY2050.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

50. RISK MANAGEMENT (CONT'D.)

50.1 General Risk Management (Cont'd.)

Risk Management Governance

The Board is ultimately accountable for the management of risks within the Group. The RMC is formed to assist the Board in discharging its duties in overseeing the overall management of all risks including but not limited to market risk, liquidity risk, credit risk, operational and fraud risk, technology and cyber risk.

The Board has also established Management Committees to assist in managing the risks and businesses of the Group. The Management Committees address all classes of risk within its Board delegated mandate: credit risk, legal risk, operational and fraud risk, technology and cyber risk, market risk, liquidity risk, Shariah risk, compliance risk, reputational risk, product and business risk, Information Technology ("IT") risk, climate related risk and sustainability (covering ESG) risk.

The Group has an independent risk management function, headed by the Group Chief Risk Officer who:

- is responsible for establishing an enterprise wide risk management framework in all areas including credit, market, liquidity, operational, fraud, reputational, security, technology and cyber, emerging risks, climate related risk and sustainability risk;
- essentially champions and embeds a positive risk culture across the Group to ensure that risk taking activities across the Group are aligned to the Group's risk appetite and strategies; and
- through the RMC, has access to the Board and the Boards of the respective banking subsidiaries to facilitate suitable escalation of issues of concern across the organisation.

Potential impact of Emerging Risk

Emerging risks, such as increasing living costs due to inflationary pressure would potentially impact the asset quality of the Group's receivables. Mitigation actions such as comprehensive assessment through new booking quality tracking and trigger as well as a thorough review of the existing portfolio to identify the potentially vulnerable segment and thereafter allocate reasonable provisions to cushion the potential impacts.

The Business Banking – Enterprise Banking ("BB-EB") portfolio, particularly for smaller SMEs, contains segments with elevated risk (i.e. high risk segment) that may affect overall asset quality. Portfolio segmentation has been carried out to enable different strategies to be deployed accordingly, enabling a more effective portfolio management with improved oversight. Furthermore, appropriate provisions have been allocated as necessary.

50. RISK MANAGEMENT (CONT'D.)

50.2 Credit Risk Management

The credit risk management process is depicted in the table below:

Identification	• Identify/recognise credit risk on transactions and/or positions • Select asset and portfolio mix
Assessment/Measurement	• Internal credit rating system • Probability Of Default ("PD") • Loss Given Default ("LGD") • Exposure At Default ("EAD") • Expected Loss ("EL") • Gross Impaired Loan/Financing ("GIL"/"GIF")
Control/Mitigation	• Portfolio Limits, Counterparty Limits • Non-Retail Pricing and Risk-based pricing for Retail • Collateral and tailored facility structures (discretionary lending) • Pre-set assessment criteria and acceptance criteria (programme lending)
Monitoring/Review	• New booking quality tracking and trigger, enabling early identification of potential deterioration • Monitor and report portfolio mix • Review Classified Accounts • Review Rescheduled and Restructured Accounts • Undertake independent credit review • Annual refresh of borrowers'/customers' credit risk rating

Credit risk is the risk of loss due to the inability or unwillingness of a counterparty to meet its payment obligations. Exposure to credit risk arises from lending/financing, securities and derivative exposures. The identification of credit risk is done by assessing the potential impact of internal and external factors on the Group's transactions and/or positions as well as Shariah compliance risk (please refer to Note 50.9 for discussion on Shariah Governance Structure).

The primary objective of credit risk management is to maintain accurate risk recognition – identification and measurement, to ensure that credit risk exposure is in line with the Group's Risk Appetite Framework ("GRAF") and related credit policies.

For non-retail credit, risk assessment is a combination of both qualitative and quantitative assessment (including the financial standing of the customer or counterparty using the banking subsidiaries' credit rating model where the scores are translated into rating grade) on the customer or counterparty. The assigned credit rating grade forms a crucial part of the credit analysis undertaken for each of the banking subsidiaries' credit exposures and the overall credit assessment is conducted either through a programme lending or discretionary lending approach.

For retail credit, credit-scoring systems to better differentiate the quality of borrowers/customers are being used to complement the credit assessment and approval processes.

To support credit risk management, rating models for major portfolios have been continuously monitored and implemented to facilitate:

- improvement in the accuracy of individual obligor risk ratings;
- enhancement to pricing models;
- credit decisioning process;
- loan/financing loss provision calculation;
- stress-testing; and
- enhancement to portfolio management.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

50. RISK MANAGEMENT (CONT'D.)

50.2 Credit Risk Management (Cont'd.)

Lending/financing activities are guided by internal credit policies and GRAF that are approved by the Board supplemented by credit guidelines and Management-level GRAF settings approved by the Management. The GRAF is refreshed at least annually and with regard to credit risk, provides direction as to portfolio management strategies and internal limits designed to deliver the Group's optimal portfolio mix. Credit risk portfolio management strategies include, amongst others:

- Concentration threshold/review triggers:
  - single counterparty credit exposure;
  - industry sector exposure; and
  - country risk exposure;
- Non-Retail Credit Policy ("NRCP") and Retail Credit Policy ("RCP") which set out the credit principles and requirements for managing credit risk in the Wholesale Banking ("WB"), Business Banking ("BB"), Investment Banking ("IB"), Group Wealth Management ("GWM") and Retail Banking ("RB") portfolios;
- Classified Account Management requirements are in place for the non-retail model related portfolio, this sets out the identification and management (including monitoring requirements) of borrowers/customers that exhibit SICR or show symptoms of potential credit issues;
- Rescheduled and Restructured ("R&R") Account Management (embedded within the NRCP for WB and BB, and RCP for RB) sets out the controls in managing R&R loans/financing; and
- Setting Retail and BB-EB risk controls capping for higher risk segment to ensure credit approval practice is aligned with the credit policies and GRAF.

Exposure outside the approval discretions of individual Credit Approval Delegation ("CAD") holders are escalated to higher approving authority or Credit and Commitments Committee ("CACC") for approval. In the event such exposure exceeds a stipulated customer group threshold within the Group, the letter of offer shall not be issued until the credit is reviewed by the Joint Board Credit Committee ("Joint BCC"). Portfolio credit risk is reported to the relevant management and board committees.

The Group Management Risk Committee ("GMRC") regularly meets to review the quality and diversification of the Group's loan/financing portfolio and review the portfolio risk profile against the GRAF and recommend or approve new and amended credit risk policies or guidelines.

Group Risk Management prepares monthly Risk Reports which detail important portfolio composition and trend analysis incorporating asset growth, asset quality, impairment, flow rates of loan/financing delinquency buckets and exposures by industry sectors are reported monthly to executive management and to all meetings of the Board.

Maximum Credit Risk Exposure and Concentration

Credit Risk Exposure and Concentration

The Group's concentrations of risk are managed by industry sector, risk grade asset quality and single name limit ("SNL"). The Group applies SNL to monitor and manage the large exposures to single counterparty risk.

For financial assets recognised on the statements of financial position, the maximum exposure to credit risk before taking account of any collateral held or other credit enhancements equals the carrying amount. For contingent exposures, the maximum exposure to credit risk is the maximum amount the Group would have to pay if the instrument is called upon. For committed facilities which are undrawn, the maximum exposure to credit risk is the full amount of the committed facilities.

The following tables show the maximum exposure to credit risk from financial instruments, including derivatives, by industry and by geography, before taking into account of any collateral held or other credit enhancements.

The comparatives for loans, advances and financing have been restated to conform with the current business realignment between the business segments. It applies to Notes 50.2.1a, 50.2.1b, 50.2.1d and 50.2.1f.

Collateral and Other Credit Enhancement

Collateral Taken by the Group

Collateral is generally taken as security for credit exposures as a secondary source of repayment in case the counterparty cannot meet its contractual repayment obligations from cash flow generation. The collateral accepted for credit risk mitigation comprises financial collateral, real estate, other physical asset and guarantees.

In the case of the Group's Islamic Banking operations, only Shariah approved assets can be accepted as permissible collateral. Notwithstanding, for specific products, a collateral that becomes non-Shariah compliant during the tenure of financing may continue to be maintained as collateral.

The Credit Risk Mitigation Policy is the internally recognised collateral framework for the Group. Any collateral that does not conform to the requirements outlined in that policy may be considered by the relevant approval authority to be accepted and approved as an exception. For capital relief purposes, Basel FIRB requirements set out in BNM's Capital Adequacy Framework are to be met, failing which no capital relief is to be accorded.

Processes for Collateral Management

The concept of legal enforceability and certainty are central to collateral management. In order to achieve legal enforceability and certainty, the Group has standard collateral instruments, and where applicable, security interests are registered.

Guarantee Support

Guarantee support for lending/financing proposals are an integral component in transaction structuring for the Group. For Non-Retail portfolio, where a counterparty's corporate guarantor guarantees 100% of the credit facility, the credit risk rating of the counterparty is able to be substituted, subject to fulfilling certain stipulated conditions. Otherwise, if the stipulated conditions are met but the guarantee is less than 100%, the weighted-average method is able to be employed.

Under the FIRB Approach for non-retail, the Group adopts the PD substitution approach whereby the exposure guaranteed by an eligible guarantor will substitute the PD of the counterparty in the computation of capital if the guarantor is internally rated and associated with a PD equivalent to BBB– or better. For retail exposures, guarantor is being considered as part of PD assessment.

50. RISK MANAGEMENT (CONT'D.)

50.2 Credit Risk Management (Cont'd.)

Collateral and Other Credit Enhancement (Cont'd.)

Use of Credit Derivatives and Netting for Risk Mitigation

Currently, the Group does not use credit derivatives and netting for risk mitigation.

Transaction Structuring to Mitigate Credit Risk

Besides tangible security and guarantee support described above, credit risk mitigation techniques are used in structuring transactions. These include duration limits managing the tenure of the loans/financing, amortisation schedules and loan/financing covenants. These assist in managing credit risk and providing early warning signals to enable pre-emptive actions to protect the quality or recoverability of loan/financing assets.

Concentrations of Credit Risk Mitigation

The Group carefully monitors collateral concentrations via portfolio management reporting and amendments as necessary to its Risk Appetite Framework.

Credit Quality

The credit quality of financial assets are analysed based on broad categories. Internal credit rating grades assigned to corporate and retail lending business are currently aligned to eight rating categories (seven for non-defaulted and one for those that have defaulted) in accordance with the Capital Adequacy Framework (Basel II – Risk-Weighted Assets) and CAFIB (Risk-Weighted Assets). The following categories based on the descriptions are appended below.

Description of the Categories for Retail Banking

Risk Grade	Category	PD ranges	Description
1 to 6	Exceptionally Strong	0.0001% to 0.0737%	• Exceptionally strong capacity and willingness to meet its financial commitments as evidenced by prompt repayment track record. • Exhibits very high degree of resilience to adverse development in view of its very established employment profile and track record.
7 to 12	Very strong	0.0738% to 0.5942%	• Very strong capacity and willingness to meet its financial commitments as evidenced by generally prompt repayment track record. • Exhibits high degree of resilience to adverse development in view of its established employment profile and track record.
13 to14	Strong	0.5943% to 1.0159%	• Exhibits willingness to meet its financial commitments as evidenced by good repayment track record. • Generally in position to withstand adverse development in view of its favourable employment profile and track record.
15 to 16	Satisfactory	1.0160% to 2.2722%	• Adequate willingness to meet its financial commitments as evidenced by satisfactory repayment track record. • Generally in position to resolve any apparent shortcoming within an acceptable time frame in view of its satisfactory employment profile and track record.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

50. RISK MANAGEMENT (CONT'D.)

50.2 Credit Risk Management (Cont'd.)

Credit Quality (Cont'd.)

Description of the Categories for Retail Banking (Cont'd.)

Risk Grade	Category	PD ranges	Description
17 to 18-	Moderate	2.2723% to 4.1028%	• Willingness to meet its financial commitments would be uncertain in the event of adverse changes in circumstances and economic conditions as evidenced by generally satisfactory repayment track record. • Generally in position to resolve any apparent shortcoming within an acceptable time frame in view of its moderate employment profile and track record.
19+ to 20-	Marginal	4.1029% to 8.2931%	• Willingness to meet its financial commitments would be uncertain under normal circumstances and economic conditions as generally evidenced by fair repayment track record. • Moderate employment profile and track record.
21 to 24	Substandard	8.2932% to 99.9999%	• Exhibits less willingness to meet its financial commitments under normal circumstances and economic conditions as generally evidenced by poor repayment track record. • Unfavourable employment profile and track record.
99	Impaired	100%	• Impaired account. Classified as impaired as per the prevailing policy/ guidelines.

Description of the Categories for Non-Retail Banking

Credit Quality Classification	Description
Exceptionally strong	Highest rating, for exceptionally strong government institutions and a small number of very large multinational institutional clients. The key characteristics are: – Exceptionally solid and stable operating and financial performance; – Debt servicing capacity has been exceptionally strong over the long-term; – All available information, of which there is a substantial quantity of extremely high quality, supports the view that these historical performance standards will be maintained for the foreseeable future; and – Highly unlikely to be adversely affected by foreseeable events.
Very strong	Strong government institutions or institutional clients, with identifiably higher, albeit modest, long-term risk but still demonstrating solid and stable operating and financial performance. The key characteristics are: – Based on their activities, financial profile and past capacity to repay, counterparties with this rating carry a small, but clearly identifiable degree of risk; and – Debt servicing capacity in previous period has been substantial and solid, and is projected to continue over the medium term but may be more vulnerable to changes in business, economic and financial conditions than is the case for stronger ratings.

50. RISK MANAGEMENT (CONT'D.)

50.2 Credit Risk Management (Cont'd.)

Credit Quality (Cont'd.)

Description of the Categories for Non-Retail Banking (Cont'd.)

Credit Quality Classification	Description
Strong	Counterparties demonstrate medium to long-term operational and financial stability and consistency but they are identifiably susceptible to cyclical trends or variability in earnings. The key characteristics are: – Counterparties present an identifiable degree of generally acceptable risk, possibly expressing itself as variability in financial and/or operating performance; and – Debt servicing capacity is quite good but adverse changes in circumstances and economic conditions are more likely to impair this capacity.
Satisfactory	Counterparties demonstrate adequate medium term operational and financial stability. Protection factors are considered sufficient for prudent investment. The key characteristics are: – Counterparties present a mostly satisfactory risk that requires mitigation, possibly expressing itself as variability in financial and/or operating performance; – Debt servicing capacity is satisfactory but adverse changes in circumstances and economic condition may impair this capacity; and – Counterparty's financial and/or non-financial profile provides a limited buffer to mitigate the negative impact of any future adverse changes in circumstances and economic conditions.
Moderate	Counterparties demonstrate limited operational and financial stability and may have a track record of fluctuating and poor earnings and profitability evidencing their past susceptibility to cyclical trends. The key characteristics are: – Capacity for timely fulfilment of financial obligations exists; – Adverse economic condition or changing business environment is more likely to lead to weakened capacity to meet timely repayment in the long run; and – Overall credit quality may be more volatile within this category.
Marginal	Counterparties demonstrate sustained operational and financial instability. The key characteristics are: – Erratic performance with one or more recent loss periods, increased borrowings or patchy account conduct; – Debt servicing capacity is marginal; – Often under strong, sustained competitive pressure; – Variability and uncertainty in profitability and liquidity is projected to continue over the short and possibly medium term; and – Significant changes and instability in senior management may be observed.
Substandard	Lowest rating for counterparties that continuously demonstrate operational and financial instability. The key characteristics are: – Mediocre financials with consistent loss periods, increased borrowings and/or poor account conduct; – Current and expected debt servicing capacity is inadequate; – Financial solvency is questionable and/or financial structure is weak; – Deteriorating state of business and require significant changes in strategies or practices to return business to sustainable state; and – Experiencing difficulties, which may result in default in the next one to two years.
Impaired	Impaired account. The key characteristic is that the counterparty has been classified as "impaired" as per the prevailing policy/guidelines.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

50. RISK MANAGEMENT (CONT'D.)

50.2 Credit Risk Management (Cont'd.)

Impairment

The relevant governance for the respective Line of Businesses are established to align with the MFRS Accounting Standards and related BNM's standards/guidelines. In general, an asset is considered impaired when:

(a) the obligor has breached its contractual payment obligations and past due for more than 90 days; or

(b) as soon as default occurs where the principal and/or interest/profit repayments/payments are scheduled on intervals of 3 months or longer; or

(c) other impairment indicators stipulated in the relevant guidelines.

Impaired accounts which undergo restructuring/rescheduling will continue to be impaired for at least 6 months.

Group Provisioning Methodology

The Group's provisioning methodology complies with MFRS 9 where the Group recognises ECL at all times to reflect changes in the credit risk of a financial instrument. The methodology incorporates historical, current and forecasted information into ECL estimation. Consequently, more timely information is required to be provided about ECL.

MFRS 9 applies to all financial assets classified as amortised cost and FVOCI, lease receivables, trade receivables, and commitments to lend money and financial guarantee contracts.

Except for POCI financial assets, financial assets are classified into 3 stages based on the changes in credit risk since initial recognition. The Group calculates 12-month ECL for Stage 1, Lifetime ECL for Stage 2, Stage 3 and POCI exposures.

(i) Stage 1 : For performing financial assets which credit risk had not been significantly increased since initial recognition.

(ii) Stage 2 : For underperforming financial assets which credit risk had significantly increased since initial recognition.

(iii) Stage 3 : For financial assets which are credit impaired subsequent to initial recognition.

(iv) POCI : For financial assets which are credit-impaired on initial recognition.

Measurement of ECL

The following diagram summarises the impairment requirements under MFRS 9 (other than POCI financial assets):

← Changes in credit quality since initial recognition →

Stage 1	Stage 2	Stage 3
(Initial recognition)	(SICR since initial recognition)	(Credit-impaired assets)
12-month ECL	Lifetime ECL	Lifetime ECL

ECL can be assessed individually or collectively. Financial assets that are not individually significant or not individually credit impaired are collectively assessed. For financial assets that are individually significant, an assessment is performed to determine whether objective evidence of impairment exists individually.

Individual assessment is divided into two main processes – trigger assessment and measurement of impairment loss. Financial assets which are triggered by the impairment triggers will be measured for evidence of high likelihood of impairment, i.e. estimated recoveries (based on the discounted cash flow projection method and taking into account economic conditions) is less than carrying value.

50. RISK MANAGEMENT (CONT'D.)

50.2 Credit Risk Management (Cont'd.)

Impairment (Cont'd.)

Measurement of ECL (Cont'd.)

The key judgements and assumptions adopted by the Group in addressing the requirements of the standard are discussed below.

Significant Increase in Credit Risk ("SICR")

The Group considers a financial instrument to have experienced a SICR when it is more than 30 days past due on its contractual payments or when a quantitative and qualitative analysis, based on the Group's historical experience, expert credit assessment and forward-looking information indicates as such. The requirement is to calculate remaining Lifetime ECL at the reporting date when the financial instrument experienced SICR, compared to 12-month ECL calculation when exposure was initially recognised.

(i) Quantitative

Each exposure is allocated to a credit risk grade at initial recognition based on a variety of data that is determined to be predictive of the risk of default and experienced credit judgement about the borrower/customer. Factors determining credit risk grades vary depending on nature of exposures and type of borrowers/customers. Exposures are subject to ongoing monitoring, which may result in an exposure being moved to a different credit risk grade. There are 4 risk bands i.e. low risk, medium risk, high risk and very high risk whereby movements to a poorer band may result in SICR.

(ii) Qualitative

The Group may determine that an exposure has undergone a SICR experiences using its expert credit risk judgement and where possible, relevant historical experience based on qualitative indicators specified by the Group's watchlist criteria that it considers as such and whose effect may not otherwise be fully reflected in quantitative analysis on a timely basis.

In relation to non-retail financial instruments, where a watchlist is used to monitor credit risk, this assessment is performed at the counterparty borrower/customer basis. The criteria used to identify SICR are monitored and reviewed periodically for appropriateness by the Wholesale Credit Risk team and Business Credit Risk team.

The assessment of SICR incorporates forward-looking information and is performed on a monthly basis at a portfolio level for all financial instruments held by the Group.

Definition of Default and Credit-impaired Assets

The Group defines a financial instrument as in default, which is fully aligned with the definition of credit-impaired, when it meets one or more of the following criteria:

(i) Quantitative criteria

(a) the borrower/customer is considered in default if its contractual payments is more than 90 days past due;
(b) as soon as default occurs where the principal and/or interest/profit repayments/payments are scheduled on intervals of 3 months or longer; or
(c) other impairment indicators stipulated in the relevant guidelines.

(ii) Qualitative criteria

The borrower/customer meets unlikeliness to pay criteria, which indicates the borrower/customer is in significant financial difficulty. These include instances where:
– the borrower/customer has ceased operations due to financial distress;
– the borrower/customer/corporate guarantor is classified as PN16/PN17/GN3 by Bursa Malaysia;
– a winding up petition has been lodged against borrower/customer;
– bankruptcy proceeding has been initiated by creditors/other lenders; or
– a receiver and manager have been appointed.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

50. RISK MANAGEMENT (CONT'D.)

50.2 Credit Risk Management (Cont'd.)

Impairment (Cont'd.)

Measurement of ECL (Cont'd.)

Definition of Default and Credit-impaired Assets (Cont'd.)

The quantitative criteria above have been applied to all financial instruments held by the Group while the qualitative criteria mainly applicable to non-retail portfolio and are consistent with the definition of default used for internal credit risk management purposes. The default definition has been applied consistently to model the EAD, PD and LGD throughout the Group's expected loss calculations.

An instrument is considered to no longer be in default (i.e. to have cured) when it no longer meets the quantitative default criteria.

For non-retail portfolio, reclassification to performing status can be considered subject to the following:
– Satisfactory conduct of the counterparty's repayment/payment conduct for at least a 6-month observation period;
– Assessment of the viability of the borrower's/customer's business;
– All arrears are settled/regularised.

Measuring ECL – Explanation of Inputs, Assumptions and Estimation Techniques

The key inputs into the measurement of ECL are the following variables:
– PD;
– LGD; and
– EAD

or

– Historical Loss Rates ("LR")

These parameters are generally derived from internally developed statistical models and other historical data. They are adjusted to reflect forward-looking information.

PD estimates are estimated at a certain date, which are calculated based on statistical rating models, and assessed using rating tools tailored to the various categories of counterparties and exposures. These statistical models are based on internally compiled data comprising both quantitative and qualitative factors.

Credit risk grades are a primary input in the determination of PD term structure for exposures. If a counterparty or exposure migrates between rating grades, then this will lead to a change in associated PD. The Group collects performance and default information about its credit risk exposures analysed by portfolio.

LGD is the magnitude of the likely loss if there is a default. The Group estimates LGD parameters based on history of recovery rates of claims against defaulted counterparties. The LGD models consider the structure, collateral, seniority of the claim, counterparty industry, and recovery costs of any collateral that is integral to the financial asset. They are calculated on a discounted cash flow basis using the EIR/EPR as the discount factor.

EAD represents the expected exposure in the event of default. The Group derives the EAD from the current exposure to the counterparty and potential changes to the current amount allowed under the contract including amortisation. The EAD of an on-balance sheet asset is its gross carrying amount. For lending commitments and financial guarantees, the EAD includes the amount drawn, and potential future amounts that may be drawn under the contract, which are estimated based on historical observations and forward-looking forecasts.

Historical LR represents the past record of average loss experience for financial assets of similar classes.

50. RISK MANAGEMENT (CONT'D.)

50.2 Credit Risk Management (Cont'd.)

Impairment (Cont'd.)

Measurement of ECL (Cont'd.)

Forward-looking Information Incorporated in the ECL Models

The measurement of ECL also takes into account the expected credit condition over the remaining life of the financial assets. Forward-looking models are built based on statistical relationship established between Observed Default Rate ("ODR") and Macroeconomic Variables ("MEVs").

