The Unaudited Condensed Interim Financial Statements should be read in conjunction with the audited financial statements of the Group and the Bank for the year ended 31 March 2018.

EXPLANATORY NOTES

A1. BASIS OF PREPARATION

These condensed interim financial statements have been prepared in accordance with MFRS 134, Interim Financial Reporting issued by the Malaysian Accounting Standards Board ("MASB") and complies with the International Accounting Standard ("IAS") 34, Interim Financial Reporting issued by the International Accounting Standards Board.

These condensed interim financial statements do not include all of the information required for full annual financial statements, and should be read in conjunction with the annual financial statements of the Group and the Bank for the financial year ended 31 March 2018.

A1.1 Significant Accounting Policies

The accounting policies adopted are consistent with those of the previous financial year except for the adoption of the following new standards, amendments to published standards, and new interpretation which became effective for the first time for the Group and the Bank on 1 April 2018:

- MFRS 9 *Financial Instruments*
- MFRS 15 *Revenue from Contracts with Customers*
- Applying MFRS 9 *Financial Instruments* with MFRS 4 *Insurance Contracts* (Amendments to MFRS 4)
- Classification and Measurement of Share-based Payment Transactions (Amendments to MFRS 2)
- Transfers of Investment Property (Amendments to MFRS 140)
- Annual Improvements to MFRSs 2014-2016 Cycle - amendments to MFRS 1 and MFRS 128
- IC Interpretation 22 *Foreign Currency Transactions and Advance Consideration*

The adoption of these new standards, amendments to published standards and new interpretation did not have any material impact on the financial statements of the Group and the Bank except for those arising from the adoption of MFRS 9 as disclosed below. Other than the adoption of new accounting policies as disclosed in Note A1.2, the Group and the Bank did not have to change its accounting policies or make retrospective adjustments as a result of adopting the other amendments to published standards and new interpretation.

The nature of the new standards, amendments to published standards and new interpretation are described below:

MFRS 9 *Financial Instruments*

MFRS 9 replaces the provisions of MFRS 139 *Financial Instruments: Recognition and Measurement* that relate to the recognition, classification and measurement, as well as derecognition of financial instruments, impairment of financial assets and hedge accounting. As permitted by the transitional provision of MFRS 9, comparative information have not been restated. The impact arising from the adoption of MFRS 9 are as follows:

(i) Classification and measurement

MFRS 9 requires all financial assets, other than equity instruments and derivatives, to be classified on the basis of two criteria, namely the entity's business model for managing the assets, as well as the instruments' contractual cash flow characteristics. Financial assets are measured at amortised cost if they are held within a business model whose objective is to hold financial assets in order to collect contractual cash flows that are solely payments of principal and interest. If the financial assets are held within a business model whose objective is achieved by both selling financial assets and collecting contractual cash flows that are solely payments of principal and interest, the assets are measured at fair value through other comprehensive income ("FVOCI"). Any financial assets that are not measured at amortised cost or FVOCI are measured at fair value through profit or loss ("FVTPL"). Instruments that qualify for amortised cost or FVOCI may be irrevocably designated as FVTPL, if doing so eliminates or significantly reduces a measurement or recognition inconsistency. Equity instruments are normally measured at FVTPL; nevertheless entities are allowed to irrevocably designate equity instruments that are not held for trading as FVOCI, with no subsequent reclassification of gains or losses to the statement of profit or loss.

Loans and advances, which form a substantial portion of the Group's and the Bank's financial assets, satisfied the conditions for classification at amortised cost and hence there is no change to the accounting of these assets. Similarly, investments in corporate bonds and sukuk classified as held-to-maturity under MFRS 139 also met the conditions for classification at amortised cost under MFRS 9.

EXPLANATORY NOTES (CONT'D.)

A1. BASIS OF PREPARATION (CONT'D.)

A1.1 Significant Accounting Policies (Cont'd.)

MFRS 9 Financial Instruments (Cont'd.)

(i) Classification and measurement (Cont'd.)

Certain investments in corporate bonds and sukuk that were classified as available-for-sale under MFRS 139 qualified for classification at amortised cost under MFRS 9. The reclassification has been effected by way of a retrospective application of the effective interest method and accordingly, the related cumulative fair value loss has been reversed on 1 April 2018. Other investments in corporate bonds and sukuk that were classified as available-for-sale satisfy the conditions for classification at FVOCI and hence there is no change to the accounting of these assets.

The majority of the Group's and the Bank's debt investments not quoted in active market that were measured at amortised cost under MFRS 139 satisfied the conditions for classification at FVOCI and the related fair value gains have been recognised in fair value reserve on 1 April 2018. However, certain debt investments did not meet the cash flow characteristics criterion to be classified either at FVOCI or at amortised cost and have been accordingly classified at FVTPL with related cumulative fair value loss recognised in retained earnings on 1 April 2018.

All financial assets held for trading comprising derivatives, as well as investments in debt and equity instruments, continued to be measured at FVTPL.

Other than equity instruments held for long-term strategic or socioeconomic purposes, the Group and the Bank did not designate any of the equity instruments not held-for-trading at FVOCI. As a majority of the equity instruments held for long-term strategic or socioeconomic purposes are unquoted and have been measured at cost in accordance with MFRS 139, the classification of these equity instruments at FVOCI under MFRS 9 resulted in the recognition of related fair value gains in fair value reserve on 1 April 2018.

There is no impact on the Group's and the Bank's accounting for financial liabilities, as the new requirements only affect the accounting for financial liabilities that are designated at FVTPL and the Group and the Bank do not have any such liabilities at this juncture.

(ii) Impairment

The loan loss impairment methodology is fundamentally changed under MFRS 9 as it replaces MFRS 139's incurred loss approach with a forward-looking expected credit loss ("ECL") approach. The impairment requirements based on ECL approach is applicable for all loans and other debt financial assets not held at FVTPL, as well as loan commitments and financial guarantee contracts. The allowances for expected losses are determined based on the expected credit losses associated with the probability of default ("PD") in the next twelve months unless there has been a significant increase in credit risk since origination, in which case, the allowance is based on the probability of default over the lifetime of the asset.

The Group and the Bank have established a policy to perform an assessment at the end of each reporting period of whether credit risk has increased significantly since initial recognition by considering the change in the risk of default occurring over the remaining life of the financial instrument. To calculate ECL, the Group and the Bank have estimated the risk of a default occurring on the financial instrument during its expected life. ECLs are estimated based on the present value of all cash shortfalls over the remaining expected life of the financial asset, i.e. the difference between the contractual cash flows that are due to the Group and the Bank under the contract and the cash flows that the Group and the Bank expect to receive, discounted at the effective interest rate of the financial asset.

Following the adoption of MFRS 9, the Group and the Bank recorded an additional loss allowance in respect of loans and advances, as well as investments in debt securities and other financial assets that are not classified at FVTPL, which has been adjusted to retained earnings on 1 April 2018.

(iii) Hedge accounting

All existing hedge relationships that were designated in effective hedging relationships under MFRS 139 continued to qualify for hedge accounting under MFRS 9. As MFRS 9 did not change the general principles of how an entity accounts for effective hedges, applying the hedging requirements of MFRS 9 did not result in any significant impact on the Group's and the Bank's financial statements.

The financial impacts of the adoption of MFRS 9 on the financial statements of the Group and the Bank are as disclosed in Note A40.

EXPLANATORY NOTES (CONT'D.)

A1. BASIS OF PREPARATION (CONT'D.)

A1.1 Significant Accounting Policies (Cont'd.)

MFRS 15 Revenue from Contracts with Customers

MFRS 15 established a new five-step model that applies to revenue arising from contracts with customers, based on the underlying principle that an entity should recognise revenue in a manner which depicts the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Under MFRS 15, an entity recognises revenue when (or as) a performance obligation is satisfied, i.e. when “control” of the goods or services underlying the particular performance obligation is transferred to the customer. The standard also specified the accounting for the incremental costs of obtaining a contract and the costs directly related to fulfilling a contract.

In accordance with the transitional provision in MFRS 15, the Group and the Bank have adopted the standard using the modified retrospective approach without any restatement to the comparative information. The adoption of MFRS 15 has resulted in changes in the Group's and the Bank's accounting policies. Nevertheless, no adjustment has been made to the amounts recognised in the financial statements as the adoption of MFRS 15 did not have any material financial impact because the Group and the Bank have been recognising revenue in a manner consistent with the principles of MFRS 15.

Annual Improvements to MFRSs 2014-2016 Cycle

The Annual Improvements to MFRSs 2014-2016 Cycle include minor amendments affecting three MFRSs, in which two of them are effective for annual periods beginning on or after 1 January 2018, as summarised below:

- (i) **MFRS 1 *First-time Adoption of Malaysian Financial Reporting Standards***
The amendments deleted short-term exemptions covering transition provisions of MFRS 7, MFRS 10, and MFRS 119. These transition provisions were available to entities for past reporting periods and are therefore no longer applicable. The deletion has no impact as the Group and the Bank have transitioned into MFRS in the past.
- (ii) **MFRS 128 *Investments in Associates and Joint Ventures***
MFRS 128 allows venture capital organisations, mutual funds, unit trusts and similar entities to elect measuring their investments in associates or joint ventures at fair value through profit or loss. The amendments clarified that this election should be made separately for each associate or joint venture at initial recognition. The amendment has no impact as such election is not applicable to the Group and the Bank.