This analysis includes the identification and calibration of relationships between changes in default rates and to the MEVs. Examples of key macroeconomic indicators include Gross Domestic Product ("GDP") growth, Consumer Price Index, House Price Index, foreign exchange (USD/MYR) and Brent Crude Oil price.

Three scenarios are projected for forward-looking namely base case, optimistic and pessimistic which requires management judgement of the economic situation i.e. normal, bullish or downturn. A weightage is applied to the scenarios to produce an appropriate forward-looking ECL to best reflect the forward-looking economic outlook.

Key Variables/Assumptions for ECL Calculations

The recognition and measurement of ECL is highly complex and involves the use of significant judgement and estimation. This involves establishing the forward-looking macroeconomic conditions into ECL as required under MFRS 9. The allowances for ECL are sensitive to the inputs used and economic assumptions underlying the estimate.

The following table shows the forecast of key economic variables used in forward-looking models for ECL calculations for financial year ended 31 March 2026 and 31 March 2025.

31 March 2026 Macroeconomic Variable List	Forward-Looking Scenario	Assigned Probabilities (%)	2026	2027	2028	2029	2030

	Pessimistic	30%	65.51	63.40	63.09	69.86	71.18

(Yearly values = average of forecasted quarterly values).

Write-off Governance

(i) Stage 1 write-off

The Group may partially/fully write-off on financial assets where the receivables is deemed uncollectable and full recovery is not possible taking proceeds from value of securities or where customer has been allowed time to repay on negotiated settlement basis. The outstanding contractual amounts of such assets written off during the financial year ended 31 March 2026 was RM764.3 million (2025: RM783.8 million). The Group still seeks legal recovery action, as such, credit exposures for these continue unabated.

(ii) Stage 2 write-off

The Group write-off financial assets in whole when it has exhausted all necessary recovery actions against credit exposures and there is minimal prospect of recovery and/or further recovery is not economical, then the credit exposures will be written off from both the general ledger and subsidiary ledger.

50. RISK MANAGEMENT (CONT'D.)

50.2 Credit Risk Management (Cont'd.)

Impairment (Cont'd.)

Measurement of ECL (Cont'd.)

Modified Financial Assets

The Group sometimes modifies the terms of loans/financing provided to borrowers/customers due to commercial renegotiations, or for distressed loans/financing, with a view to maximising recovery.

Such restructuring activities include extended payment term arrangements, payment holidays and payment forgiveness. Restructuring governance and practices are based on indicators or criteria which, in the judgement of management, indicate that payment will most likely continue. These governance are kept under continuous review.

The risk of default of such assets after modification is assessed at the reporting date and compared with the risk under the original terms at initial recognition. The Group then monitors the subsequent performance of modified assets. The Group may determine that the credit risk has significantly improved after restructuring and if so, the assets are moved from Stage 2 – Lifetime ECL not credit impaired or Stage 3 – Lifetime ECL credit impaired to Stage 1 – 12-month ECL or Stage 2 – Lifetime ECL not credit impaired as per Group's internal SICR criteria. This is only the case for assets which have performed in accordance with the new terms for at least six consecutive months or more.

The following table includes summary information for financial assets whose cash flows were modified during the financial year as part of the Group's restructuring activities and their respective effect on the Group's financial performance:

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Loans, advances and financing		
Amortised cost before modification	1,974,096	1,141,881
Net modification loss included under interest income	(7,862)	(4,015)

50. RISK MANAGEMENT (CONT'D.)

50.2 Credit Risk Management (Cont'd.)

50.2.1d Estimated value of collateral for financial assets

The Group's policies regarding obtaining collateral have not significantly changed during the financial year and there has been no significant change in the overall quality of the collateral held by the Group since the previous financial year.

The following table summarises the financial effects of collateral received from loans, advances and financing:

Group	Gross exposure to credit risk		Financial effect of collateral		Unsecured portion of credit exposure	
	31 March 2026 RM'000	31 March 2025 RM'000	31 March 2026 RM'000	31 March 2025 RM'000	31 March 2026 RM'000	31 March 2025 RM'000
Gross loans, advances and financing						
Retail banking	67,412,659	67,373,529	63,225,654	62,953,101	4,187,005	4,420,428
Business banking	53,853,991	48,707,853	32,383,365	31,812,661	21,470,626	16,895,192

Total	146,687,294	138,883,354	107,928,399	104,623,439	38,758,895	34,259,915

50.2.1e Collateral repossessed

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Residential properties, net of impairment	150	150

The above assets are accounted for as foreclosed properties under other assets (Note 17). There were no new assets obtained for the financial year 2026 and 2025.

50. RISK MANAGEMENT (CONT'D.)

50.2 Credit Risk Management (Cont'd.)

50.2.1f Collateral held for credit-impaired financial assets

The Group closely monitors collateral held for financial assets considered to be credit-impaired, as it becomes more likely that the Group will take possession of collateral to mitigate potential credit losses. Financial assets that are credit-impaired and related collateral held in order to mitigate potential losses are shown below:

Group 31 March 2026	Gross exposure RM'000	Impairment allowance RM'000	Carrying amount RM'000	Fair value of collateral RM'000
Credit-impaired financial assets				
Loans, advances and financing				
Retail banking	1,230,811	252,837	977,974	1,142,701
Business banking	946,043	300,317	645,726	750,880
Wholesale banking	113,201	9,931	103,270	111,844
Investment banking	41,302	13,980	27,322	45,369
Total credit-impaired financial assets	2,331,357	577,065	1,754,292	2,050,794

Group 31 March 2025	Gross exposure RM'000	Impairment allowance RM'000	Carrying amount RM'000	Fair value of collateral RM'000
Credit-impaired financial assets				
Loans, advances and financing				
Retail banking	1,107,623	219,611	888,012	1,047,770
Business banking	847,287	210,499	636,788	664,382
Wholesale banking	145,504	63,625	81,879	85,387
Investment banking	31,808	16,980	14,828	47,916
Total credit-impaired financial assets	2,132,222	510,715	1,621,507	1,845,455

50.2.1g Overlays and adjustments for ECL, stemming from emerging risks on the Consumer and BB-EB portfolios as well as exposure to vulnerable borrowers/customers

Management overlay has been provided in anticipation of potential deterioration of credit risk for loans/financing for vulnerable/high risk borrowers/customers.

The overlays adjustments were generally made to specific borrowers/customers and at portfolio level in determining the sufficient level of ECL.

The overlays adjustments as at 31 March 2026 amounted to RM363.3 million (2025: RM461.1 million).

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

50. RISK MANAGEMENT (CONT'D.)

50.3 Liquidity Risk and Funding Management

Liquidity risk is the risk that the organisation either does not have sufficient financial resources available to meet all its obligations and commitments as they fall due, or can only access these financial resources at an unreasonable cost. Liquidity risk exposure arises mainly from the deposit taking and borrowing/financing activities and market disruption, and to a lesser extent, significant drawdown of funds from previously contracted financing and purchase commitments. Funding management is the ongoing ability to raise sufficient funds to finance actual and proposed business activities at a reasonable cost. Improper funding management may lead to liquidity problem. On the other hand, insufficient liquidity risk management may also give rise to funding risk.

The liquidity risk management process is depicted in the table below:

Identification	• Identify liquidity risk within existing and new business activities • Review market-related information such as market trend and economic data • Keep abreast with regulatory requirements
Assessment/Measurement	• Liquidity Coverage Ratio ("LCR") • Net Stable Funding Ratio ("NSFR") • Depositor Concentration Ratios • Other Detailed Controls
Control/Mitigation	• LCR Limits/Triggers • NSFR Limits/Triggers/Targets • Depositor Concentration Ratios • Other Detailed Triggers/Targets
Monitoring/Review	• Monitor controls • Periodical review and reporting

The liquidity risk management of the Group is aligned to the Liquidity Risk policy document, LCR policy document and NSFR policy document issued by BNM. The primary objective of the Group's liquidity risk management is to ensure the availability of sufficient funds at a reasonable cost to honour all financial commitments when they fall due. This objective is partly managed through maintenance of a portfolio of high-quality liquid assets to protect against adverse funding conditions and support day-to-day operations. The secondary objective is to ensure an optimal funding structure and to balance the key liquidity risk management objectives, which includes diversification of funding sources, customer base and maturity period.

The Board provides the liquidity risk management oversight including setting and reviewing the liquidity risk appetite while GALCO is the core management committee established by the Board to oversee the overall liquidity management of the Group.

The Group has put in place a Contingency Funding Plan which is established by Capital and Balance Sheet Management ("CBSM") to identify early warning signals of possible liquidity problem. The Contingency Funding Plan also sets out the detailed responsibilities among the relevant departments in the event of actual liquidity crises occurring to ensure orderly execution of procedures to restore the liquidity position and confidence in the organisation.

Various liquidity measurements have been put in place to support the broader strategic objectives of the Group and amongst others include the BNM LCR, BNM NSFR and other Liquidity Ratios such as Depositor Concentration Ratio. Investment Banking and Markets Risk ("IBMR") is responsible for developing and monitoring the controls and limits while the Group Treasury and Markets ("GTM") and CBSM are responsible to ensure the controls and limits are within the thresholds.

Stress testing is undertaken to assess and plan for the impact for various scenarios which may put the Group's liquidity at risk. The Group further stresses the importance of the stable funding sources to finance placement/lending and loans, advances and financing to borrowers/customers. They are monitored using the loans/financing to fund ratio, which compares loans, advances and financing to borrowers/customers as a percentage of the Group's total funds.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

50. RISK MANAGEMENT (CONT'D.)

50.4 Market Risk Management

Market risk is the risk of losses due to adverse changes in the level or volatility of market rates or prices, such as interest/profit rates, credit spreads, equity prices and foreign exchange rates. The Group differentiates between two categories of market risk: Traded Market Risk ("TMR") and Non-Traded Market Risk ("NTMR"). Assessment, control and monitoring of these risks are the responsibilities of IBMR.

Traded Market Risk ("TMR")

The TMR management process is depicted in the table below:

Identification	• Identify market risks within existing and new products • Review market-related information such as market trends and economic data
Assessment/Measurement	• Value-at-Risk ("VaR") • Loss Limits • Historical Stress Loss ("HSL") • Present Value of One Basis Point ("PV01") • Sensitivity to Change • Other Detailed Controls
Control/Mitigation	• VaR Limits • Loss Limits/Triggers (Annual/Monthly/Daily) • HSL Limits • PV01 Limits • Greek Limits (Delta/Gamma/Delta-Gamma/Vega/Theta) • Concentration Limits • Position Size Limits • Maximum Tenor Limits • Maximum Holding Period • Minimum Holding Period • Approved Portfolio Products • Approved Countries/Currencies • Other Detailed Limits/Triggers
Monitoring/Review	• Monitor controls • Periodical review and reporting

TMR arises from transactions in which the Group acts as principal with clients or the market. It involves taking positions in fixed income, equity, foreign exchange, commodities and/or derivatives. The objectives of TMR management are to understand, accurately measure and work with Business Units to ensure exposures are managed within the Board and GMRC approved limit structures and risk appetite. This is done via robust TMR measurement, limit setting, limit monitoring, and collaboration and agreement with Business Units.

VaR, Loss Limits, HSL and other detailed management controls are used to measure, monitor and control TMR exposures. VaR is a quantitative measure which the Group applies recent historical market conditions to estimate potential losses in market value, at a certain confidence level and over a specified time horizon (i.e. holding period). Loss Limits serve to alert management on the need to take relevant and appropriate action once they are triggered.

To complement VaR, HSL is used as a measure of the potential impact on portfolio values due to more extreme, albeit plausible, market movements. In addition, HSL is used to gauge and ensure that the Group is able to absorb extreme, unanticipated market movements.

50. RISK MANAGEMENT (CONT'D.)

50.4 Market Risk Management (Cont'd.)

Traded Market Risk ("TMR") (Cont'd.)

Apart from VaR, Loss Limits and HSL, additional sensitivity controls (e.g. Greek Limits/PV01 Limits) and indicators are used to monitor changes in portfolio value due to changes in risk factors under different market conditions.

IBMR independently monitors risk exposures against limits on a daily basis. Portfolio market risk positions are independently monitored and reported by IBMR to GMRC, RMC and the Board. Furthermore, policies and procedures are in place to ensure prompt action is taken in the event of non-adherence to limits. Business Units exposed to traded market risk are required to maintain risk exposures within approved risk limits and to provide an explanation for any non-adherence event to Senior Management.

The Group adopts the Standardised Approach for market risk capital charge computation. The capital charge serves as a buffer against losses from potential adverse market movements.

IBMR is committed to on-going improvements in market risk processes and systems, and allocates substantial resources to this endeavour.

Non-Traded Market Risk ("NTMR")

NTMR refers to interest rate risk/rate of return risk in the banking book including those arising from balance sheet management activities as covered under the risk appetite.

Interest Rate Risk/Rate of Return Risk in the Banking Book ("IRR/RORBB")

The IRR/RORBB risk management process is depicted in the table below:

Identification	• Identify IRR/RORBB within existing and new products • Review market-related information such as market trend and economic data
Assessment/Measurement	• ICAAP IRR/RORBB Economic Value of Equity ("EVE") • ICAAP IRR/RORBB Earnings-at-Risk ("EaR")
Control/Mitigation	• ICAAP IRR/RORBB EVE/ Tier 1 Capital Triggers • CAAP IRR/RORBB EaR/ Total Net Interest/Profit Income ("NII/NPI") Triggers
Monitoring/Review	• Monitor controls • Periodical review and reporting

IRR/RORBB arises from changes in market interest/profit rates that impact core net interest/profit income, future cash flows or fair values of financial instruments. This risk arises from mismatches between repricing dates of assets and liabilities, changes in yield curves, volatilities in interest/profit margins and implied volatilities on interest/profit rate options. The provision of retail and wholesale banking products and services (primarily lending/financing and deposit taking activities) creates interest/profit rate-sensitive positions in the Group's statement of financial position.

The principal objectives of balance sheet risk management are to manage interest/profit income sensitivity while maintaining acceptable levels of IRR/RORBB and funding risk, and to manage the economic value of the Group's capital.

The Board's oversight of IRR/RORBB is supported by the GALCO and GMRC. The Board and GMRC are responsible for the alignment of Group-wide risk appetite. GALCO reviews strategies to ensure a comfortable level of IRR/RORBB is maintained, taking into consideration the Group's business strategies and is responsible for overseeing the Group's gapping positions, asset growth and liability mix against the interest/profit rate outlook. The Group has successfully engaged long-term borrowings and written interest/profit rate swaps to manage IRR/RORBB, and maintained an acceptable gapping profile as a result. In accordance with the Group's policy, IRR/RORBB positions are monitored on a monthly basis and hedging strategies are employed to ensure risk exposures are maintained within Board and Management-approved triggers.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

50. RISK MANAGEMENT (CONT'D.)

50.4 Market Risk Management (Cont'd.)

Non-Traded Market Risk ("NTMR") (Cont'd.)

Interest Rate Risk/Rate of Return Risk in the Banking Book ("IRR/RORBB") (Cont'd.)

The Group measures the IRR/RORBB exposures using EVE and EaR, which are quantitative measures to assess the impact of change in value of future cash flows or fair values of financial instruments and net interest/profit income due to movement in market interest/profit rates. The Group complements EVE and EaR by stress testing IRR/RORBB exposures to highlight potential risk that may arise from extreme market events that are rare but plausible.

Key assumptions in the gap and sensitivity analysis relate to the behaviour of interest/profit rates and spreads, changes in loans, advances and financing and deposit product balances due to behavioural characteristics under different interest/profit rate environments. Material assumptions include the repricing characteristics and the stability of indeterminate or non-maturity deposits and loans, advances and financing.

The rate scenarios may include rapid ramping of interest/profit rates, gradual ramping of interest/profit rates, and narrowing or widening of spreads. Usually each analysis incorporates what Management deems the most appropriate assumptions about customer behaviour in an interest/profit rate scenario. However, in certain cases, assumptions are deliberately changed to test the Group's exposure to a specified event.

The Group's strategy seeks to optimise exposure to IRR/RORBB within Board and Management-approved triggers. This is achieved through the ability to reposition the interest/profit rate exposure of the statement of financial position using various product and funding strategies, supported by interest/profit rate hedging activities using interest/profit rate swaps and other derivatives. These approaches are governed by the Group's policies in the areas of product and liquidity management as well as the Trading Book and Banking Book Policy, hedging policies and Non-Traded Interest/Profit Rate Risk Framework.

IRR/RORBB exposures are monitored by IBMR and positions reported to the GALCO, GMRC, RMC and Board.

Market Risk Sensitivity

(i) Interest Rate Risk/Rate of Return Risk

Interest rate risk/rate of return risk ("IRR/ROR") is the risk that the value of a financial instrument will fluctuate due to changes in market interest/profit rate and is managed through gap and sensitivity analysis. Interest/profit rate movements also affect the Group's income and expense from assets and liabilities as well as capital fund. The Group has adopted IRR/ROR hedging measures to cushion the interest/profit rate volatility.

The following table demonstrates the sensitivity of the Group's profit before taxation and zakat and equity to a reasonable possible change in interest/profit rate with all other variables remaining constant. There is no impact to the Company for interest rate risk/rate of return risk.

	31 March 2026 IRR/ROR		31 March 2025 IRR/ROR	
Group	+100 bps RM'000	-100 bps RM'000	+100 bps RM'000	-100 bps RM'000
Traded market risk				
Impact on profit before taxation and zakat	(48,966)	51,228	(83,750)	89,080
Non-traded market risk				
Impact on profit before taxation and zakat	994,672	(994,672)	930,264	(930,264)
Impact on equity	(849,287)	914,980	(706,036)	752,638

50. RISK MANAGEMENT (CONT'D.)

50.4 Market Risk Management (Cont'd.)

(ii) Foreign Exchange Risk

Foreign exchange risk arises from changes in foreign exchange rates to exposure on the Group's financial instruments denominated in currencies other than the functional currency of the transacting entity. Position limits are imposed to prevent the Group from being exposed to excessive foreign exchange risk.

The following table demonstrates the sensitivity of the Group's profit before taxation and zakat and equity to a reasonable possible change in foreign exchange rates with all other variables remaining constant. There is no impact to the Company for foreign exchange risk.

Group	31 March 2026 Foreign exchange rate		31 March 2025 Foreign exchange rate	
	+10% RM'000	-10% RM'000	+10% RM'000	-10% RM'000
Impact on profit before taxation and zakat				
Currency				
USD	41,969	(41,969)	32,196	(32,196)
SGD	(2,729)	2,729	(2,926)	2,926
EUR	19,370	(19,370)	1,843	(1,843)
JPY	1,827	(1,827)	112	(112)
GBP	12,421	(12,421)	(117)	117
HKD	8,748	(8,748)	8,330	(8,330)
Others	1,027	(1,027)	1,024	(1,024)
Impact on equity				
Currency				
USD	25,308	(25,308)	27,852	(27,852)
EUR	69	(69)	58	(58)

(iii) Equity Price Risk

Equity price risk arises from the adverse movements in the price of equities. Equity price risk is controlled via position size, loss limits and VaR limits.

The following table demonstrates the sensitivity of the Group's profit before taxation and zakat to a reasonable possible change in equity prices with all other variables remaining constant. There is no impact to the Company for equity price risk.

Group	31 March 2026 Equity price		31 March 2025 Equity price	
	+10% RM'000	-10% RM'000	+10% RM'000	-10% RM'000
Impact on profit before taxation and zakat	135,278	(135,278)	141,958	(141,958)

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

50. RISK MANAGEMENT (CONT'D.)

50.5 Enterprise Fraud and Operational Risk Management ("EFORM")

The Operational Risk Management ("ORM") process is depicted in the table below:

Identification	• Identify and analyse risks in key processes/activities within Business and Functional Lines (including new products) • Review of past operational and fraud losses and incidences data • Regulators' and Auditors' review and feedback
Assessment/Measurement	• Risk and Control Self Assessment ("RCSA") • The inherent and residual risks are assessed based on the probability and impact of activity undertaken
Control/Mitigation	Several ORM tools are used to mitigate the risks identified: • Incident Management and Data Collection ("IMDC") • Key Risk Indicators ("KRI") • Key Control Testing ("KCT") • Root cause analysis • Scenario Analysis • Insurance programme
Monitoring/Review	• Monitoring and reporting of loss incidents by Event Type, Portfolio and Line of Business and entity, reporting of operational risk board and management triggers, risk profile status, key risk indicator breaches and key control testing exceptions and operational risk framework adherence • Challenging the periodical review or updating the RCSA (risk profile)/KRIs/KCTs of all Line of Business and entity • Trigger by adverse change in circumstances (trigger event review) • Change management process review

Operational risk is defined as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external incidents which includes but is not limited to legal risk, outsourcing risk, technology (including cyber) risk, fraud risk and Shariah compliance risk. (Please refer to Note 50.9 for discussion on Shariah Governance Structure). It excludes strategic, systemic and reputational risk.

Operational Risk Appetite ("ORA") is set as part of overall GRAF, which sets the acceptable tolerance levels of operational risk that the Group is willing to accept, taking into consideration of the relevant financial and non-financial risk or return attributes in order to support the achievement of the Group's strategic plan and business objectives. The ORA statements and measurements are classified based on operational risk loss event types, which are grouped into five (5) categories as below and monitored via IMDC, KRI and KCT:

- Fraud (internal and external);
- Employment Practices and Workplace Safety;
- Client, Products and Business Practices;
- Business Disruption, System Failures and Damage to Physical Assets; and
- Execution, Delivery and Process Management.

50. RISK MANAGEMENT (CONT'D.)

50.5 Enterprise Fraud and Operational Risk Management ("EFORM") (Cont'd.)

The strategy for managing operational and fraud risks in the Group is anchored on the three (3) lines of defence concept which are as follows:

- The first line of defence ("FLOD") is responsible for the management of operational and fraud risks in order for accountability and ownership to be as close as possible to the activity that creates the risk and ensuring that effective action is taken to manage them. Enhanced FLOD provides a business specific focus on the implementation of operational and fraud risk management activities and supports more effective day-to-day monitoring of operational and fraud risks.
- In the second line of defence, EFORM is responsible for exercising governance over operational and fraud risk through the management of the operational risk and enterprise fraud risk framework, policy development and communication, quality assurance of internal controls, operational and fraud risk measurement, validation of FLOD effectiveness, operational risk, fraud and scam training and reporting of operational risk triggers, breaches, KCT exceptions, operational loss incidents to GMRC, RMC and the Board.
- Group Internal Audit Department ("GIAD") acts as the third and final line of defence by providing independent assurance on the internal control effectiveness through periodic audit programme.

EFORM maintains close working relationships with all Business and Functional Lines, continually assisting in the identification of operational and fraud risks inherent in their respective business activities, assessing the impact and significance of these risks and ensuring that satisfactory risk mitigation measures and controls are in place. Various tools and methods are employed to identify, measure, control and monitor/report operational and fraud risk issues within the Group. The ORM process contains the following ORM tools:

- The IMDC module provides a common platform for reporting operational and fraud risk incidents that fall within one of the seven Event Types as stated in Basel II. IMDC also serves as a centralised database of operational and fraud risk incidents to model the potential exposure to operational and fraud risks in future and estimate the amount of economic capital charge.
- The RCSA is a process of continual identification, assessment of risks and controls effectiveness. By using structured questionnaires to assess and measure key risk and its corresponding controls effectiveness, RCSA provides risk profiling across the Group.
- The KRI module provides early warning of increasing risk and/or control failures by monitoring the changes of the underlying risk measurements.
- The KCT is the test steps or assessment performed periodically to assure that the key controls are in place and they are operating as intended or effective in managing the operational and fraud risks.
- Root cause analysis is conducted by the Enterprise Fraud and Operational Risk Relationship Managers within EFORM to prevent recurrence of operational and fraud risk incidents.
- Scenario analysis is a forward-looking assessment tool to assess the severity impact on the Group's profitability and capital adequacy should the plausible and worse case scenarios materialise.