IC Interpretation 22 *Foreign Currency Transactions and Advance Consideration*

The Interpretation provides guidance on how to determine the date of the transaction when applying MFRS 121 *The Effects of Changes in Foreign Exchange Rates* in situations where an entity either pays or receives consideration in advance for foreign currency-denominated contracts. For the purpose of determining the exchange rate to use on initial recognition of the related item, the Interpretation states that the date of the transaction shall be the date on which an entity initially recognises the non-monetary asset or liability arising from the advance consideration. The adoption of this Interpretation did not have any material financial impact to the Group and the Bank.

EXPLANATORY NOTES (CONT'D.)

A1. BASIS OF PREPARATION (CONT'D.)

A1.1 Significant Accounting Policies (Cont'd.)

Standards issued but not yet effective

Description	Effective for annual periods beginning on or after
MFRS 16 Leases	1 January 2019
IC Interpretation 23 <i>Uncertainty over Income Tax Treatments</i>	1 January 2019
Prepayment Features with Negative Compensation (Amendments to MFRS 9)	1 January 2019
Long-term Interests in Associates and Joint Ventures (Amendments to MFRS 128)	1 January 2019
Plan Amendment, Curtailment or Settlement (Amendments to MFRS 119)	1 January 2019
Annual Improvements to MFRSs 2015-2017 Cycle	1 January 2019
Amendments to References to the Conceptual Framework in MFRS Standards	1 January 2020
MFRS 17 <i>Insurance Contracts</i>	1 January 2021
Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to MFRS 10 and MFRS 128)	To be determined by MASB

The nature of the new standards, amendments to published standards and new interpretation that are issued and relevant to the Group and the Bank but not yet effective are described below. The Group and the Bank are assessing the financial effects of their adoption.

(a) Standards effective for financial year ending 31 March 2020

MFRS 16 Leases

MFRS 16 supersedes *MFRS 117 Leases* and the related interpretations.

Under MFRS 16, a lease is a contract (or part of a contract) that conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

MFRS 16 eliminates the classification of leases by the lessee as either finance leases (on balance sheet) or operating leases (off balance sheet). MFRS 16 requires a lessee to recognise a "right-of-use" of the underlying asset and a lease liability reflecting future lease payments for most leases.

The right-of-use asset is depreciated in accordance with the principle in *MFRS 116 Property, Plant and Equipment* and the lease liability is accreted over time with interest expense recognised in the profit or loss.

For lessors, MFRS 16 retains most of the requirements in MFRS 117. Lessors continue to classify all leases as either operating leases or finance leases and account for them differently.

MFRS 16 is effective for annual periods beginning on or after 1 January 2019, with early application permitted provided MFRS 15 is also applied. At this stage, the Group and the Bank do not intend to adopt the standard before its effective date. The Group and the Bank intend to apply the simplified transition approach and will not restate comparative amounts.

The Group and the Bank are in the process of assessing the financial implication of adopting MFRS 16. It is therefore not yet possible to estimate the amount of right-of-use assets and lease liabilities that will have to be recognised on adoption of the new standard.

EXPLANATORY NOTES (CONT'D.)

A1. BASIS OF PREPARATION (CONT'D.)

A1.1 Standards issued but not yet effective (Cont'd.)

(a) Standards effective for financial year ending 31 March 2020 (Cont'd.)

IC Interpretation 23 *Uncertainty over Income Tax Treatments*

The Interpretation provides guidance on how to recognise and measure deferred and current income tax assets and liabilities in situations where there is uncertainty over whether the tax treatment applied by an entity will be accepted by the tax authority. If it is probable that the tax authority will accept an uncertain tax treatment that has been taken or is expected to be taken on a tax return, the accounting for income taxes shall be determined consistently with that tax treatment. If an entity concludes that it is not probable that the treatment will be accepted, it should reflect the effect of the uncertainty in its income tax accounting in the period in which that determination is made, by applying the most likely amount method or the expected value method.

The Interpretation is effective for annual periods beginning on or after 1 January 2019 with early adoption permitted. Entities can choose to apply the Interpretation on full retrospective basis if possible without the use of hindsight, or retrospectively with the cumulative effect of initial application recognised as an adjustment to the opening balance of retained earnings.

Prepayment Features with Negative Compensation (Amendments to MFRS 9)

Under the current MFRS 9 requirements, the "solely payments of principal and interest on the principal amount outstanding" ("SPPI") condition is not met if the lender has to make a settlement payment in the event of early termination by the borrower. The existing requirements are amended to enable entities, to measure at amortised cost or at fair value through other comprehensive income (depending on the business model), some prepayable financial assets with negative compensation if the negative compensation is a reasonable compensation for early termination of the contract. An example of such reasonable compensation is an amount that reflects the effect of the change in the relevant benchmark rate of interest at the time of termination; the calculation of this compensation payment must be the same for both the case of an early repayment penalty and the case of a early repayment gain.

The amendments are effective for annual periods beginning on or after 1 January 2019 with early adoption permitted. The amendments shall be applied retrospectively.

Long-term Interests in Associates and Joint Ventures (Amendments to MFRS 128)

The amendments clarify that MFRS 9 including its impairment requirements shall be applied to long-term interests in an associate or joint venture that form part of the net investment in the associate or joint venture but to which the equity method is not applied.

The amendments are effective for annual periods beginning on or after 1 January 2019 with early adoption permitted. The amendments shall be applied retrospectively.

EXPLANATORY NOTES (CONT'D.)

A1. BASIS OF PREPARATION (CONT'D.)

A1.1 Standards issued but not yet effective (Cont'd.)

(a) Standards effective for financial year ending 31 March 2020 (Cont'd.)

Annual Improvements to MFRSs 2015-2017 Cycle

The Annual Improvements to MFRSs 2015-2017 Cycle include minor amendments affecting 4 MFRSs, which are effective for annual periods beginning on or after 1 January 2019, as summarised below:

- (i) *MFRS 3 Business Combinations*
The amendments clarified that obtaining control of a business that is a joint operation is a business combination achieved in stages. The acquirer shall remeasure its previously held interest in the joint operation at fair value at the acquisition date.
- (ii) *MFRS 11 Joint Arrangements*
The amendments clarified that the party obtaining joint control of a business that is a joint operation shall not remeasure any previously held interest in the joint operation.
- (iii) *MFRS 112 Income Taxes*
The amendments clarified that the income tax consequences of dividends on financial instruments classified as equity should be recognised according to where the past transactions or events that generated the distributable amounts were recognised. Hence the tax consequences are recognised in profit or loss only when an entity determines payments on such instruments are distributions of profits.
- (iv) *MFRS 123 Borrowing Costs*
The amendments clarified that if any specific borrowing remains outstanding after the related asset is ready for its intended use or sale, that borrowing becomes part of the funds that an entity borrows generally when calculating the capitalisation rate on general borrowings.

(b) Standards effective for financial year ending 31 March 2021

Amendments to References to the Conceptual Framework in MFRS Standards

The amendments, affecting nine published standards and five published interpretations, were issued as a consequence to the issuance of the revised *Conceptual Framework for Financial Reporting* ("Conceptual Framework") on 30 April 2018. The references and quotations in these published standards and interpretations to the Conceptual Framework have been updated so as to clarify the version of the Conceptual Framework these published standards and interpretations refer to. The amendments are effective for annual periods beginning on or after 1 January 2020 for entities that develop an accounting policy by reference to the Conceptual Framework.

(c) Standard effective on a date to be determined by MASB

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to MFRS 10 and MFRS 128)

The amendments clarify that:

- gains and losses resulting from transactions involving assets that do not constitute a business, between investor and its associate or joint venture are recognised in the entity's financial statements only to the extent of unrelated investors' interests in the associate or joint venture; and
- gains and losses resulting from transactions involving the sale or contribution to an associate of a joint venture of assets that constitute a business is recognised in full.

EXPLANATORY NOTES (CONT'D.)

A1. BASIS OF PREPARATION (CONT'D.)

A1.2 Summary of Significant Accounting Policies Applied from 1 April 2018

The significant accounting policies adopted in preparing these condensed interim financial statements are consistent with those as disclosed in the annual financial statements of the Group and the Bank for the financial year ended 31 March 2018 except for the following new accounting policies which have been applied from 1 April 2018 following the adoption of the new standards and amendments to published standards which are effective for annual periods beginning on or after 1 January 2018:

(a) Financial instruments – initial recognition and measurement

(i) Initial recognition

Financial assets and financial liabilities are recognised when the Group and the Bank become a party to the contractual provisions of the instrument. Regular way purchases and sales of financial assets are recognised using trade date accounting or settlement date accounting. The method used is applied consistently for all purchases and sales of financial assets that belong to the same category of financial assets. The Group and the Bank apply trade date accounting for derivative financial instruments and investments in equity instruments, and settlement date accounting for investments in debt instruments.