The GMRC, RMC and Board are the main reporting and escalation committees for operational risk matters including outsourcing risk, information technology (including cyber) risk, Shariah risk, legal risk, fraud risk and business continuity management.

In an increasingly digital and interconnected financial landscape, the Group recognises that fraud risk is a persistent and evolving threat. This risk encompasses the potential for financial loss, reputational damage, and regulatory sanction resulting from deceptive acts by external parties or internal personnel. Our strategy to combat fraud is built on a multi-layered framework of prevention, detection, and response. We invest in technological solutions to monitor transactions in real-time, identify anomalous patterns to detect and prevent fraudulent activity.

Furthermore, we maintain a robust system of internal controls and conduct employee training to foster a strong culture of security awareness and ethical conduct. We continuously enhance our authentication protocols and customer education initiatives to protect our customers' assets and data. While the sophistication and volume of fraud attempts continue to rise, the Group's dedicated Fraud Risk Management team works continuously to anticipate emerging threats. We collaborate closely with industry partners and law enforcement to strengthen the entire financial ecosystem's resilience. Although it is not possible to eliminate all fraud risk, we are committed to managing it within acceptable levels to safeguard the interests of our shareholders, customers, and the Group.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

50. RISK MANAGEMENT (CONT'D.)

50.5 Enterprise Fraud and Operational Risk Management ("EFORM") (Cont'd.)

50.5.1 Business Continuity Management ("BCM")

The BCM process is depicted in the table below:

Identification	• Identify events that potentially threaten the business operations and areas of criticality
Assessment/Measurement	• Business Impact Analysis ("BIA") • Risk Assessment • Climate-related Operational Risk Assessment
Control/Mitigation	• Policies governing the BCM implementation • BCM methodologies controlling the process flow • Implementing the Business Continuity ("BC") plan
Monitoring/Review	• BC Plan testing and exercise • Review of BC Plan • BC site readiness and maintenance

The BCM function is an integral part of EFORM. It places the importance of maintaining a BCM framework and policies to identify events that could potentially threaten the Group's operations and the identification of critical functions through BIA exercise, for the development of recovery strategy. BCM builds the resilience and recovery capability to safeguard the interest of the Group's stakeholders by protecting our brand and reputation.

The BCM process complements the effort of the recovery team units to ensure that the Group has the required critical capabilities and resources, such as IT system disaster recovery, alternate workspace arrangements and effective communication during interruptions.

The Group is continuously reviewing the level of business operations resiliency to enhance the BCM capability throughout all critical departments and branches across the region. Training is an integral part of the process to heighten BCM awareness and inculcate a business resiliency culture.

The Group integrates climate-related operational risk into its BCM programmes and activities to ensure the continuity of its Critical Business Functions ("CBF") and Third Party Service Providers ("TPSP") in the face of climate related events. The integration shall include an objective risk assessment from credible external parties that evaluates the climate-related risk vulnerabilities of CBFs and TPSPs.

50.6 Technology and Cyber Risk Management

Technology risk is defined as the potential for financial loss, operational disruption, or reputational damage caused by failures in an organisation's IT infrastructure, software, systems, or data. It encompasses cyber risks (often considered a subset of technology risk, though they are frequently used interchangeably), system downtime, and hardware failures. It arises from both internal factors and external threats.

The scope addresses the various cyber and technology domains as listed (not limited to) below. This should include consideration on the Group's eco system, risk appetite, strategy transformation and the usage of emerging technology i.e. Artificial Intelligence ("AI") and Machine Learning ("ML").

Similar to Operation Risk Management, the Technology and Cyber Risk Management process comprises the 4 phases encompassing the technology(ies), mechanisms, tools, policies, procedures, controls and processes, including management oversight, to continuously identify, assess, monitor, report and mitigate/control technology risks, which include (but not limited to) IT risk, information security risk and cyber security risk.

Technology and cyber security risks remain a persistent threat for the financial industry. The constantly evolving nature of the regulatory, digital landscape and sophistication of cyber threats and attack vectors calls for increased vigilance, readiness and ability to respond to upcoming threats. The resilience of the Group's IT infrastructure and cyber security capabilities are of paramount importance, especially with regards to safeguarding borrowers'/customers' information.

50. RISK MANAGEMENT (CONT'D.)

50.6 Technology and Cyber Risk Management (Cont'd.)

The Group continues to monitor its cyber resilience posture, enhance its cyber security controls framework, execute internal assessment reviews, build defence mechanisms and uplift governance processes alongside the Group's cyber risk management strategy – to identify threats in a timely manner, and build or enhance the right defences to mitigate risks. Creating a security mindset for employees and borrowers/customers via its Cyber Security awareness programmes also remains a priority.

The Group Technology Risk team acts as a second line of defence to monitor alongside the first line of defence to ensure that risks and controls are properly managed. The Group's technology risk management capabilities include oversight over infrastructure security risk, data leakage risk, application security risk, third party security risk, governance and process robustness.

Group Technology Risk works closely with all Business and Functional Lines to identify technology and cyber risks inherent in the respective business activities, impact assessment and ensuring remedial actions are in place to mitigate risks accordingly. Various tools and methods are employed (similar to Operation Risk tools) to support the execution of these assessments. Progressive tracking and advisory are performed in parallel to execute an effective security programme to combine maturity-based and risk-based programmes towards proactive cyber security.

50.7 Legal Risk

In all jurisdictions that the Group conducts its business, there could be potential legal risks arising from breaches of applicable laws, unenforceability of contracts, lawsuits, adverse judgement, failure to respond to changes in regulatory requirements and failure to protect assets (including intellectual properties) owned by the Group which may lead to incurrence of losses, disruption or otherwise impact on the Group's financials or reputation.

Legal risk is overseen by GMRC/Group Management Committee ("GMC"), upon advice by internal legal counsel and, where necessary, in consultation with external legal counsel to ensure that such risks are appropriately managed.

50.8 Regulatory Compliance Risk

The Group adopts a zero tolerance approach to regulatory breaches, including bribery, corruption and Shariah non-compliance.

The Group is committed to upholding high integrity and ethical standards by complying to the Code of Conduct and the applicable laws and regulations to safeguard the organisation and support sound and ethical business operations.

The Group has in place a comprehensive Regulatory Compliance Risk Management Framework to promote the safety and soundness of the Group by minimising financial, reputational and operational risks arising from regulatory non-compliance.

The compliance framework defines clear roles and responsibilities for compliance with regulatory guidelines and requirements and outlines the accountability of business and support units in managing compliance risks within their respective areas. The responsible parties are accountable for the management of compliance risks associated with the Group's processes and increasing awareness on the role of every employee to be compliant and safeguard the Group's reputation against any potential legal violations and/or regulatory non-compliance.

The Group Chief Compliance Officer provides independent oversight and has a direct reporting line to the Board Risk Management Committee ("RMC"). A structured governance and escalation process is in place to ensure timely identification, escalation, and reporting of compliance risks, with regular compliance updates submitted through monthly compliance reports to the RMC and the Board.

The Senior Management team is responsible for communicating the compliance framework to all employees across the organisation and ensuring the appropriate corrective actions are taken in response to any identified non-compliance. To support effective oversight, the Group Management Governance and Compliance Committee, comprising Senior Management representatives from Group Compliance, Group Risk, Group Internal Audit and Business Units, meets regularly to discuss and deliberate on regulatory updates, assess compliance issues, and address areas of non-compliance.

The Group continues to strengthen its compliance culture, supported by strong leadership commitment to high ethical standards and integrity. The Group remains vigilant to emerging regulatory risks, enhances its due-diligence and governance processes, and proactively responds to heightened regulatory scrutiny and supervisory expectations. The Board and Senior Management lead by example in fostering a robust compliance culture, ensuring that integrity and ethical conduct are embedded across the organisation.

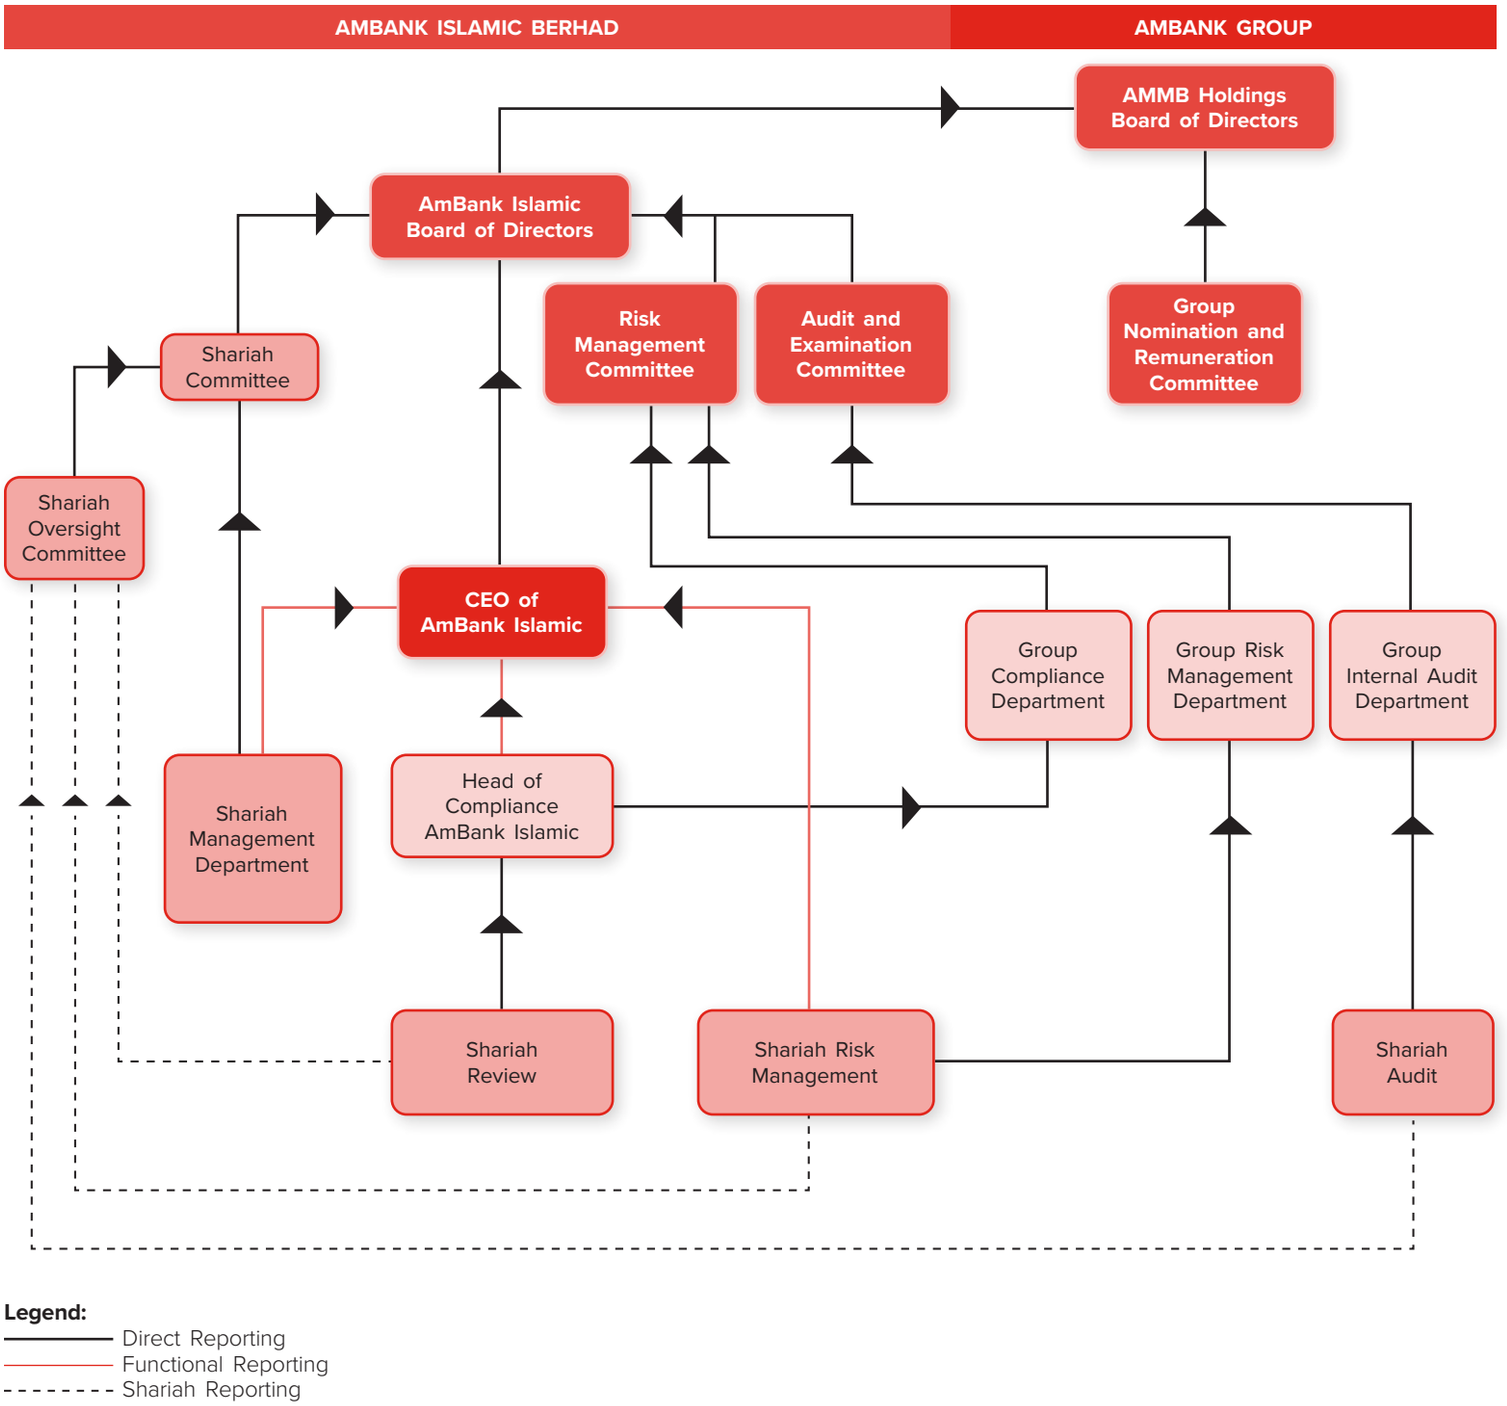
NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

50. RISK MANAGEMENT (CONT'D.)

50.9 Shariah Risk Management Control

Shariah Governance Structure



Legend:

- Direct Reporting
- Functional Reporting
- Shariah Reporting

50. RISK MANAGEMENT (CONT'D.)

50.9 Shariah Risk Management Control (Cont'd.)

Shariah Governance Structure (Cont'd.)

AmBank Islamic has established its Shariah governance structure in accordance with the requirements of the Islamic Financial Services Act 2013 ("IFSA") and BNM's Policy Document on Shariah Governance ("SGPD"). This is to ensure that the operations and business activities of AmBank Islamic comply with Shariah principles and requirements.

Apart from the Shariah Management Department, Shariah Risk Management and Shariah Review functions which reside in AmBank Islamic, AmBank Islamic's Shariah governance structure leverages on the GIAD for the Shariah Audit function.

Board of Directors

The Board is responsible for the overall oversight on the Shariah governance and Shariah compliance, including the appointment, remuneration, performance evaluation and reappointment of the Shariah Committee members. The Board performs its oversight role through various committees such as the Audit and Examination Committee, Risk Management Committee and the Shariah Committee.

Audit and Examination Committee ("AEC")

The AEC is a Board committee responsible for assisting the Board in ensuring that AmBank Islamic's operations are Shariah compliant through the independent assurance from the Shariah Audit function. The reports from the Shariah Review Section are also presented to the AEC for information.

Risk Management Committee ("RMC")

The RMC is a Board committee responsible for assisting the Board in ensuring that risk management (including Shariah risk management) controls and processes are in place.

Group Nomination and Remuneration Committee ("GNRC")

The GNRC is established as a committee of the Company to provide assistance to the Group in the following areas:

1. Review and assess the appointment/reappointment and remuneration of Directors, Shariah Committee members and Senior Management for recommendation to the Board.
2. Oversee the establishment of a formal and transparent procedure for the performance evaluation of Directors, Shariah Committee members and Senior Management.
3. Advise the Board on the optimal size and mix of skills of the Board and Board Committee.

Shariah Committee

The Shariah Committee is responsible on matters related to Shariah. This includes advising the Board and Senior Management on Shariah matters as well as endorsing products and services, Shariah policies and the relevant documentation in relation to AmBank Islamic's business and operations. In addition to endorsing the zakat computation mechanism and the proposed recipients for zakat distribution, the Shariah Committee provides advice and guidance on the management of the zakat fund, charity and other social programmes or activities.

Shariah Oversight Committee

The Shariah Oversight Committee, which is a sub-committee to the Shariah Committee, performs an oversight function via the Shariah Control Functions (i.e. Shariah Review, Shariah Risk Management, and Shariah Audit). The Shariah Oversight Committee provides guidance and advice on matters pertaining to Shariah non-compliant ("SNC") incidents as well as treatment of any SNC income.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

50. RISK MANAGEMENT (CONT'D.)

50.9 Shariah Risk Management Control (Cont'd.)

Senior Management

The Chief Executive Officer ("CEO") and senior officers of AmBank Islamic and the Group are responsible to make reference to the Shariah Committee and/or Shariah Oversight Committee on Shariah matters of AmBank Islamic and to take the necessary measures for implementation. The Senior Management is also responsible in establishing the infrastructure and adequate resources to support the Shariah governance structure. This includes putting in place adequate systems and controls in order to ensure compliance with Shariah and to mitigate Shariah non-compliance risk.

Shariah Management

The Shariah Management Department is accountable to the Shariah Committee with functional reporting to the CEO and is responsible for providing operational support for the effective functioning of the Shariah Committee including day-to-day Shariah advisory, conducting Shariah research, formulating Shariah policies and acting as the Secretariat to the Shariah Committee and the Shariah Oversight Committee.

Shariah Risk Management

The Shariah Risk Management Department is accountable to the Group Risk Management Department and the CEO of AmBank Islamic, and has Shariah reporting to the Shariah Oversight Committee. Shariah Risk Management Department is the designated second-line of defense that shall be responsible of managing Shariah risk within the Group with the exception for Shariah risk of AmIslamic Funds Management Sdn Bhd. The Department systematically identifies, measures, monitors and reports Shariah non-compliance risks to mitigate any possible non-compliance incidents.

Shariah Review

The Shariah Review Section is accountable to the Head of Compliance, AmBank Islamic with functional reporting to the CEO of AmBank Islamic, with Shariah reporting to the Shariah Oversight Committee. Shariah Review refers to a function that conducts regular assessment on the compliance of the operations, business, affairs and activities of AmBank Islamic which are predominantly transactional in nature, with Shariah requirements.

The Shariah Review Section also acts as the Shariah Non-Compliance Officer ("SNCO") of AmBank Islamic. The SNCO is responsible to assess and decide whether the reported Shariah related incidents shall be classified as Potential SNC, and also in preparing the SNC report for deliberation by the Shariah Oversight Committee in determining whether the Shariah related incident is an SNC or otherwise.

Shariah Audit

The Shariah Audit Section is accountable to the AEC in relation to Shariah-related matters and reports to the Shariah Oversight Committee. The Shariah Audit Section is a dedicated team within the GIAD, and is responsible to conduct independent assessment on the quality and effectiveness of AmBank Islamic's internal control, risk management systems, governance processes as well as the overall compliance of AmBank Islamic's operations, business, affairs and activities with Shariah requirements. The scope of Shariah Audit includes but is not limited to activities undertaken by departments and functions that relate to Islamic products and services.

SNC Income

For the financial year ended 31 March 2026, there was no SNC incidents.

For the financial year ended 31 March 2025, there was one (1) SNC event declared with estimated SNC income of RM75,537.

51. FAIR VALUE MEASUREMENTS OF FINANCIAL INSTRUMENTS

Financial instruments are contracts that give rise to both a financial asset of one enterprise and a financial liability or equity instrument of another enterprise. The fair value of a financial instrument is the amount at which the instrument could be exchanged or settled between knowledgeable and willing parties in an arm's length transaction, other than a forced or liquidated sale. The information presented herein represents best estimates of fair values of financial instruments at the reporting date.

Where available, quoted and observable market prices are used as the measure of fair values. Where such quoted and observable market prices are not available, fair values are estimated based on a number of methodologies and assumptions regarding risk characteristics of various financial instruments, discount rates, estimates of future cash flows and other factors. Changes in the assumptions could materially affect these estimates and the corresponding fair values.

In addition, fair value information for non-financial assets and liabilities such as investments in subsidiaries and taxation are excluded, as they do not fall within the scope of MFRS 7 *Financial Instruments: Disclosures*, which requires the fair value information to be disclosed.

(a) Financial instruments not measured at fair value (excluding those financial instruments where the carrying amounts are reasonable approximation of their fair values).

	Group

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

51. FAIR VALUE MEASUREMENTS OF FINANCIAL INSTRUMENTS (CONT'D.)

Determination of fair value

The following describes the methodologies and assumptions used to determine fair values for those financial instruments which are not already recorded at fair value in the financial statements.

(a) Financial assets and financial liabilities for which fair value approximates carrying amount

For financial assets and financial liabilities that have a short-term maturity (less than six months), the carrying amounts approximate to their fair value.

(b) Financial investments at amortised cost

Fair value of securities is based on observable mid prices at reporting date and where observable mid prices are not available, the fair value is based on net tangible asset backing.

(c) Loans, advances and financing

The fair value of variable rate loans, advances and financing are estimated to approximate their carrying amount. For fixed rate loans, advances and financing, the fair values are estimated based on expected future cash flows of contractual instalments discounted at prevailing indicative rates adjusted for credit risk. For impaired loans, advances and financing, the fair values are deemed to approximate the carrying amount (net of impairment losses).

(d) Term funding and debt capital

The Group uses observable mid prices to estimate the fair values and where mid prices are not available, the fair values are estimated by discounting the expected future cash flows using market indicative rates of instruments with similar risk profile.

(e) Recourse obligation on loans and financing sold to Cagamas Berhad

The fair value for recourse obligation on loans and financing sold to Cagamas Berhad is determined based on the discounted cash flows of future instalment payments at prevailing rates quoted by Cagamas Berhad as at reporting date.

Financial assets and liabilities measured using a valuation technique based on assumptions that are supported by prices from observable current market transactions are assets and liabilities for which pricing is obtained via pricing services, but where prices have not been determined in an active market, financial assets with fair values based on broker quotes, investments in private equity funds with fair values obtained via fund managers and assets that are valued using the Group's own models whereby the majority of assumptions are market observable.

Non market observable inputs means that fair values are determined, in whole or in part, using a valuation technique (model) based on assumptions that are neither supported by prices from observable current market transactions in the same instrument, nor are they based on available market data. The main asset classes in this category are unlisted equity investments and debt instruments. Valuation techniques are used to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. However, the fair value measurement objective remains the same, that is, an exit price from the perspective of the Group or the Company. Therefore, unobservable inputs reflect the Group's and the Company's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). These inputs are developed based on the best information available, which might include the Group's and the Company's own data, as well as financial information of the counterparties. Unquoted equity investments at FVOCI are revalued using adjusted net assets method.

About 2.3% (2025: 2.5%) of the Group's total financial assets recorded at fair value, are based on estimates and recorded as Level 3 investments. Where estimates are used, these are based on a combination of independent third-party evidence and internally developed models, calibrated to market observable data where possible. While such valuations are sensitive to estimates, it is believed that changing one or more of the assumptions to reasonably possible alternative assumptions would not change the fair value significantly.

There was no transfer between Level 1 and Level 2 during the current and previous financial year for the Group and the Company.