(ii) Initial measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

All financial liabilities are recognised initially at fair value and, in the case of financial liabilities not recorded at fair value through profit or loss, net of directly attributable transaction costs.

(iii) “Day 1” profit or loss

At initial measurement, if the transaction price differs from the fair value, the Group and the Bank immediately recognise the difference between the transaction price and fair value (a “Day 1” profit or loss) in “investment and trading income” provided that fair value is evidenced by a quoted price in an active market for an identical asset or liability (i.e. Level 1 input) or based on a valuation technique that uses only data from observable markets. In all other cases, the difference between the transaction price and model value is recognised in profit or loss on a systematic and rational basis that reflects the nature of the instrument over its tenure.

(b) Financial assets – classification and subsequent measurement

The Group and the Bank classify their financial assets in the following measurement categories:

- Amortised cost;
- Fair value through other comprehensive income (“FVOCI”); or
- Fair value through profit or loss (“FVTPL”).

EXPLANATORY NOTES (CONT'D.)

A1. BASIS OF PREPARATION (CONT'D.)

A1.2 Summary of Significant Accounting Policies Applied from 1 April 2018

(b) Financial assets – classification and subsequent measurement (Cont'd.)

The classification requirements for debt and equity instruments are described below:

(i) Debt instruments

Debt instruments are those instruments that meet the definition of a financial liability from the issuer's perspective. Classification and subsequent measurement of debt instruments depend on:

Business model

The business model reflects how the Group and the Bank manage the financial assets in order to generate cash flows. That is, whether the Group and the Bank's objective is solely to collect the contractual cash flows from the assets, or is to collect both the contractual cash flows and cash flows arising from the sale of assets. If neither of these is applicable (e.g. the financial assets are held for trading purposes), then the financial assets are classified as part of "other" business model. Factors considered by the Group and the Bank in determining the business model for a portfolio of assets include past experience on how the cash flows for these assets were collected, how the asset's performance is evaluated and reported to key management personnel, and how risks are assessed and managed.

Cash flow characteristics

Where the business model is to hold the financial assets to collect contractual cash flows, or to collect contractual cash flows and sell, the Group and the Bank assess whether the financial assets' contractual cash flows represent solely payment of principal and interest ("SPPI"). In making this assessment, the Group and the Bank consider whether the contractual cash flows are consistent with a basic lending arrangement, i.e. interest includes only consideration for time value of money, credit risk, other basic lending risks and a profit margin that is consistent with a basic lending arrangement. Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are SPPI.

Based on these factors, the Group and the Bank classify the debt instruments into one of the following three measurement categories:

Amortised cost

Financial assets that are held for collection of contractual cash flows where those cash flows represent SPPI, and that are not designated at FVTPL, are measured at amortised cost using the effective interest method. The carrying amount of these assets is adjusted by any expected credit loss allowance recognised and measured using the methodology described in Note A1.2(g). Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate ("EIR"). The EIR amortisation is included in "interest income" in profit or loss. The losses arising from impairment are recognised in the statement of profit or loss in "impairment losses on financial investments" for bonds, "impairment losses on loans and advances" for loans and advances or "doubtful receivables" for losses other than bonds, loans and advances.

FVOCI

Financial assets that are held for contractual cash flows and for selling the assets, where the assets' cash flows represent SPPI, and are not designated at FVTPL, are measured at FVOCI. Changes in the fair value are recognised through other comprehensive income ("OCI"), except for the recognition of impairment losses (measured using the methodology described in Note A1.2(g)), interest income and foreign exchange gains or losses on the assets' amortised cost which are recognised in profit or loss. Interest earned whilst holding the assets are reported as "interest income" using the effective interest method. The losses arising from impairment are reclassified from other comprehensive income to profit or loss in "impairment losses on financial investments". When the financial asset is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified to profit or loss and recognised in "other operating income".

EXPLANATORY NOTES (CONT'D.)

A1. BASIS OF PREPARATION (CONT'D.)

A1.2 Summary of Significant Accounting Policies Applied from 1 April 2018 (Cont'd.)

(b) Financial assets – classification and subsequent measurement (Cont'd.)

(i) Debt instruments (Cont'd.)

FVTPL

Financial assets that do not meet the criteria for amortised cost or FVOCI, including financial assets held-for-trading and derivatives, are measured at FVTPL. A gain or loss on an asset that is subsequently measured at FVTPL and is not part of a hedging relationship is recognised in profit or loss and presented within "investment and trading income". Interest earned whilst holding the assets are reported as "interest income" using the effective interest method.

In addition, financial assets that meet the criteria for amortised cost or FVOCI may be irrevocably designated by management as FVTPL on initial recognition, provided the designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the assets or liabilities or recognising gains or losses on them on a different basis. Such designation is determined on an instrument by instrument basis. Any change in fair value is recognised in profit or loss and presented within "investment and trading income". Interest earned are recognised in "interest income" using the effective interest method.

(ii) Reclassification of debt investments

The Group and the Bank reclassify debt investments when and only when its business model for managing those assets changes. The reclassification takes place from the start of the first reporting period following the change. Such changes are expected to be very infrequent and none occurred during the financial period.

(iii) Equity instruments

Equity instruments are instruments that meet the definition of equity from the issuer's perspective; that is, instruments that do not contain a contractual obligation to pay and that evidence a residual interest in the issuer's net assets.

The Group and the Bank subsequently measure all equity investments at FVTPL, except where the management has elected at initial recognition to irrevocably designate an equity investment that is not held for trading at FVOCI. When this election is used, fair value gains and losses are recognised in other comprehensive income and are not subsequently reclassified to profit or loss, including on disposal. Dividends earned whilst holding the equity investment are recognised in profit or loss as "other operating income" when the right to the payment has been established.

Gains and losses on equity investments at FVTPL, including dividends earned, are included in "investment and trading income" in profit or loss.

(c) Financial liabilities – classification and subsequent measurement

Financial liabilities are classified as subsequently measured at amortised cost, except for:

- financial liabilities at FVTPL; and
- financial guarantee contracts and loan commitments (see Note A1.2(j)).

(i) Amortised cost

Financial liabilities issued by the Group and the Bank, that are not designated at FVTPL, are classified as financial liabilities at amortised cost, where the substance of the contractual arrangement results in the Group and the Bank having an obligation either to deliver cash or another financial asset to the holder, or to satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

EXPLANATORY NOTES (CONT'D.)

A1. BASIS OF PREPARATION (CONT'D.)

A1.2 Summary of Significant Accounting Policies Applied from 1 April 2018 (Cont'd.)

(c) Financial liabilities – classification and subsequent measurement (Cont'd.)

(i) Amortised cost (Cont'd.)

After initial measurement, term funding, debt capital and other borrowings are subsequently measured at amortised cost using the effective interest method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR.

A compound financial instrument which contains both a liability and an equity component is separated at the issue date. A portion of the net proceeds of the instrument is allocated to the debt component on the date of issue based on its fair value (which is generally determined based on the quoted market prices for similar debt instruments). The equity component is assigned the residual amount after deducting from the fair value of the instrument as a whole the amount separately determined for the debt component. The value of any derivative features (such as a call option) embedded in the compound financial instrument other than the equity component is included in the debt component.

(ii) FVTPL

This classification is applied to derivatives, financial liabilities held for trading and other financial liabilities designated as such at initial recognition. Gains or losses on financial liabilities designated at FVTPL are presented partially in other comprehensive income (being the amount of change in the fair value of the financial liability that is attributable to changes in credit risk of that liability) and partially in profit or loss (i.e. the remaining amount of change in fair value of the liability). This is unless such presentation would create, or enlarge, an accounting mismatch, in which case the gains and losses attributable to changes in the credit risk of the liability are also presented in profit or loss.

(d) Derecognition of financial instruments

(i) Derecognition of financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- the rights to receive cash flows from the asset have expired, or
- the Group and the Bank have transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a “pass-through” arrangement; and either:
 - the Group and the Bank have transferred substantially all the risks and rewards of the asset, or
 - the Group and the Bank have neither transferred nor retained substantially all the risks and rewards of the asset, but have transferred control of the asset.

When the Group and the Bank have transferred their rights to receive cash flows from an asset or has entered into a pass-through arrangement, and have neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Group's and the Bank's continuing involvement in the asset. In that case, the Group and the Bank also recognise an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group and the Bank have retained.

A1. BASIS OF PREPARATION (CONT'D.)

A1.2 Summary of Significant Accounting Policies Applied from 1 April 2018 (Cont'd.)

(d) Derecognition of financial instruments (Cont'd.)

(ii) Modification of loans

The Group and the Bank sometimes renegotiate or otherwise modify the contractual cash flows of loans to customers. When this happens, the Group and the Bank assess whether or not the new terms are substantially different to the original terms. The Group and the Bank do this by considering, among others, the following factors:

- If the borrower is in financial difficulty, whether the modification merely reduces the contractual cash flows to amounts the borrower is expected to be able to pay;
- Whether any substantial new terms are introduced, such as a profit share or equity-based return that substantially affects the risk profile of the loan;
- Significant extension of the loan term when the borrower is not in financial difficulty;
- Significant change in the interest rate;
- Change in the currency the loan is denominated in;
- Insertion of collateral, other security or credit enhancements that significantly affect the credit risk associated with the loan.