51. FAIR VALUE MEASUREMENTS OF FINANCIAL INSTRUMENTS (CONT'D.)

Movements in Level 3 financial instruments measured at fair value

The level of the fair value hierarchy of financial instruments is determined at the beginning of each reporting year. The following table shows a reconciliation of the opening and closing amounts of Level 3 financial assets which are recorded at fair value for the financial year.

Group 31 March 2026	Financial investments at FVOCI RM'000	Financial assets at FVTPL RM'000	Total RM'000
Balance at beginning of the financial year	833,407	31	833,438
Total gains recognised in other comprehensive income	48,977	–	48,977
Loss on revaluation taken up in statements of profit or loss	–	(4)	(4)
Balance at end of the financial year	882,384	27	882,411

Group 31 March 2025	Financial investments at FVOCI RM'000	Financial assets at FVTPL RM'000	Total RM'000
Balance at beginning of the financial year	721,045	29	721,074
Total gains recognised in other comprehensive income	112,362	–	112,362
Gain on revaluation taken up in statements of profit or loss	–	2	2
Balance at end of the financial year	833,407	31	833,438

There were no transfers between Level 2 and Level 3 during the current financial year and previous financial year for the Group.

Total gains or losses included in the statements of profit or loss and statements of comprehensive income for financial instruments held at the end of the reporting date:

Group	31 March 2026 RM'000	31 March 2025 RM'000
Financial investments at FVOCI:		
Total gains included in:		
– fair value reserve in statements of comprehensive income	48,977	112,362
Financial assets at FVTPL:		
Total (loss)/gain included in:		
– investment and trading income in statements of profit or loss	(4)	2

Impact on fair value of Level 3 financial instruments measured at fair value arising from changes to key assumptions

Changing one or more of the inputs to reasonable alternative assumptions would not change the value significantly for the financial assets in Level 3 of the fair value hierarchy.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

52. BUSINESS SEGMENT ANALYSIS

Segment information is presented in respect of the Group's business segments. The business segment information is prepared based on internal management reports, which are regularly reviewed by the Chief Operating Decision Maker in order to allocate resources to a segment and to assess its performance.

The Group comprises the following main business segments:

(a) Retail Banking

Retail Banking continues to focus on building mass affluent and affluent customers. Retail Banking offers products and financial solutions which includes auto finance, mortgages, personal loan/financing, credit cards, priority banking services, wealth management, remittance services and deposits.

(b) Business Banking

Business Banking focuses on all sizes of businesses and enterprises by providing a range of products and solutions such as Commercial, Enterprise and SME Lending, Business Wealth, Industrial Hire Purchase and Bancassurance.

(c) Wholesale Banking

Wholesale Banking comprises Corporate Banking, Transaction Banking and Group Treasury and Markets.

(i) Corporate and Transaction Banking
Corporate Banking offers a full range of products and services, including corporate lending, investment banking advisory, trade finance, offshore banking and cash management solutions to wholesale banking clients.

Transaction Banking delivers tailor-made digital and cash management solutions, as well as trade financing and remittance services, to corporate and SME clients.

(ii) Group Treasury and Markets
Group Treasury and Markets manages funding and liquidity for the banking group and offers financial market and hedging solutions across all asset classes to a broad range of clients. The sales and trading activities cover fixed income, interest rates, foreign exchange, money market, equity derivatives, commodities and other derivatives.

(d) Investment Banking

Investment Banking provides a full range of integrated solutions and services, which include corporate finance M&A advisory, equity and debt capital markets, private banking and stockbroking services.

(e) Funds Management

Funds Management manages a broad range of investment mandates and unit trust funds across the risk-return spectrum for individuals, corporates and institutions, and provides fund distribution support services for institutional distributors. Funds Management also manages Private Retirement Schemes and Exchange Traded Funds.

(f) Insurance

Insurance segment offers a broad range of general insurance products, namely motor, personal accident, property and household through our associates. It also offers life insurance and takaful products namely wealth protection/savings, health and medical protection and family takaful solutions provided through our joint venture operations.

(g) Others

Others comprise activities to support operations of its main business units and non-core operations of the Group.

Measurement of segment performance

The segment performance is measured on income, expenses and profit basis. These are shown after allocation of certain centralised cost, funding income and expenses directly associated with each segment. Transactions between segments are recorded within the segment as if they are third party transactions and are eliminated on consolidation under Others.

Notes:

(i) The Chief Operating Decision Maker relies primarily on the net interest and funding income information to assess the performance of, and to make decisions about resources to be allocated to these operating segments.

(ii) The financial information by geographical segment is not presented as the Group's activities are principally conducted in Malaysia.

(iii) The comparatives have been restated to conform with current business realignment between the business segment.

Allowances for ECL for cash and cash equivalents	54(II)	7	18
Cash and cash equivalents		2,825,410	2,438,130

The accompanying notes form an integral part of the financial statements of the operations of Islamic banking.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

54. OPERATIONS OF ISLAMIC BANKING (CONT'D.)

NOTES TO THE FINANCIAL STATEMENTS OF THE OPERATIONS OF ISLAMIC BANKING

(I) ISLAMIC BANKING BUSINESS

Shariah Committee and governance

The Shariah Committee ("ShC") comprises six (6) members and is responsible and accountable for matters related to Shariah. This includes:

i. advising Board of Directors and Senior Management of AmBank Islamic on Shariah matters;

ii. endorsing products and services, Shariah policies and the relevant documentation in relation to Islamic Banking business and operation; and

iii. endorsing the zakat computation mechanism and the proposed recipients for zakat distribution and providing advice and guidance on management of zakat fund, charity and other social programmes and activities.

The ShC members also sit in the Shariah Oversight Committee ("SOC"). The SOC is established as a sub-committee of the ShC of the Group to assist the ShC to oversee the strategies, initiatives and work carried out by the Shariah control functions namely Shariah Review, Shariah Risk Management and Shariah Audit.

SNC incident and income

For the financial year ended 31 March 2026, there was no SNC incidents.

For the financial year ended 31 March 2025, there was one (1) SNC event declared with estimated SNC income of RM75,537.

(II) CASH AND SHORT-TERM FUNDS

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Cash and bank balances	825,410	98,130
Less: Allowances for ECL	(7)	(18)
	825,403	98,112
Deposits and placements maturing within one month with original maturity of three months or less:		
Bank Negara Malaysia	2,000,000	2,340,000
	2,825,403	2,438,112

54. OPERATIONS OF ISLAMIC BANKING (CONT'D.)

NOTES TO THE FINANCIAL STATEMENTS OF THE OPERATIONS OF ISLAMIC BANKING (CONT'D.)

(II) CASH AND SHORT-TERM FUNDS (CONT'D.)

Movements in allowances for ECL are as follows:

Group 31 March 2026	Note	Stage 1 12-month ECL RM'000
Balance at beginning of the financial year		18
Net writeback of ECL	54(XXII)	(9)
Net remeasurement of allowances		(9)
Foreign exchange differences		(2)
Balance at end of the financial year		7

Group 31 March 2025	Note	Stage 1 12-month ECL RM'000
Balance at beginning of the financial year		16
Net allowances for ECL	54(XXII)	4
Net remeasurement of allowances		4
Foreign exchange differences		(2)
Balance at end of the financial year		18

The decrease in allowances for ECL in Stage 1 mainly due to net remeasurement of allowances.

Foreign exchange differences		(61)	(14)	–	(75)
Amount written off		–	(7,084)	(227,484)	(234,568)
Balance at end of the financial year		105,174	301,921	142,816	549,911

Overall, the total allowances for ECL on financing and advances for the Group decreased by RM77.6 million due to the following:

(a) 12-month ECL (Stage 1) – slightly decrease of RM0.1 million mainly due to financial assets derecognised, impact from transfer to Stage 2 and Stage 3, net remeasurement of allowances, changes in model assumptions and methodologies and modification of contractual cash flows of financial assets, partly offset by newly originated financial assets and impact from transfer to Stage 1;

(b) Lifetime ECL not credit-impaired (Stage 2) – decrease of RM83.2 million mainly due to impact from transfer to Stage 1 and Stage 3, changes in model assumptions and methodologies, financial assets derecognised, net remeasurement of allowances and modification of contractual cash flows of financial assets, offset by impact from transfer to Stage 2 and new financial assets originated; and

(c) Lifetime ECL credit-impaired (Stage 3) – increase of RM5.7 million mainly due to net remeasurement of allowances, change in credit risk, new financial assets originated and changes in model assumptions and methodologies, offset by financing and advances written off and financial assets derecognised.

54. OPERATIONS OF ISLAMIC BANKING (CONT'D.)

NOTES TO THE FINANCIAL STATEMENTS OF THE OPERATIONS OF ISLAMIC BANKING (CONT'D.)

(VII) DEFERRED TAX ASSETS

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set-off current tax assets against current tax liabilities and when the deferred income taxes relate to the same fiscal authority. The following amounts are shown in the statement of financial position, after appropriate offsetting:

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Deferred tax assets, net	49,252	55,406
Deferred tax assets and liabilities prior to offsetting are summarised as follows:		
Deferred tax assets	66,635	77,036
Deferred tax liabilities	(17,383)	(21,630)

	2,057,293	12,480

(XIV) DEPOSITS AND PLACEMENTS OF BANKS AND OTHER FINANCIAL INSTITUTIONS

	Note	Group	
		31 March 2026 RM'000	31 March 2025 RM'000
Non-Mudarabah:			
Licensed investment banks		201,440	190,458
Other financial institutions		358,726	736,712
Licensed Islamic banks		198,969	–
Licensed banks	(a)	290,902	87,545
Bank Negara Malaysia		206,460	166,938
		1,256,497	1,181,653

(a) Included in the deposits and placements of licensed banks is RM99.5 million (2025: RM99.5 million) of interbank placement from AmBank, a related company, at below market rate with six (6) year to eight and a half (8.5) year maturities. This placement was part of the fund received by AmBank under the government financing scheme for COVID-19 relief measures, for the purpose of lending to SME at below market rate.

Total unwinding amount of RM3.7 million (2025: RM3.5 million) was recognised as income attributable to deposits and placements of banks and other financial institutions as disclosed in Note 54(XXIV).

54. OPERATIONS OF ISLAMIC BANKING (CONT'D.)

NOTES TO THE FINANCIAL STATEMENTS OF THE OPERATIONS OF ISLAMIC BANKING (CONT'D.)

(XV) INVESTMENT ACCOUNT DUE TO A LICENSED BANK

	Note	Group	
		31 March 2026 RM'000	31 March 2025 RM'000
Restricted investment account ("RA")			
– Mudarabah Muqayyadah	(a)	2,542,135	1,194,172

(a) The RA contract is a contract based on the Shariah concept of Mudarabah between two parties, that is, capital provider and entrepreneur to finance a business venture where the business venture is managed solely by AmBank Islamic as the entrepreneur. The profit of the business venture is shared between both parties based on a pre-agreed ratio. Losses shall be borne solely by the capital provider. The capital provider for the RA contracts is AmBank, a related company.

As at 31 March 2026, the tenure of the RA contracts is for a period range of less than 1 year to 20 years (2025: 2 to 5 years).

(b) Movements in the investment account are as follows:

	Group

		573,301	501,636

(a) The movements in lease liabilities are as follows:

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Premises		
At beginning of the financial year	1,774	2,064
Additions	263	–
Remeasurement	(807)	–
Finance cost charged	35	52
Payment of lease liabilities	(349)	(342)
At end of the financial year	916	1,774

54. OPERATIONS OF ISLAMIC BANKING (CONT'D.)

NOTES TO THE FINANCIAL STATEMENTS OF THE OPERATIONS OF ISLAMIC BANKING (CONT'D.)

(XVI) OTHER LIABILITIES (CONT'D.)

(a) The movements in lease liabilities are as follows: (Cont'd.)

There were no variable lease payments, subleasing, leases with residual value guarantees, leases not yet commenced, restrictions or covenants imposed to which the Group is committed.

There were no costs relating to leases for which the Group applied the practical expedient described in Note 2.5(g) for low-value assets. There was no lease with contract term of less than 12 months.

Lease liabilities analysed by undiscounted contractual payments are as follows:

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Premises		
Up to 1 month	30	28
> 1 month to 3 months	60	57
> 3 months to 6 months	90	67
> 6 months to 12 months	181	134
> 1 year to 5 years	589	1,073
Over 5 years	–	469
	950	1,828

(b) The movements for provision for reinstatement of leased premises are as follows:

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
At beginning of the financial year	86	85
Finance cost charged	1	1
At end of the financial year	87	86

NOTES TO THE FINANCIAL STATEMENTS

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2026

54. OPERATIONS OF ISLAMIC BANKING (CONT'D.)

NOTES TO THE FINANCIAL STATEMENTS OF THE OPERATIONS OF ISLAMIC BANKING (CONT'D.)

(XXIX) CAPITAL ADEQUACY RATIO

The capital adequacy ratios of the Islamic banking operations of the Group are computed in accordance with BNM's policy documents on CAFIB (Capital Components) issued on 14 June 2024, CAFIB (Risk Weighted Assets) issued on 18 December 2023, Capital Adequacy Framework (Operational Risk) and Capital Adequacy Framework (Exposures to Central Counterparties) issued on 15 December 2023. Pursuant to the BNM's policy document on CAFIB (Capital Components), the minimum capital adequacy ratios to be maintained under the guideline are at 4.5% for CET1 Capital Ratio, 6.0% for Tier 1 Capital Ratio and 8.0% for Total Capital Ratio at all times. In addition, an Islamic financial institution is also required to maintain capital buffers which comprise the sum of the following:

(i) a Capital Conservation Buffer ("CCB") of 2.5%;

(ii) a Countercyclical Capital Buffer ("CCyB"), determined as the weighted-average of the prevailing CCyB rates applied in the jurisdictions in which an Islamic financial institution has credit exposures. BNM will communicate any decision on the CCyB rate by up to 12 months before the date from which the rate applies; and

(iii) a Higher Loss Absorbency ("HLA") requirement for a financial institution that is designated as a domestic systemically important bank ("D-SIB").

Islamic banking operations of the Group adopt the following approaches in determining the capital requirements:

- **Credit Risk:**
  Islamic banking operations of the Group have adopted the FIRB Approach and Supervisory Slotting Criteria for major non-retail portfolios and the AIRB Approach for major retail portfolios. Credit risk is computed in accordance with CAFIB (Risk Weighted Assets) and Capital Adequacy Framework (Exposures to Central Counterparties).
- **Market Risk:**
  Market risk remains to be computed using the Standardised Approach, as per the CAFIB (Risk Weighted Assets).
- **Operational Risk:**
  The computation of operational risk-weighted assets is in line with the Capital Adequacy Framework (Operational Risk).

(a) The capital adequacy ratios of the Islamic banking operations of the Group are as follows:

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Before deducting proposed dividends:		
CET1 Capital Ratio	15.937%	15.652%
Tier 1 Capital Ratio	15.937%	15.652%
Total Capital Ratio	20.344%	20.276%
After deducting proposed dividends:		
CET1 Capital Ratio	14.594%	14.814%
Tier 1 Capital Ratio	14.594%	14.814%
Total Capital Ratio	19.001%	19.439%

54. OPERATIONS OF ISLAMIC BANKING (CONT'D.)

NOTES TO THE FINANCIAL STATEMENTS OF THE OPERATIONS OF ISLAMIC BANKING (CONT'D.)

(XXIX) CAPITAL ADEQUACY RATIO (CONT'D.)

(b) The components of CET1 Capital, Tier 1 and Tier 2 Capital of the Islamic banking operations of the Group are as follows:

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
CET1 Capital		
Ordinary share capital	1,387,107	1,387,107
Retained earnings	3,711,713	3,724,686
Fair value reserve	168	(1,589)
Regulatory reserve	249,295	80,674
Less: Regulatory adjustments applied on CET1 Capital		
– Intangibles assets	(130)	(210)
– Deferred tax assets	(49,268)	(55,440)
– 55% of cumulative gains of FVOCI financial instruments	(92)	–
– Regulatory reserve	(249,295)	(80,674)
– Unrealised fair value gains on financial liabilities due to changes in own credit risk	(13)	(9)
CET1/Tier 1 Capital	5,049,485	5,054,545
Tier 2 Capital		
Tier 2 Capital instruments meeting all relevant criteria for inclusion	1,300,000	1,300,000
Surplus of eligible provisions to expected losses	62,563	154,180
General provisions[1]	33,743	39,241
Tier 2 Capital	1,396,306	1,493,421
Total Capital	6,445,791	6,547,966

[1] Consists of provision for performing assets and regulatory reserve subject to a maximum 1.25% of total credit RWA.

The breakdown of the RWA in various categories of risk are as follows:

	Group	
	31 March 2026 RM'000	31 March 2025 RM'000
Credit RWA	32,122,513	29,448,313
Less: Credit RWA absorbed by Profit Sharing Investment Account	(2,805,388)	(612,320)
Total Credit RWA	29,317,125	28,835,993
Market RWA	327,492	449,684
Operational RWA	2,039,197	1,952,957
Additional RWA due to Capital Floor	–	1,055,516
Total RWA	31,683,814	32,294,150

NOTES TO THE FINANCIAL STATEMENTS

54. OPERATIONS OF ISLAMIC BANKING (CONT'D.)

NOTES TO THE FINANCIAL STATEMENTS OF THE OPERATIONS OF ISLAMIC BANKING (CONT'D.)

(XXX) COMMITMENTS AND CONTINGENCIES

In the normal course of business, the operations of Islamic banking of the Group makes various commitments and incur certain contingent liabilities with legal recourse to its customers. No material losses are anticipated as a result of these transactions other than those where provision had been made in the financial statements. The commitments and contingencies are not secured against the Group's assets.

As at the reporting date, the principal amounts of the commitments and contingencies and notional contracted amounts of derivatives are as follows:

Group	31 March 2026 RM'000	31 March 2025 RM'000
Commitments		
Other commitments, such as formal standby facilities and credit lines, with an original maturity of:		
– One year or less	7,717,536	6,143,759
– Over one year	597,940	635,225
Unutilised credit card lines	1,859,216	1,601,577
Forward asset purchases	10,126	173,308
	10,184,818	8,553,869
Contingent Liabilities		
Transaction-related contingent items	1,885,706	1,644,120
Short-term self-liquidating trade-related contingencies	106,045	52,545
Direct credit substitutes	77,675	145,994
	2,069,426	1,842,659
Derivative Financial Instruments		
Profit rate related contracts:	200,000	200,000
– Over one year to five years	200,000	200,000
Foreign exchange related contracts:	1,697,448	2,132,975
– One year or less	1,692,593	1,992,481
– Over one year to five years	4,855	140,494
	1,897,448	2,332,975
Total	14,151,692	12,729,503

55. SIGNIFICANT EVENT

The Middle East Conflict that began on 28 February 2026 and caused the closure of the Strait of Hormuz, has significantly disrupted many business operations around the world. In assessing the potential credit implications of the conflict, specific borrowers' and customers' information and situations with particular focus on exposures to and from Middle East, industry and sectoral developments and trends, forward-looking economic information and a range of external market views were considered, with judgement applied considering the evolving facts and circumstances.

The assessment considered the actual and possible assistances the borrowers and customers would require and possibilities of more adverse developments. The process involved judgements on areas including duration, extent, and ultimate outcomes of the conflict which are subject to high degree of uncertainties. The results of the assessment and these considerations have been reflected and incorporated in the ECL allowances as at 31 March 2026. While available, reasonable and supportable information have been considered in determining the ECL allowances for the current financial year ended 31 March 2026, actual outcomes may differ from these estimates due to high level of uncertainties involved.

Provisioning against credit loss under the MFRS 9 *Financial Instruments* and IFRS 9 *Financial Instruments* also requires forward-looking analysis which involves forecasts and projections of future scenarios at least twelve months after the balance sheet date. There are inherent limitations in determining possible future scenarios due to the highly uncertain situation and volatile development of the Middle East Conflict. There is a wide range of possible outcomes with practical difficulty to assign probabilities for quantifying their financial impacts meaningfully and reliably. A worst-case scenario indicated a possible global recession triggered by geopolitics with significant impact on ECL allowances, while a base-case scenario on the other hand, indicated a muted impact on ECL allowances if the Iran War ended in near future. Only reasonable scenario(s) supportable by internal and external views were used in this analysis as required under the accounting standard.

Given the inherent uncertainties and the high level of subjectivity involved in the recognition or measurement of ECL allowances as stated above, it is possible that the outcomes in the next financial year could differ from the expectations on which these estimates are based, resulting in the recognition and measurement of materially different amounts from those recorded in the financial statements. The extent of any adverse impacts on the Group's borrowers and customers, particularly on their ability to meet financial obligations to the Group, will continue to affect the ECL allowances in the next financial year ending 31 March 2027. The Group will continue to monitor these developments and implement appropriate measures to mitigate any adverse impacts on its credit portfolio.

APPENDIX

DIRECTORS OF SUBSIDIARY COMPANIES OF THE COMPANY

PILLAR 3 DISCLOSURE

1.0 SCOPE OF APPLICATION

The Risk Weighted Capital Adequacy Framework (Basel II) – Disclosure Requirements (Pillar 3) and Capital Adequacy Framework for Islamic Banks ("CAFIB") – Disclosure Requirements (Pillar 3) policy documents issued by Bank Negara Malaysia ("BNM") aim to enhance the transparency of disclosures on the risk management practices and capital adequacy of banking institutions. The two policy documents are applicable to all banking institutions licensed under the Financial Services Act 2013 ("FSA") and Islamic Financial Service Act 2013 ("IFSA").

The banking subsidiaries of AMMB Holdings Berhad ("AMMB" or "the Company") to which the policy documents apply are AmBank (M) Berhad ("AmBank"), AmInvestment Bank Berhad ("AmInvestment Bank") and AmBank Islamic Berhad ("AmBank Islamic"). AMMB is a financial holding company ("FHC") approved pursuant to Section 112(3) of the FSA.

The Pillar 3 Disclosure and regulatory capital ratio calculations are prepared at the consolidated AMMB Holdings Berhad level excluding investment in insurance entities and joint ventures ("the Group"). Investment in insurance entities is deducted from the regulatory capital. The information provided in this Pillar 3 Disclosure has been verified by the Group internal auditors and certified by the Group Chief Executive Officer.

Capital Adequacy

BNM's guidelines on capital adequacy seek to ensure that risk exposures of financial institutions are supported by adequate level of capital to withstand losses which may result from credit and other risks associated with its business operations.

The capital adequacy ratios are computed in accordance with BNM's policy documents on Capital Adequacy Framework (Capital Components), CAFIB (Capital Components) issued on 14 June 2024, Capital Adequacy Framework (Basel II – Risk Weighted Assets), CAFIB (Risk Weighted Assets) issued on 18 December 2023, Capital Adequacy Framework (Operational Risk) and Capital Adequacy Framework (Exposures to Central Counterparties) issued on 15 December 2023. Pursuant to BNM's policy documents on Capital Adequacy Framework (Capital Components) and CAFIB (Capital Components), financial institution is required to maintain minimum Common Equity Tier 1 ("CET1") Capital Ratio of 4.5%, Tier 1 Capital Ratio of 6.0% and Total Capital Ratio of 8.0% at all times. In addition, a financial institution is also required to maintain capital buffers which comprise the sum of the following:

(i) a Capital Conservation Buffer ("CCB") of 2.5%;

(ii) a Countercyclical Capital Buffer ("CCyB") determined as the weighted-average of the prevailing CCyB rates applied in the jurisdictions in which the financial institution has credit exposures. BNM will communicate any decision on the CCyB rate by up to 12 months before the date from which the rate applies; and

(iii) a Higher Loss Absorbency ("HLA") requirement for a financial institution that is designated as a domestic systemically important bank ("D-SIB").