If the terms are substantially different, the Group and the Bank derecognise the original financial asset and recognise a "new" asset at fair value and recalculate a new effective interest rate for the asset. The date of renegotiation is consequently considered to be the date of initial recognition for impairment calculation purposes, including for the purpose of determining whether a significant increase in credit risk has occurred. However, the Group and the Bank also assess whether the new financial asset recognised is deemed to be credit-impaired at initial recognition, especially in circumstances where the renegotiation was driven by the borrower being unable to make the originally agreed payments. Differences in the carrying amount are also recognised in profit or loss as a gain or loss on derecognition.

If the terms are not substantially different, the renegotiation or modification does not result in derecognition, and the Group and the Bank recalculate the gross carrying amount based on the revised cash flows of the financial asset and recognise a modification gain or loss in profit or loss. The new gross carrying amount is recalculated by discounting the modified cash flows at the original effective interest rate.

(iii) Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expired.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate, is at least 10% different from the discounted present value of the remaining cash flows of the original financial liability. In addition, other qualitative factors such as the currency that the instrument is denominated in, changes in the type of interest rate, new conversion features attached to the instrument and changes in covenants are also taken into consideration. The difference in the respective carrying amount of the original financial liability and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

If the exchange or modification is not accounted for as an extinguishment, any costs or fees incurred are adjusted to the carrying amount of the financial liability and are amortised over the remaining term of the modified financial liability.

A1. BASIS OF PREPARATION (CONT'D.)

A1.2 Summary of Significant Accounting Policies Applied from 1 April 2018 (Cont'd.)

(e) Repurchase and reverse repurchase agreements

Securities sold under repurchase agreements at a specified future date are not derecognised from the statement of financial position as the Group and the Bank retain substantially all the risks and rewards of ownership. The corresponding cash received is recognised in the statement of financial position as an asset with a corresponding obligation to return it, including accrued interest, as a liability within "securities sold under repurchase agreements", reflecting the transaction's economic substance as a loan to the Group and the Bank. The difference between the sale and repurchase prices is treated as interest expense and is accrued over the life of the agreement using the EIR. When the counterparty has the right to sell or repledge the securities, the Group and the Bank reclassify those securities in its statement of financial position to "financial assets at FVTPL pledged as collateral" or to "financial investments at FVOCI pledged as collateral", as appropriate.

Conversely, securities purchased under agreements to resell at a specified future date are not recognised in the statement of financial position. The consideration paid, including accrued interest, is recorded in the statement of financial position, within "securities purchased under reverse repurchase agreements", reflecting the transaction's economic substance as a loan by the Group and the Bank. The difference between the purchase and resale prices is recorded in "net interest income" and is accrued over the life of the agreement using the EIR.

If securities purchased under agreement to resell are subsequently sold to third parties, the obligation to return the securities is recorded as a short sale within "financial liabilities at FVTPL" and measured at fair value with any gains or losses included in "investment and trading income".

(f) Securities lending and borrowing

Securities lending and borrowing transactions are usually collateralised by securities or cash. The transfer of the securities to counterparties is only reflected on the statement of financial position if the risks and rewards of ownership are also transferred. Cash advanced or received as collateral is recorded as an asset or liability.

Securities borrowed are not recognised on the statement of financial position, unless they are then sold to third parties, in which case the obligation to return the securities is recorded as a trading liability and measured at fair value with any gains or losses included in "investment and trading income".

(g) Financial instruments - expected credit losses

The Group and the Bank assess on a forward-looking basis the expected credit losses ("ECL") associated with their debt instrument assets carried at amortised cost and FVOCI and with the exposure arising from loan commitments and financial guarantee contracts. The Group and the Bank recognise a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- the time value of money; and
- reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The carrying amount of the asset is reduced through the use of an allowance account and the loss is recognised in profit or loss. Interest income continues to be accrued in profit or loss on the reduced carrying amount and is accrued using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the allowance account.

For loan commitments and financial guarantee contracts, the loss allowance is recognised as a provision. However, for contracts that include both a loan and an undrawn commitment and the Group and the Bank cannot separately identify the expected credit losses on the undrawn commitment component from those on the loan component, the expected credit losses on the undrawn commitment are recognised together with the loss allowance for the loan. To the extent that the combined expected credit losses exceed the gross carrying amount of the loan, the expected credit losses are recognised as a provision.

A1. BASIS OF PREPARATION (CONT'D.)

A1.2 Summary of Significant Accounting Policies Applied from 1 April 2018 (Cont'd.)

(g) Financial instruments - expected credit losses (Cont'd.)

Loans together with the associated allowance are written off when it has exhausted all practical recovery efforts and there is no realistic prospect of future recovery, and all collateral has been realised or has been transferred to the Group and the Bank. The Group and the Bank may also write-off financial assets that are still subject to enforcement activity when there is no reasonable expectation of full recovery. If a write-off is later recovered, the recovery is credited to profit or loss.

(i) Rescheduled and restructured loans

Where possible, the Group and the Bank seek to reschedule or restructure loans rather than to take possession of collateral. This may involve extending the payment arrangements and the agreement of new loan conditions. Once the terms have been rescheduled or restructured, any impairment is measured using the original EIR as calculated before the modification of terms. Management continually reviews impaired rescheduled or restructured loans for a certain period to ensure all terms are adhered to and that future payments are likely to occur before reclassification back to performing status.

(ii) Collateral valuation

The Group and the Bank seek to use collateral, where possible, to mitigate its risks on financial assets. The collateral comes in various forms such as cash, securities, letters of credit/guarantees, real estate, receivables, inventories, other non-financial assets and credit enhancements such as netting agreements. The fair value of collateral is generally assessed, at a minimum, at inception and based on the Group's and the Bank's quarterly reporting schedule, however, some collateral, for example, cash or securities relating to margining requirements, is valued daily.

To the extent possible, the Group and the Bank use active market data for valuing financial assets held as collateral. Other financial assets which do not have a readily determinable market value are valued using models. Non-financial collateral, such as real estate, is valued based on data provided by third parties such as mortgage brokers, housing price indices, audited financial statements, and other independent sources.

(iii) Collateral repossessed

The Group's and the Bank's policy is to determine whether a repossessed asset is best used for its internal operations or should be sold. Repossessed financial assets determined to be useful for the internal operations are classified based on their characteristics, business model and the cash flow characteristics, and are measured at their fair value in the same manner as described in Note A.1.2(a)(ii). Repossessed non-financial assets determined to be useful for the internal operations are transferred to their relevant asset category at the lower of their repossessed value and the carrying value of the original secured asset. Repossessed assets that are determined better to be sold are immediately transferred to assets held for sale if the sale is deemed highly probable within a short period following the repossession, whereby financial assets are measured at their fair value whereas non-financial assets are measured at the lower of fair value less cost to sell at the repossession date and the carrying value of the original secured asset.

A1. BASIS OF PREPARATION (CONT'D.)

A1.2 Summary of Significant Accounting Policies Applied from 1 April 2018 (Cont'd.)

(h) Hedge accounting

The Group and the Bank make use of derivative instruments to manage exposures to interest rate, foreign currency and credit risks, including exposures arising from forecast transactions and firm commitments. In order to manage particular risks, the Group and the Bank apply hedge accounting for transactions which meet specified criteria.

At inception of the hedge relationship, the Group and the Bank formally document the relationship between the hedged item and the hedging instrument, including the nature of the risk, the risk management objective and strategy for undertaking the hedge and the method that will be used to assess the effectiveness of the hedging relationship at inception and on an ongoing basis.

At each hedge effectiveness assessment date, a hedge relationship must be expected to be highly effective on a prospective basis for the designated period in order to qualify for hedge accounting. A formal assessment is undertaken by comparing the hedging instrument's effectiveness in offsetting the changes in fair value or cash flows attributable to the hedged risk in the hedged item, both at inception and at each quarter end on an ongoing basis. Hedge ineffectiveness is recognised in profit or loss. For situations where the hedged item is a forecast transaction, the Group and the Bank also assess whether the transaction is highly probable and presents an exposure to variations in cash flows that could ultimately affect profit or loss.

(i) Fair value hedges

The change in the fair value of a hedging derivative is recognised in "investment and trading income" in profit or loss. The change in the fair value of the hedged item attributable to the risk hedged is recorded as part of the carrying value of the hedged item and is also recognised in "investment and trading income" in the statement of profit or loss.

For fair value hedges relating to items recorded at amortised cost, any adjustment to carrying value is amortised through profit or loss over the remaining term of the hedge using the effective interest method. EIR amortisation may begin as soon as an adjustment exists and no later than when the hedged item ceases to be adjusted for changes in its fair value attributable to the risk being hedged.

If the hedged item is derecognised, the unamortised fair value is recognised immediately in profit or loss.