The Group adopts the following approaches in determining the capital requirements:

Credit Risk:

AmBank and AmBank Islamic have adopted the Foundation Internal Rating Based ("FIRB") Approach and Supervisory Slotting Criteria for major non-retail portfolios and the Advanced Internal Ratings Based ("AIRB") Approach for major retail portfolios. Given that the credit risk exposure of AmInvestment Bank is relatively less material, the credit risk component of capital adequacy ratios of AmInvestment Bank remains to be computed using Standardised Approach. Credit risk is computed in accordance with Capital Adequacy Framework (Basel II – Risk Weighted Assets), CAFIB (Risk Weighted Assets) and Capital Adequacy Framework (Exposures to Central Counterparties).

Market Risk:

Market risk remains to be computed using the Standardised Approach, as per the Capital Adequacy Framework (Basel II – Risk Weighted Assets) and CAFIB (Risk Weighted Assets).

Operational Risk:

The computation of operational risk-weighted assets is in line with the Capital Adequacy Framework (Operational Risk).

PILLAR 3 DISCLOSURE

1.0 SCOPE OF APPLICATION (CONT'D.)

Frequency of Disclosure

Full disclosure requirements under the BNM guidelines are made on an annual and semi-annual basis except for disclosures under paragraph 10.1 of the guidelines and all qualitative disclosures which are made on an annual basis if there are no material changes in the interim reporting period.

Medium and Location of Disclosure

The Pillar 3 disclosure of the Group is available on the Group's corporate website at www.ambankgroup.com/home.

1.1 Basis of Consolidation

For statutory accounting purposes, the consolidated financial statements of AMMB comprise the financial statements of the Company and the financial statements of all its controlled entities (individually referred to as "group entities") where it is determined that there is a capacity to control. An investor controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

For purposes of this Pillar 3 Disclosure, the consolidation basis used is the same as that used for regulatory capital adequacy purposes except for the exclusion of investment in insurance entities and joint ventures. The following table shows the differences between the scope of statutory and regulatory consolidation.

	Accounting treatment	
Type of entity	**Statutory reporting**	**Basel III regulatory reporting**
Subsidiaries licensed under FSA or IFSA or engaged in financial activities	Fully consolidated	Deducted from capital at the banking subsidiary entity level; Consolidated in the calculation of capital adequacy at the banking subsidiary consolidated level and FHC level
Subsidiaries engaged in non-financial activities	Fully consolidated	Risk weighted at the banking subsidiary entity level; Consolidated in the calculation of capital adequacy at the banking subsidiary consolidated level and FHC level
Associates and jointly controlled entities which are licensed under FSA or IFSA or engaged in financial activities	Equity accounted	Deducted in the calculation of capital
Associates and jointly controlled entities which are not licensed under FSA or IFSA or engaged in financial activities	Equity accounted	Risk weighted

Apart from regulatory requirements and statutory constraints, there is no current or foreseen material, practical or legal impediments to the transfer of funds or regulatory capital within the Group.

Any such transfers would require the approvals of the respective Board of Directors ("Board"), as well as the concurrence of BNM.

2.0 CAPITAL MANAGEMENT

The Group's capital management approach is focused on maintaining an optimal capital position that supports the Group's strategic objectives and risk appetite. In line with the Group's annual 3-year strategy plan, a capital plan is developed to ensure that adequate level of capital and an optimum capital structure is maintained to meet regulatory requirements, the Group's strategic objectives and stakeholders' expectations.

The Group uses internal models and other quantitative techniques in its internal risk and capital assessment. They help to estimate potential future losses arising from credit, market and other material risks, and supplement the regulatory formulae to simulate the amount of capital required to support them.

Stress testing is used to ensure that the Group's internal capital assessment considers the impact of extreme but probable scenarios on its risk profile and capital position. They provide an insight into the potential impact of significant adverse events on the Group and how these events could be mitigated. The Group's target capital levels are set taking into account its risk appetite and its risk profile under future expected and stressed economic scenarios.

The Group's assessment of risk appetite is closely integrated with the Group's strategy, business planning and capital assessment processes, and is used to inform senior management's views on the level of capital required to support the Group's business activities.

The capital that the Group is required to hold is determined by its risk exposures after applying collaterals and other risk mitigants.

The Group has in place processes and controls to monitor and manage capital adequacy across the organisation. The Group Assets and Liabilities Committee ("GALCO") is responsible for overseeing and managing the Group's capital and liquidity positions.

A strong governance and process framework is embedded in the capital planning and assessment methodology. Overall responsibility for the effective management of risk rests with the Board. The Risk Management Committee ("RMC") is specifically delegated the task of reviewing all risk management issues including oversight of the Group's capital position and any actions impacting the capital levels.

Table 2.1: Capital Adequacy Ratios

(a) The capital adequacy ratios of the Group and the banking subsidiaries are as follows:

Total Capital Ratio	18.451%	19.439%	40.093%	17.493%

Note:

1. The Company, being a FHC i.e. a financial holding company approved pursuant to Section 112(3) of the FSA or Section 124(3) of the IFSA and holds investment directly or indirectly in corporations that are engaged predominantly in banking business or Islamic banking business, has complied with BNM guidelines on minimum capital adequacy ratios and capital buffer requirements at the consolidated level effective 1 January 2019. For regulatory capital reporting purposes, the consolidated level comprises the consolidation of all its financial and non-financial subsidiaries, excluding investments in ordinary shares of unconsolidated financial and insurance entities as per BNM's guidelines on Capital Adequacy Framework (Capital Components) and CAFIB (Capital Components). Under the guidelines, investments in ordinary shares of unconsolidated financial and insurance entities shall be deducted in the calculation of CET1 Capital Ratio.

3.0 CAPITAL STRUCTURE

Table 3.4 summarises the capital position and capital structure of the Group and its banking subsidiaries. The capital structure is made up of:

- CET1 Capital;
- Additional Tier 1 Capital; and
- Tier 2 Capital

3.1 CET1 Capital

CET1 Capital consists of the following:

(a) Ordinary Share Capital

Ordinary share capital represents the most subordinated claim in liquidation of the financial institution.

(b) Retained Earnings

Retained earnings are included in CET1 Capital net of any interim and final dividend declared, and net of any interim losses. Quarterly interim profits that are reviewed or audited by external auditors are included in the computation of CET1 Capital.

3.0 CAPITAL STRUCTURE (CONT'D.)

3.1 CET1 Capital (Cont'd.)

(c) Fair Value Reserve

The fair value reserve comprises fair value gains (net of fair value losses) on financial investments measured at fair value through other comprehensive income ("FVOCI"). In addition, the loss allowance arising from the recognition of expected credit losses on financial investments measured at FVOCI is accumulated in fair value reserve instead of reducing the carrying amount of the assets. To the extent the balance in the fair value reserve is a net credit position, the Group can recognise 45% of the balance as part of CET1 Capital. Where the balance is a net debit position, the entire balance is deducted from CET1 Capital.

(d) Foreign Currency Translation Reserve

Foreign currency translation reserve represents foreign exchange differences arising from the translation of the financial statements of foreign operations whose functional currencies are different from that of the Group's functional currency.

(e) Regulatory Reserve

Regulatory reserve is maintained in accordance with paragraph 10.5 of the BNM's Policy Document on Financial Reporting and paragraph 10.9 of the BNM's Policy Document on Financial Reporting for Islamic Banking Institutions as an additional credit risk absorbent. The amount of the regulatory reserve is deducted from the calculation of CET1 Capital.

(f) Other disclosed reserves comprise:

(i) Executive Share Scheme reserve

Executive Share Scheme ("ESS") reserve represents the equity-settled scheme shares granted to employees. The reserve is made up of the cumulative value of services received from employees recorded over the vesting period commencing from the grant date of equity-settled scheme shares and is reduced by the expiry of the scheme shares.

(ii) Treasury shares

Treasury shares represent the shares of the Company listed on the Main Market of Bursa Malaysia bought back from the open market. Shares bought back are held as treasury shares in accordance with Section 127(4)(b) of the Companies Act 2016. These shares have no rights to vote, dividends and participate in other distributions.

During the current financial year, the Company bought back 4,922,000 (2025: 8,322,000) ordinary shares of the Company for a total consideration of RM26.9 million (2025: RM44.7 million) (including transaction costs) from the open market at an average price of RM5.46 per share (2025: RM5.37 per share).

3.2 Additional Tier 1 Capital

No Additional Tier 1 issuance was made during the financial year under review.

3.3 Tier 2 Capital

The main components of Tier 2 Capital are Basel III compliant subordinated debt capital instruments, surplus eligible provisions over expected losses for IRB exposures and general provision for standardised exposures, subjects to applicable regulatory cap. Any shortfall of eligible provision over expected loss will be deducted from CET1 Capital. For AmInvestment Bank's capital adequacy ratios that are computed based on Standardised Approach, the main components of Tier 2 capital are Stage 1 and Stage 2 loss allowances and regulatory reserves (subject to a maximum of 1.25% of total credit risk-weighted assets determined under the Standardised Approach).

3.0 CAPITAL STRUCTURE (CONT'D.)

3.3 Tier 2 Capital (Cont'd.)

Basel III Subordinated Notes

On 13 December 2013, AmBank established a Basel III compliant Subordinated Notes programme of RM4.0 billion ("Tier 2 Programme") to enable the issuance of Tier 2 capital instruments from time to time. The Tier 2 Programme has a tenure of 30 years from the date of the first issuance under the Tier 2 Programme. Each issuance of Tier 2 Subordinated Notes under the Tier 2 Programme shall have a tenure of at least 5 years from the issue date, and is callable on any coupon payment date after a minimum period of 5 years from the date of issuance.

On 19 December 2018, AmBank revised the terms of the Tier 2 Programme to include the non-viability trigger event referenced to the financial group. The revision is and will be applicable to all existing and future capital instruments issued under the Tier 2 Programme.

The salient features of the Tier 2 Subordinated Notes issued under the RM4.0 billion Tier 2 Programme and outstanding as at 31 March 2026 are as follows:

Issue Date	First Call Date	Tenure	Interest Rate	Nominal value outstanding (RM million)
8 March 2022	8 March 2027	10 years Non-Callable 5 years	4.30% per annum	600
12 October 2022	12 October 2027	10 years Non-Callable 5 years	5.20% per annum	745
28 March 2023	28 March 2028	10 years Non-Callable 5 years	4.58% per annum	350
27 June 2023	27 June 2028	10 years Non-Callable 5 years	4.59% per annum	500
Total				2,195

On 16 October 2023, AmBank established a new Basel III compliant Subordinated Notes programme of RM8.0 billion ("AT1/Tier 2 Programme") to enable the issuance of Additional Tier 1 and Tier 2 capital instruments from time to time. This programme's tenure is perpetual.

The salient features of the Tier 2 Subordinated Notes issued under this AT1/Tier 2 Programme and outstanding as at 31 March 2026 are as follows:

Issue Date	First Call Date	Tenure	Interest Rate	Nominal value outstanding (RM million)
3 November 2023	3 November 2028	10 years Non-Callable 5 years	4.55% per annum	500
17 March 2026	17 March 2031	10 years Non-Callable 5 years	3.95% per annum	400
Total				900

3.0 CAPITAL STRUCTURE (CONT'D.)

3.3 Tier 2 Capital (Cont'd.)

Basel III Subordinated Sukuk Murabahah

On 26 February 2014, AmBank Islamic established a Basel III compliant Subordinated Sukuk Murabahah programme of RM3.0 billion ("Sukuk Murabahah Programme") to enable the issuance of Tier 2 Capital from time to time.

The Sukuk Murabahah Programme has a tenure of 30 years from the date of the first issuance under the programme. Each issuance of Tier 2 Subordinated Sukuk under the programme shall have a tenure of at least 5 years from the issue date, and is callable on any profit payment date after a minimum period of 5 years from the date of issuance of each tranche.

On 19 December 2018, AmBank Islamic revised the terms of the Sukuk Murabahah Programme to include the non-viability trigger event referenced to the financial group. The revision is and will be applicable to all existing and future capital instruments issued under the programme.

The salient features of the Sukuk Murabahah issued under this programme and outstanding as at 31 March 2026 are as follows:

Issue Date	First Call Date	Tenure	Profit Rate	Nominal value outstanding (RM million)
8 March 2022	8 March 2027	10 years Non-Callable 5 years	4.25% per annum	250
28 March 2023	28 March 2028	10 years Non-Callable 5 years	4.53% per annum	150
27 June 2023	27 June 2028	10 years Non-Callable 5 years	4.53% per annum	500
30 September 2025	30 September 2030	10 years Non-Callable 5 years	3.75% per annum	400
Total				1,300

PILLAR 3 DISCLOSURE

4.0 GENERAL RISK MANAGEMENT

The Risk Management Framework takes its lead from the Board's Approved Risk Appetite Framework that forms the foundation of the Group to set its risk/reward profile.

The Risk Appetite Framework is reviewed and approved annually by the Board taking into account the Group's desired external rating and targeted profitability/return on capital employed ("ROCE") and is reviewed periodically throughout the financial year by both the executive management and the Board to consider any fine tuning/enhancements taking into consideration the prevailing or in anticipation of challenges to the environment that the Group operates in.

The Risk Appetite Framework provides portfolio limits/triggers for Credit Risk, Traded Market Risk, Non-Traded Market Risk, Operational Risk, Sustainability Risk and Technology and Cyber Risk incorporating, inter alia, limits/triggers for countries, industries, single counterparty group, products, value at risk, stop loss, stable funding ratio, liquidity and Operational Risk Management ("ORM") tools.

The Group Risk Direction

The Group's financial year ("FY") 2025 to FY2029 Winning Together Strategy blueprint is to focus and reconstruct on 8 key areas, namely, (1) Path to Return on Equity ("ROE") of ≥10%, (2) Sharpening Segment Play, (3) Holistic Customer Value Proposition ("CVP") Leveraging A Collaboration Culture and Partnerships, (4) Pushing Capital-Light Revenue, (5) Ramping Up the Next Wave of Digital Initiatives, (6) Future Proofing The Workforce, (7) Integrating Environmental, Social, and Governance ("ESG") Considerations and (8) The Digital Bank.

1 The Group aspires to maintain its corporate credit ratings and the financial institution ratings of its banking subsidiaries at a minimum of AA2/P1 by RAM Rating Services Berhad ("RAM").

2 The Group aims to maintain a minimum ROCE of 12% and RWA efficiency ("CRWA/EAD") in the range of 40% to 45%, both based on FIRB.

3 The Group aims to maintain its Capital Ratios and at the Group's Internal Capital Target and Desired Operating Level Target under normal conditions.

4 The Group aims to maintain Available Financial Resources in excess of the capital requirements as estimated in the Internal Capital Adequacy Assessment Process ("ICAAP").

5 The Group recognises the importance of funding its own business. It aims to maintain the following:
   a. Liquidity Coverage Ratio ("LCR") (both consolidated and entity level) at least 10 percentage points above prevailing regulatory minimum;
   b. Stressed LCR (both consolidated and entity level) above the regulatory requirement; and
   c. Net Stable Funding Ratio ("NSFR") (FHC level) above the prevailing regulatory minimum (effective July 2020).

6 The Group aims to maintain adequate controls for all key operational risks (including but not limited to regulatory, compliance, technology, conduct and reputational risks).
   a. Keep the overall financial losses (operational losses, regulatory penalties and fraud losses) below 0.8% of Profit After Taxation and Minority Interest ("PATMI"); and
   b. Remain vigilant in risk identification and management to protect its reputation and business franchise.

7 The Group aims to maintain adequate controls for all Shariah Non-Compliance ("SNC") risks, with zero tolerance to SNC.

8 The Group aims to manage the non-climate supporting and transition exposures of the climate sensitive sectors within 15% by FY2027 (Short Term) and 10% by FY2030 (Medium Term) of non-retail financing/investment exposures.

9 The Group aims to manage its exposures to Green House Gas ("GHG") emission intensive sectors while continuing to engage and assist our customers onto sustainability pathways toward the Group's ultimate target of net zero, in line with the country aspiration by FY2050.

4.0 GENERAL RISK MANAGEMENT (CONT'D.)

Risk Management Governance

The Board is ultimately accountable for the management of risks within the Group. The RMC is formed to assist the Board in discharging its duties in overseeing the overall management of all risks including but not limited to market risk, liquidity risk, credit risk, operational and fraud risk, technology and cyber risk.

The Board has also established Management Committees to assist in managing the risks and businesses of the Group. The Management Committees address all classes of risk within its Board delegated mandate: credit risk, legal risk, operational and fraud risk, technology and cyber risk, market risk, liquidity risk, Shariah risk, compliance risk, reputational risk, product and business risk, Information Technology ("IT") risk, climate related risk and sustainability (covering ESG) risk.

The Group has an independent risk management function, headed by the Group Chief Risk Officer who:

- is responsible for establishing an enterprise wide risk management framework in all areas including credit, market, liquidity, operational, fraud, reputational, security, technology and cyber, emerging risks, climate related risk and sustainability risk;
- essentially champions and embeds a positive risk culture across the Group to ensure that risk taking activities across the Group are aligned to the Group's risk appetite and strategies; and
- through the RMC, has access to the Board and the Boards of the respective banking subsidiaries to facilitate suitable escalation of issues of concern across the organisation.

Potential impact of Emerging Risk

Emerging risks, such as increasing living costs due to inflationary pressure would potentially impact the asset quality of the Group's receivables. Mitigation actions such as comprehensive assessment through new booking quality tracking and trigger as well as a thorough review of the existing portfolio to identify the potentially vulnerable segment and thereafter allocate reasonable provisions to cushion the potential impacts.

The Business Banking – Enterprise Banking ("BB-EB") portfolio, particularly for smaller small and medium enterprises ("SMEs"), contains segments with elevated risk (i.e. high risk segment) that may affect overall asset quality. Portfolio segmentation has been carried out to enable different strategies to be deployed accordingly, enabling a more effective portfolio management with improved oversight. Furthermore, appropriate provisions have been allocated as necessary.

4.1 Internal Capital Adequacy Assessment Process

The core objectives of the Group's Internal Capital Adequacy Assessment Process ("ICAAP") Policy are:

- To protect the interests of depositors, creditors and shareholders;
- To ensure the safety and soundness of the Group's capital position; and
- To ensure that the capital base supports the Group's Risk Appetite and strategic business objectives, in an efficient and effective manner.

The requirements of the ICAAP Policy are consistent and calibrated with the Group's Risk Appetite as set and approved by the Board.

The following key principles underpin the ICAAP:

4.1.1 The Group shall maintain an approved, documented, risk based and auditable ICAAP. The aim is to ensure the Group maintains, on a continuous basis, an adequate level of capitalisation which is sized following the identification, measurement, monitoring, and effective management and oversight of material risks across the Group, consistent with:

- The Group Risk Appetite, including the Group's target credit rating category;
- Regulatory Capital requirements;
- The Board and Management's targeted financial performance; and
- The Group's planned asset growth and strategic business objectives.

PILLAR 3 DISCLOSURE

4.0 GENERAL RISK MANAGEMENT (CONT'D.)

4.1 Internal Capital Adequacy Assessment Process (Cont'd.)

The following key principles underpin the ICAAP: (Cont'd.)

4.1.2 Board and Senior Management Oversight

The ICAAP must be subject to Board and senior management oversight, forms an integral part of the Group's capital management and decision making processes, and will:

- Ensure all elements of the ICAAP are established and functioning effectively and subject to independent review on a periodic basis; and
- Ensure comprehensive assessment of capital adequacy conducted annually.

4.1.3 Capital Management Framework

The ICAAP shall include an approved Capital Management Framework which contains:

- A strategy for maintaining capital resources over time;
- Measures that would be taken in the event capital falls below a targeted level; and
- Measures to ensure that the Group is in compliance with minimum regulatory standards.

4.1.4 The Group's quality and level of capital shall commensurate with the level of risks exposures. Sufficient capital shall be maintained to:

- Meet minimum prudential requirements (including capital buffer requirements) in all jurisdictions in which the Group operates, and any requirements that may be imposed by the stakeholders of the Group;
- Be consistent with the Group's overall risk profile and financial positions, taking into account its strategic focus and business plan; and
- Achieve or maintain the Group's desired long term credit rating.

4.1.5 Capital allocation:

- Capital allocation shall be consistent with the Group's regulatory capital measurement framework and risk adjusted performance requirements.

4.1.6 Material Risks

- The Group shall identify and assess the risk materiality on an annual basis;
- Risk assessments shall be conducted at banking subsidiaries' level and incorporate both quantitative and qualitative elements; and
- Methodologies to identify and determine the materiality of current risk types, changes to existing risk types and new risk types must be established.

4.0 GENERAL RISK MANAGEMENT (CONT'D.)

4.1 Internal Capital Adequacy Assessment Process (Cont'd.)

ICAAP Framework

Requirements of the Banks	Requirements of the Regulator
Principal 1: • Banks have an ICAAP in relation to their risk profile and a strategy for maintaining capital levels **Principal 3:** • Banks are expected to operate above the minimum regulatory capital ratios and should have the ability to hold capital in excess of the minimum	**Principal 2:** • Regulators to review and evaluate the Bank's ICAAP strategies • Regulators to monitor and ensure Bank's compliance with regulatory capital ratios • Regulators undertake appropriate supervisory action if unsatisfactory results **Principal 4:** • Early intervention by the Regulator to prevent capital from falling below the required minimum levels

Internal Capital Adequacy Assessment Process

Board and Management Oversight	Sound Capital Assessment	Comprehensive Risk Assessment and Management Processes	Monitoring and Reporting	Internal Control and Review
• Material Risks identified • Material thresholds • Group Risk Appetite • Sufficient Capital Adequacy • Targeted Financial Performance • Planned Asset Growth and Strategic business objectives • Policy/Frameworks	• Identification, Measurement and Reporting of Material Risks • Compliance with minimum regulatory standards • Clear linkage between risks and capital • Capital Plan	• Credit Risk • Market Risk • Operational Risk • Large exposure risk requirements • Rate Risk in the Banking Book • Credit Concentration Risk • Sustainability risk • Stress testing • Technology risk • Liquidity risk • Shariah risk • Regulatory risk • Capital risk • Model risk • Enterprise-wide risk • Additional risk from risk register process	• Level and Trend of Material Risks • Sensitivity Analysis of key assumptions • Regulatory Reporting to Board and Senior Management	• Independent reviews of ICAAP (internal audit) • Ongoing compliance monitoring • Stress Testing • Documented processes/ frameworks

Overview of ICAAP process and setting Internal Capital Targets

PILLAR 3 DISCLOSURE

5.0 CREDIT RISK MANAGEMENT

The credit risk management process is depicted in the table below:

Identification	• Identify/recognise credit risk on transactions and/or positions • Select asset and portfolio mix
Assessment/Measurement	• Internal credit rating system • Probability Of Default ("PD") • Loss Given Default ("LGD") • Exposure At Default ("EAD") • Expected Loss ("EL") • Gross Impaired Loan/Financing ("GIL"/"GIF")
Control/Mitigation	• Portfolio Limits, Counterparty Limits • Non-Retail Pricing and Risk-based pricing for Retail • Collateral and tailored facility structures (discretionary lending) • Pre-set assessment criteria and acceptance criteria (programme lending)
Monitoring/Review	• New booking quality tracking and trigger, enabling early identification of potential deterioration • Monitor and report portfolio mix • Review Classified Accounts • Review Rescheduled and Restructured Accounts • Undertake independent credit review • Annual refresh of borrowers'/customers' credit risk rating

Credit risk is the risk of loss due to the inability or unwillingness of a counterparty to meet its payment obligations. Exposure to credit risk arises from lending/financing, securities and derivative exposures. The identification of credit risk is done by assessing the potential impact of internal and external factors on the Group's transactions and/or positions as well as Shariah compliance risk (please refer to section 12 for discussion on Shariah Governance Structure).

The primary objective of credit risk management is to maintain accurate risk recognition – identification and measurement, to ensure that credit risk exposure is in line with the Group's Risk Appetite Framework ("GRAF") and related credit policies.