(ii) Cash flow hedges

The effective portion of the gain or loss on the hedging instrument is recognised in OCI in the "cash flow hedge reserve", while any ineffective portion is recognised immediately in "investment and trading income" in the statement of profit or loss.

Amounts recognised as OCI are transferred to profit or loss when the hedged transaction affects profit or loss, such as when the hedged financial income or financial expense is recognised or when a forecast sale occurs. When the hedged item is the cost of a non-financial asset or non-financial liability, the amounts recognised as OCI are transferred to the initial carrying amount of the non-financial asset or liability.

If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover (as part of the hedging strategy), or if its designation as a hedge is revoked, or when the hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss previously recognised in OCI remains separately in equity until the forecast transaction occurs or the foreign currency firm commitment is met.

(iii) Hedges of a net investment

Hedges of net investments in a foreign operation, including a hedge of a monetary item that is accounted for as part of the net investment, are accounted for in a way similar to cash flow hedges. Gains or losses on the hedging instrument relating to the effective portion of the hedge are recognised in OCI while any gains or losses relating to the ineffective portion are recognised in profit or loss. On disposal of the foreign operation, the cumulative value of any such gains or losses recorded in equity is transferred to profit or loss.

A1. BASIS OF PREPARATION (CONT'D.)

A1.2 Summary of Significant Accounting Policies Applied from 1 April 2018 (Cont'd.)

(i) Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

(j) Financial guarantee contracts and loan commitments

Financial guarantee contracts issued by the Group and the Bank are those contracts that require a payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance (calculated as described in Note A1.2(g)) and the premium received on initial recognition less income recognised in accordance with the principles of MFRS 15.

Loan commitments provided by the Group and the Bank are measured at the amount of the loss allowance (calculated as described in Note A1.2(g)).

(k) Investment in associates and joint ventures

An associate is an entity over which the Group and the Bank have significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

A joint arrangement is an arrangement of which there is contractually agreed sharing of control by the Group and the Bank with one or more parties, i.e. joint control, where decisions about the relevant activities relating to the joint arrangement require unanimous consent of the parties sharing control. A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture.

The considerations made in determining significant influence or joint control are similar to those necessary to determine control over subsidiaries.

The Group's investment in associate is accounted for using the equity method.

Under the equity method, the investment in an associate is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the associate since the acquisition date. Dividends received or receivable from an associate are recognised as a reduction in the carrying amount of the investment. Goodwill relating to the associate is included in the carrying amount of the investment and is neither amortised nor individually tested for impairment.

The statement of profit or loss reflects the Group's share of the results of operations of the associate. The Bank's associate is classified as investment in subsidiary at Group level through additional equity interest held by two of its wholly-owned subsidiaries.

In the Bank's separate financial statements, investment in an associate is stated at cost less accumulated impairment losses. On disposal of such investment, the difference between net disposal proceeds and its carrying amount is recognised in profit or loss.

A1. BASIS OF PREPARATION (CONT'D.)

A1.2 Summary of Significant Accounting Policies Applied from 1 April 2018 (Cont'd.)

(I) Recognition of income and expenses relating to financial instruments

(i) Interest/financing income and similar income and expense

For all interest-bearing financial assets and financial liabilities measured at amortised cost, interest bearing financial investments at FVOCI and financial assets and financial liabilities at fair value through profit or loss, interest/financing income or expense is calculated using the effective interest method. EIR is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or financial liability. The calculation takes into account all contractual terms of the financial instrument and includes any fees or incremental costs that are directly attributable to the instrument and are an integral part of the EIR, but not future credit losses.

The carrying amount of the financial asset or financial liability is adjusted if the Group and the Bank revise the estimates of payments or receipts. The adjusted carrying amount is calculated based on the original EIR and the change in carrying amount is recorded in profit or loss. However, for a reclassified financial asset for which the Group and the Bank subsequently increase the estimates of future cash receipts as a result of increased recoverability of those cash receipts, the effect of that increase is recognised as an adjustment to the EIR from the date of the change in estimate.

Once the recorded value of a financial asset or a group of similar financial assets has been reduced due to an impairment loss, interest income continues to be recognised using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

Loan commitment fees for loans that are likely to be drawn down and other credit related fees are deferred (together with any incremental costs) and recognised as an adjustment to the EIR on the loan.

(ii) Dividend income

Revenue is recognised when the Group's and the Bank's right to receive the payment is established, it is probable that the economic benefits will flow to the Group and the amount of payment can be reliably measured. The conditions are generally met when shareholders approve the dividend.

(iii) Investment and trading income

Results arising from trading activities include all gains and losses from changes in fair value and dividends for financial assets held-for-trading classified as financial assets at FVTPL. This includes any ineffectiveness recorded in hedging transactions.

A1. BASIS OF PREPARATION (CONT'D.)

A1.2 Summary of Significant Accounting Policies Applied from 1 April 2018 (Cont'd.)

(m) Recognition of revenue from contracts with customers

Revenue is recognised by reference to each distinct performance obligation promised in the contract with customer when or as the Group and the Bank transfer the control of the goods or services promised in a contract and the customer obtains control of the goods or services. Depending on the substance of the respective contract with customer, the control of the promised goods or services may transfer over time or at a point in time.

A contract with customer exists when the contract has commercial substance, the Group and the Bank and customer have approved the contract and intend to perform their respective obligations, the Group's, the Bank's and the customer's rights regarding the goods or services to be transferred and the payment terms can be identified, and it is probable that the Group and the Bank will collect the consideration to which it will be entitled to in exchange of those goods or services.

At the inception of each contract with customer, the Group and the Bank assess the contract to identify distinct performance obligations, being the units of account that determine when and how revenue from the contract with customer is recognised.

Revenue is measured at the amount of consideration to which the Group and the Bank expect to be entitled in exchange for transferring the promised goods or services to the customers, excluding amounts collected on behalf of third parties. If the amount of consideration varies, the Group and the Bank estimate the amount of consideration that it expects to be entitled based on the expected value or the most likely outcome but the estimation is constrained up to the amount that is highly probable of no significant reversal in the future. If the contract with customer contains more than one distinct performance obligation, the amount of consideration is allocated to each distinct performance obligation based on the relative stand-alone selling prices of the goods or services promised in the contract.

The consideration allocated to each performance obligation is recognised as revenue when or as the customer obtains control of the goods or services. At the inception of each contract with customer, the Group and the Bank determine whether control of the goods or services for each performance obligation is transferred over time or at a point in time. Revenue is recognised over time if the control over the goods or services are transferred over time. Revenue for performance obligation that is not satisfied over time is recognised at the point in time at which the customer obtains control of the promised goods or services.

The following specific recognition criteria must be met before revenue is recognised:

(i) Fee and commission income

The Group and the Bank earn fee and commission income from a diverse range of services provided to their customers. Fee income can be divided into the following two categories:

Fee income earned from services that are provided over a period of time

Fees earned for the provision of services over a period of time are accrued over that period by reference to the stage of completion of the services. These fees include loan arrangement, commission income, asset management, custody and other management and advisory fees. Loan commitment fees for loans that are unlikely to be drawn down are recognised over the commitment period on a straight-line basis.

A1. BASIS OF PREPARATION (CONT'D.)

A1.2 Summary of Significant Accounting Policies Applied from 1 April 2018 (Cont'd.)

(m) Recognition of revenue from contracts with customers (Cont'd.)

(i) Fee and commission income (Cont'd.)

Fee income from providing transaction services

Fees arising from negotiating or participating in the negotiation of a transaction for a third party, such as the arrangement of the acquisition of shares or other securities or the purchase or sale of businesses, are recognised on completion of the underlying transaction. Fees or components of fees that are linked to a certain performance are recognised after fulfilling the corresponding criteria. Revenue from sale of unit trusts is recognised upon allotment of units, net of cost of units sold.

(ii) Customer loyalty programmes

Award credits under customer loyalty programmes are accounted for as a separate performance obligation of the transaction in which the award credits are granted (i.e. a material right). The fair value of the consideration received in respect of the transaction is allocated between the award credits and the other components of the transaction on a relative stand-alone selling price basis. Revenue from the award credits is recognised when the award credits are redeemed or expired. The amount of revenue recognised when the award credits are redeemed is based on the number of award credits redeemed relative to the total number expected to be redeemed.

A1.3 Significant changes in Regulatory Requirements

BNM policy documents on Financial Reporting

On 2 February 2018, BNM issued the revised policy documents for Financial Reporting which are effective for financial years beginning on or after 1 January 2018.

Certain requirements in the policy documents have been revised in response to the changes in the loan loss impairment methodology arising from the expected credit loss approach under MFRS 9. In addition, the credit-impaired classification requirements which was previously provided in BNM's policy document on Classification and Impairment Provisions for Loans/Financing have also been incorporated into the above revised policy documents.

Following the application of MFRS 9 impairment requirements, the revised policy documents require banking institutions and Islamic banking institutions to maintain, in aggregate, loss allowance for non-credit-impaired exposures (commonly referred to as Stage 1 and Stage 2 expected credit losses) and regulatory reserves of no less than 1% of total credit exposures, net of loss allowance for credit-impaired exposures. This revised requirement has been applied in the computation of regulatory reserve as presented in these condensed interim financial statements.