For non-retail credit, risk assessment is a combination of both qualitative and quantitative assessment (including the financial standing of the customer or counterparty using the banking subsidiaries' credit rating model where the scores are translated into rating grade) on the customer or counterparty. The assigned credit rating grade forms a crucial part of the credit analysis undertaken for each of the banking subsidiaries' credit exposures and the overall credit assessment is conducted either through a programme lending or discretionary lending approach.

For retail credit, credit-scoring systems to better differentiate the quality of borrowers/customers are being used to complement the credit assessment and approval processes.

5.0 CREDIT RISK MANAGEMENT (CONT'D.)

To support credit risk management, rating models for major portfolios have been continuously monitored and implemented to facilitate:

- improvement in the accuracy of individual obligor risk ratings;
- enhancement to pricing models;
- credit decisioning process;
- loan/financing loss provision calculation;
- stress-testing; and
- enhancement to portfolio management.

Lending/financing activities are guided by internal credit policies and GRAF that are approved by the Board supplemented by credit guidelines and Management-level GRAF settings approved by the Management. The GRAF is refreshed at least annually and with regard to credit risk, provides direction as to portfolio management strategies and internal limits designed to deliver the Group's optimal portfolio mix. Credit risk portfolio management strategies include, amongst others:

- Concentration threshold/review triggers:
  - single counterparty credit exposure;
  - industry sector exposure; and
  - country risk exposure;
- Non-Retail Credit Policy ("NRCP") and Retail Credit Policy ("RCP") which sets out the credit principles and requirements for managing credit risk in the Wholesale Banking ("WB"), Business Banking ("BB"), Investment Banking ("IB"), Group Wealth Management ("GWM") and Retail Banking ("RB") portfolios;
- Classified Account Management requirements are in place for the non-retail model related portfolio, this sets out the identification and management (including monitoring requirements) of borrowers/customers that exhibit significant increase in credit risk or show symptoms of potential credit issues;
- Rescheduled and Restructured ("R&R") Account Management (embedded within the NRCP for WB and BB, and RCP for RB) sets out the controls in managing R&R loans/financing; and
- Setting Retail and BB-EB risk controls capping for higher risk segment to ensure credit approval practice is aligned with the credit policies and GRAF.

Exposure outside the approval discretions of individual Credit Approval Delegation ("CAD") holders are escalated to higher approving authority or Credit and Commitments Committee ("CACC") for approval. In the event such exposure exceeds a stipulated customer group threshold within the Group, the letter of offer shall not be issued until the credit is reviewed by the Joint Board Credit Committee ("Joint BCC"). Portfolio credit risk is reported to the relevant management and board committees.

The Group Management Risk Committee ("GMRC") regularly meets to review the quality and diversification of the Group's loan/financing portfolio and review the portfolio risk profile against the GRAF and recommend or approve new and amended credit risk policies or guidelines.

Group Risk Management prepares monthly Risk Reports which detail important portfolio composition and trend analysis incorporating asset growth, asset quality, impairment, flow rates of loan/financing delinquency buckets and exposures by industry sectors are reported monthly to executive management and to all meetings of the Board.

PILLAR 3 DISCLOSURE

5.0 CREDIT RISK MANAGEMENT (CONT'D.)

5.1 Impairment

The relevant governance for the respective Line of Businesses are established to align with the MFRS Accounting Standards and related BNM's standards/guidelines. In general, an asset is considered impaired when:

a. The obligor has breached its contractual payment obligations and past due for more than 90 days; or

b. As soon as default occurs where the principal and/or interest/profit repayments/payments are scheduled on intervals of 3 months or longer; or

c. Other impairment indicators stipulated in the relevant guidelines.

Impaired accounts which undergo restructuring/rescheduling will continue to be impaired for at least 6 months.

5.1.1 Group Provisioning Methodology

The Group's provisioning methodology complies with MFRS 9 where the Group recognises ECL at all times to reflect changes in the credit risk of a financial instrument. The methodology incorporates historical, current and forecasted information into ECL estimation. Consequently, more timely information is required to be provided about ECL.

MFRS 9 applies to all financial assets classified as amortised cost and FVOCI, lease receivables, trade receivables, and commitments to lend money and financial guarantee contracts.

Except for purchased or originated credit-impaired ("POCI") financial assets, financial assets are classified into 3 stages based on the changes in credit risk since initial recognition. The Group calculates 12-month ECL for Stage 1, Lifetime ECL for Stage 2, Stage 3 and POCI exposures.

i. Stage 1 : For performing financial assets which credit risk had not been significantly increased since initial recognition.

ii. Stage 2 : For underperforming financial assets which credit risk had significantly increased since initial recognition.

iii. Stage 3 : For financial assets which are credit impaired subsequent to initial recognition.

iv. POCI : For financial assets which are credit-impaired on initial recognition.

Measurement of ECL

The following diagram summarises the impairment requirements under MFRS 9 (other than POCI financial assets):

Changes in credit quality since initial recognition

Stage 1	Stage 2	Stage 3
(Initial recognition)	(Significant increase in credit risk since initial recognition)	(Credit-impaired assets)
12-month ECL	Lifetime ECL	Lifetime ECL

ECL can be assessed individually or collectively. Financial assets that are not individually significant or not individually credit impaired are collectively assessed. For financial assets that are individually significant, an assessment is performed to determine whether objective evidence of impairment exists individually.

Individual assessment is divided into two main processes – trigger assessment and measurement of impairment loss. Financial assets which are triggered by the impairment triggers will be measured for evidence of high likelihood of impairment, i.e. estimated recoveries (based on the discounted cash flow projection method and taking into account economic conditions) is less than carrying value.

Table 5.1.3: Geographical distribution of impaired and past due loans, advances and financing and impairment allowances

The impaired and past due loans, advances and financing and impairment allowances by geographic distribution of the Group are as follows:

	31 MARCH 2026		
	In Malaysia RM'000	Outside Malaysia RM'000	Total RM'000
Impaired loans, advances and financing	2,331,357	–	2,331,357
Past due but not impaired loans/financing	9,053,575	–	9,053,575
Allowances for expected credit losses			
– Individual allowance	231,541	–	231,541
– Collective allowance	1,363,692	328	1,364,020

	31 MARCH 2025		
	In Malaysia RM'000	Outside Malaysia RM'000	Total RM'000
Impaired loans, advances and financing	2,132,222	–	2,132,222
Past due but not impaired loans/financing	8,519,943	–	8,519,943
Allowances for expected credit losses			
– Individual allowance	227,737	–	227,737
– Collective allowance	1,524,028	1,521	1,525,549

Table 5.1.4: Reconciliation of changes to loans/financing impairment allowances

The disclosure on reconciliation of loan/financing loss allowances can be found in Note 12 of the financial statements. Charge offs and recoveries that have been taken up directly to the statement of profit or loss are as follows:

FINANCIAL YEAR ENDED 31 MARCH 2026	(Charge off)/ Recoveries RM'000
Individual allowance written off during the financial year	(53,717)
Individual allowance recoveries during the financial year	349,192

FINANCIAL YEAR ENDED 31 MARCH 2025	(Charge off)/ Recoveries RM'000
Individual allowance written off during the financial year	(53,848)
Individual allowance recoveries during the financial year	339,221

5.0 CREDIT RISK MANAGEMENT (CONT'D.)

5.2 Credit Risk Exposure under the IRB Approach

Adoption of IRB Basel II

The Group has on 29 July 2024 obtained BNM's approval to adopt FIRB Approach, i.e. to apply internal models to determine risk-weight for the majority of its credit portfolios in AmBank and AmBank Islamic. For AmInvestment Bank, given the relatively less material size of credit exposures, it remains under Standardised Approach.

For RWA computation of retail portfolios, the Group adopts the AIRB Approach using own internal estimates of PD, LGD and EAD. For non-retail portfolios, the Group adopts FIRB Approach, which uses own internal PD estimates and applies supervisory estimates of LGD and EAD.

The key measures generated by the internal models to quantify regulatory capital are:

(i) PD
This measures the likelihood that a borrower/customer defaults on its credit obligation over a period of one year.

(ii) LGD
This is a measure of the economic loss the Group would incur in the event a borrower/customer defaults taking into account also the time value of money when measuring recovery cash flows.

(iii) EAD
EAD is the expected amount that a borrower/customer is expected to be owing at time of default. This takes into account potential additional drawdown that may be incurred by the borrower/customer facing financial difficulties prior to default.

Various models are developed, tuned to the specific risk characteristics of each portfolio, to achieve these measurements.

In general, default risk estimates approach for Retail and Non-Retail portfolios are similar for PD, EAD and LGD models.

- Nevertheless, PD model for Retail segment is further segmented by Application Scorecard ("Ascore") and Behavioural Scorecard ("Bscore"). Ascore is generally developed by using internal and external (e.g. CCRIS) information for new application decisioning. Bscore is used primarily for account management and business strategy.
- Non-retail exposures under FIRB Approach for capital computation allows the Group to use its internal PD estimates, but use supervisory LGD and EAD estimates to compute the risk weights for corporate exposures. For specialised lending exposures, the Group adopts Supervisory Slotting Criteria approach with supervisory prescribed risk weights.

Model Risk Management

To ensure a robust model risk management, the Group has established a Board-approved model risk management framework and its related guidelines on the operational structure, minimum thresholds and standards, and risk management requirements for governing the controls and processes relating to model development, model validation and on-going model monitoring.

Internal models are developed, or co-developed with external consultants, by a dedicated internal modelling team functionally separate from risk origination. All new models and subsequent material changes to the models are subject to independent validation prior to implementation, and thereafter re-validated annually, by an internal validation team or external consultants who are independent from model ownership, development, monitoring and use. All models used for regulatory purposes are approved by the Board.

Internal Audit also reviews the adequacy and effectiveness of model-related governance, risk management and internal control processes and provides value-added assurance to assist the Board in the discharge of its oversight responsibilities.

PILLAR 3 DISCLOSURE

5.0 CREDIT RISK MANAGEMENT (CONT'D.)

5.2 Credit Risk Exposure under the IRB Approach (Cont'd.)

Model Risk Management (Cont'd.)

The model development, validation and governance process is depicted in the diagram below:

Modelling Stage
(Consultants, Modelers, Risk and Business Representatives)

- Modelling approach and methodology
- Data preparation and due diligence
- Factor selection and weight assignment
- Calibration

Technical/Business Working Group
(Modelers, Business Heads and Risk Heads)

- Deliberate on model outcome, issues and resolutions
- Agree on model assumptions and limitations
- Review impact and implementation plan

Model Validation
(External/internal independent validators)

- Provide independent review of model's fitness for purpose

Model Approval
(Board through Group Management Risk Committee and Risk Management Committee)

Subsequent to model implementation, the performance of the models is monitored regularly by the modelling team; deliberated at the Technical Working Group; and reported to GMRC, RMC and the Board for oversight.

The on-going model performance reporting process is depicted in the diagram below:

On-going model performance monitoring
(Modelers)

- Measure and analyse on-going model performance
- Produce reports
- Identify weaknesses and propose action plan

Periodic Technical/Business Working Group Discussion
(Modelers, Business Heads and Risk Heads)

- Deliberate model performance results and issues
- Agree on action plan and action parties
- Discuss user feedback and experience

Periodic updates to Committees
(Group Management Risk Committee, Risk Management Committee and the Board)

- Facilitate Committees' understanding on model performance
- Enable Committees to make informed decisions on model reliability and use

All Credit Models are being monitored on a quarterly basis and presented to:

1 Technical/Business Working Group which comprises representatives from both risk and business.

2 GMRC, RMC and the Board.

The scope of monitoring covers various quantitative tests on model discrimination, calibration and stability; highlights model weaknesses and ensure prompt action is taken by responsible parties.

5.0 CREDIT RISK MANAGEMENT (CONT'D.)

5.2 Credit Risk Exposure under the IRB Approach (Cont'd.)

Model Risk Management (Cont'd.)

Independent Model Validation

All models used for regulatory RWA computations are subjected to validation by an independent party not involved in model ownership, development, monitoring and use to ascertain whether the models are fit-for-purpose and meeting regulatory and/or internal policy requirements.

The scope of validation covers:

a. Model Validation
- Quantitative Tests – Discrimination, Calibration, Stability
- Data
- Methodology
- Governance
- Documentation

b. System Validation
- Input to Output Accuracy
- System and Data Governance
- User Acceptance Test
- Functional Specifications

All models used for regulatory RWA computations are validated annually, and the model validation results are reported to GMRC, RMC and the Board.

Use of Internal Models

The internal risk ratings are used not only for regulatory capital purposes, but also in various management of credit risk within the Group and its banking subsidiaries.

The basic credit risk measurement metrics of PD, LGD and EAD are transformed into measures of EL, capital consumption (RWA capital), and together with profitability to determine ROCE. These are used in the following applications within AmBank and AmBank Islamic.

1 Credit underwriting approval

All borrowers/customers are required to be rated at credit origination/annual review or rating refreshed to facilitate credit analysis and decision.

Credit approval matrix for a loan/financing application is determined based on EL and quantum of exposure. Retail cutoff score for credit acceptance takes EL into consideration.

2 Risk Governance

Risk grade/EL are used in risk appetite setting, such as setting of limits to manage credit concentration risk and setting of portfolio risk controls.

3 Capital management

ROCE is used in influencing lending growth/direction and capital allocation.

4 Policy

Internal ratings are consistently applied and used in the basis for credit risk policy/guidelines.

PILLAR 3 DISCLOSURE

5.0 CREDIT RISK MANAGEMENT (CONT'D.)

5.2 Credit Risk Exposure under the IRB Approach (Cont'd.)

Model Risk Management (Cont'd.)

Use of Internal Models (Cont'd.)

5 Reporting

Regular reporting relating to credit, such as distribution of credit/sectorial exposures, rating migration, estimation of relevant parameters per grade and relating to profitability areas.

6 Pricing

EL are used/considered in loan/financing pricing. Setting minimum hurdle rate for retail portfolio and ROCE for individual wholesale borrower/customer pricing.

7 Provisions and account management

The base PD, LGD and EAD are used for ECL provisioning estimates with modification to meet accounting standard.

Retail behavioural scores and PD segmentation model are used for account management and collection strategy.

5.2.1 Retail Portfolio

Retail PD models

Each account is assigned to a risk pool, of similar risk characteristics or drivers. The PD estimation is developed using historical data spanning a minimum 5 years, with each pool (or PD segment) calibrated to long run average which cover at least one business cycle.

Retail LGD models

All of the Retail LGD models are built using data spanning a minimum 5 years. For Basel II purposes, LGD is estimated to reflect downturn conditions. Similar to PD segmentation model, homogenous risk profile accounts will be segmented into the same LGD pool.

Retail EAD models

For on-balance sheet exposures (e.g. term loans/financing or mortgage loans/financing), EAD is equal to the current outstanding of the facility. For off-balance sheet exposures, (e.g. undrawn amount for revolving and non-revolving facility), EAD consist of current outstanding and the expected utilisation of committed (Cash Conversion Factor ("Cash CF") (where applicable)) and undrawn amount (Credit Conversion Factor ("CCF")) at the time of default. All EAD models are built using data spanning a minimum 5 years. For Basel II purposes, EAD is estimated to reflect downturn conditions. Similar to PD segmentation model, homogenous risk profile accounts will be segmented into the same EAD pool.

Cash CF refers to how much of an off-balance sheet exposure will actually be called upon and become an on-balance sheet item.

5.0 CREDIT RISK MANAGEMENT (CONT'D.)

5.2 Credit Risk Exposure under the IRB Approach (Cont'd.)

5.2.2 Non-Retail PD Model

PDs for wholesale borrowers/customers are generated by wholesale models differentiated by turnover size, specialised lending segments, contracting business and real estate activities. The methods used to develop models for risk quantification are summarised as follows:

I. Statistical method – Built and tested with data statistically;

II. Hybrid method – Built judgmentally and tested with limited data;

III. Expert method – Built on expert judgement; or

IV. Slotting method – Slot credit based on supervisory slotting criteria.

A hybrid rating model of point in time and through the cycle is generally adopted in wholesale rating models. The models allow expert judgement by credit evaluation officers to be reflected as the final rating for consideration of some model inputs not captured by the models. The internal risk grades are calibrated to the long run average default rates with upward adjustments made to the downturn period of year 2008 and 2009 to reflect 2000/2001 recession such that the PD increases exponentially at each higher risk grades. For models such as income-producing real estate, project finance and object finance (i.e. specialised lending models) which are difficult to model due to low default portfolio, these segments are developed using the supervisory slotting criteria. Similar default definition as per Basel II requirement is adopted across all non-retail exposures.

The rating is determined at customer level and translated into PD based on the calibration parameters that mapped to AmBank Masterscale. For regulatory RWA computation, a minimum floor PD of 0.03% is applied for conservativeness.

Corporate borrower/customer risk grade can be mapped to external agency ratings. Table below depicts AmBank Masterscale and mapping of internal risk grades of corporate borrowers/customers with Rating Agency of Malaysia ("RAM") rating grades. The external agency ratings recognise transaction structure and collateral, whereas internal rating reflects that in combination of PD (Risk Grade) and LGD, where PD (Risk Grade) is strictly borrower/customer default while transaction mitigation and collateral is reflected in LGD.

Category	Risk Grade	PD Range	RAM Equivalent
Exceptionally	1 to 6	0.0001% – 0.0737%	AAA
Very Strong	7 to 12	0.0738% – 0.5942%	AA1 to A3
Strong	13 to 14	0.5943% – 1.0159%	BBB1 to BBB2
Satisfactory	15 to 16	1.0160% – 2.2722%	BBB3 to BB2
Moderate	17 to 18	2.2723% – 4.1028%	BB3
Marginal	19 to 20	4.1029% – 8.2931%	B1 to B3
Substandard	21 to 24	8.2932% – 99.9999%	C1 to C3

Securitisation and Equity Exposures (Banking Book) are disclosed under the Standardised Approach under section 7 and 10 respectively.

5.0 CREDIT RISK MANAGEMENT (CONT'D.)

5.3 Credit Risk Mitigation

Collateral taken by the Group

Collateral is generally taken as security for credit exposures as a secondary source of repayment in case the counterparty cannot meet its contractual repayment obligations from cash flow generation. The collateral accepted for credit risk mitigation comprises financial collateral, real estate, other physical asset and guarantees.

In the case of the Group's Islamic Banking operations, only Shariah approved assets can be accepted as permissible collateral. Notwithstanding, for specific products, a collateral that becomes non-Shariah compliant during the tenure of financing may continue to be maintained as collateral.

The Credit Risk Mitigation Policy is the internally recognised collateral framework for the Group. Any collateral that does not conform to the requirements outlined in that policy may be considered by the relevant approval authority to be accepted and approved as an exception. For capital relief purposes, Basel FIRB requirements set out in BNM's Capital Adequacy Framework are to be met, failing which no capital relief is to be accorded.

Processes for collateral management

The concept of legal enforceability and certainty are central to collateral management. In order to achieve legal enforceability and certainty, the Group has standard collateral instruments, and where applicable, security interests are registered.

Guarantee support

Guarantee support for lending/financing proposals are an integral component in transaction structuring for the Group. For Non-Retail portfolio, where a counterparty's corporate guarantor guarantees 100% of the credit facility, the credit risk rating of the counterparty is able to be substituted, subject to fulfilling certain stipulated conditions. Otherwise, if the stipulated conditions are met but the guarantee is less than 100%, the weighted-average method is able to be employed.

Under the FIRB Approach for non-retail, the Group adopts the PD substitution approach whereby the exposure guaranteed by an eligible guarantor will substitute the PD of the counterparty in the computation of capital if the guarantor is internally rated and associated with a PD equivalent to BBB- or better. For retail exposures, guarantor is being considered as part of PD assessment.

Use of credit derivatives and netting for risk mitigation

Currently, the Group does not use credit derivatives and netting for risk mitigation.

Transaction structuring to mitigate credit risk

Besides tangible security and guarantee support described above, credit risk mitigation techniques are used in structuring transactions. These include duration limits managing the tenure of the loans/financing, amortisation schedules and loan/financing covenants. These assist in managing credit risk and providing early warning signals to enable pre-emptive actions to protect the quality or recoverability of loan/financing assets.

Concentrations of credit risk mitigation

The Group carefully monitors collateral concentrations via portfolio management reporting and amendments as necessary to its Risk Appetite Framework.

5.4 Credit Risk Exposure under the Standardised Approach

The Group uses external ratings for credit exposures to assign risk weights under the Standardised Approach where relevant. The ratings from the following external credit assessment institutions ("ECAIs") are used:

- Moody's Investors Service ("Moody's")
- Fitch Rating ("Fitch")
- RAM Rating Services Berhad ("RAM")
- Malaysian Rating Corporation Berhad ("MARC")

6.0 OFF-BALANCE SHEET EXPOSURES AND COUNTERPARTY CREDIT RISK

6.1 Off-Balance Sheet Exposures

The Group's off-balance sheet exposures consist of 3 main categories as follows:

(1) Credit-related exposures, e.g. direct credit substitute, guarantees given on behalf of borrowers/customers, certain transaction-related contingent items, obligation under underwriting agreement, short-term self-liquidating trade-related contingencies, irrevocable commitment to extend credit and unutilised credit card line.

(2) Derivative financial instruments, e.g. forward exchange contracts (forward exchange contracts and cross currency swaps), interest/profit rate related contracts (interest/profit rates futures and interest/profit rates swap), equity related contracts (option and futures) and commodity related contract (option).

(3) Other treasury-related exposures, e.g. forward purchase commitment.

Off-balance sheet exposure is mitigated by setting of credit limit for the respective counterparty and exposure limit for industry sectors which are governed under the GRAF.

6.2 Counterparty Credit Risk

Market-related credit risk is present in market instruments (derivatives and forward contracts), and comprises counterparty risk (default at the end of contract) and pre-settlement risk (default at any time during the life of contract). Market-related credit risk requires a different method in calculating the pre-settlement risk because actual and potential market movements impact the Group's exposure. The market-related credit risk covered by this treatment for transactions entered by the Group include interest/profit rates, foreign exchange and equities.

For each individual contract, the pre-settlement risk exposure is normally calculated based on the sum of the marked-to-market ("MTM") value of the exposure, plus the notional principal multiplied by the potential credit risk exposure ("PCRE") factor; if the sum of each individual contract is negative, the pre-settlement risk exposure for this contract is deemed to be zero.

Pre-settlement risk exposure = MTM + PCRE factor (or known as add-on factor) x Notional Principal

- The MTM is essentially the current replacement cost of the contract, and can be positive or negative. Where it is positive, i.e. in the money, the Group has credit exposure against the counterparty; if it is negative, i.e. out of the money, the negative value will be used.
- The PCRE factors recognise that prices change over the remaining period to maturity, and that risk increases with time. The PCRE factors are mandated for regulatory capital purposes.
- Variation to the above generic methodology is allowed for specific product.

Maximum pay out method is used for back-to-back and structured products where the underlying instrument structures are dynamic i.e. not confined to a standardised underlying instrument. Where the maximum payout is known, it is taken as the pre-settlement risk amount. However, in situations where the maximum payout is not observable, a Monte Carlo simulation method is used.

Exposure to the counterparty is governed by the counterparty credit limit under the GRAF.

Other than credit limit setting and related duration setting of such limits, the Group's primary tool to mitigate counterparty credit risk is by taking collateral.

For derivative exposures, collateral is generally managed via standard market documentation which governs the amount of collateral required and the re-margining frequency between counterparties, including the impact on collateral requirements should either the banking subsidiary's or the counterparty's credit risk rating be upgraded or downgraded.

6.4 Credit Derivatives Counterparty Credit Risk ("CCR")

The Group did not have any counterparty credit risk exposure as at 31 March 2026 and 31 March 2025.