The revised policy documents also introduced the following new disclosure requirements in the annual financial statements. These information which are not disclosed in these condensed interim financial statements, will be presented in the Group's annual financial statements for the financial year ending 31 March 2019:

- (i) a movement schedule of financial instruments classified as credit-impaired with a breakdown by class of financial instrument;
- (ii) a movement schedule of loss allowance with a breakdown by class of financial instrument and showing separately the loss allowance measured by different stages of expected credit loss;
- (iii) intercompany charges with a breakdown by type of services received and geographical distribution; and
- (iv) nature of the underlying assets in connection with placement of funds in an investment account with an Islamic banking institution. (refer Note A10 Investment Account Placement)

A1. BASIS OF PREPARATION (CONT'D.)

A1.4 Significant Accounting Judgements, Estimates and Assumptions

The preparation of the condensed interim financial statements in accordance with MFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and reported amounts of revenue, expenses, assets and liabilities, the accompanying disclosures and the disclosure of contingent liabilities. Judgements, estimates and assumptions are continually evaluated and are based on past experience, reasonable expectations of future events and other factors. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In the process of applying the Group's and the Bank's accounting policies, the significant judgements, estimates and assumptions made by management were the same as those applied to the annual financial statements for the financial year ended 31 March 2018 except for the measurement of expected credit losses under MFRS 9 which involves increased complexity and judgements.

A2. AUDIT QUALIFICATION

The auditors' report on the audited annual financial statements for the financial year ended 31 March 2018 was not qualified.

A3. SEASONALITY OR CYCLICALITY OF OPERATIONS

The operations of the Group and the Bank are not subject to seasonal or cyclical fluctuation in the current financial quarter and period.

A4. UNUSUAL ITEMS DUE TO THEIR NATURE, SIZE OR INCIDENCE

There were no unusual items during the current financial quarter and period.

A5. CHANGES IN ESTIMATES

There was no material change in estimates of amounts reported in prior financial years that have a material effect on the financial quarter ended 30 September 2018 other than impact of adoption of MFRS9 as disclosed in Note A40.

A6. ISSUANCE, REPURCHASE AND REPAYMENT OF DEBT AND EQUITY SECURITIES

Issuance of equity securities

On 28 June 2018, the Bank increased its issued and paid-up ordinary share capital by RM177.3 million through the issuance of 16,489,024 new ordinary shares at an issue price of RM10.75 per ordinary share. The new ordinary shares issued during the current financial period rank pari passu in all respects with the existing ordinary shares of the Bank.

Issuance of debt securities

On 26 June 2018, the Bank issued Tranche 7 of Senior Notes with nominal amount of RM700.0 million under its Senior Notes programme of RM7.0 billion. This tranche bears interest at 4.5% payable half-yearly and is for a tenor of 2 years.

Repayment of debt securities

- a) On its first call date on 9 April 2018, the Bank fully redeemed Tranche 6 of Medium Term Notes with nominal amount of RM600.0 million issued under its Medium Term Notes Programme of up to RM2.0 billion.
- b) On 21 May 2018, the Bank fully redeemed Tranche 5 of Senior Notes with nominal amount of RM400.0 million issued under its Senior Notes programme of RM7.0 billion.

Other than disclosed above, there were no share buy-backs, share cancellations, shares held as treasury shares, resale of treasury shares and repayment of debt and equity securities by the Group and the Bank during the financial quarter and period.

A7. DIVIDENDS

During the financial period, the final single-tier cash dividend of 30.50 sen per ordinary share on 820,363,762 ordinary shares amounting to approximately RM250,210,947 in respect of the financial year ended 31 March 2018 was paid on 27 June 2018.

In respect of the current financial year, the Board of Directors declare an interim single-tier cash dividend of 37.00 sen per ordinary share on 836,852,786 ordinary shares amounting to approximately RM309,635,531.

A10. INVESTMENT ACCOUNT PLACEMENT

	Group and Bank	
	30 September 2018	31 March 2018 (Restated) (Note A17(i) and A40)
	RM'000	RM'000
Licensed Islamic bank	1,855,079	2,859,110
Less: Impairment allowance	(6,191)	(2,740)
	1,848,888	2,856,370

This represent investment placed under Restricted Investment Account ("RIA") arrangement with AmBank Islamic Berhad ("AmBank Islamic"). The contract is based on the Shariah concept of Mudarabah Muqayyadah between two parties, that is, the investor ("the Bank") and the entrepreneur ("AmBank Islamic") to finance a business venture where the investor provides capital and the business venture is managed solely by the entrepreneur. The profit of the business venture is shared between both parties based on pre-agreed ratio. Losses shall be borne solely by the investor. The investment assets financed under this arrangement are financing and advances extended by AmBank Islamic to external customers.

During the current financial period on 30 April 2018 and 14 May 2018, AmBank early redeemed placements which amounted to RM517.4 million and RM480.7 million respectively.

As losses are borne solely by the investor, the related impairment allowance for financing and advances is recorded by the Bank. Previously, the collective allowance for financing and advances for the investment assets was presented under collective allowance for loans and advances of the Bank. During the current financial period, the impairment allowance is presented as impairment allowance for the investment account placement to better reflect the nature of the impairment allowance. Accordingly, the comparatives have been restated to conform with the current period's presentation as disclosed in Note A40.

As at 30 September 2018, the gross exposure relating to the RIA financing for the Group and the Bank amounted to RM1,861.1 million (31 March 2018: RM2,869.6 million). No individual allowance is provided for the RIA financing as at 30 September 2018 and 31 March 2018.

Movements in allowances for impairment are as follows:

Group and Bank

	30 September 2018		
	12-Month ECL Stage 1 RM'000	12-Month ECL Stage 2 RM'000	Total RM'000

* In financial year ended 31 March 2015, the Inland Revenue Board ("IRB") had issued notice of income tax assessments for the years of assessment 2008 and 2009 to the Bank. The Bank had appealed against the said notices by filing an application to the High Court for judicial review of the notice of assessment for the year of assessment 2008 and to the Special Commissioners of Income Tax for the notice of assessment for the year of assessment 2009. Included in tax recoverable of the Bank was tax paid of approximately RM203,500,700 in financial year ended 31 March 2015 as the Bank was of the opinion that it had strong grounds to succeed in its appeals. The Bank was successful in its appeals for the majority of the tax matters under dispute. The Bank had since received Notice of Reduced Assessment for years of assessment 2008 and 2009 and progressive cash refund.

Basic/diluted earnings per share (sen)	29.81	33.31	56.52	62.61

A31. BUSINESS SEGMENT ANALYSIS

Segment information is presented in respect of the Group's business segments. The business segment information is prepared based on internal management reports, which are regularly reviewed by the chief operating decision-maker in order to allocate resources to a segment and to assess its performance.

The Group comprises the following main business segments:

(a) Retail Banking

Retail Banking continues to focus on building mass affluent, affluent and small business customers. Retail Banking offers products and financial solutions which includes auto finance, mortgages, personal loans, credit cards, small business loans, priority banking services, wealth management, remittance services and deposits.

A31. BUSINESS SEGMENT ANALYSIS (CONT'D.)

The Group comprises the following main business segments (Cont'd.):

(b) Business Banking

Business Banking ("BB") focuses on the small and medium sized enterprises segment, which comprises Enterprise Banking and Commercial Banking. Solutions offered to Enterprise Banking customers encompass Capital Expenditure ("CAPEX") financing, Working Capital financing and Cash Management, and while Commercial Banking offers the same suite of products, it also provides more sophisticated structures such as Contract Financing, Development Loans, and Project Financing.

(c) Wholesale Banking

Wholesale Banking comprises Corporate Banking and Group Treasury and Markets.

(i) Corporate Banking

Corporate Banking offers a full range of products and services of corporate lending, trade finance, offshore banking, and cash management solutions to wholesale banking clients.

(ii) Group Treasury and Markets

Group Treasury and Markets includes proprietary trading as well as providing full range of products and services relating to treasury activities, including foreign exchange, derivatives, fixed income and structured warrants. It also offers customised investment solutions for customers.

(d) Investment Banking

Under the Investment Banking division, the core products are capital markets group, private banking and equity markets.

Capital Markets focused on providing integrated financing solutions to our corporate and institutional clients. It offers a full suite of customised debt and capital financing solutions which include corporate bond issuances, loan syndication, structured finance, capital and project advisory services and primary syndication and underwriting services. Private Banking primarily services high net worth clients and offers financing and deposit products. Equity markets offers margin financing to retail and corporate clients.

(e) Group Funding and Others

Group Funding and Others comprise activities to maintain the liquidity of the Group as well as support operations of its main business units and non-core operations of the Group.

Note:

(i) The revenue generated by a majority of the operating segments substantially comprises of finance income. The Chief Operating Decision Maker relies primarily on the net finance income information to assess the performance of, and to make decisions about resources to be allocated to these operating segments.

(ii) The financial information by geographical segment is not presented as the Group's activities are principally conducted in Malaysia.

A32. PERFORMANCE REVIEW FOR THE PERIOD ENDED 30 SEPTEMBER 2018

The Group reported a profit before taxation of RM618.2 million for the financial quarter ended 30 September 2018 compared to RM580.5 million in the corresponding period in the previous financial year.

The increase in Group's profit before taxation for the period is mainly attributable to improvement in net interest income from assets growth despite higher interest expense from deposits placed from customers and lower other operating expenses. Impairment loss for financial investments and other financial assets decreased in the current financial period compared to previous corresponding financial period.

Lower writeback in loan loss allowances due to higher collective allowances made for customers.

The Group's ratio of impaired loans and advances increased to 1.60% from 1.55% as at 31 March 2018. Loan loss coverage remained consistently above 100.0%.

The Group and the Bank remained well capitalised with risk weighted capital adequacy ratios of 15.9% and 15.8% respectively.

In the opinion of the Directors, the results of operations of the Group and the Bank for the financial period have not been substantially affected by any items, transaction or event of a material and unusual nature.

A33. PROSPECTS FOR FINANCIAL YEAR ENDING 31 MARCH 2019

The economy slowed down to 4.4% y/y in 3Q2018 from 4.5% y/y in 2Q2018 with the continued drag from both mining and agriculture while services and manufacturing continued to support growth. Besides, private expenditure i.e. consumption and investment remained as key growth catalysts. Given the slower GDP print in the third quarter, we feel 2018 growth could fall around the government's 4.8% projection.

Inflation in three quarter averaged at 1.2%. We envisage 2018 inflation to average around 1.1% on the back of blanket fuel subsidy for Ron95 and limited impact from the reintroduction of sales and services tax (SST) in September which accounts for about 36% of CPI basket of goods and services.

The banking system's loans expanded by 4.1% in 2017 following a stable growth in retail loans while business loans were impacted by repayments. For 2018, loans is projected to grow circa 5.5% based on our view that GDP will expand by 4.6% in 2018.

Banks have sufficient liquid assets with an industry liquidity coverage ratio of 139.5% as at end of September 2018, well above the regulatory requirement of 100.0%. Funding profiles of banks have been well diversified with the industry's loan-to-fund ratio and loan-to-fund and equity ratio standing at 84.1% and 73.4% respectively as at September 2018.

We anticipate NIM of banks to taper from 1Q18 that was boosted by an OPR hike of 25bps on January 2018. The lagged repricing of banks' deposit rates adjusting to the increase in OPR coupled with keener competition for deposits compared to 1H18 as the sector moves closer towards the implementation of net stable funding ratio (NSFR) will be the contributing factors.

On the monetary policy, we reiterate our view that the OPR will remain at 3.25% until 1H2019, with the aim to support the economic growth while maintaining inflationary pressure. Yet, a potential 25bps hike in 2H2019 is possible if the inflationary pressure trends upwards rapidly. Otherwise, the movement of the OPR will be more data driven and we have played down the possibility of a rate cut in 2019.

A33. PROSPECTS FOR FINANCIAL YEAR ENDING 31 MARCH 2019

For FY2019, our financial priorities will be centred on the following:

1. Revenue growth: We will continue to focus on driving our income growth momentum, in line with our key segments and products strategies. CASA (current and savings accounts) growth is one of our key priorities this year.
2. Business efficiency transformation (BET 300): This is a 3-year business efficiency programme, which aims to achieve RM300 million gross cost efficiencies across the Group and help us achieve our cost-to-income ratio target of 55% in FY2019. We will continue to keep a tight rein on cost, pacing our investments while continuing to look for operational efficiencies.
3. Capital accretive growth: We aim to strengthen our capital position further and deliver sustainable dividend payout to our shareholders. To achieve this, we are driving initiatives to improve our capital efficiency and return on risk-weighted assets.

A34. VALUATION OF PROPERTY AND EQUIPMENT

The Group's and the Bank's property and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.

A35. CHANGES IN THE COMPOSITION OF THE GROUP

There has been no other significant changes in the composition of the Group for the financial quarter and period ended 30 September 2018.

A36. COMMITMENTS AND CONTINGENCIES

In the normal course of business, the Group and the Bank make various commitments and incur certain contingent liabilities with legal recourse to its customers. No material losses are anticipated as a result of these transactions. The commitments and contingencies are not secured against the Group's and the Bank's assets.

The principal/notional amounts of the commitments and contingencies of the Group and the Bank are as follows:

	Group		Bank	
	30 September 2018 RM'000	31 March 2018 RM'000	30 September 2018 RM'000	31 March 2018 RM'000

A37. FAIR VALUE MEASUREMENTS OF FINANCIAL INSTRUMENTS

Determination of fair value and fair value hierarchy

The Group and the Bank use the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly;
- Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

Financial assets and liabilities measured using valuation techniques based on assumptions that are supported by prices from observable current market transactions are assets and liabilities for which pricing is obtained via pricing services, but where prices have not been determined in an active market, financial assets with fair values based on broker quotes, investments in private equity funds with fair values obtained via fund managers and assets that are valued using the Group's own models whereby the majority of assumptions are market observable.

Non market observable inputs means that fair values are determined, in whole or in part, using a valuation technique (model) based on assumptions that are neither supported by prices from observable current market transactions in the same instrument, nor are they based on available market data. The main asset classes in this category are unlisted equity investments and debt instruments. Valuation techniques are used to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. However, the fair value measurement objective remains the same, that is, an exit price from the perspective of the Group and the Bank. Therefore, unobservable inputs reflect the Group's and the Bank's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). These inputs are developed based on the best information available, which might include the Group's and the Bank's own data.

About 3.1% and 3.3% of the Group's and the Bank's (31 March 2018: 0.3% and 0.6% of the Group's and the Bank's) total financial assets recorded at fair value, are based on estimates and recorded as Level 3 investments. Where estimates are used, these are based on a combination of independent third-party evidence and internally developed models, calibrated to market observable data where possible. While such valuations are sensitive to estimates, it is believed that changing one or more of the assumptions to reasonably possible alternative assumptions would not change the fair value significantly.

A37. FAIR VALUE MEASUREMENTS OF FINANCIAL INSTRUMENTS (CONT'D.)**Movements In Level 3 financial instruments measured at fair value**

The level of the fair value hierarchy of financial instruments is determined at the beginning of each reporting period. The following tables show the reconciliation of the opening and closing amounts of Level 3 financial assets which are recorded at fair value:

Group	Equity instruments at fair value through other comprehensive income	Financial investments available-for-sale	Total
	RM'000	RM'000	RM'000
At 31 March 2018	-	46,677	46,677
Effect of adopting MFRS 9	518,798	(46,677)	472,121
Adjusted 1 April 2018	518,798	-	518,798
Addition	288	-	288
Exchange fluctuation taken up in statement of comprehensive income	3	-	3
At 30 September 2018	519,089	-	519,089

Bank	Debt instruments at fair value through other comprehensive income	Equity instruments at fair value through other comprehensive income	Financial investments available-for-sale	Total
	RM'000	RM'000	RM'000	RM'000
At 31 March 2018	-	-	81,176	81,176
Effect of adopting MFRS 9	34,499	518,798	(81,176)	472,121
Adjusted 1 April 2018	34,499	518,798	-	553,297
Addition	-	288	-	288
Settlement	(6,750)	-	-	(6,750)
Total losses recognised in other comprehensive income	201	-	-	201
Exchange fluctuation taken up in statement of comprehensive income	-	3	-	3
At 30 September 2018	27,950	519,089	-	547,039

Total gains or losses included in the statements of profit or loss and statements of comprehensive income for financial instruments held at the end of reporting period:

Group	30 September 2018 RM'000	31 March 2018 RM'000	Bank	
			30 September 2018 RM'000	31 March 2018 RM'000

**Financial investments fair value through
other comprehensive income/
available-for-sale:**

Total losses included in other comprehensive income	3	-	204	(177)
--	---	---	-----	-------

There were no transfers between Level 2 and Level 3 during the current financial period and previous financial year for the Group and the Bank.

Impact on fair value of Level 3 financial instruments measured at fair value arising from changes to key assumptions.

Changing one or more of the inputs to reasonable alternative assumptions would not change the value significantly for the financial assets in Level 3 of the fair value hierarchy.