PILLAR 3 DISCLOSURE

7.0 SECURITISATION

7.1 Objectives, roles and involvement

The Group has undertaken securitisations of its own originated assets, as well as advised on securitisations of third party assets as part of its structured finance/debt markets services for its clients. The Group's objectives in relation to securitisation activity include the following:

- increase the availability of different sources of funding;
- facilitate prudential balance sheet management;
- transfer of credit and market risk;
- obtain regulatory capital relief, if applicable;
- earn management fees on assets under management; and
- earn other fees for products and services provided, e.g. liquidity, funding and credit support, structuring, arranging and underwriting services.

The Group is involved in the following types of securitisation activities:

- Securitisation of assets originated by the Group. Such transactions provide diversity in the funding base for the Group entities. Such securitisations may or may not involve the transfer of credit risk and as such, may or may not provide regulatory capital relief;
- Securitisation of third party-originated assets;
- Facilities and services provided to securitisations – the Group provides various facilities to securitisations which include liquidity, funding and credit support as well as services such as structuring and arranging; and
- Investment in securities – the Group may purchase bonds issued from securitisation programmes and also purchases such bonds in the secondary markets.

7.2 Regulatory capital approaches used in the Group's securitisation activities

Securitisation exposures held in the trading books of the Group are subjected to market risk capital charge using the Standardised Approach.

For securitisation exposures held in the banking books, the Group applies the FIRB Approach related to banking book exposures to determine the credit risk capital charge.

7.3 Governance

The Group's Debt Markets team is tasked with the structuring of securitisation transactions whilst the governance of these securitisation activities is overseen by the Board and Executive Committees, and managed in accordance with the credit risk and market risk frameworks.

The exposures held in the trading book and banking book are governed by the market risk limits set by the respective books (Trading & Banking Book Policy) and the Credit Committee (CACC members) for credit limit approvals.

For non-retail, the use of credit risk mitigation to mitigate the risks retained through securitisation exposures shall be guided by the Credit Risk Mitigation Policy/Guideline (refer to section 5.3 on 'Credit Risk Mitigation'), unless there are specific collateral acceptance criteria set out for specific products.

7.4 Risk measurement and reporting of securitisation exposures

The Group relies on the external ratings assigned by recognised external credit assessment institutions in determining the capital charge requirement for rated securitisation exposures. The Group also assesses the performance information of the underlying pool on an ongoing basis e.g. 30/60/90 days past due, default rates, prepayment rates, etc, to gauge the stability of the model parameters to determine sufficiency of the buffers. The reporting for such exposures is dependent on the Group's ultimate position, whether acting as a third party investor to both on or off-balance sheet exposures.

7.5 Special Purpose Vehicle ("SPV") used in securitisation exercises

Third party exposures that have been securitised via SPVs include civil servant loans/financing, personal loans/financing and government-linked companies' staff housing loans/financing.

7.0 SECURITISATION (CONT'D.)

7.6 Accounting Policies for Securitisation

The Group has sponsored SPVs involving assets of the Group. Such SPVs are consolidated where the Group has control as determined in accordance with MFRS 10 *Consolidated Financial Statements*.

Assets that have been transferred wholly or proportionately to an unconsolidated entity remain on the Group's statement of financial position, with a liability recognised for the proceeds received, unless:

(a) substantially all risks and rewards associated with the assets have been transferred, in which case, they are derecognised in full; or

(b) if a significant portion, but not all, of the risks and rewards have been transferred, the asset is derecognised entirely if the transferee has the ability to sell the financial asset, otherwise the asset continues to be recognised to the extent of the Group's continuing involvement.

7.7 Use of external rating agencies

The Group uses the services of both RAM and MARC and where applicable, international rating agency (Fitch) for securitisation transaction purposes.

Table 7.8: Securitisation (Trading and Banking Book)

The securitised exposures of the Group are as follows:

	31 MARCH 2026			
Underlying Asset	**Total Exposures Securitised RM'000**	**Past Due RM'000**	**Impaired RM'000**	**Gains/Losses recognised during the financial year RM'000**
Traditional Securitisation				
Originated by the Group				
Banking Book				
Mortgage loans	7,495	–	7,149	–
Total Traditional Securitisation	7,495	–	7,149	–

	31 MARCH 2025			
Underlying Asset	**Total Exposures Securitised RM'000**	**Past Due RM'000**	**Impaired RM'000**	**Gains/Losses recognised during the financial year RM'000**
Traditional Securitisation				
Originated by the Group				
Banking Book				
Mortgage loans	1,217,947	–	1,206,071	–
Total Traditional Securitisation	1,217,947	–	1,206,071	–

The Group did not have any exposures under synthetic securitisation as at 31 March 2026 and 31 March 2025.

PILLAR 3 DISCLOSURE

Total Traditional Securitisation	2,368	2,368	–	2,368	29,598

There is no securitisation exposure under trading book as at 31 March 2026 and 31 March 2025.

8.0 ENTERPRISE FRAUD AND OPERATIONAL RISK MANAGEMENT ("EFORM")

The Operational Risk Management ("ORM") process is depicted in the table below:

Identification	• Identify and analyse risks in key processes/activities within Business and Functional Lines (including new products) • Review of past operational and fraud losses and incidences data • Regulators' and Auditors' review and feedback
Assessment/Measurement	• Risk and Control Self Assessment ("RCSA") • The inherent and residual risks are assessed based on the probability and impact of activity undertaken
Control/Mitigation	Several ORM tools are used to mitigate the risks identified: • Incident Management and Data Collection ("IMDC") • Key Risk Indicators ("KRI") • Key Control Testing ("KCT") • Root cause analysis • Scenario Analysis • Insurance programme
Monitoring/Review	• Monitoring and reporting of loss incidents by Event Type, Portfolio and Line of Business and entity, reporting of operational risk board and management triggers, risk profile status, key risk indicator breaches and key control testing exceptions and operational risk framework adherence • Challenging the periodical review or updating the RCSA (risk profile)/KRIs/KCTs of all Line of Business and entity • Trigger by adverse change in circumstances (trigger event review) • Change management process review

Operational risk is defined as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external incidents which includes but is not limited to legal risk, outsourcing risk, technology (including cyber) risk, fraud risk and Shariah compliance risk (Please refer to section 12 for discussion on Shariah Governance Structure). It excludes strategic, systemic and reputational risk.

Operational Risk Appetite ("ORA") is set as part of overall GRAF, which sets the acceptable tolerance levels of operational risk that the Group is willing to accept, taking into consideration of the relevant financial and non-financial risk or return attributes in order to support the achievement of the Group's strategic plan and business objectives. The ORA statements and measurements are classified based on operational risk loss event types, which are grouped into five (5) categories as below and monitored via IMDC, KRI and KCT:

- Fraud (internal and external);
- Employment Practices and Workplace Safety;
- Client, Products and Business Practices;
- Business Disruption, System Failures and Damage to Physical Assets; and
- Execution, Delivery and Process Management.

The strategy for managing operational and fraud risks in the Group is anchored on the three (3) lines of defence concept which are as follows:

- The first line of defence ("FLOD") is responsible for the management of operational and fraud risks in order for accountability and ownership to be as close as possible to the activity that creates the risk and ensuring that effective action is taken to manage them. Enhanced FLOD provides a business specific focus on the implementation of operational and fraud risk management activities and supports more effective day-to-day monitoring of operational and fraud risks.
- In the second line of defence, EFORM is responsible for exercising governance over operational and fraud risk through the management of the operational risk and enterprise fraud risk framework, policy development and communication, quality assurance of internal controls, operational and fraud risk measurement, validation of FLOD effectiveness, operational risk, fraud and scam training and reporting of operational risk triggers, breaches, KCT exceptions, operational loss incidents to GMRC, RMC and the Board.
- Group Internal Audit Department ("GIAD") acts as the third and final line of defence by providing independent assurance on the internal control effectiveness through periodic audit programme.

PILLAR 3 DISCLOSURE

8.0 ENTERPRISE FRAUD AND OPERATIONAL RISK MANAGEMENT ("EFORM") (CONT'D.)

EFORM maintains close working relationships with all Business and Functional Lines, continually assisting in the identification of operational and fraud risks inherent in their respective business activities, assessing the impact and significance of these risks and ensuring that satisfactory risk mitigation measures and controls are in place. Various tools and methods are employed to identify, measure, control and monitor/report operational and fraud risk issues within the Group. The ORM process contains the following ORM tools:

- The IMDC module provides a common platform for reporting operational and fraud risk incidents that fall within one of the seven Event Types as stated in Basel II. IMDC also serves as a centralised database of operational and fraud risk incidents to model the potential exposure to operational and fraud risks in future and estimate the amount of economic capital charge.
- The RCSA is a process of continual identification, assessment of risks and controls effectiveness. By using structured questionnaires to assess and measure key risk and its corresponding controls effectiveness, RCSA provides risk profiling across the Group.
- The KRI module provides early warning of increasing risk and/or control failures by monitoring the changes of the underlying risk measurements.
- The KCT is the test steps or assessment performed periodically to assure that the key controls are in place and they are operating as intended or effective in managing the operational and fraud risks.
- Root cause analysis is conducted by the Enterprise Fraud and Operational Risk Relationship Managers within EFORM to prevent recurrence of operational and fraud risk incidents.
- Scenario analysis is a forward-looking assessment tool to assess the severity impact on the Group's profitability and capital adequacy should the plausible and worse case scenarios materialise.

The GMRC, RMC and Board are the main reporting and escalation committees for operational risk matters including outsourcing risk, information technology (including cyber) risk, Shariah risk, legal risk, fraud risk and business continuity management.

In an increasingly digital and interconnected financial landscape, the Group recognises that fraud risk is a persistent and evolving threat. This risk encompasses the potential for financial loss, reputational damage, and regulatory sanction resulting from deceptive acts by external parties or internal personnel. Our strategy to combat fraud is built on a multi-layered framework of prevention, detection, and response. We invest in technological solutions to monitor transactions in real-time, identify anomalous patterns to detect and prevent fraudulent activity.

Furthermore, we maintain a robust system of internal controls and conduct employee training to foster a strong culture of security awareness and ethical conduct. We continuously enhance our authentication protocols and customer education initiatives to protect our customers' assets and data. While the sophistication and volume of fraud attempts continue to rise, the Group's dedicated Fraud Risk Management team works continuously to anticipate emerging threats. We collaborate closely with industry partners and law enforcement to strengthen the entire financial ecosystem's resilience. Although it is not possible to eliminate all fraud risk, we are committed to managing it within acceptable levels to safeguard the interests of our shareholders, customers, and the Group.

8.1 Business Continuity Management

The Business Continuity Management ("BCM") process is depicted in the table below:

Identification	• Identify events that potentially threaten the business operations and areas of criticality
Assessment/Measurement	• Business Impact Analysis ("BIA") • Risk Assessment • Climate-related Operational Risk Assessment
Control/Mitigation	• Policies governing the BCM implementation • BCM methodologies controlling the process flow • Implementing the Business Continuity ("BC") plan
Monitoring/Review	• BC Plan testing and exercise • Review of BC Plan • BC site readiness and maintenance

8.0 ENTERPRISE FRAUD AND OPERATIONAL RISK MANAGEMENT ("EFORM") (CONT'D.)

8.1 Business Continuity Management (Cont'd.)

The BCM function is an integral part of EFORM. It places the importance of maintaining a BCM framework and policies to identify events that could potentially threaten the Group's operations and the identification of critical functions through BIA exercise, for the development of recovery strategy. BCM builds the resilience and recovery capability to safeguard the interest of the Group's stakeholders by protecting our brand and reputation.

The BCM process complements the effort of the recovery team units to ensure that the Group has the required critical capabilities and resources, such as IT system disaster recovery, alternate workspace arrangements and effective communication during interruptions.

The Group is continuously reviewing the level of business operations resiliency to enhance the BCM capability throughout all critical departments and branches across the region. Training is an integral part of the process to heighten BCM awareness and inculcate a business resiliency culture.

The Group integrates climate-related operational risk into its BCM programmes and activities to ensure the continuity of its Critical Business Functions ("CBF") and Third Party Service Providers ("TPSP") in the face of climate related events. The integration shall include an objective risk assessment from credible external parties that evaluates the climate-related risk vulnerabilities of CBFs and TPSPs.

8.2 Technology and Cyber Risk Management

Technology risk is defined as the potential for financial loss, operational disruption, or reputational damage caused by failures in an organisation's IT infrastructure, software, systems, or data. It encompasses cyber risks (often considered a subset of technology risk, though they are frequently used interchangeably), system downtime, and hardware failures. It arises from both internal factors and external threats.

The scope addresses the various cyber and technology domains as listed (not limited to) below. This should include consideration on the Group's eco system, risk appetite, strategy transformation and the usage of emerging technology i.e. Artificial Intelligence ("AI") and Machine Learning ("ML").

Similar to Operation Risk Management, the Technology and Cyber Risk Management process comprises the 4 phases encompassing the technology(ies), mechanisms, tools, policies, procedures, controls and processes, including management oversight, to continuously identify, assess, monitor, report and mitigate/control technology risks, which include (but not limited to) IT risk, information security risk and cyber security risk.

Technology and cyber security risks remain a persistent threat for the financial industry. The constantly evolving nature of the regulatory, digital landscape and sophistication of cyber threats and attack vectors calls for increased vigilance, readiness and ability to respond to upcoming threats. The resilience of the Group's IT infrastructure and cyber security capabilities are of paramount importance, especially with regards to safeguarding borrowers'/customers' information.

The Group continues to monitor its cyber resilience posture, enhance its cyber security controls framework, execute internal assessment reviews, build defence mechanisms and uplift governance processes alongside the Group's cyber risk management strategy – to identify threats in a timely manner, and build or enhance the right defences to mitigate risks. Creating a security mindset for employees and borrowers/customers via its Cyber Security awareness programmes also remains a priority.

The Group Technology Risk team acts as a second line of defence to monitor alongside the first line of defence to ensure that risks and controls are properly managed. The Group's technology risk management capabilities include oversight over infrastructure security risk, data leakage risk, application security risk, third party security risk, governance and process robustness.

Group Technology Risk works closely with all Business and Functional Lines to identify technology and cyber risks inherent in the respective business activities, impact assessment and ensuring remedial actions are in place to mitigate risks accordingly. Various tools and methods are employed (similar to Operation Risk tools) to support the execution of these assessments. Progressive tracking and advisory are performed in parallel to execute an effective security programme to combine maturity-based and risk-based programmes towards proactive cyber security.

PILLAR 3 DISCLOSURE

8.0 ENTERPRISE FRAUD AND OPERATIONAL RISK MANAGEMENT ("EFORM") (CONT'D.)

8.3 Legal Risk

In all jurisdictions that the Group conducts its business, there could be potential legal risks arising from breaches of applicable laws, unenforceability of contracts, lawsuits, adverse judgement, failure to respond to changes in regulatory requirements and failure to protect assets (including intellectual properties) owned by the Group which may lead to incurrence of losses, disruption or otherwise impact on the Group's financials or reputation.

Legal risk is overseen by GMRC/Group Management Committee ("GMC"), upon advice by internal legal counsel and, where necessary, in consultation with external legal counsel to ensure that such risks are appropriately managed.

8.4 Regulatory Compliance Risk

The Group adopts a zero tolerance approach to regulatory breaches, including bribery, corruption and Shariah non-compliance.

The Group is committed to upholding high integrity and ethical standards by complying to the Code of Conduct and the applicable laws and regulations to safeguard the organisation and support sound and ethical business operations.

The Group has in place a comprehensive Regulatory Compliance Risk Management Framework to promote the safety and soundness of the Group by minimising financial, reputational and operational risks arising from regulatory non-compliance.

The compliance framework defines clear roles and responsibilities for compliance with regulatory guidelines and requirements and outlines the accountability of business and support units in managing compliance risks within their respective areas. The responsible parties are accountable for the management of compliance risks associated with the Group's processes and increasing awareness on the role of every employee to be compliant and safeguard the Group's reputation against any potential legal violations and/or regulatory non-compliance.

The Group Chief Compliance Officer provides independent oversight and has a direct reporting line to the Board Risk Management Committee ("RMC"). A structured governance and escalation process is in place to ensure timely identification, escalation, and reporting of compliance risks, with regular compliance updates submitted through monthly compliance reports to the RMC and the Board.

The Senior Management team is responsible for communicating the compliance framework to all employees across the organisation and ensuring the appropriate corrective actions are taken in response to any identified non-compliance. To support effective oversight, the Group Management Governance and Compliance Committee, comprising Senior Management representatives from Group Compliance, Group Risk, Group Internal Audit and Business Units, meets regularly to discuss and deliberate on regulatory updates, assess compliance issues, and address areas of non-compliance.

The Group continues to strengthen its compliance culture, supported by strong leadership commitment to high ethical standards and integrity. The Group remains vigilant to emerging regulatory risks, enhances its due-diligence and governance processes, and proactively responds to heightened regulatory scrutiny and supervisory expectations. The Board and Senior Management lead by example in fostering a robust compliance culture, ensuring that integrity and ethical conduct are embedded across the organisation.

9.0 MARKET RISK MANAGEMENT

Market risk is the risk of losses due to adverse changes in the level or volatility of market rates or prices, such as interest/profit rates, credit spreads, equity prices and foreign exchange rates. The Group differentiates between two categories of market risk: Traded Market Risk ("TMR") and Non-Traded Market Risk ("NTMR"). Assessment, control and monitoring of these risks are the responsibilities of Investment Banking and Markets Risk ("IBMR").

9.1 Traded Market Risk ("TMR")

The TMR management process is depicted in the table below:

Identification	• Identify market risks within existing and new products • Review market-related information such as market trends and economic data
Assessment/Measurement	• Value-at-Risk ("VaR") • Loss Limits • Historical Stress Loss ("HSL") • Present Value of One Basis Point ("PV01") • Sensitivity to Change • Other Detailed Controls
Control/Mitigation	• VaR Limits • Loss Limits/Triggers (Annual/Monthly/Daily) • HSL Limits • PV01 Limits • Greek Limits (Delta/Gamma/Delta-Gamma/Vega/Theta) • Concentration Limits • Position Size Limits • Maximum Tenor Limits • Maximum Holding Period • Minimum Holding Period • Approved Portfolio Products • Approved Countries/Currencies • Other Detailed Limits/Triggers
Monitoring/Review	• Monitor controls • Periodical review and reporting

TMR arises from transactions in which the Group acts as principal with clients or the market. It involves taking positions in fixed income, equity, foreign exchange, commodities and/or derivatives. The objectives of TMR management are to understand, accurately measure and work with Business Units to ensure exposures are managed within the Board and GMRC approved limit structures and risk appetite. This is done via robust TMR measurement, limit setting, limit monitoring, and collaboration and agreement with Business Units.

VaR, Loss Limits, HSL and other detailed management controls are used to measure, monitor and control TMR exposures. VaR is a quantitative measure which the Group applies recent historical market conditions to estimate potential losses in market value, at a certain confidence level and over a specified time horizon (i.e. holding period). Loss Limits serve to alert management on the need to take relevant and appropriate action once they are triggered.

To complement VaR, HSL is used as a measure of the potential impact on portfolio values due to more extreme, albeit plausible, market movements. In addition, HSL is used to gauge and ensure that the Group is able to absorb extreme, unanticipated market movements.

PILLAR 3 DISCLOSURE

9.0 MARKET RISK MANAGEMENT (CONT'D.)

9.1 Traded Market Risk ("TMR") (Cont'd.)

Apart from VaR, Loss Limits and HSL, additional sensitivity controls (e.g. Greek Limits/PV01 Limits) and indicators are used to monitor changes in portfolio value due to changes in risk factors under different market conditions.

IBMR independently monitors risk exposures against limits on a daily basis. Portfolio market risk positions are independently monitored and reported by IBMR to GMRC, RMC and the Board. Furthermore, policies and procedures are in place to ensure prompt action is taken in the event of non-adherence to limits. Business Units exposed to traded market risk are required to maintain risk exposures within approved risk limits and to provide an explanation for any non-adherence event to Senior Management.

The Group adopts the Standardised Approach for market risk capital charge computation. The capital charge serves as a buffer against losses from potential adverse market movements.

IBMR is committed to on-going improvements in market risk processes and systems, and allocates substantial resources to this endeavour.

9.2 Non-Traded Market Risk ("NTMR")

NTMR refers to interest rate risk/rate of return risk in the banking book including those arising from balance sheet management activities as covered under the risk appetite.

Interest Rate Risk/Rate of Return Risk in the Banking Book ("IRR/RORBB")

The IRR/RORBB risk management process is depicted in the table below:

Identification	• Identify IRR/RORBB within existing and new products • Review market-related information such as market trend and economic data
Assessment/Measurement	• ICAAP IRR/RORBB Economic Value of Equity ("EVE") • ICAAP IRR/RORBB Earnings-at-Risk ("EaR")
Control/Mitigation	• ICAAP IRR/RORBB EVE / Tier 1 Capital Triggers • ICAAP IRR/RORBB EaR / Total Net Interest/Profit Income ("NII/NPI") Triggers
Monitoring/Review	• Monitor controls • Periodical review and reporting

IRR/RORBB arises from changes in market interest/profit rates that impact core net interest/profit income, future cash flows or fair values of financial instruments. This risk arises from mismatches between repricing dates of assets and liabilities, changes in yield curves, volatilities in interest/profit margins and implied volatilities on interest/profit rate options. The provision of retail and wholesale banking products and services (primarily lending/financing and deposit taking activities) creates interest/profit rate-sensitive positions in the Group's statement of financial position.

The principal objectives of balance sheet risk management are to manage interest/profit income sensitivity while maintaining acceptable levels of IRR/RORBB and funding risk, and to manage the economic value of the Group's capital.

The Board's oversight of IRR/RORBB is supported by the GALCO and GMRC. The Board and GMRC are responsible for the alignment of Group-wide risk appetite. GALCO reviews strategies to ensure a comfortable level of IRR/RORBB is maintained, taking into consideration the Group's business strategies and is responsible for overseeing the Group's gapping positions, asset growth and liability mix against the interest/profit rate outlook. The Group has successfully engaged long-term borrowings and written interest/profit rate swaps to manage IRR/RORBB, and maintained an acceptable gapping profile as a result. In accordance with the Group's policy, IRR/RORBB positions are monitored on a monthly basis and hedging strategies are employed to ensure risk exposures are maintained within Board and Management-approved triggers.

9.0 MARKET RISK MANAGEMENT (CONT'D.)

9.2 Non-Traded Market Risk ("NTMR") (Cont'd.)

Interest Rate Risk/Rate of Return Risk in the Banking Book ("IRR/RORBB") (Cont'd.)

The Group measures the IRR/RORBB exposures using EVE and EaR, which are quantitative measures to assess the impact of change in value of future cash flows or fair values of financial instruments and net interest/profit income due to movement in market interest/profit rates. The Group complements EVE and EaR by stress testing IRR/RORBB exposures to highlight potential risk that may arise from extreme market events that are rare but plausible.

Key assumptions in the gap and sensitivity analysis relate to the behaviour of interest/profit rates and spreads, changes in loans, advances and financing and deposit product balances due to behavioural characteristics under different interest/profit rate environments. Material assumptions include the repricing characteristics and the stability of indeterminate or non-maturity deposits and loans, advances and financing.

The rate scenarios may include rapid ramping of interest/profit rates, gradual ramping of interest/profit rates, and narrowing or widening of spreads. Usually each analysis incorporates what Management deems the most appropriate assumptions about customer behaviour in an interest/profit rate scenario. However, in certain cases, assumptions are deliberately changed to test the Group's exposure to a specified event.

The Group's strategy seeks to optimise exposure to IRR/RORBB within Board and Management-approved triggers. This is achieved through the ability to reposition the interest/profit rate exposure of the statement of financial position using various product and funding strategies, supported by interest/profit rate hedging activities using interest/profit rate swaps and other derivatives. These approaches are governed by the Group's policies in the areas of product and liquidity management as well as the Trading Book and Banking Book Policy, hedging policies and Non-Traded Interest/Profit Rate Risk Framework.