A38. CAPITAL ADEQUACY

(a) The capital adequacy ratios of the Group and the Bank are as follows:

	Group	Bank
30 September 2018		
Before deducting proposed dividends		
Common Equity Tier 1 ("CET 1") Capital Ratio	11.485%	11.384%
Tier 1 Capital Ratio	12.433%	12.329%
Total Capital Ratio	16.288%	16.175%
After deducting proposed dividends		
Common Equity Tier 1 ("CET 1") Capital Ratio	11.063%	10.963%
Tier 1 Capital Ratio	12.010%	11.907%
Total Capital Ratio	15.865%	15.754%
31 March 2018		
Before deducting proposed dividends		
CET 1 Capital Ratio	11.057%	10.955%
Tier 1 Capital Ratio	12.009%	11.903%
Total Capital Ratio	16.571%	16.451%
After deducting proposed dividends		
Common Equity Tier 1 ("CET 1") Capital Ratio	10.714%	10.613%
Tier 1 Capital Ratio	11.666%	11.561%
Total Capital Ratio	16.228%	16.109%

Notes:

- (i) The capital adequacy ratios are computed in accordance to BNM's guidelines on Capital Adequacy Framework (Capital Components) issued by Bank negara Malaysia on 2 February 2018, which is based on the Basel III capital accord. The Group and the Bank have adopted the Standardised Approach for Credit and Market Risks and the Basic Indicator Approach for Operational Risk, based on BNM's Guidelines on Capital Adequacy Framework (Basel II - Risk Weighted Assets).
- (ii) Pursuant to the above BNM's guideline on Capital Adequacy Framework (Capital Components), the minimum capital adequacy ratios to be maintained under the guideline are at 4.5% for CET 1 capital, 6% for Tier 1 capital and 8% for total capital ratio. Banking Institutions are also required to maintain capital buffers. The capital buffers shall comprise the sum of the following:
- (a) a Capital Conservation Buffer ("CCB") of 2.5%; and
- (b) a Countercyclical Capital Buffer ("CCyB") determined as the weighted-average of the prevailing CCyB rates applied in the jurisdictions in which the Bank has credit exposures.

The CCB requirements shall be phased-in under transitional arrangements starting from 1 January 2016 as follows:

	CCB
Calendar year 2016	0.625%
Calendar year 2017	1.25%
Calendar year 2018	1.875%
Calendar year 2019 onwards	2.5%

Tier 2 Capital instruments (subject to gradual phase-out treatment)	-	600,000	-	600,000
Qualifying CET 1, Additional Tier 1 and Tier 2 capital instruments held by third parties	1	1	-	-
Collective allowance and regulatory reserve	828,263	733,999	831,492	734,013
Total Tier 2 capital	2,823,264	3,329,000	2,826,492	3,329,013
Total Capital	11,929,440	12,090,583	11,885,026	12,040,799

The breakdown of the risk-weighted assets ("RWA") in various categories of risk is as follows:

	Group		Bank	
	30 September 2018 RM'000	31 March 2018 RM'000	30 September 2018 RM'000	31 March 2018 RM'000
Credit RWA	66,261,061	65,724,455	66,519,340	65,981,322
Market RWA	2,425,006	2,861,357	2,424,446	2,861,798
Operational RWA	4,015,390	4,001,549	3,990,696	3,973,753
Large exposure risk RWA for equity holdings	541,042	373,899	541,042	373,899
Total RWA	73,242,499	72,961,260	73,475,524	73,190,772

A39. CREDIT EXPOSURE ARISING FROM CREDIT TRANSACTIONS WITH CONNECTED PARTIES

	Group		Bank	
	30 September 2018 RM'000	31 March 2018 RM'000	30 September 2018 RM'000	31 March 2018 RM'000
Outstanding credit exposures with connected parties (RM'000)	2,174,583	2,168,123	2,302,268	2,303,602
Percentage of outstanding credit exposures to connected parties as proportion of total credit exposures (%)	2.72	2.71	2.79	2.89
Percentage of outstanding credit exposures with connected parties which is non-performing or in default (%)	0.27	0.42	0.26	0.40

The credit exposures above are based on Bank Negara Malaysia's revised Guidelines on Credit Transactions and Exposures with Connected Parties.

A40. FINANCIAL IMPACT ARISING FROM ADOPTION OF MFRS 9 FINANCIAL INSTRUMENTS AND RESTATEMENT OF COMPARATIVE INFORMATION

Adoption of MFRS 9 Financial Instruments

i. Classification and measurement of financial instruments

On 1 April 2018, Group management has assessed which business models apply to the financial assets held by the Group and the Bank at the date of initial application of MFRS 9 (1 April 2018) and has classified its financial instruments into the appropriate MFRS 9 categories. The main effects resulting from this reclassification are as follows:

Group	Measurement category		Carrying amount		
	Under MFRS 139	Under MFRS 9	Under MFRS 139	Remeasurement, Reclassification and Impairment	Under MFRS 9
			RM'000	RM'000	RM'000
Financial assets					
Cash and short-term funds	Amortised cost (Loans and receivables)	Amortised cost	3,716,029	(973)	3,715,056
Investment account placement	Amortised cost	Amortised cost	2,859,110	-	2,859,110
Financial assets held-for-trading	FVTPL (HFT)	FVTPL	8,041,941	-	8,041,941
Financial investments available-for-sale	FVOCI (AFS)	FVOCI (Debt)	3,049,673	-	3,049,673
Financial investments available-for-sale	FVOCI (AFS)	FVOCI (Equity)	427,525	201,366	628,891
Financial investments available-for-sale	FVOCI (AFS)	FVTPL	402	(218)	184
Financial investments available-for-sale	FVOCI (AFS)	Amortised Cost	1,317,391	21,855	1,339,246
Financial investments held-to-maturity	Amortised Cost (HTM)	Amortised Cost	1,802,605	-	1,802,605
Loans and advances	Amortised cost (Loans and receivables)	Amortised cost	67,321,750	(308,618)	67,013,132
Receivables: Investments not quoted in active markets	Amortised cost (Loans and receivables)	FVTPL	87,181	(9,216)	77,965
Receivables: Investments not quoted in active markets	Amortised cost (Loans and receivables)	FVOCI (Debt)	1,062,419	7,189	1,069,608

A40. FINANCIAL IMPACT ARISING FROM ADOPTION OF MFRS 9 FINANCIAL INSTRUMENTS AND RESTATEMENT OF COMPARATIVE INFORMATION (CONT'D.)

Adoption of MFRS 9 Financial Instruments (Cont'd.)

- iii. The following is the reconciliation of prior year's closing equity balances which have been impacted from the adoption of MFRS 9 arising from the reclassifications and remeasurements highlighted in Note A.1.1 to the restated opening balance as at 1 April 2018:

	Group RM'000	Bank RM'000
Retained earnings		
Closing balance under MFRS 139 as at 31 March 2018	6,641,531	6,700,583
Recognition of allowance for ECL	(356,958)	(356,941)
Tax impact on allowance for ECL	85,250	85,250
Transfer to regulatory reserve	245,968	245,968
Fair value changes on financial assets at FVTPL	(9,453)	(9,453)
Tax impact on remeasurement of assets to FVTPL	2,269	2,269
Opening balance under MFRS 9 as at 1 April 2018	<u>6,608,607</u>	<u>6,667,676</u>
Regulatory reserve		
Closing balance under MFRS 139 as at 31 March 2018	372,133	372,133
Transfer from retained earnings	(245,968)	(245,968)
Opening balance under MFRS 9 as at 1 April 2018	<u>126,165</u>	<u>126,165</u>
Available-for-sale deficit		
Closing balance under MFRS 139 as at 31 March 2018	(23,387)	(23,518)
Transfer to fair value reserve	23,387	23,518
Opening balance under MFRS 9 as at 1 April 2018	<u>-</u>	<u>-</u>
Fair value reserve		
Closing balance under MFRS 139 as at 31 March 2018	-	-
Transfer from available-for-sale deficit	(23,387)	(23,518)
Fair value changes for financial investments available-for-sale reclassified to financial investments at amortised cost	25,057	25,057
Fair value changes for financial investments available-for-sale reclassified to financial assets at FVTPL	19	19
Fair value changes on financial investments at FVOCI	208,555	208,555
Recognition of allowance for ECL	11,840	11,872
Tax impact on unrealised fair value changes	(7,751)	(7,751)
Opening balance under MFRS 9 as at 1 April 2018	<u>214,333</u>	<u>214,234</u>

- iv. Reconciliation of impairment allowances balance

The following table reconciles the prior period's closing impairment allowance measured in accordance with the MFRS 139 incurred loss model or provision under MFRS 137 to the new impairment allowance measured in accordance with the MFRS 9 expected loss model at 1 April 2018:

Group	Loss allowance under MFRS 139/ Provision under MFRS 137 RM'000	Reclassification and Remeasure- ments RM'000	Loss allowance under MFRS 9 RM'000
Loans and receivables and held-to-maturity under MFRS 139/Financial assets at amortised cost under MFRS 9			
Cash and short-term funds	-	973	973
Investment account placement	-	4,259	4,259
Financial investments at amortised cost	2,550	3,202	5,752
Loans and advances	681,652	308,618	990,270
Total	<u>684,202</u>	<u>317,052</u>	<u>1,001,254</u>

A40. FINANCIAL IMPACT ARISING FROM ADOPTION OF MFRS 9 FINANCIAL INSTRUMENTS AND RESTATEMENT OF COMPARATIVE INFORMATION (CONT'D.)

Adoption of MFRS 9 Financial Instruments (Cont'd.)

iv. Reconciliation of impairment allowances balance (Cont'd.)

	Loss allowance under MFRS 139/ Provision under MFRS 137 RM'000	Reclassification and Remeasure- ments RM'000	Loss allowance under MFRS 9 RM'000
Group			
Available-for-sale under MFRS 9/Financial assets at FVOCI under MFRS 9