IRR/RORBB exposures are monitored by IBMR and positions reported to the GALCO, GMRC, RMC and Board.

Table 9.3: Interest Rate Risk/Rate of Return Risk Sensitivity in the Banking Book

The IRR/RORBB sensitivity for the Group is as follows:

	31 MARCH 2026	
	Interest Rate/ Rate of Return +100 bps RM'000	Interest Rate/ Rate of Return -100 bps RM'000
Impact on Profit Before Taxation and Zakat	249,830	(249,830)
Impact on Equity	(1,175,107)	1,291,625

	31 MARCH 2025	
	Interest Rate/ Rate of Return +100 bps RM'000	Interest Rate/ Rate of Return -100 bps RM'000
Impact on Profit Before Taxation and Zakat	207,520	(207,520)
Impact on Equity	(1,179,316)	1,304,392

PILLAR 3 DISCLOSURE

10.0 EQUITIES (BANKING BOOK POSITIONS)

Equity risk is the potential loss that may be incurred on equity investments in the banking book. The Group's equity exposures in the banking book are equity investments that are taken for strategic and other objectives. Where an equity investment is undertaken for a strategic purpose, such investment will be made only after extensive analysis and due diligence. Equity investments undertaken for other business objectives are principally in conjunction with initiatives or measures promoted by the relevant regulatory authorities or trade bodies in which the Group will jointly with other financial institutions invest in such entities to attain various objectives, such as socio-economic development, promoting the further development of the financial market, the provision of facilities to improve customer service, and support for human capital development for the betterment of the Malaysian banking industry. The Board's approvals are required prior to committing to all forms of equity investment under this category and, where relevant, the necessary regulatory approval or notification will be obtained or met.

10.1 Valuation for and accounting of equity investments in the banking book

Measurement of equity securities – management has elected at initial recognition to irrevocably designate certain equity investment not held for trading at financial assets at fair value through profit or loss ("FVTPL") and FVOCI. When this election is used, fair value gains and losses for equity investment at FVTPL are recognised in profit or loss and equity investment at FVOCI are recognised in other comprehensive income.

Table 10.1: Equity investments and capital requirement

An analysis of equity investments by appropriate equity groupings and risk weighted assets of the Group is as follows:

	31 MARCH 2026 RM'000	31 MARCH 2025 RM'000
Non-traded equity investments		
Value of quoted (publicly traded) equities	13,781	11,007
Value of unquoted (privately held) equities	919,886	862,674
Total	933,667	873,681
Net unrealised gains		
Total unrealised gains	57,332	102,632
Risk Weighted Assets		
Equity investments subject to a 100% risk weight	893,351	841,643
Equity investments subject to a 150% risk weight	60,474	48,056
Total	953,825	889,699
Total minimum capital requirement (8%)	76,306	71,176

11.0 LIQUIDITY RISK AND FUNDING MANAGEMENT

Liquidity risk is the risk that the organisation either does not have sufficient financial resources available to meet all its obligations and commitments as they fall due, or can only access these financial resources at an unreasonable cost. Liquidity risk exposure arises mainly from the deposit taking and borrowing/financing activities and market disruption, and to a lesser extent, significant drawdown of funds from previously contracted financing and purchase commitments. Funding management is the ongoing ability to raise sufficient funds to finance actual and proposed business activities at a reasonable cost. Improper funding management may lead to liquidity problem. On the other hand, insufficient liquidity risk management may also give rise to funding risk.

The liquidity risk management process is depicted in the table below:

Identification	• Identify liquidity risk within existing and new business activities • Review market-related information such as market trend and economic data • Keep abreast with regulatory requirements
Assessment/Measurement	• Liquidity Coverage Ratio ("LCR") • Net Stable Funding Ratio ("NSFR") • Depositor Concentration Ratios • Other Detailed Controls
Control/Mitigation	• LCR Limits/Triggers • NSFR Limits/Triggers/Targets • Depositor Concentration Ratios • Other Detailed Triggers/Targets
Monitoring/Review	• Monitor controls • Periodical review and reporting

The liquidity risk management of the Group is aligned to the Liquidity Risk policy document, LCR policy document and NSFR policy document issued by BNM. The primary objective of the Group's liquidity risk management is to ensure the availability of sufficient funds at a reasonable cost to honour all financial commitments when they fall due. This objective is partly managed through maintenance of a portfolio of high-quality liquid assets to protect against adverse funding conditions and support day-to-day operations. The secondary objective is to ensure an optimal funding structure and to balance the key liquidity risk management objectives, which includes diversification of funding sources, customer base and maturity period.

The Board provides the liquidity risk management oversight including setting and reviewing the liquidity risk appetite while GALCO is the core management committee established by the Board to oversee the overall liquidity management of the Group.

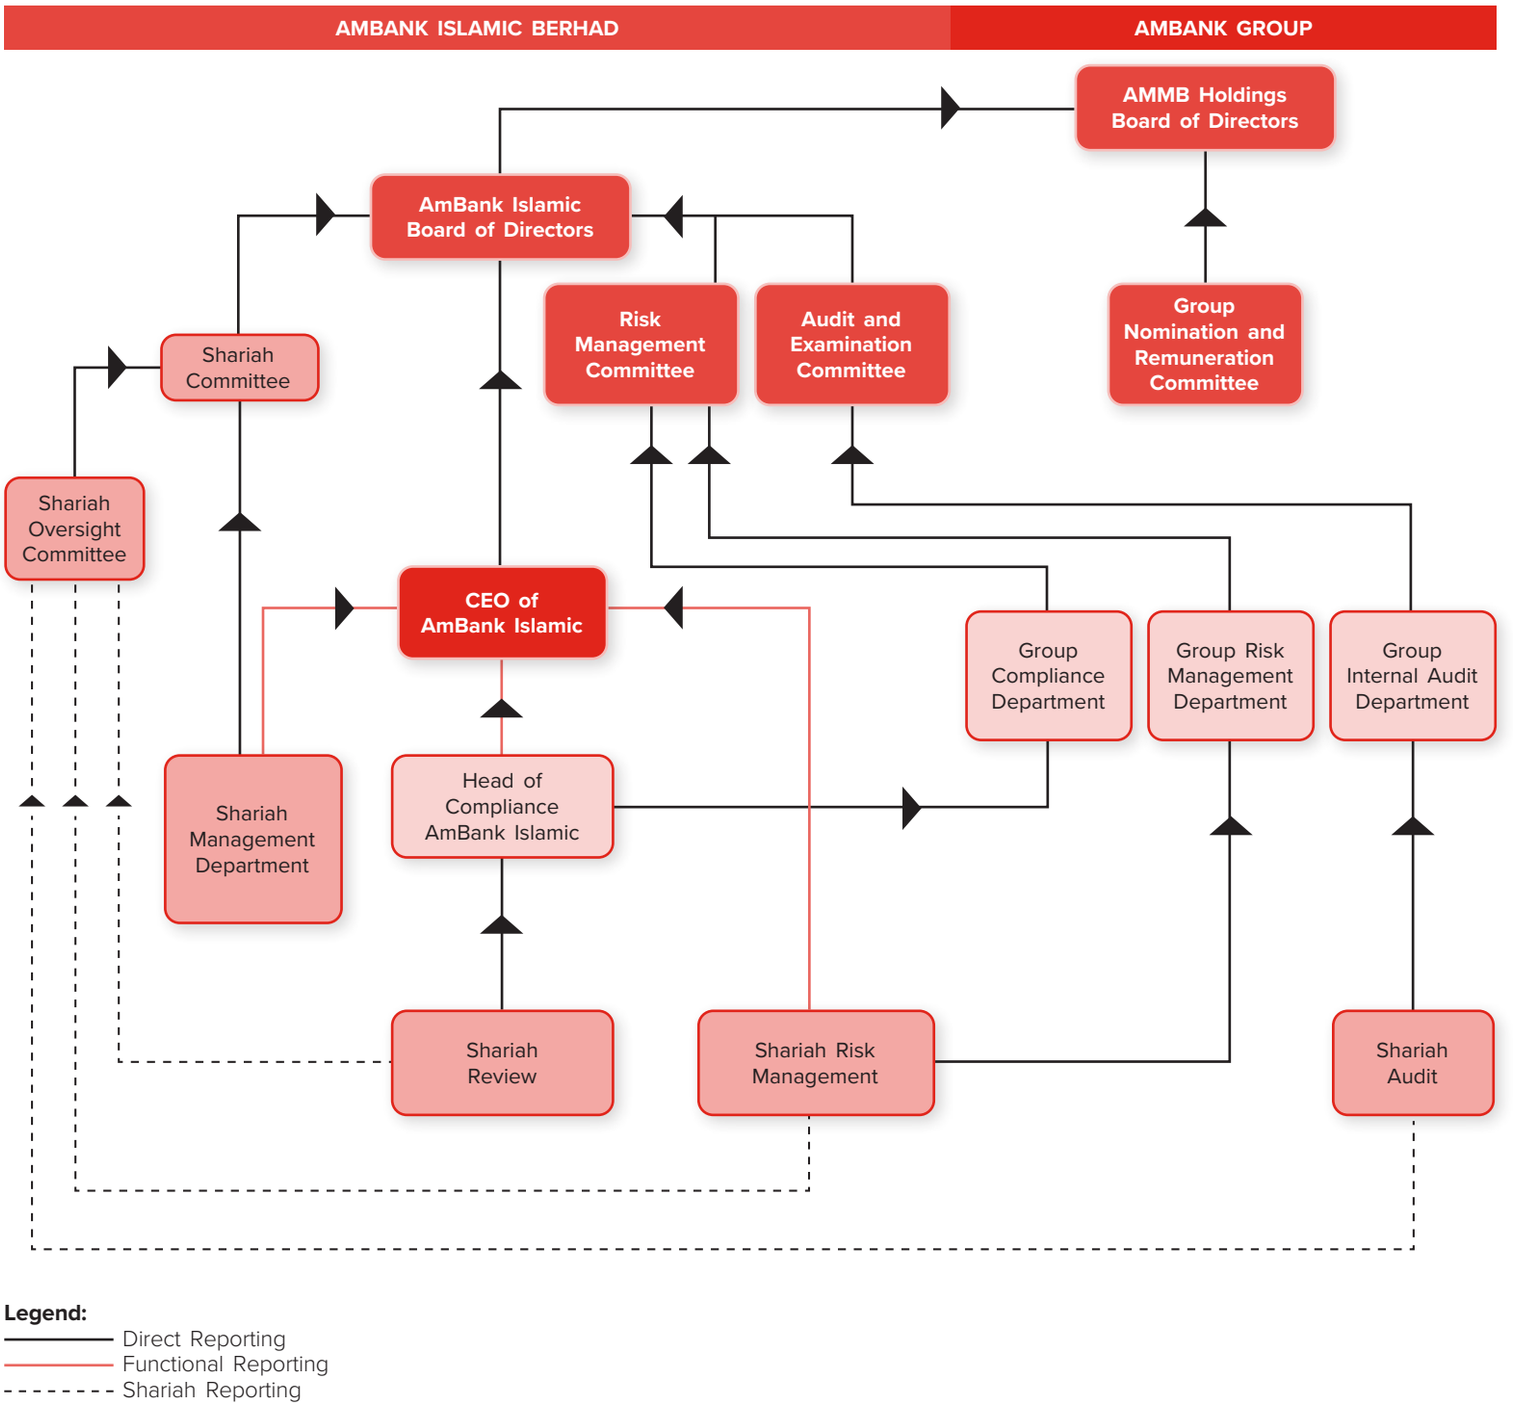
The Group has put in place a Contingency Funding Plan which is established by Capital and Balance Sheet Management ("CBSM") to identify early warning signals of possible liquidity problem. The Contingency Funding Plan also sets out the detailed responsibilities among the relevant departments in the event of actual liquidity crises occurring to ensure orderly execution of procedures to restore the liquidity position and confidence in the organisation.

Various liquidity measurements have been put in place to support the broader strategic objectives of the Group and amongst others include the BNM LCR, BNM NSFR and other Liquidity Ratios such as Depositor Concentration Ratio. IBMR is responsible for developing and monitoring the controls and limits while the Group Treasury and Markets ("GTM") and CBSM are responsible to ensure the controls and limits are within the thresholds.

Stress testing is undertaken to assess and plan for the impact for various scenarios which may put the Group's liquidity at risk. The Group further stresses the importance of the stable funding sources to finance placement/lending and loans, advances and financing to borrowers/customers. They are monitored using the loans/financing to fund ratio, which compares loans, advances and financing to borrowers/customers as a percentage of the Group's total funds.

PILLAR 3 DISCLOSURE

12.0 SHARIAH GOVERNANCE STRUCTURE



12.0 SHARIAH GOVERNANCE STRUCTURE (CONT'D.)

AmBank Islamic has established its Shariah governance structure in accordance with the requirements of the Islamic Financial Services Act 2013 ("IFSA") and BNM's Policy Document on Shariah Governance ("SGPD"). This is to ensure that the operations and business activities of AmBank Islamic comply with Shariah principles and requirements.

Apart from the Shariah Management Department, Shariah Risk Management and Shariah Review functions which reside in AmBank Islamic, AmBank Islamic's Shariah governance structure leverages on the GIAD for the Shariah Audit function.

Board of Directors

The Board is responsible for the overall oversight on the Shariah governance and Shariah compliance, including the appointment, remuneration, performance evaluation and reappointment of the Shariah Committee members. The Board performs its oversight role through various committees such as the Audit and Examination Committee, Risk Management Committee and the Shariah Committee.

Audit and Examination Committee ("AEC")

The AEC is a Board committee responsible for assisting the Board in ensuring that AmBank Islamic's operations are Shariah compliant through the independent assurance from the Shariah Audit function. The reports from the Shariah Review Section are also presented to the AEC for information.

Risk Management Committee ("RMC")

The RMC is a Board committee responsible for assisting the Board in ensuring that risk management (including Shariah risk management) controls and processes are in place.

Group Nomination and Remuneration Committee ("GNRC")

The GNRC is established as a committee of the Company to provide assistance to the Group in the following areas:

1. Review and assess the appointment/reappointment and remuneration of Directors, Shariah Committee members and Senior Management for recommendation to the Board.
2. Oversee the establishment of a formal and transparent procedure for the performance evaluation of Directors, Shariah Committee members and Senior Management.
3. Advise the Board on the optimal size and mix of skills of the Board and Board Committee.

Shariah Committee

The Shariah Committee is responsible on matters related to Shariah. This includes advising the Board and Senior Management on Shariah matters as well as endorsing products and services, Shariah policies and the relevant documentation in relation to AmBank Islamic's business and operations. In addition to endorsing the zakat computation mechanism and the proposed recipients for zakat distribution, the Shariah Committee provides advice and guidance on the management of the zakat fund, charity and other social programmes or activities.

Shariah Oversight Committee

The Shariah Oversight Committee, which is a sub-committee to the Shariah Committee, performs an oversight function via the Shariah Control Functions (i.e. Shariah Review, Shariah Risk Management, and Shariah Audit). The Shariah Oversight Committee provides guidance and advice on matters pertaining to Shariah non-compliant ("SNC") incidents as well as treatment of any SNC income.

PILLAR 3 DISCLOSURE

12.0 SHARIAH GOVERNANCE STRUCTURE (CONT'D.)

Senior Management

The Chief Executive Officer ("CEO") and senior officers of AmBank Islamic and the Group are responsible to make reference to the Shariah Committee and/or Shariah Oversight Committee on Shariah matters of AmBank Islamic and to take the necessary measures for implementation. The Senior Management is also responsible in establishing the infrastructure and adequate resources to support the Shariah governance structure. This includes putting in place adequate systems and controls in order to ensure compliance with Shariah and to mitigate Shariah non-compliance risk.

Shariah Management

The Shariah Management Department is accountable to the Shariah Committee with functional reporting to the CEO and is responsible for providing operational support for the effective functioning of the Shariah Committee including day-to-day Shariah advisory, conducting Shariah research, formulating Shariah policies and acting as the Secretariat to the Shariah Committee and the Shariah Oversight Committee.

Shariah Risk Management

The Shariah Risk Management Department is accountable to the Group Risk Management Department and the CEO of AmBank Islamic, and has Shariah reporting to the Shariah Oversight Committee. Shariah Risk Management Department is the designated second-line of defense that shall be responsible of managing Shariah risk within the Group with the exception for Shariah risk of AmIslamic Funds Management Sdn Bhd. The Department systematically identifies, measures, monitors and reports Shariah non-compliance risks to mitigate any possible non-compliance incidents.

Shariah Review

The Shariah Review Section is accountable to the Head of Compliance, AmBank Islamic with functional reporting to the CEO of AmBank Islamic, with Shariah reporting to the Shariah Oversight Committee. Shariah Review refers to a function that conducts regular assessment on the compliance of the operations, business, affairs and activities of AmBank Islamic which are predominantly transactional in nature, with Shariah requirements.

The Shariah Review Section also acts as the Shariah Non-Compliance Officer ("SNCO") of AmBank Islamic. The SNCO is responsible to assess and decide whether the reported Shariah related incidents shall be classified as Potential SNC, and also in preparing the SNC report for deliberation by the Shariah Oversight Committee in determining whether the Shariah related incident is an SNC or otherwise.

Shariah Audit

The Shariah Audit Section is accountable to the AEC in relation to Shariah-related matters and reports to the Shariah Oversight Committee. The Shariah Audit Section is a dedicated team within the GIAD, and is responsible to conduct independent assessment on the quality and effectiveness of AmBank Islamic's internal control, risk management systems, governance processes as well as the overall compliance of AmBank Islamic's operations, business, affairs and activities with Shariah requirements. The scope of Shariah Audit includes but is not limited to activities undertaken by departments and functions that relate to Islamic products and services.

12.1 SNC Income

For the financial year ended 31 March 2026, there was no SNC incident.

For the financial year ended 31 March 2025, there was one (1) SNC event declared with estimated SNC income of RM75,537.

13.0 INVESTMENT ACCOUNT ("IA")

The Group via AmBank Islamic offers two types of IA namely, Restricted Investment Account ("RA") which refers to a type of IA where the Investment Account Holder ("IAH") provides a specific investment to AmBank Islamic and Unrestricted Investment Account ("UA") which refers to a type of IA where the customer provides AmBank Islamic with mandate to make the ultimate investment decision without specifying any particular restriction or condition. Both RA and UA are based on the Shariah concept of Mudarabah. Currently, the RA arrangement undertaken by AmBank Islamic is with a subsidiary of the Group and is eliminated upon consolidation.

Mudarabah means a profit sharing contract between the IAH as the fund provider and AmBank Islamic as the fund manager in which the IAH provides capital to be managed by AmBank Islamic. Any profit generated from the capital is shared between the IAH and AmBank Islamic in accordance with a mutually agreed Profit Sharing Ratio ("PSR"), whilst financial losses (if any) are solely borne by the IAH provided that such losses are not due to AmBank Islamic's misconduct, negligence or breach of specified terms. The IA is not covered by PIDM.

As part of the measures to further support the growth in financing or assets of AmBank Islamic, AmBank Islamic is allowed to recognise the placement of Investment accounts for the purpose of:

a. Computation of Single Customer Exposure Limit ("SCEL"); where the RA placement maintained by AmBank Islamic shall be captured via look-through approach whereby the exposure to the counterparty in relation to the underlying asset invested by AmBank Islamic. The exposure shall be aggregated with all other exposure to such counterparty which in this case AmBank;

b. Credit and market risk weighted assets funded by RA and UA are allowed to be excluded from AmBank Islamic's calculation of Risk Weighted Capital Ratio ("RWCR"). Hence, allowing AmBank Islamic to enhance its financing capacity.

The IA is structured based on application of Shariah contracts terms which do not create an obligation for AmBank Islamic to repay in full the money accepted from the IAH. The structure and term of the IA provide sufficient legal enforceability to affect the loss bearing or loss transfer arrangement to IAH in accordance with Shariah.

Although the risk will be borne by the investor, AmBank Islamic will ensure the assets portfolio tagged to the investment accounts are being monitored diligently by specific team set up by AmBank Islamic. For RA, the selection of financing assets among others will take into consideration the Risk Grade ("RG"), arrears position, tenor of the facility and also collateral value. The return will also be determined based on the Investment account holders' risk appetite. For UA, AmBank Islamic will invest in low risk investment portfolios which comprise of pool of stable Shariah-compliant financing-i.

Restricted Investment Account ("RA")

The RA is an arrangement between AmBank Islamic and AmBank (act as IAH) to finance a specific business venture whereby AmBank solely provides capital and the business ventures are managed solely by AmBank Islamic as the fund manager. AmBank records its exposure in the arrangement as "Investment Account", whereas AmBank Islamic records its exposure as "financing and advances".

The RA exposes AmBank to the risks and rewards of the financing, and accordingly, AmBank accounts for all impairment allowances and risk weighted assets arising from the RA arrangement.

The RA placement will be limited to a cap agreed and approved by the management and Board of Directors for both AmBank Islamic and AmBank. In addition, the identified assets funded by RA shall be based on the criteria that has been agreed and approved by the relevant committees of AmBank Islamic and AmBank.

AmBank Islamic conducts regular review of the disclosure policies to ensure reliable, relevant and timely information to AmBank Islamic to facilitate the evaluation of RA performance and the risks associated with the assets portfolio.

PILLAR 3 DISCLOSURE

13.0 INVESTMENT ACCOUNT ("IA") (CONT'D.)

Restricted Investment Account ("RA") (Cont'd.)

The contract or Aqad encompassed terms and conditions including but not limited to the followings:

i. The description of the shariah concept used the RA arrangement
ii. Placement amount
iii. Tenor in months or days (whichever applicable)
iv. Profit Sharing Ratio ("PSR") for Mudarabah
v. Description of Assets/Investments matched with the funding

In managing the liquidity risk for RA, the redemption conditions imposed on AmBank would significantly mitigate the liquidity risk exposure of AmBank Islamic.

Mudarabah Term Investment Account ("MTIA-i")

AmBank Islamic has widened the scope of business beyond credit intermediation by acting as an investment intermediation role via the introduction of UA product.

The investment mandate, strategy and parameters for UA are in accordance with the governance set up by AmBank Islamic to ensure effective and efficient oversight on business activities and operations of UA in safeguarding the IAH's interest.

AmBank Islamic had established proper governance to facilitate effective monitoring and control of the overall management and conduct of the investment account. A dedicated unit was established to ensure management, development and implementation of operational policies that govern the conduct of IA are observed. On a periodic basis, a Fund Performance Report shall be made available on AmBank Islamic's website disclosing the performance of the underlying assets which in turn facilitates the IAH in making their investment decision.

MTIA-i fund is invested in investment asset with competitive pricing and good asset quality. The investment asset subscribes to AmBank Islamic's internal credit controls as regulated by BNM. Investment asset allocated is Shariah compliant retail mortgage portfolio of AmBank Islamic. AmBank Islamic manages the investment return in a manner consistent with IAH investment objective and the related governing rules and regulations.

Valuation methodology employed is in accordance with sound industry practice and consistent with the MFRS Accounting Standards. AmBank Islamic monitored the performance of the investment asset on monthly basis. The net return/loss on the MTIA-i are published on AmBank Islamic's website.

MTIA-i Performance

As at 31 March 2026, balance of MTIA-i stood at RM2,046.2 million (31 March 2025: RM1.1 million). The performance of the MTIA-i is as described in the table below:

As at 31 MARCH 2026	%
Return on Assets ("ROA")	5.00
Average Net Distributable Income Attributable to the IAH	3.62
Average Profit Sharing Ratio to the IAH	72.50

As at 31 MARCH 2025	%
Return on Assets ("ROA")	4.99
Average Net Distributable Income Attributable to the IAH	2.43
Average Profit Sharing Ratio to the IAH	48.72
